

Room Air Conditioner

- Please read carefully and thoroughly this manual before operating this unit.
- Contact the authorized SVC man for repair or maintenance of this unit.
- Contact the installer for installation of this unit.
- The appliance is not intended for use by young children or infirm persons without supervision.
- Young children should be supervised to ensure that they do not play with the appliance.

LS-126_Series LS-096_Series

Prior to installation, th unit must be submit service which prov conditioning approval by the utility electricity (EN 61000-3 Norm).

Troubleshooting Tips

٠.

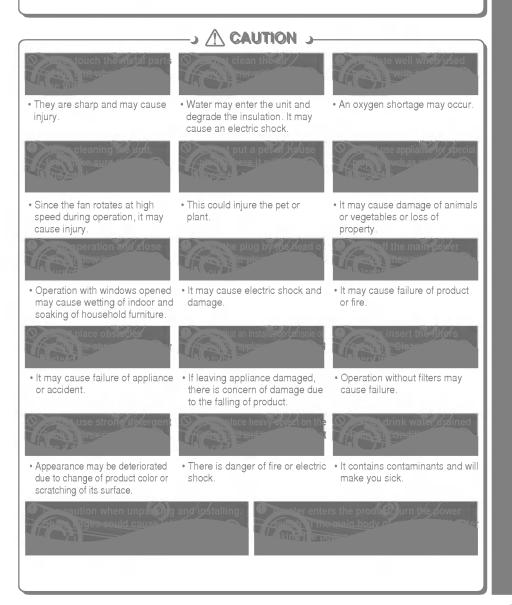

ر WARNING ک

Destilate before operation ir conditioner

pot disassemble of the products

• It may cause explosion, fire and, burn.

• It may cause failure and electric shock.

Preparation before operation

How to Insert the Batteries

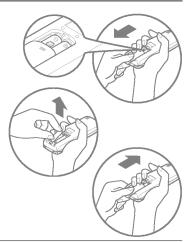

Insert new batteries making sure that the (+) and (-) of battery are installed correctly.

Reattach the cover by sliding it back into position.

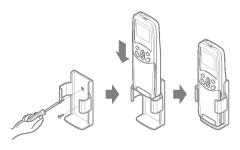

NOTES:

 Use 2 AAA(1.5volt) batteries. Do not use rechargeable batteries.

Storage and Tips For Using the Remote Control

- The remote control may be stored mounted on a wall.
- To operate the room air conditioner, aim the remote control at the signal receptor.

Signal Receptor

Receives the signals from the remote control.(Signal receiving sound: two short beeps or one long beep.)

Operation Indication Lamps

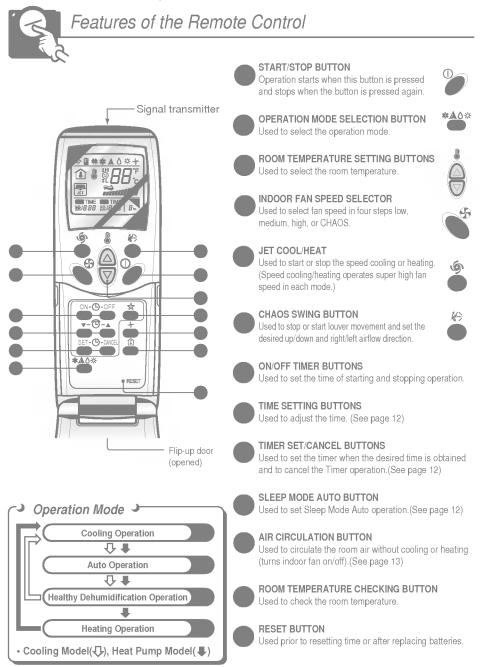

\bigcirc	On/Off	: Lights up during the system operation.
\bigotimes	Sleep Mode	: Lights up during Sleep Mode Auto operation.
\bigcirc	Timer	: Lights up during Timer operation.
★ ᠔	Defrost Mode	: Lights up during Defrost Mode or Hot Start operation.(Heat pump model only)
OUT DOOR	Outdoor unit operation	: Lights up during outdoor unit operation. (Cooling model only)
88	Temperature	: Indicate the setting temperature.

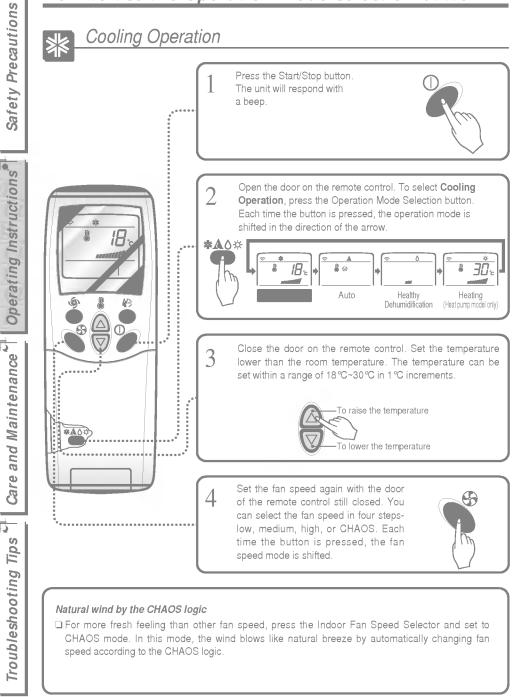

Operation indication lamps

About the remote control on the system

The remote control transmits the signals to the system.

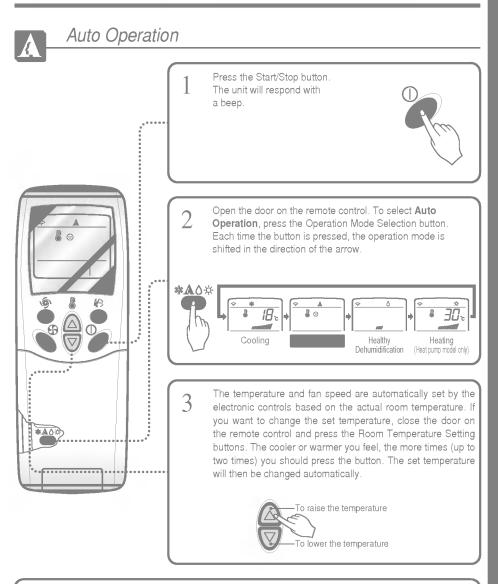

How to use the Operation Mode Selection button

Natural wind by the CHAOS logic

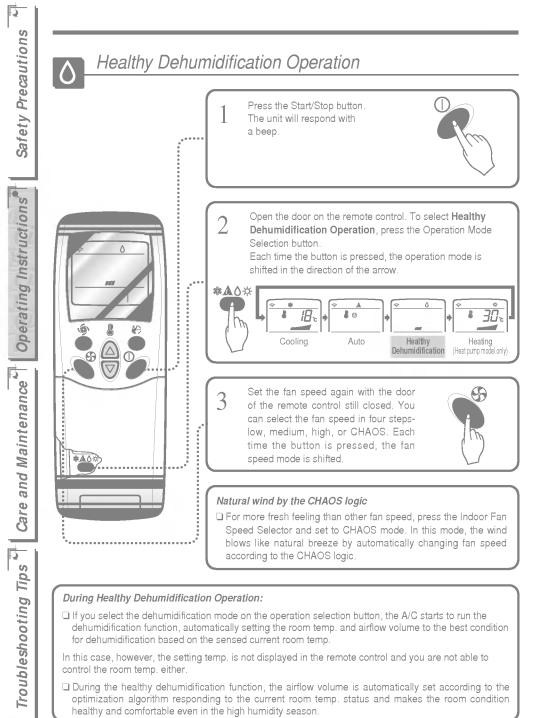

G For more fresh feeling than other fan speed, press the Indoor Fan Speed Selector and set to CHAOS mode. In this mode, the wind blows like natural breeze by automatically changing fan speed according to the CHAOS logic.

5

During Auto Operation:

- □ You cannot switch the indoor fan speed. It has already been set by the Fuzzy rule.
- □ If the system is not operating as desired, manually switch to another mode. The system will not automatically switch from the cooling mode to the heating mode, or from heating to cooling, it must be done by manually resetting.
- During Auto Operation, pressing the chaos swing button makes the horizontal louvers swing up and down automatically. If you want to stop auto-swing, press the chaos swing button again.

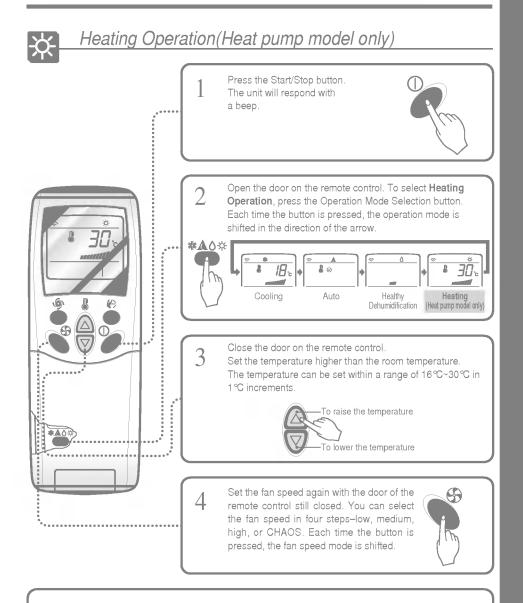

During Healthy Dehumidification Operation:

If you select the dehumidification mode on the operation selection button, the A/C starts to run the dehumidification function, automatically setting the room temp. and airflow volume to the best condition for dehumidification based on the sensed current room temp.

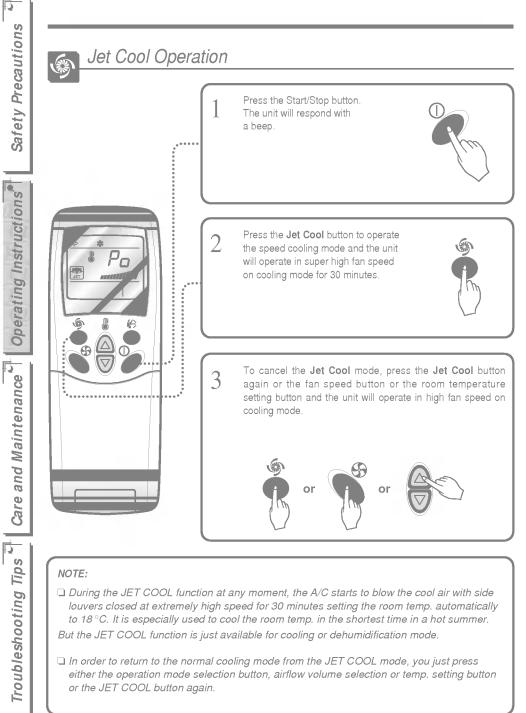

In this case, however, the setting temp. is not displayed in the remote control and you are not able to control the room temp, either.

During the healthy dehumidification function, the airflow volume is automatically set according to the optimization algorithm responding to the current room temp. status and makes the room condition healthy and comfortable even in the high humidity season.

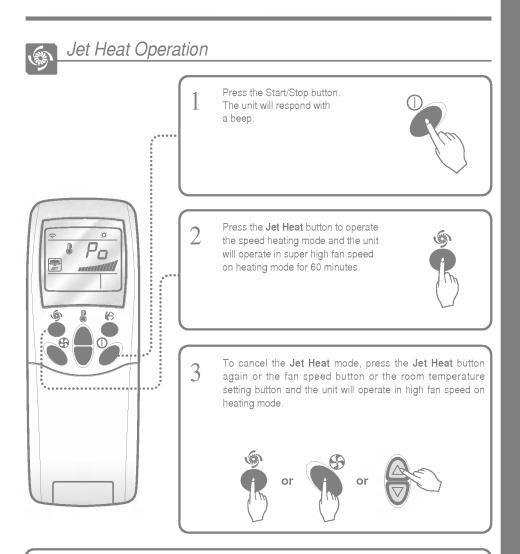

Natural wind by the CHAOS logic

□ For more fresh feeling than other fan speed, press the Indoor Fan Speed Selector and set to CHAOS mode. In this mode, the wind blows like natural breeze by automatically changing fan speed according to the CHAOS logic.

NOTE:

- During the JET COOL function at any moment, the A/C starts to blow the cool air with side louvers closed at extremely high speed for 30 minutes setting the room temp. automatically to 18 °C. It is especially used to cool the room temp. in the shortest time in a hot summer. But the JET COOL function is just available for cooling or dehumidification mode.
- □ In order to return to the normal cooling mode from the JET COOL mode, you just press either the operation mode selection button, airflow volume selection or temp. setting button or the JET COOL button again.

NOTE:

- During the JET HEAT function at any moment, the A/C starts to blow the hot air with side louvers closed at extremely high speed for 60 minutes setting the room temp. automatically to 30 °C. It is especially used to heat the room temp. in the shortest time in a cold winter. But the JET HEAT function is just available for Heating mode.
- □ In order to return to the normal heating mode from the JET HEAT mode, you just press either the operation mode selection button, airflow volume selection or temp. setting button or the JET HEAT button again.

٠.

Additional features

Sleep Mode

Press the Sleep Mode Auto button to set the time you want the unit to turn off automatically.

The Timer is programmed in one-hour increments by pressing the Sleep Mode Auto button 1 to 7 times.

The sleep mode is available for 1 to 7 times. To alter the time period in steps of 1 hour, press the Sleep Mode Button while aiming at air conditioner.

Make sure the Sleep Mode Auto LED lights up.

ė.

Setting the Time

Time can be set only when you have pressed the Reset button. If you have just replaced the batteries, the Reset button should be pressed to reset the time.

Press the Start/Stop button.

Delay Start/Pre-Set Stop

Make sure the time is set correctly on the remote control display.

NOTE: Select one of the following four types of operation.

ON TIME

.m. 5:00

Press the ON/OFF Timer buttons to turn Timer on or off.

Press the Time Setting buttons until the desired time is set.

Care and Maintenance

Airflow Direction Control

The up/down and right/left airflow can be adjusted by using the remote control.

Press the Start/Stop button to start the unit.

Press Chaos Swing button and the louvers will swing.

Press the button again and the louvers will stop. After 30 minutes, the louvers return to the maximum airflow position automatically.

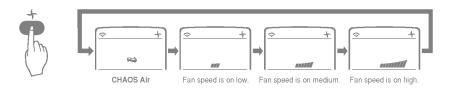

Air Circulation Mode

Circulates the room air without cooling or heating.

Press the Start/Stop button. the unit will respond with a beep.

Open the door on the remote control. Press the Air Circulation button. Close the door on the remote control. Now each time that you press the Indoor Fan Speed Selector, the fan speed is shifted from low to CHAOS and back to low again.

Note:

CHAOS Air economizes power consumption and prevents overcooling. The fan speed is automatically changed from high to low or vice versa, depending on the ambient temperature.

3

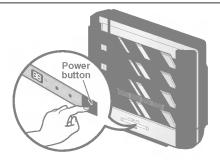

J)

Forced Operation

Operation procedures when the remote control can't be used.

The operation will be started if the power button is pressed.

If you want to stop operation, re-press the button.

	Cooling Model	Heat pump Model		
		Room Temp. \geq 24 °C	21 ℃ ≤ Room Temp. < 24 ℃	Room Temp. < 21 ℃
Operating mode	Cooling	Cooling	Healthy Dehumidification	Heating
Indoor FAN Speed	High	High	High	High
Setting Temperature	22℃	22°C	23°C	24°C

Test operation

During the TEST OPERATION, the unit operates in cooling mode at high speed fan, regardless of room temperature and resets in 18 minutes.

During test operation, if remote controller signal is received, the unit operates as remote controller sets. If you want to use this operation, open the front panel upward and Press the power button let it be pressed for about 3 seconds.

If you want to stop the operation, re-press the button.

Auto restart

In case the power comes on again after a power failure, Auto Restarting Operation is the function to operate procedures automatically to the previous operating conditions.

So there is no need of activating this function by pressing any key or button.

In the initial mode, the fan operates at a low speed and the compressor starts 2.5~3 minutes later. As the compressor starts, the fan speed also resumes its previous setting mode.

Helpful information

Fan speed and cooling capacity.

The cooling capacity indicated in the specification is the value when the fan speed is set to high, and the capacity will be lower at low or medium fan speed.

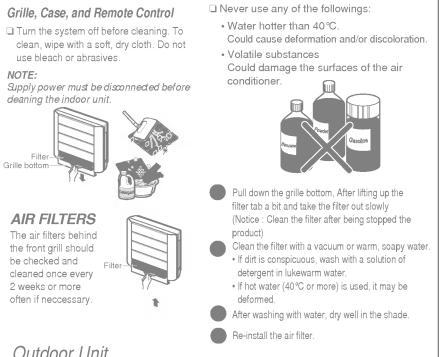

High fan speed is recommended when you wish to cool the room quickly.

Care and maintenance of the air conditioner

CAUTION: Before performing any maintenance, turn off the main power to the system.

Indoor Unit

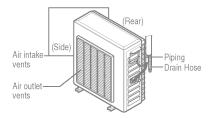

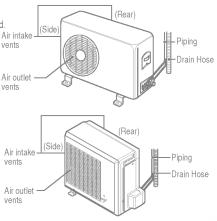

Outdoor Unit

The heat exchanger coils and panel vents of the outdoor unit should be checked regularly. If clogged with dirt or soot, the heat exchanger and panel vents may be professionally steam cleaned

NOTE:

Dirty or dogged coils will reduce the operating efficiency of the system and cause higher operating costs.

S.

When the air conditioner is not going to be used for a long time. Operate the air conditioner on Air circulation Clean the air filter and install it in the indoor mode (Refer to page 13) for 2 to 3 hours. unit (Refer to page 15 for cleaning filters.) . This will dry out the internal mechanisms. Turn off the circuit breaker, and disconnect the plug. Check that the air inlet and outlet of the CAUTION indoor/outdoor unit are not blocked. Turn off the circuit breaker when the air conditioner is not going to be used for a long time. Dirt may collect and may cause a fire. Remove the batteries from the remote control.

Operation Tips

This is not good for the health and wastes electricity.	Do not let direct sunshine enter the room when the air conditioner is in operation.	Adjust the vertical and horizontal airflow direction to ensure a uniform temperature in the room.
Avoid opening doors and windows as much as possible to keep the cool air in the room.	Blockages in the air filter reduce the airflow and lower cooling and dehumidifying effects. Clean at least once every two weeks.	Since windows are kept closed, it is a good idea to open them and ventilate the room now and then.

Troubleshooting Tips! Save time and money!

Check the following points before requesting repairs or service.... If the fault persists, please contact your dealer or service center.

Case	Explanation	See page
The air conditioner does not operate.	Have you made a mistake in timer operation? Has the fuse blown or has the circuit breaker been tripped?	-
The room has a peculiar odor.	 Check that this is not a damp smell exuded by the walls, carpet, furniture, or cloth items in the room. 	-
It seems that condensation is leaking from the air conditioner.	Condensation occurs when the airflow from the air conditioner cools the warm room air.	-
Air conditioner does not operate for about 3 minutes when restarted.	 This is the protector of the mechanism. Wait about three minutes and operation will begin. 	-
Does not cool or heat effectively.	 Is the air filter dirty? See air filter cleaning instructions. 	15
	• Has the temperature been set incorrectly?	6,9
	 Are the indoor unit's air inlet or outlet vents obstructed? 	-
The air conditioner operation is noisy.	 For a noise that sounds like water flowing. This is the sound of freon flowing inside the air conditioner unit. For a noise that sounds like the compressed air releasing into atmosphere. This is the sound of the dehumidifying water being processed inside the air conditioning unit. 	-
Remote control display is faint, or no display at all.	 Are the batteries depleted? Are the batteries inserted in the opposite (+) and (-) directions? 	4
Crack sound is heard.	• This sound is generated by the expansion/constriction of the front panel, etc. due to changes of temperature.	-

NOTE

WATER RESISTANT: The outdoor side of this appliance is WATER RESISTANT.

The indoor side is not water resistant and should not be exposed to excess water.
