

# Software Upgrade Instruction

- **Download firmware file from Web (www.lge.com)**

Please download LG\_BD\_350.zip file from www.lge.com and extract to temporary folder  
Then you can find LG\_BD\_350BA.ROM and LG\_BD\_350BB.ROM files  
If you create Firmware update Disc or USB, you should saving two files to your USB memory device or in CD/DVD

- **USB/DISC Update**

### **Step 1: Creating Separate Firmware Update Device**

You can create a firmware update files on your own media by saving them in the USB memory device or in CD/DVD.

#### **[Option A] Creating a Firmware Update USB Device**

To create a firmware update in a USB memory device, copy the update file(s) to the USB device.

#### **Preparation:**

The USB memory device should have at least 50MB of free space to save the firmware update files.

1. Insert a USB memory device into the PC.
2. Copy the latest version of firmware update files to the USB drive.

(You do not need to create directory, the files will be saved in the root directory.)

#### **[Option B] Creating a Firmware Update CD/DVD**

To create a firmware update in a CD/DVD, write the update file(s) to the CD+R/RW or DVD±R/RW disc using CD burning software.

#### **Preparation:**

To create a firmware update CD/DVD, prepare the following items according to your storage media:

<b>CD</b>	- CD-RW drive and CD burning software. (Both must be installed in your PC to create a firmware update CD.) - Blank recordable CD-R or CD-RW disc.
<b>DVD</b>	- DVD-RW drive and DVD burning software. (Both must be installed in your PC to create a firmware update DVD.) - Blank recordable DVD-R, DVD-RW, DVD+R, or DVD+RW disc.

1. Insert a blank recordable CD/DVD-R, CD/DVD-RW, DVD+R, or DVD+RW disc into the CD/DVD-RW drive.
2. Run the CD/DVD burning software, and select the [CD Data] or the [Burn DVD Data] option on the program.
3. Write the firmware update file(s) in the root directly of CD/DVD. For details, follow the operating instructions provided by the CD/DVD burning software provider.

## Step 2: Updating Firmware

- 1) Turn on the player and wait until the Home Menu appears.
- 2) Insert USB memory or CD/DVD disc that contains the update file(s) of the latest firmware version into the player.

- USB memory device: Insert the USB memory device to a USB port on the front panel of the player.
- CD/DVD: Press OPEN/CLOSE button to open the disc tray. Load the disc and press OPEN/CLOSE button to close the disc tray.

- 3) The UPDATE window appears displaying the versions of current firmware in white, and the versions saved in the USB memory device or CD/DVD in blue.

- 4) Press ENTER on the remote control or press Play on the player to start the update. A status bar shows the progress of the firmware update.

- Updating Main Software will take about 3 minutes.
- Updating Driver will take about 1 minute.
- Updating both Main Software and Driver will take about 4 minutes

Please be patient during the software update!

- 5) When the update is completed, the message, "Update is complete." will appear, and the power will turn off automatically after 5 seconds. h Main Software and Driver will take about 4 minutes.

- 6) Eject the firmware update device and turn the player back on.
