• Manufacturer is not responsible for accidents caused by the user as a result of not following the user's guide.

In Operation	Installation Area				
• Do not insert the hand in the spin dryer basket while the machine is in operation. (Do not let children climb on the machine or climb into the tub Injury may occur.)	Avoid area exposed to snow, rain, or where humidity is high. It may cause electric shock.				
Switch Area	Spin Motor				
• Avoid watering on the switch area It may cause electric shock or fire.	 After continuous using spinning program 3 times, please stop spinning more than 1 hour. Otherwise the spin motor could be damaged of fired. 				
Volatile Material	Heat				
• Do not use volatile material such as Benzene, Gasoline, bug killer. Do not leave strong alkaline substance such as bleach inside the tub. Damage on plastic surface and rubber parts may occur.	Avoid electric heater, candle light, cigarette light, bug smoker, etc. near the machine. It may ignite or deform plastic part.				
Electric Outlet	Hard objects				
 Avoid connecting several electric devices to single outlet. It may cause fire. 	 Remove pins, buckles and removable hard objects in the wash load to avoid damaging the tub before your washing 				
Power Cord					
 If the power supply cord is damaged, it must only be replaced by the manufacture or its service agent or a similarly qualified person in order to avoid a hazard. 	• Do not plug in the power supply cord when your hand wet.				

4

1. Water Supply Inlet

Connect here with the inlet hose from the water faucet to feed water to the tub.

2. Wash Timer

Select the desired time for washing or rinsing.

3. Wash Program

Set the selector to "Gentle", "Normal", "Strong" according to kind and quantity of the laundry.

4. Drain Selector

Select "Wash-Rinse" for washing and rinsing, and "Drain" to drain the water out of the tub.

5. Spin Timer

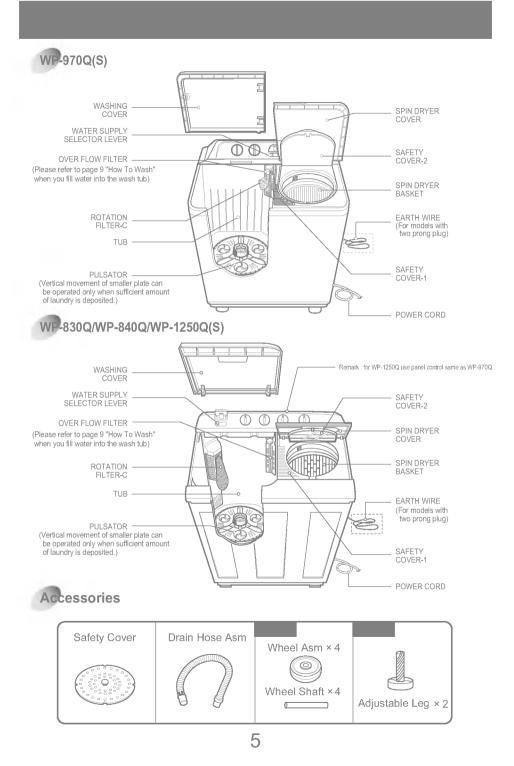

Select the desired time for spinning. The maximum limit is 5 min. Don't rotate the knob more than prescribed limit.

6. Water Supply Selector

Select "WASH" to supply water for washing and rinsing and "SPIN" for spin shower rinse.

know the completion of washing cycle.

Buzzer(Option : Inside)
 It is electrically operated to facilitate you to

Installation area

- Set on flat and firm floor.
- Incorrect installation may cause severe noise and break down.
- Maintain more than 10cm between the side of drain hose and the wall.
- A carpet must not obstruct the ventilation openings.

Leveling the machine (Option)

- Lift the front of the washing machine and twist the Adjustable Leg until the washing machine is placed evenly.
- If the Adjustable Leg is too short, use the Level Adjusting Plates as shown.

Connecting the drain hose

• Connect the drain hose to the outlet of the plunger valve located at the back side of the washing machine.

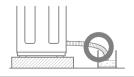

• Push the clamp toward the body of the washing machine as shown in the figure.

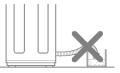

Notes :

- Be sure to re-route the hose so that it is not kinked or has sharp bends which will prevent proper drainage.
- The level of the drain should be slightly lower than the lowest part of the washing machine in order to ensure proper and complete drainage.

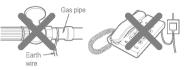

Connecting the earth wire

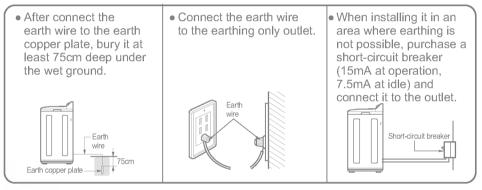

- Install the earth wire to prevent short-circuit due to leaking current and electric shock.
- It is attached at the back of the washer. Connect it to the metal water pipe. If the water pipe is made of plastic, it does not have the earth effect.

• Never connect the earth wire to the gas pipe, lightning arrester. telephone connecter, etc.

* WARNING-THE APPLIANCE WITH TWO-PRONGED PLUG MUST BE GROUNDED.

Other earthing method

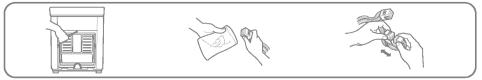

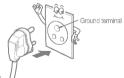

Connecting the power plug

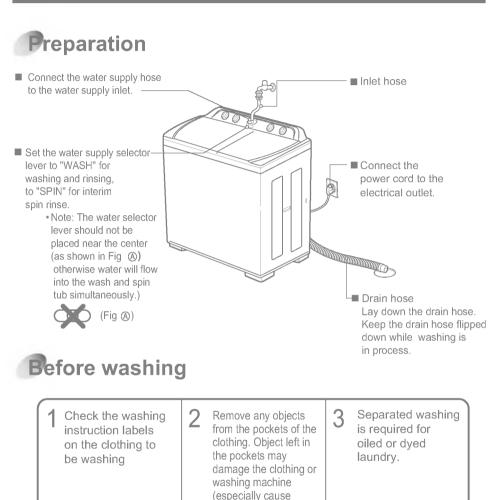

- Insert the power plug into the outlet.
- Before connecting the power plug, check if the voltage setting of the washer matches the outlet voltage.
- If AC outlet with ground terminal is used, grounding is not needed. If not, never forget earthing (earthing method above).
- The appliance must be positioned so that the plug is accessible.

Voltage Change (only for dual voltage)

This washer is assembled for 220V, but can be changed from 220V to 110V(or 127V). Check your electrical source and follow the diagram below to convert voltage.

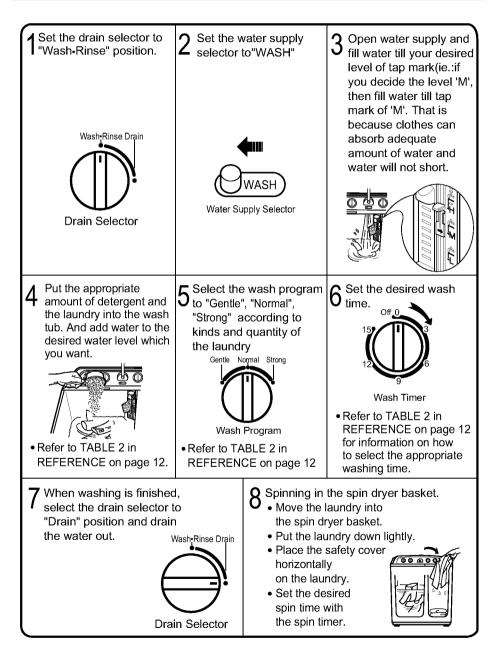

Note) • For better wash of lots of laundry, Putting more heavily-soiled laundry first is recommended.

clogging of the drain

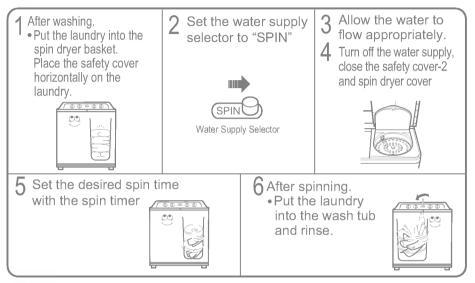

hose).

HOW TO WASH

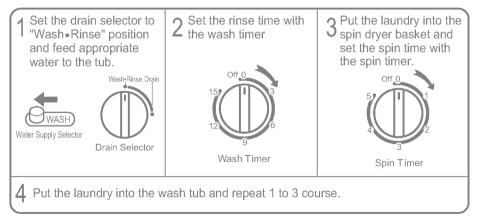

Interim spin rinse

• Interim spin rinse prior to regular rinsing will remove sudsy water from the laundry and improve rinsing efficiency.

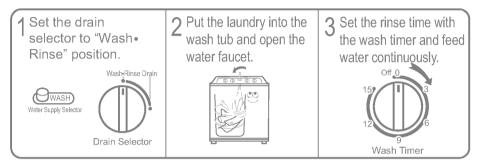

Economical water supply rinse

• This course allows you to save water as this course is to rinse after feeding appropriate water to the tub.

Continuous water supply rinse

•This over flowing rinse is helpful to improve rinsing efficiency and remove the lint.

1. Put the laundry evenly into the spin dryer basket.

- 2. Put the laundry down lightly.
- 3. Place the safety cover horizontally on the top of the laundry.
- 4. Close the spin dryer cover.
- 5. Set the spin timer according to the following table.

Type of clothing	Spin time		
Thin fabrics (synthetic fabrics, mixed fabrics)	1 minute		
Sweaters (synthetic fabrics)	1~3 minutes		
Cotton underwear	3~5 minutes		
Sheets, towels	5 minutes		

• If the spin dryer basket is off-balance and vibrates excessively, stop the spinning, rearrange the clothes evenly, and then resume spinning.

• If spinning fail to stop within 15 seconds after the spin dryer cover is opened, the brake is out of order. Immediately stop using the machine and request repair service.

AFTER FINISHING

- 1. Remove the laundry from the spin dryer basket and close the spin dryer cover,
- If there is water in the wash tub, set the drain selector to "Drain" in order to drain it out completely.
- 3. Disconnect the power cord from the electrical outlet.
- 4. Clean the washing machine. (Refer to CARE AND MAINTENANCE on page 13~14.)

Note) • Amount of laundry is a weight of dry laundry.

- Detergent is a general synthetic detergent.
- For better wash for lots of laundry, using about 300mg of detergent is reccomended. But if too much foam is made, decrease the amount of detergent.

• Be sure to disconnect the power cord from the electric outlet before starting care and maintenance.

Washing machine

If the washing machine itself becomes dirty.

• The washing machine can be cleaned with a mild liquid detergent. Never use abrasive cleanser or chemicals such as benzene or thinner to clean the washing machine, because these materials will damage both the painted surfaces and the plastic parts.

Pulsator

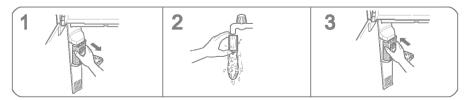

- If a button or some other object gets caught in the pulsator.
- 1. Take out the pulsator cap with "-" type driver.
- 2. Use a screwdriver to loosen the screw in the center of the pulsator, and lift the pulsator straight up in order to remove the button or other object.
- 3. Replace the pulsator and tighten the screw.
- 4. Replace the pulsator cap.

Rotation filter-C

- 1. Take out the rotation filter-C by pulling in the direction shown.
- 2. Turn the net over and rinse in water.
- 3. After cleaning, replace the rotation filter-C.
- WP-970Q(S)

• WP-830Q/WP-840Q/WP-1250Q(S)

Overflow filter

- 1. Pull the overflow filter forward from the wash tub in the direction of the arrow.
- 2. Use a brush or your hand to remove all of the lints whichs has adhered to the overflow filter.
- 3. Insert the over flow filter back into the wash tub.

Spin dryer basket

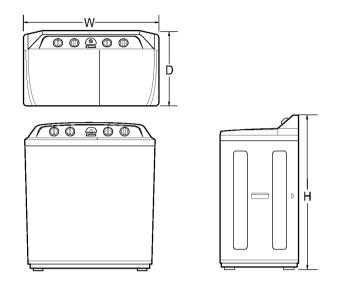

- If clothing becomes trapped between the spin dryer basket and the spin tub.
 - 1. Take hold of the front of the safety cover-1 and pull the tub by the other hand.
 - 2. Pull the safety cover-1 upward and then remove the article of clothing.
 - 3. Close the safety cover-1, pressing down on it so that it fits securely into the spin tub.

Before Requesting Service

Type of clothing	Checking point	
Motor does not operate	Is the power cord firmly plugged in?	
	Is the timer turned to a suitable point except "OFF"?	
Spin dryer basket does not operate.	 Is there any clothing dropped between the basket and tub? Is the spin dryer cover closed? Is the laundry gathered to one side of the spin dryer basket? 	
No draining	 Is there any lint stuck in the plunger valve? Is the end of the drain hose guide located at an exceed height?
