GPRS Phone

USER'S MANUAL

MODEL : G7020

Please read this manual carefully
before operating your set.
Retain it for future reference.

G7020 has a polished style which provides users' a better feel and convenience.

For Your Safety

All radio transmitters carry risks of interference with electronics in close proximity.

GSM Phones must be switched off at all times in an aircraft.

Avoid pointing active infrared port at eyes.

Do not activate near petrol stations, fuel depots, chemical plants or blasting operations.

Switch off the phone in any area where are forced by special regulations. For example, the phone does not allow to be used in hospital because pacemakers and hearing aids can be affected.

Minor interference may affect TVs, radios, PCs, etc.

Do not hold the phone in your hand while driving.

Do not dismantle phone or battery.

Keep the phone in a safe place out of children's reach since it contains the detachable small parts and create a choking hazard.

Do not touch the charger with wet hands.

For your safety, use ONLY specified ORIGINAL batteries and chargers.

Please note:

Unusable batteries should be disposed of in accordance with relevant legislation.

Only use ORIGINAL accessories to avoid damage to your phone.

Emergency call may not be available under all cellular networks. Therefore, you should never depend solely on the phone for essential communications such as medical emergencies.

Important Information

This user's guide contains important information on the use and operation of this phone. Please read all the information carefully for optimal performance and to prevent any damage to or misuse of the phone. Any changes or modifications not expressly approved in this user's guide could void your warranty for this equipment.

Driver Safety Tips

Your wireless telephone gives you the powerful ability to communicate by voice – almost anywhere, anytime. But an important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When driving a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features such as speed dial and redial. If available, these features help you to place your call without taking attention off the road.
2. When available, use a hands free device. If possible, add an additional layer of convenience and safety to your wireless phone with one of the many hands free accessories available today.
3. Position your wireless phone within easy reach. Be able to access your wireless phone without removing your eyes from the road. If you get the incoming call at an inconvenient time, if possible, let your voice mail answer it for you.
4. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice and even heavy traffic can be hazardous.
5. Do not take notes or look up phone numbers while driving. Jotting down a “to do” list or flipping through your address book takes attention away from your primary responsibility, driving safety.
6. Dial sensibly and access the traffic; If possible, place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call while moving, dial only a few numbers, check the road and your mirrors, they continue.

-
7. Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.
 8. Use your wireless phone to call for you. Dial 9-1-1 or other (1-1-2 or 0-0-0) local emergency number in the case of fire, traffic accident or medical emergencies. Remember, it is a free call on your wireless phone!
 9. Use your wireless phone to help others in emergencies, if you see an auto accident crime in progress or other serious emergency where lives are in danger, call 9-1-1 or other (1-1-2 or 0-0-0) to call emergency number, as you would want others to do for you.
 10. Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

“The wireless industry reminds you to use your phone safely when driving.”

For more information, please call to 888-901-SAFE, or visit our website www.wow-com.com

Industry Association

CARING FOR BATTERY USE

- Must be recycled or disposed of properly

CAUTION FOR ADAPTER (CHARGER) USE

- Charge only Lithium rechargeable battery.
Other types of batteries may burst causing injury to person and damage.
- Charge the battery pack equipped with this charger at room temperature condition.
The charger or adapter is intended for indoor use only.

Do not expose the battery charger or adapter to direct sunlight nor use it in any place of high humidity, such as the bathroom.

Blasting Areas

To avoid interfering with blasting operations, **TURN OFF** your phone when you are in a blasting area or in areas posted “Turn off two-way radio”, Obey all signs and instructions.

Potentially explosive atmospheres

TURN OFF your phone and when you are in any area that has a potentially explosive atmosphere, and obey all signs and instructions. Sparks in such areas could cause an explosion or fire, resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked.

They include fuelling area such as gasoline stations, below deck on boats, fuel or chemical transfer or storage facilities, where fuel odors are present (for example, if a gas/propane leak occurs in a car or home), areas where the air contains chemicals or particles (such as grain, dust, or metal powders), and any other where you would normally be advised to turn off your vehicle engine.

Do not transport or store flammable gas, liquid, or explosives in the compartment of your vehicle containing your mobile phone and accessories.

	SIM Service (Dependent on SIM card)

① Inserting the SIM Card

Locate the SIM card socket in the back of the phone.

Follow the steps below to install the SIM card.

1. Remove the battery if attached.
2. Slide the SIM card into the slot, under the silvery holders, with the golden connectors facing down and the cut corner to the right.

● **Notice**

- Before installing always make sure that the phone is switched off and remove the battery.
- The metal contact of the SIM card can be easily damaged by scratches. Pay special attention to the SIM card when you handle and install. Follow the instructions supplied with the SIM card.

② Installing the Battery

1. Place the battery on the back of the phone.

2. Push it until you hear a click.

③ Charging the Battery

To connect the travel adapter to the phone, you must have installed the battery.

1. Insert one end of the travel adapter into the bottom of the phone.

2. Connect the other end of the travel adapter to an AC wall outlet.
Use only the included packing charger.

● Warning

- Do not force the connector as this may damage the phone and/or the travel adapter.

4 **Disconnecting the charger**

Disconnect the travel adapter from the phone by pressing its side buttons.

● **Notice**

- The battery delivered with your phone has to be fully charged before using it.
- Do not remove your battery or the SIM card while charging.
- The moving bars of battery icon will stop after charging completely.
- On charging the phone, you can check the status of battery by the color of the indicator LED. [Full charge: Blue, In progress of charging: Red]

● **Note**

- In case of not charging the battery properly...
 1. After switching On/Off Power key, please try to recharge it.
 2. In case of the battery is attached, please detach it from the phone. And then place it back, please try to recharge it.

① To get started with the phone

1. Press and hold  [Power/End Key] until you hear a tone.
2. Depending on setting **PIN code request** [Menu 4-5-1], you can enter it or not.
3. If your phone connects to a network, the network name will be displayed shortly.

② To turn off the phone

In a standby mode, press and hold  key until you hear a tone.

You can use the access codes described in this section to avoid unauthorized use of your phone. The access codes (except PUK and PUK2 codes) can be changed by using **Change codes** [Menu 4-5-4].

PIN code (4 to 8 digits)

The PIN (Personal Identification Number) code protects your SIM card against unauthorized use. The PIN code is usually supplied with the SIM card. When **PIN code request** is set **Enable**, your phone will request the PIN code every time it is switched on. On the contrary, when **PIN code request** is set **Disable**, your phone connects to the network directly without PIN code.

PIN2 code (4 to 8 digits)

The PIN2 code, supplied with some SIM cards, is required to access some functions such as Advice of call charge, Fixed Dial number. These functions are only available if supported by your SIM card.

PUK code (4 to 8 digits)

The PUK (PIN Unblocking Key) code is required to change a blocked PIN code. The PUK code may be supplied with the SIM card. If not, contact your local service provider for the code. If you lose the code, also contact your service provider.

PUK2 code (4 to 8 digits)

The PUK2 code, supplied with some SIM cards, is required to change a blocked PIN2 code. If you lose the code, also contact your service provider.

Security code (4 to 8 digits)

The security code protects the unauthorized use of your phone. It is usually supplied with the phone. This code is required to delete all phone entries and to activate “Restore factory settings” menu. The default number is “0000”. You also can change it in Security settings menu.

Making a call

1. Key in phone number including the area code, To edit a number on the display, press  to move cursor to the left and press  to move cursor to the right. Press  to call the number.
2. Press  to end the call.

Making a call by [Send key]

1. Press  [Send key], and then you can check the latest missed, received, and dialled phone numbers.
2. Select the number you want on the list.
3. Press  [Send key].

International Calls

1. Press and hold the  key for the international prefix.
“+” character may replace with the international access code.
2. Enter the country code, area code, and the phone number.
3. Press .

Making a call using the Phonebook

1. In a standby mode, press  [Names].
2. When the menu is displayed, you select **Search** by pressing  [OK].
3. If you find out the desired item through searching by a name or a number, press  to call.

Making call by Speed dials.

See the menu **Phonebook – Speed dials** [Menu 6-3-4] in detail.

Phonebook

Menu Description

To select a menu in phonebook, press  [Names] in standby mode and then scroll to a desired item. You can also access this menu through **Organizer**.

If the message has the phone number, you can not only extract it also save it in a phonebook. You can call by this number.

Messages [Menu 1]

Menu Description

● Notice

If you space out as inputting numbers, the receiver can check them respectively.

Info service [Menu 1-4]

Cell Broadcast messages (CB message) are text ones that are sent by the network to GSM phone users. The network provides general information such as weather reports, traffic news, tax, pharmacies, and stock prices. Each type of information has the number; therefore, you can contact service provider. When you receive CB message, you can view the submenus below:

Receive [Menu 1-4-1]

- **Yes** : If you select this menu, your phone will receive the Cell Broadcast message.
- **No** : If you select this menu, your phone will not receive the Cell Broadcast message.

Inbox [Menu 1-4-2]

You can read and delete received CB messages.

Topics [Menu 1-4-3]

If you want to create new topics, press  [OK]. Then, you select New topics menu by  [Select]. If you have already topics, you can delete, edit, and activate by pressing  [Option].

Alert [Menu 1-4-4]

- **On**

When Cell broadcast message is arrived, your phone will inform you by beep.

- **Off**

When Cell broadcast message is arrived, your phone will not beep.

Auto display [Menu 1-4-5]

When you receive CB message, it is automatically displayed on the window. You can read it by scrolling  ,  .

- **On**

The message will be displayed on the screen automatically.

- **Off**

The message will not be displayed on the screen automatically.

Language [Menu 1-4-6] (Dependent upon the Network)

You can select the language pressing  [OK]. Then, the cell broadcast message will be displayed in the language that you selected. If you use all languages supported by phone, select **Automatic** at the bottom of the list.

Voice messages [Menu 1-5]

Listen to voice messages [Menu 1-5-1]

In this menu, you can listen to your voice messages. If the address of voicemail centre is already saved in phone, your phone connects it automatically. Otherwise, the phone requires entering the address.

Care and Maintenance

When using this unit, basic safety precautions as below should be always followed.

- Do not touch the adapter with wet hands.
- Do not disassemble this unit. (Take it to a qualified service technician when repair work is required.)
- Away from electrical appliance such as a TV, radio or personal computer.
- The unit should be situated from heat sources such as radiators or cookers.
- Do not drop.
- Do not subject this unit to mechanical vibration or shock.
- The coating of the phone may be damaged if covered with wrap or vinyl wrapper.
- Use dry cloth to clean the exterior of the unit. (Do not use solvent such as benzene, thinner or alcohol.)
- Do not subject this unit to excessive smoke or dust.
- Do not keep the phone next to credit cards or transport tickets; it can be affect the information on the magnetic strips.
- Do not tap the screen with a sharp object; otherwise, it may damage the phone.
- Do not expose the phone to liquid or moisture.
- Use the accessories like an earphone cautiously. Do not touch the antenna unnecessarily.

■ Caring for the Battery

- You do not need to completely discharge the battery before recharging. Unlike other battery systems, there is no memory effect that could compromise the battery's performance.
- Use only LG batteries and chargers. LG chargers are designed to maximize the battery life.
- Do not disassemble or short-circuit the battery pack.
- Keep the metal contacts of the battery pack clean.
- Replace the battery when it no longer provides acceptable performance. The battery pack may be recharged hundreds of times until it needs replacing.
- Recharge the battery if it has not been used for a long time to maximize usability.
- Do not expose the battery charger to direct sunlight or use it in high humidity, such as the bathroom.
- Do not leave the battery in hot or cold places, this may deteriorate the battery performance.
