

AN110B-JD AN110W-JD OWNER'S MANUAL

Please read this manual carefully before operating your set. Retain it for future reference.

Record model number and serial number of the set below.

See the label attached on the bottom of the set and quote this information to your dealer if you require service.

Model number : Serial number :

# DLP PROJECTOR

### **FCC NOTICE**

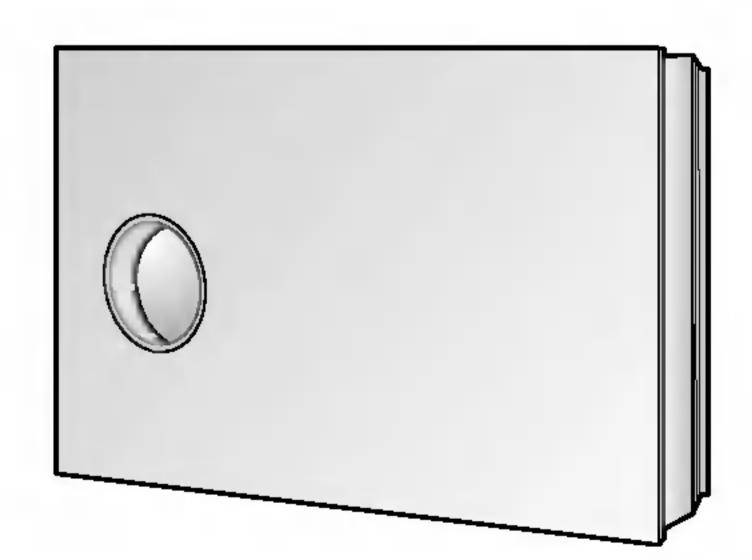

# A Class B digital device

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### Warning

This is a class B product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

# Disposal of your old appliance

- 1. When this crossed-out wheeled bin symbol is attached to a product it means the product is covered by the European Directive 2002/96/EC.
- 2. All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.
- 3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.
- 4. For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service or the shop where you purchased the product.

# Safety Instructions

Please take note of the safety instructions to prevent any potential accident or misuse of the projector.

→ Safety Instructions are given in two forms as detailed below.

 $\triangle$  **WARNING**: The violation of this instruction may cause serious injuries and even death.

 $\triangle$  **NOTES**: The violation of this instruction may cause light injuries or damage to the projector.

--- After reading this manual, keep it in the place that the user always can contact easily.

# Stand the projector when you install. If not, the power turns off. Do not place the Projector in direct sunlight or near heat sources such as radiators, fires and stove etc. This may cause a fire hazard! Do not place inflammable materials beside the projector This may cause a fire hazard!

Do not allow children to hang on the installed projector.

It may cause the projector to fall, causing injury or death.

#### NOTES Indoor Installation Disconnect the power and Do not place the projector close Do not place the projector where remove all connections before to sources of steam or oil such it might be exposed to excessive dust. moving. as a humidifier. This may create a fire hazard or an This may cause a fire hazard! electric shock hazard! Only use the projector on a level Ensure good ventilation around the Do not block the vents of the proprojector. The distance between the and stable place. jector or restrict air-flow in any way. projector and the ceiling or bottom It may become unstable and affect This would cause the internal temperashould be more than 20cm/8 inches. operation. ture to increase and could cause a fire hazard! An excessive increase in its internal temperature may cause a fire hazard!

Do not place the projector directly on a carpet, rug or place where ventilation is restricted.

This would cause its internal temperature to increase and might create a fire hazard!

# **Outdoor Installation**

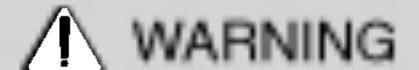

Do not use the projector in a damp place such as a bathroom where it is likely to get wet.

This may cause a fire or an electric shock hazard!

#### WARNING Power Earth wire should be connected. Do not place heavy objects on The mains plug should be inserted fully into the power outlet to the power cord If the earth wire is not connected, there is a avoid a fire hazard! possible danger of electric shock caused by This may cause a fire or an electric the current leakage. shock hazard! If grounding methods are not possible, a This may cause a fire hazard! separate circuit breaker should be employed and installed by a qualified electrician. Do not connect ground to telephone wires, lightning rods or gas pipe.

Power

Do not plug too many devices into one outlet.

It may result in overheating of the outlet and causes a fire hazard!

Power	⚠ NOTES					
Never touch the power plug with a wet hand  This may cause an electric shock hazard!	Hold the plug firmly when unplugging. If you pull the cord the cord may be damaged.  This may cause a fire hazard!	Prevent dust collecting on the power plug pins or outlet. This may cause a fire hazard!				
Do not plug in when the power cord or the plug is damaged or the connecting part of the power outlet is loose.  This may cause a fire or an electric shock hazard!	Ensure the power cord does not come into contact with sharp or hot objects such as a heater.  This may cause a fire or an electric shock hazard!	Place the projector where people will not trip or tread on the power lead.  This may cause a fire or an electric shock hazard!				

Do not turn the projector On/Off by plugging-in or unplugging the power plug to the wall outlet. (Do not use a switched power outlet to turn the unit on and off.)

It may cause mechanical failure or could give an electric shock.

Using	<u> </u> WARNING				
Do not place anything containing liquid on top of the projector such as flowerpot, cup, cosmetics or candle.  This may cause a fire hazard!	In case of impact shock or damage to the projector, switch it off and unplug it from the outlet. Contact a service center.  This may cause a fire or an electric shock hazard!	Do not allow any objects to fall into the projector.  This may cause an electric shock hazard!			
If water is spilt into the projector, unplug it from the outlet immediately and consult a Service Agent.  This may cause an electric shock hazard!	Dispose of used batteries care- fully and safely.  In the case of a battery being swallowed by a child please consult a doctor immediately.	In the event that an image does not appear on the screen, please switch the unit off and unplug it from power outlet. Contact a Service Agent.  This may cause a fire or an electric shock hazard!			
Do not remove any covers (except lens cover). High risk of Electric Shock!	Don't look directly onto the lens when the projector is in use. Eye damage may occur!	Do not touch metal parts during or soon after operation since the vents and lamp cover will remain very hot!			

#### **CAUTION concerning the Power Cord**

Most appliances recommend they be placed upon a dedicated circuit; that is, a single outlet circuit which powers only that appliance and has no additional outlets or branch circuits. Check the specification page of this owner's manual to be certain.

Do not overload wall outlets. Overloaded wall outlets, loose or damaged wall outlets, extension cords, frayed power cords, or damaged or cracked wire insulation are dangerous. Any of these conditions could result in electric shock or fire. Periodically examine the cord of your appliance, and if its appearance indicates damage or deterioration, unplug it, discontinue use of the appliance, and have the cord replaced with an exact replacement part by an authorized servicer.

Protect the power cord from physical or mechanical abuse, such as being twisted, kinked, pinched, closed in a door, or walked upon. Pay particular attention to plugs, wall outlets, and the point where the cord exits the appliance.

# Using Never touch the wall outlet when Do not drop the projector or allow impact shock.

there is leakage of gas, open the windows and ventilate.

It can cause a fire or a burn by a spark.

This may cause mechanical failure or personal injury!

# Using \_\_\_\_ NOTES

Do not place heavy objects on top of projector.

This may cause mechanical failure or personal injury!

Take care not to cause impact to the lens particularly when moving the projector.

Do not touch the lens of the projector. It is delicate and easily damaged.

Do not use any sharp tools on the projector as this will damage the casing.

# Cleaning WARNING

Do not use water while cleaning the projector

This may cause damage to the projector or an electric shock hazard.

In the unlikely event of smoke or a strange smell from the projector, switch it off, unplug it from the wall outlet and contact your dealer or a service center.

This may cause a fire or an electric shock hazard!

Use an air spray or soft cloth that is moist with a neutral detergent and water for removing dust or stains on the projection lens.

# Cleaning NOTES

Contact a Service Center once a year to clean the internal parts of the projector.

Accumulated dust can cause mechanical failure.

Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners.

This may cause damage to the Projector or cause an electric shock hazard!

# Others MARNING

Do not attempt to service the projector yourself. Contact your dealer or a service center.

This may cause damage to the projector and could give an electric Shock as well as invalidating the warranty!

# Be sure to unplug if the projector is not to be used for a long period. Accumulated dust may cause a fire hazard! Refer to 43~44 page to replace the lamp. Do not mix new batteries with old batteries. This may cause the batteries to overheat and leak.

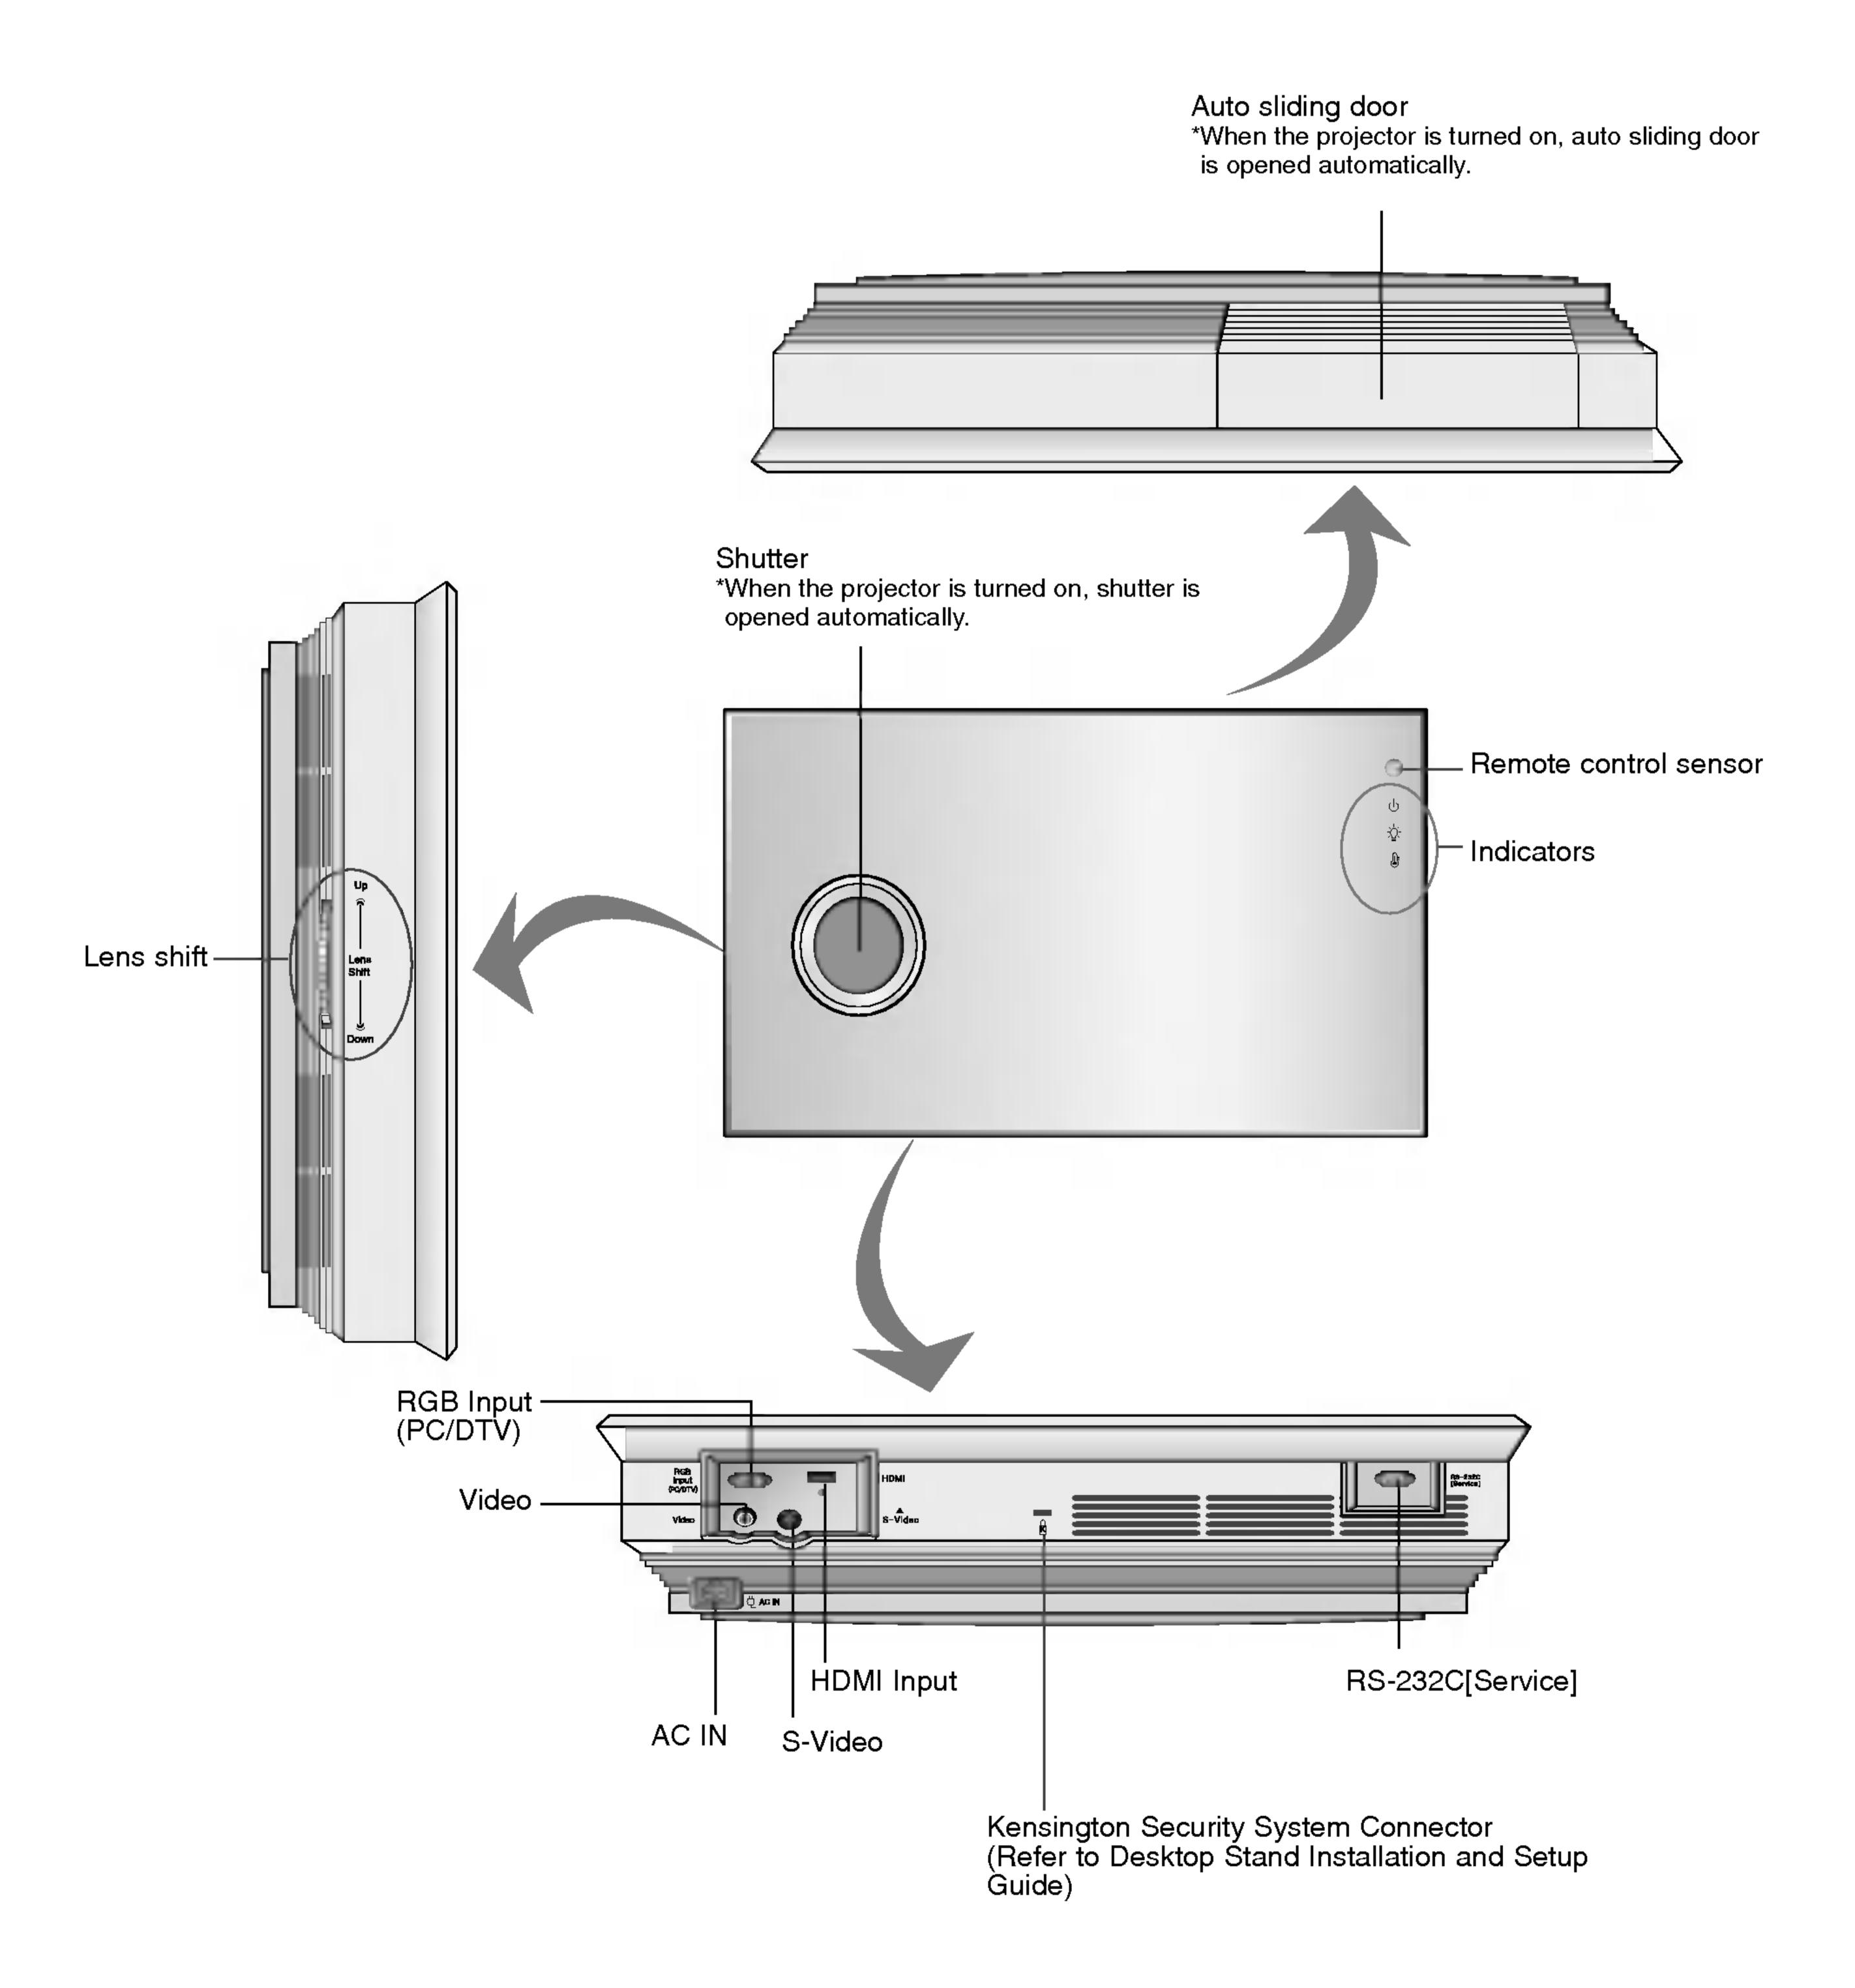

Only use the specified type of battery.

This could cause damage to the remote control.

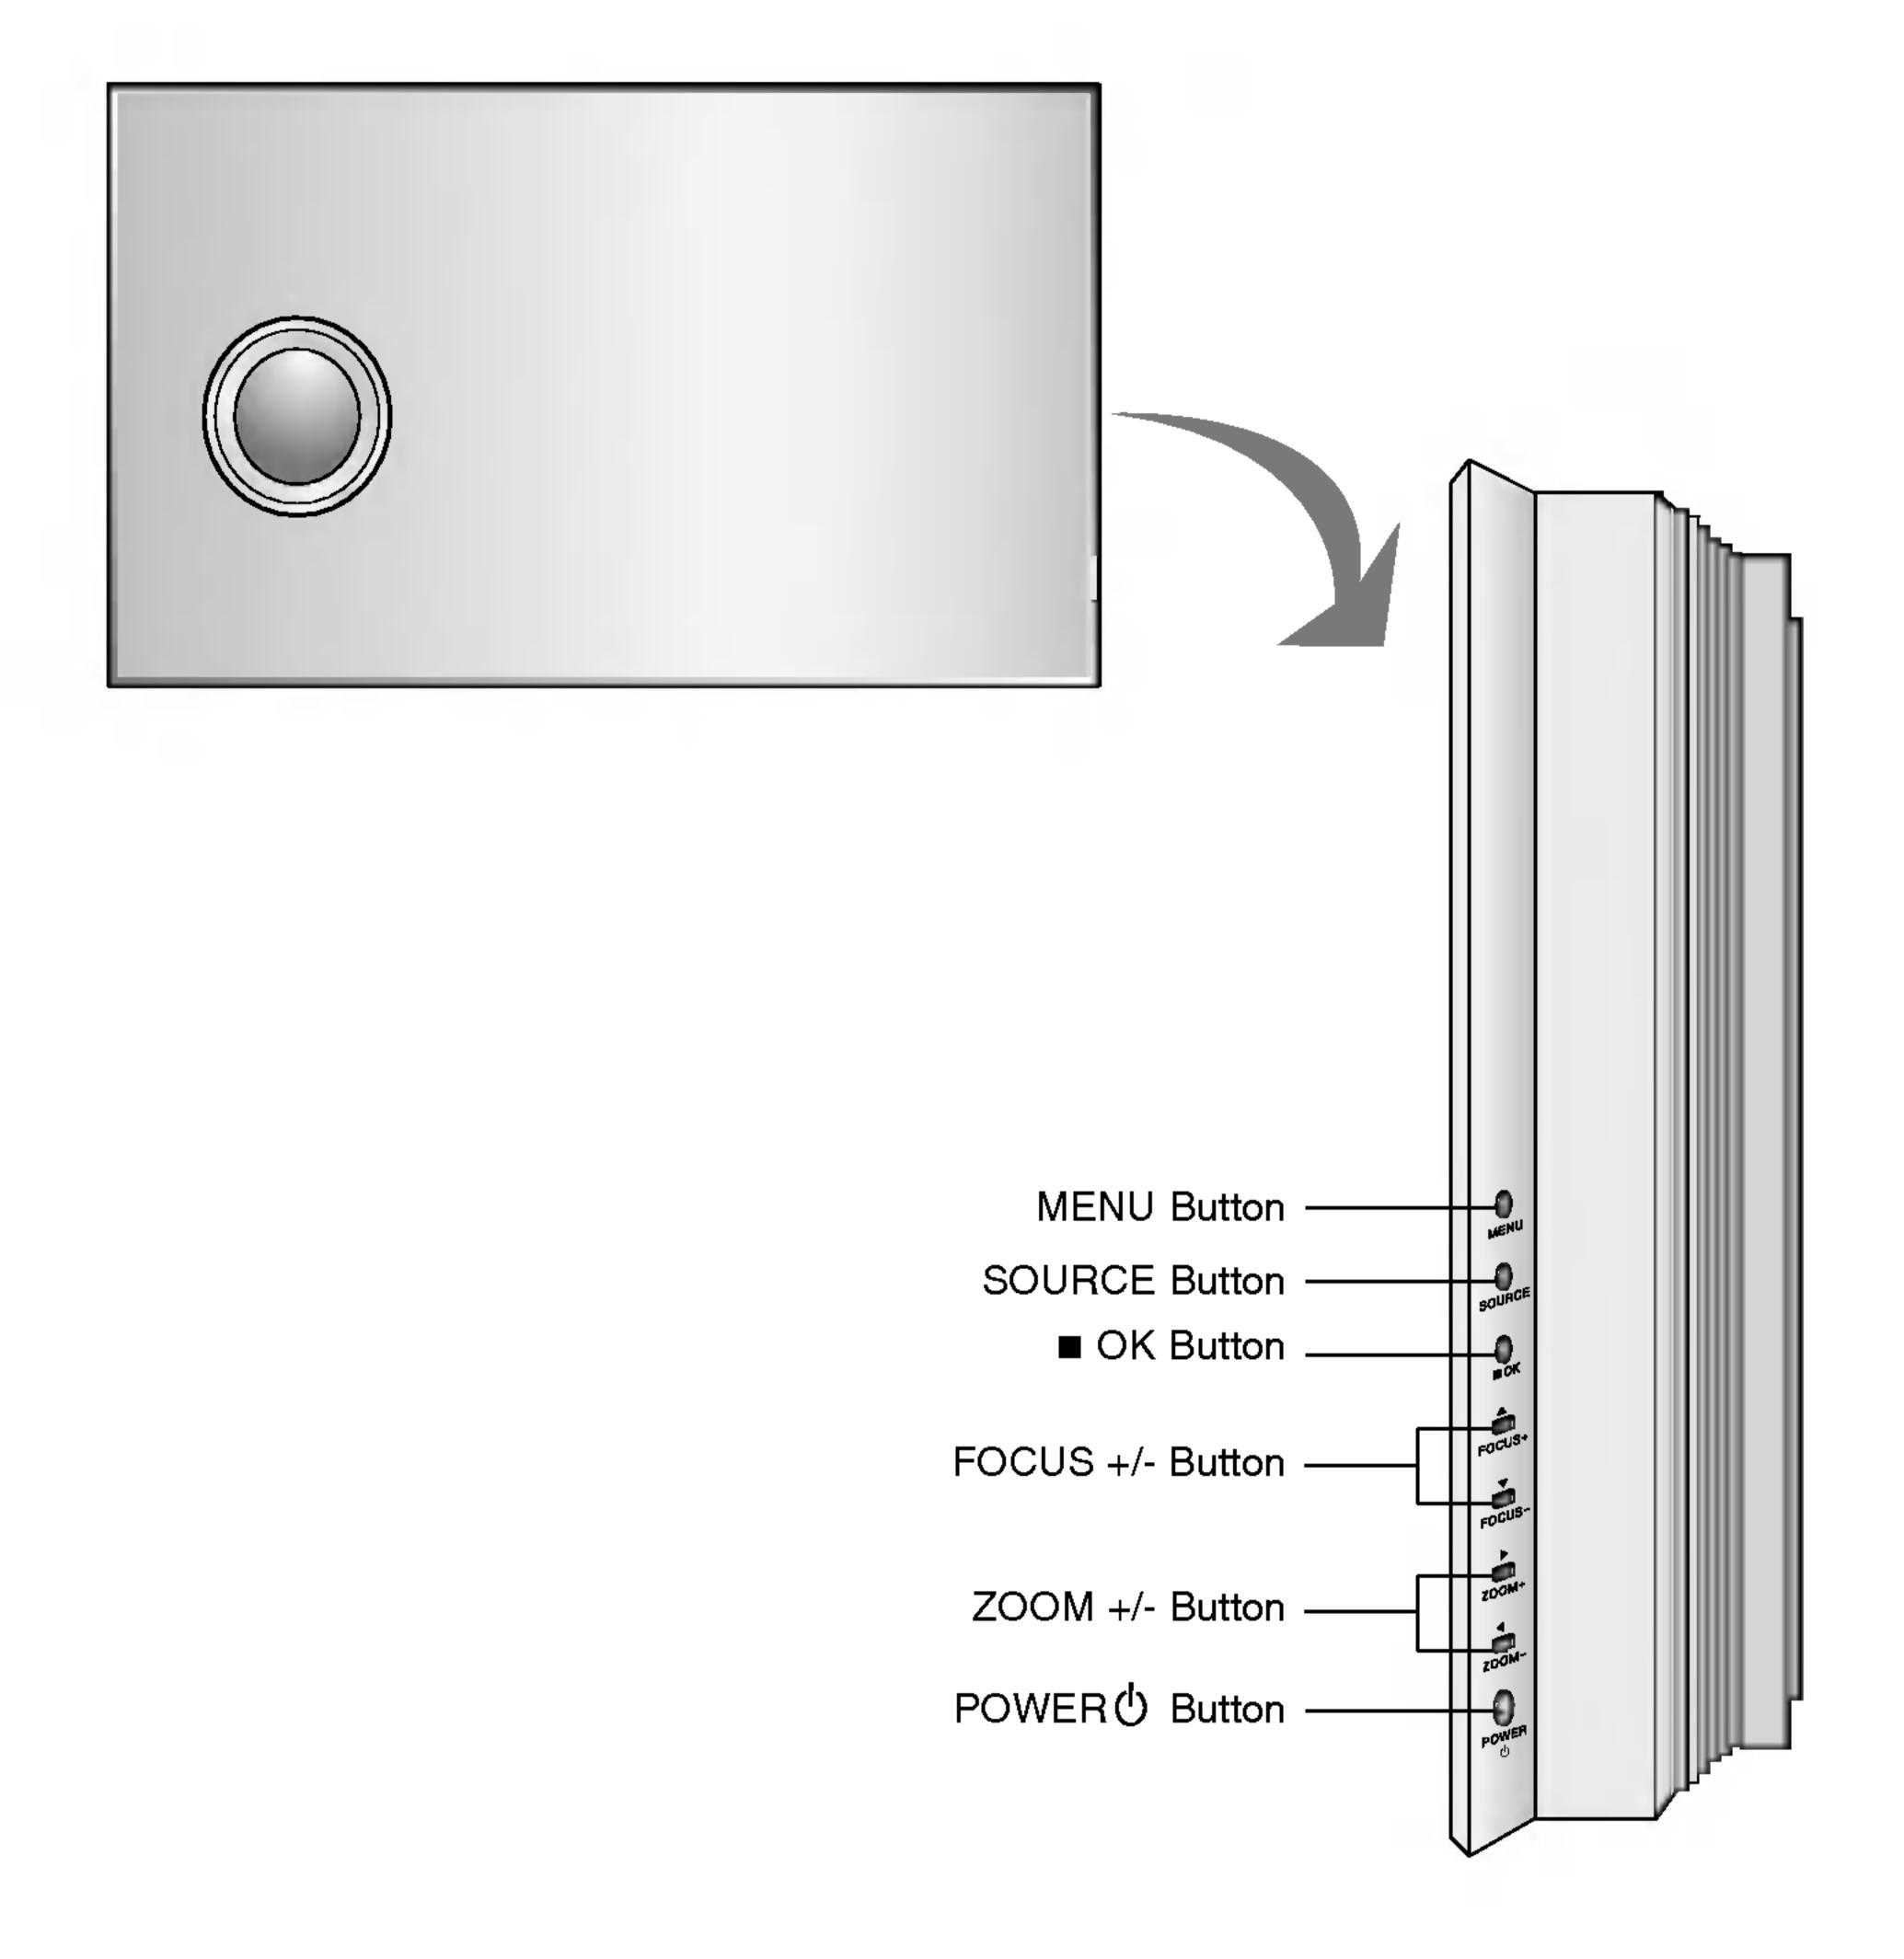

# Part Descriptions

# Main Body

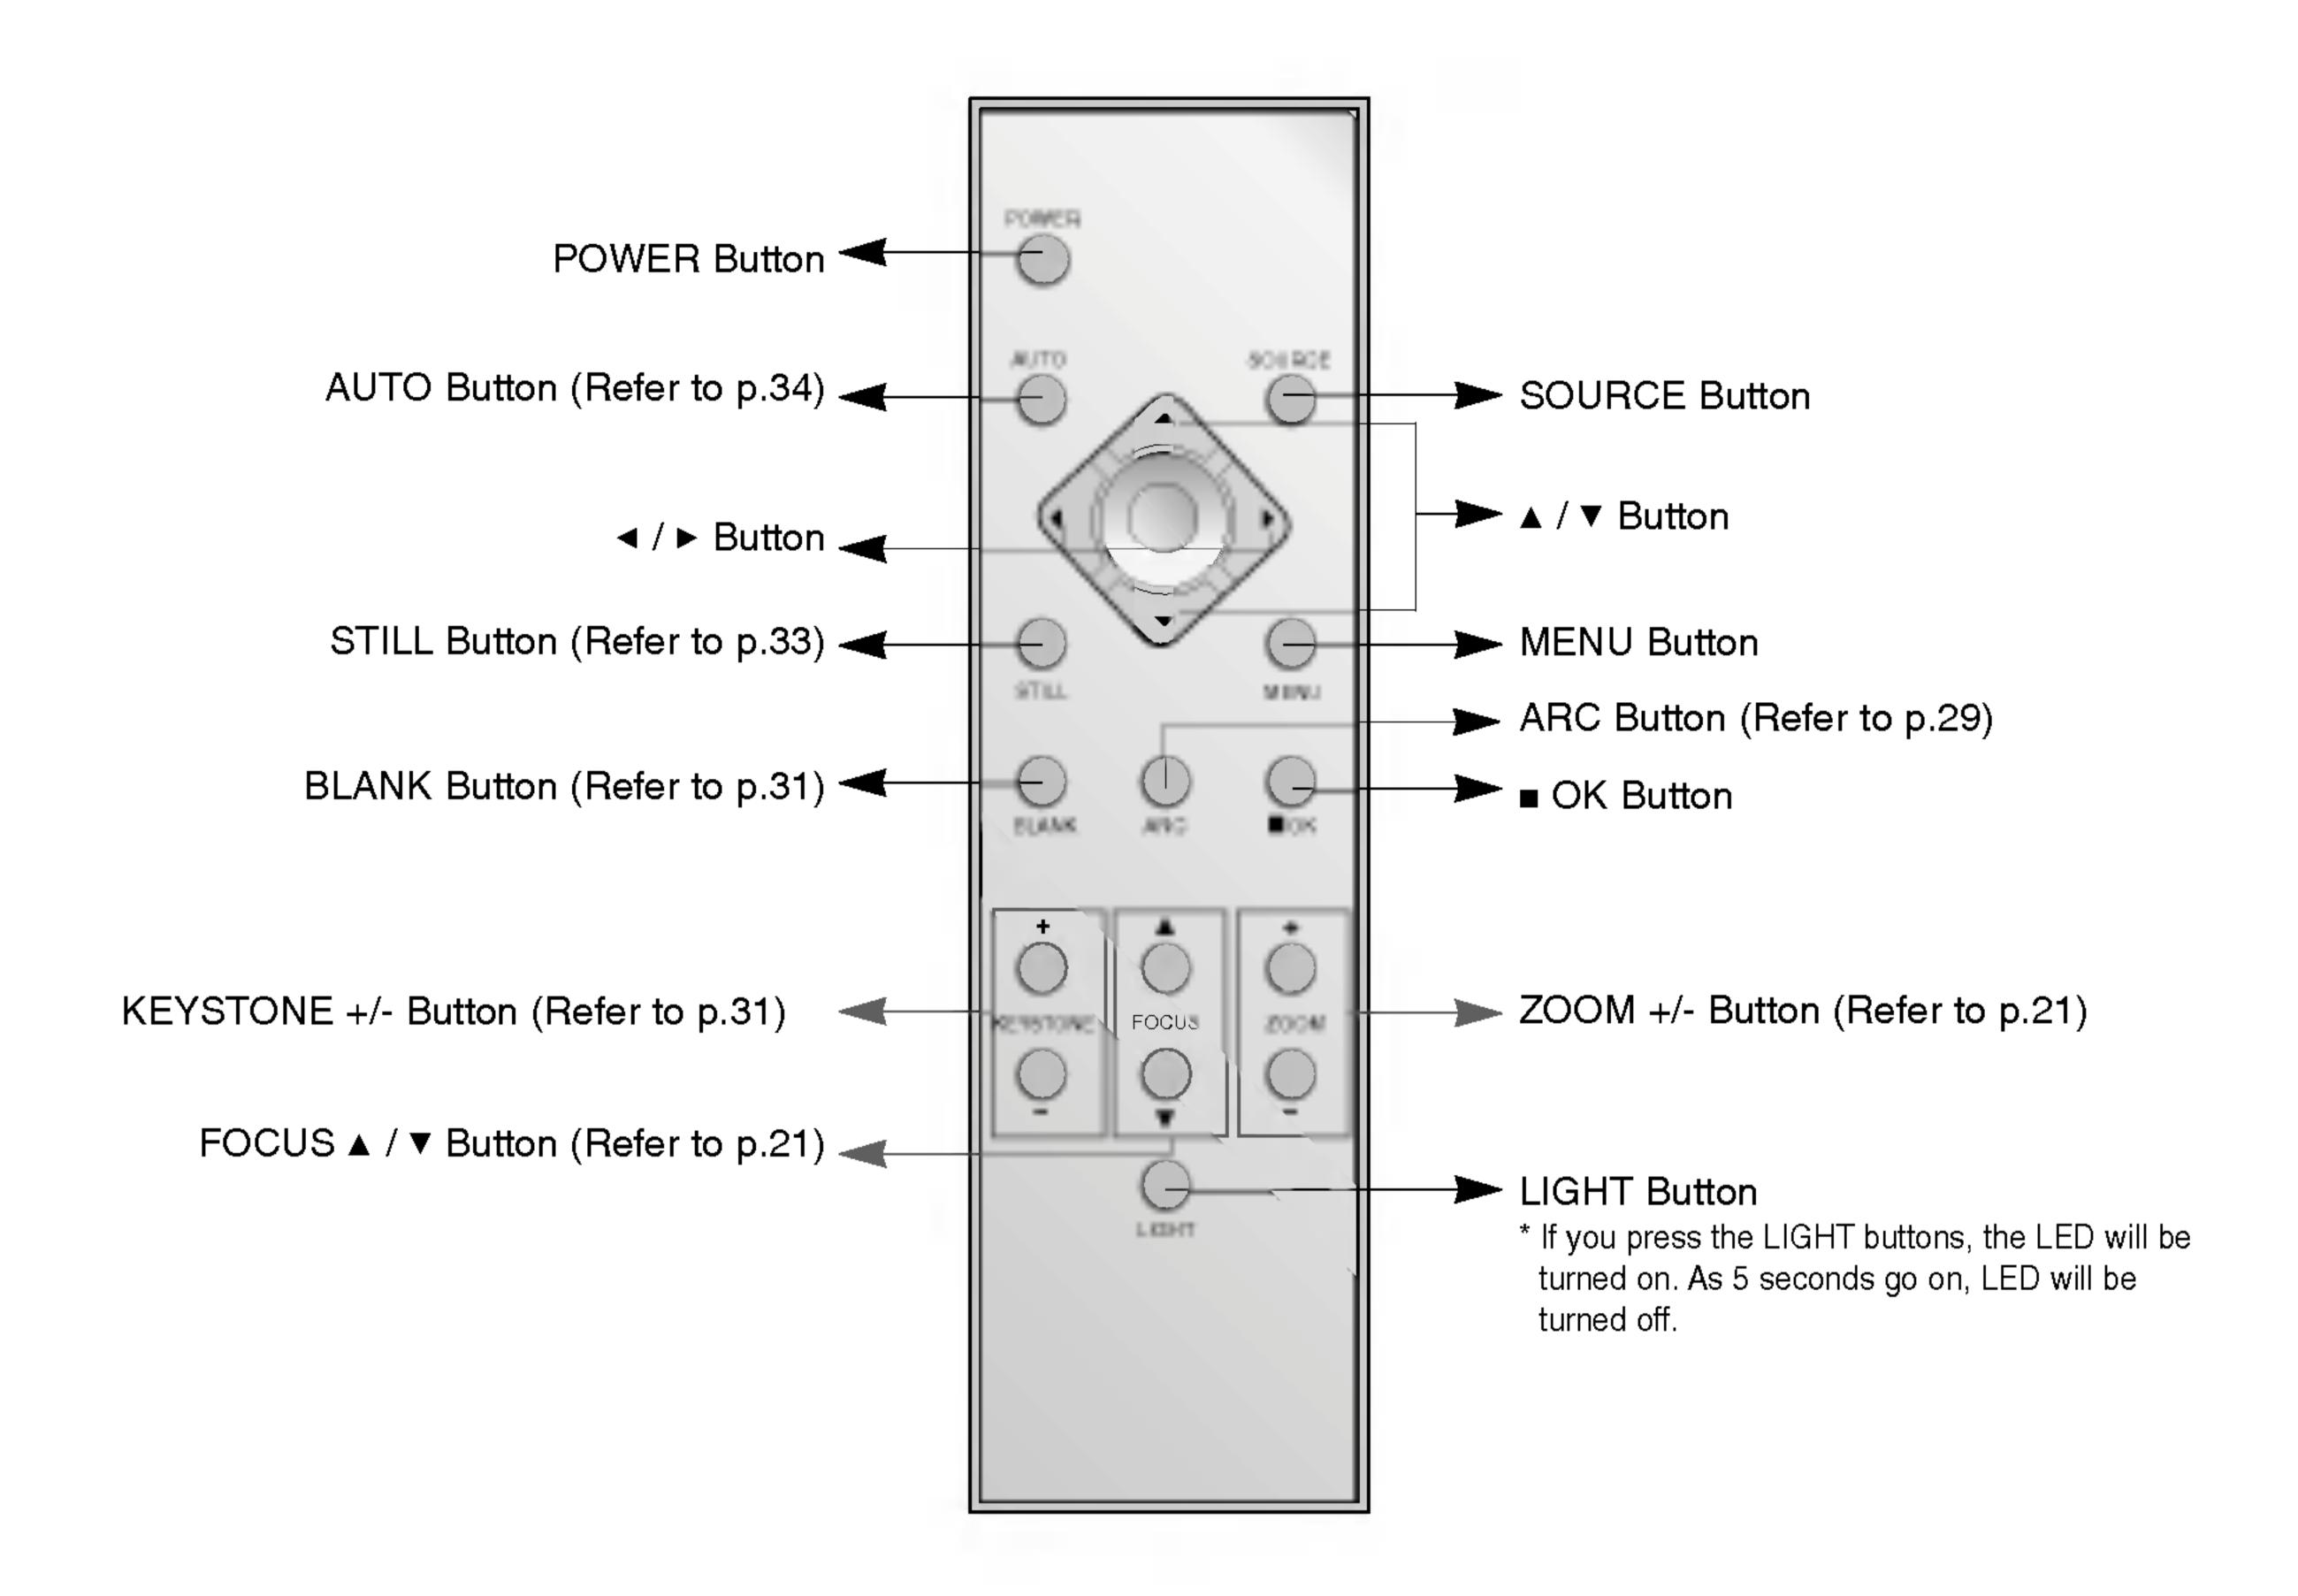

\* The projector is manufactured using high-precision technology. You may, however, see on the Projector screen tiny black points and/or bright points (red, blue, or green). This can be a normal result of the manufacturing process and does not always indicate a malfunction.

# Control Panel

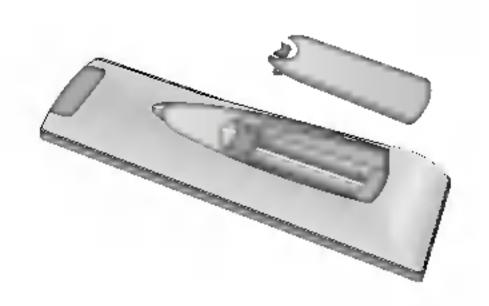

# Remote Control

# Installing Batteries

#### **CAUTION**

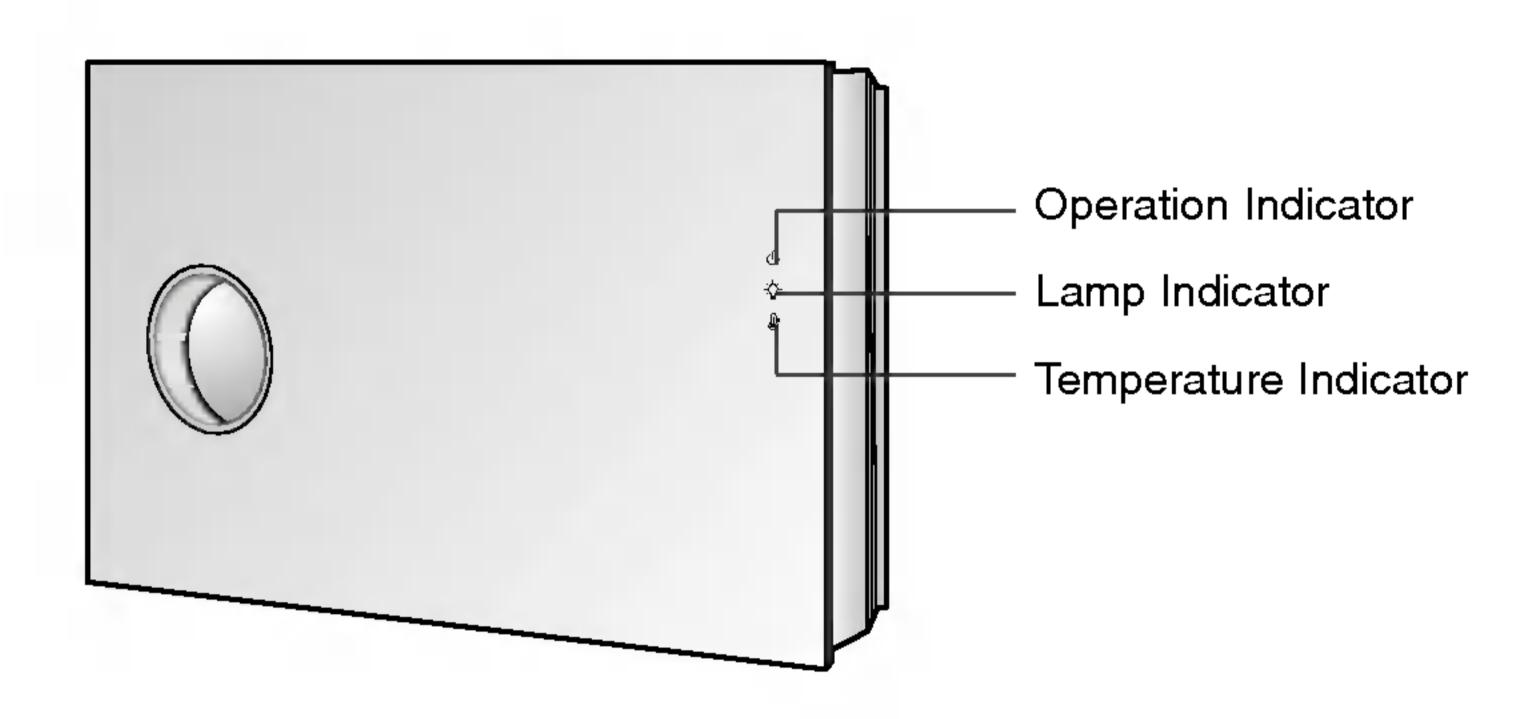

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

- Open the battery compartment cover on the back of the remote control and insert the batteries with correct polarity, match "+" with "+", and match "-" with "-".
- Install two 1.5V "AAA" batteries.
   Don't mix used batteries with new batteries.

# Projector Status Indicators

\* Lamp Indicator, operation indicator and temperature indicator at the top of the projector show the user the operating status of the projector.

	Orange	Standby.			
Operation Indicator	Green(flashing)	Lamp cooling until the lamp turn on.			
	Green	On operation. (Turn on the lamp)			
	Orange(flashing)	Projector lamp is cooling as power out (2 minutes)			
	Off	Power off.			
		Projector lamp is reaching the end of its life and needs			
	Red	to be replaced with a new lamp. (over 4000 hours)			
		The OSD, "Replace the lamp" is displayed 5 seconds			
Lamp Indicator		from the first power on.			
		The projector has trouble in the lamp or around it at			
	Red(flashing)	power-on. Retry Power On again later. If lamp indicator			
		is red (flashing) again, contact a service center.			
	Green(flashing)	The lamp cover is not closed.			
	Orango/floobing)	It's state of not opening well the door or shutter. Contact a			
	Orange(flashing)	service center.			
Temperature Indicator		This projector is in high temperature. Turn the power of			
	Orange	projector off and check the ventilator.			
	Red	The projector is turned off as its high temperature.			
	Dod (flocking)	Power has turned off due to problem with the			
	Red (flashing)	internal cooling fan. Contact a service center.			

<sup>\*</sup> If operation indicator is red, it's state of checking the closed door or shutter.

# Installation and Composition

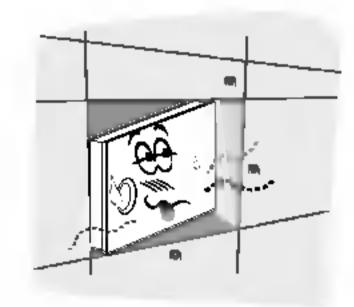

#### Installation Instructions

\* Don't place the projector in the following conditions. It may cause malfunction or product damage.

Provide proper ventilation for this projector.

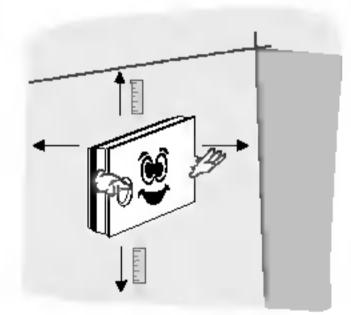

• The projector is equipped with ventilation holes(intake) on the bottom and ventilation holes(exhaust) on the front. do not block or place anything near these holes, or internal heat build-up may occur, causing picture degradation or damage to the projector.

 Never insert materials as paper into the lower of the projector.

 Ensure good ventilation around the projector.
 The distance between the projector and the ceiling or bottom should be more than 20cm/8 inches.

Place this projector in adequate temperature and humidity conditions.

• Install this projector only in a location where adequate temperature and humidity is available. (refer p.47)

Don't place the projector where it can be covered with dust.

This may cause overheating of the projector.

The projector is manufactured using high-precision technology. You may, however, see tiny black points and/or bright points (red, blue, or green) that continuously appear on the projector Screen. This is a normal result of the manufacturing process and does not indicate a malfunction.

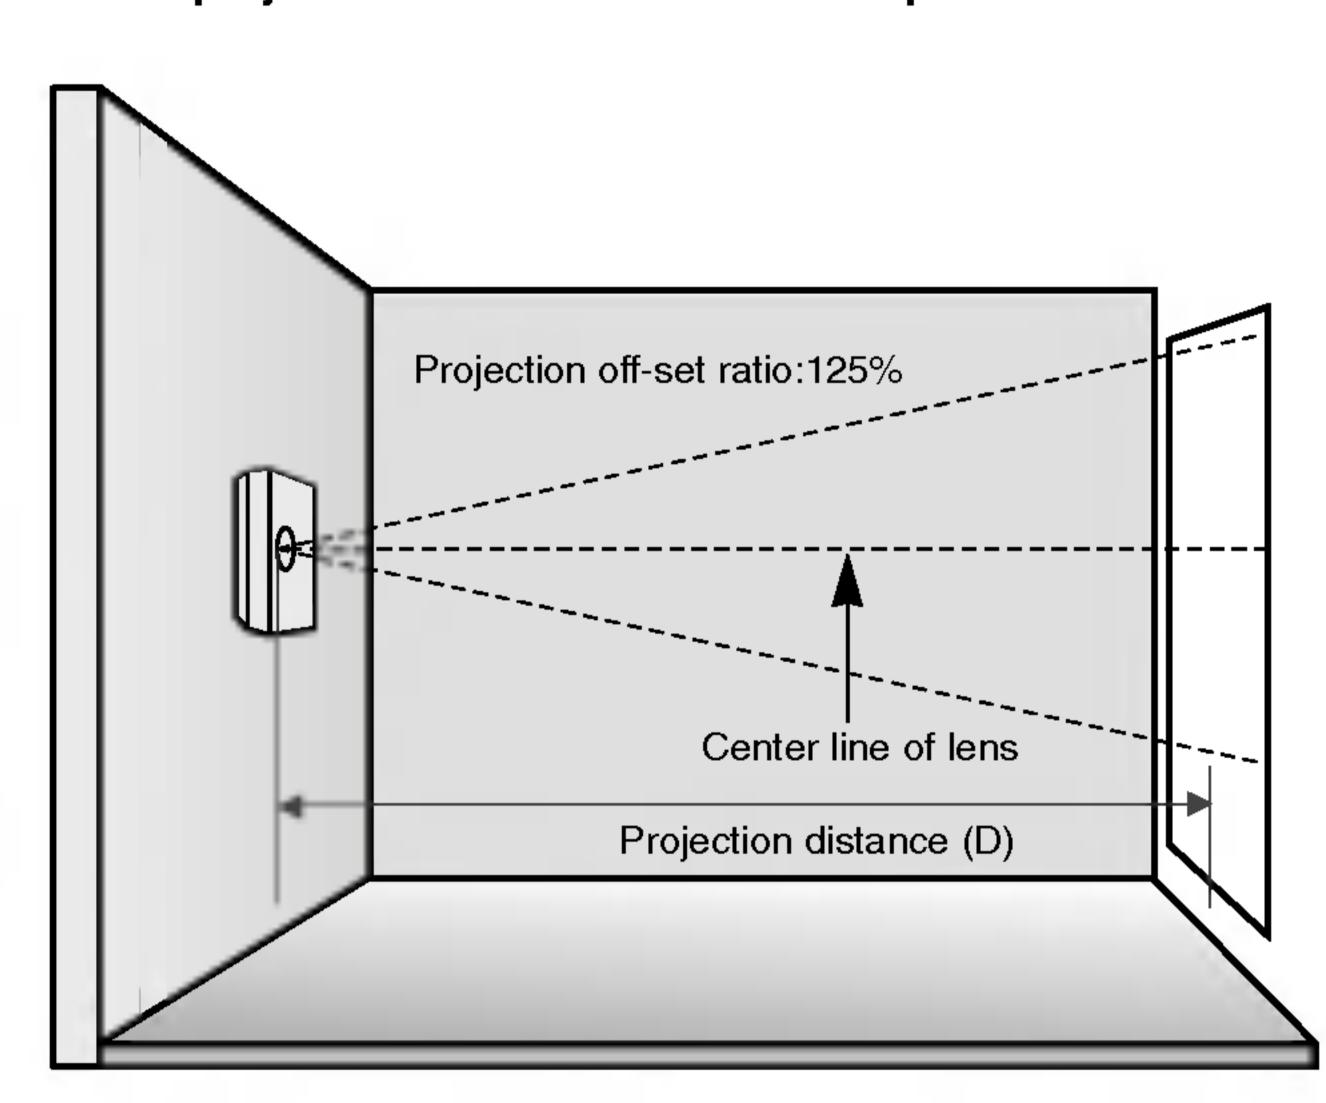

To display DTV programs, it is necessary to connect a DTV receiver (Set-top Box) and connect it to the projector.

If there is no input signal, the Menu will not be displayed on screen.

# Basic Operation of the Projector

- 1. Place the projector on a wall.
- 2. Place the projector the correct distance from the screen. The distance between the projector and the screen determines the actual size of the image.
- 3. Position the projector so that the lens is set at a right angle to the screen. If the projector is not set at a right angle, the screen image will be crooked. If this is so then the keystone adjustment may correct this (Refer to page 31.)
- 4. Connect the cables of the projector to a wall power socket and other connected sources.

### projection distance based on the picture format

16:9 picture format mm / inches					n / inches				
screen size	40″	60″	80″	100″	120″	140″	160″	180″	200″
The shortest distance (D)	1507/59	2273/89	3039/120	3804/150	4570/180	5336/210	6101/240	6867/270	7633/301
The longest distance (D)	2109/830	3180/1252	4251/1674	5323/2096	6394/2517	7466/2939	8537/3361	9608/3783	10680/4205

<sup>\*</sup> The longest/shortest distance show status when adjusted by the zoom function.

# Installing the projector to the wall

# Safety instructions on installing the wall

Please take note of the safety instructions to prevent any potential accident or misuse of the projector.

→ Safety Instructions are given in two forms as detailed below.

MARNING: The violation of this instruction may cause serious injuries and even death.

 $oldsymbol{oldsymbol{oldsymbol{\Lambda}}}$  NOTES : The violation of this instruction may cause light injuries or damage to the projector.

After reading this manual, keep it in the place that the user always can contact easily.

# / WARNING

Do not install this product on the place where it cannot be supported.

It may cause the product to fall and could cause injuries.

Do not hang on or impact this product.

It may cause the product to fall and could cause injuries.

# NOTES

Follow the instructions when installing this product.

Otherwise it may cause serious injuries or damage of the product.

Do not install this product by yourself. Get some help from others.

It may cause the product to fall and could cause injuries.

Before installing, check whether the material of wall satisfies the specifications and make sure to use enclosed anchors supplied with the product.

Otherwise it may cause safety problem.

When drilling use drill and drill bit specified by the manufacturer. And the depth of the hole should satisfy the specifications.

Otherwise it may cause safety problem.

Do not place a heat source (radiator or heater) or a humidifier under the installed product.

It may cause a fire or could give an electric shock.

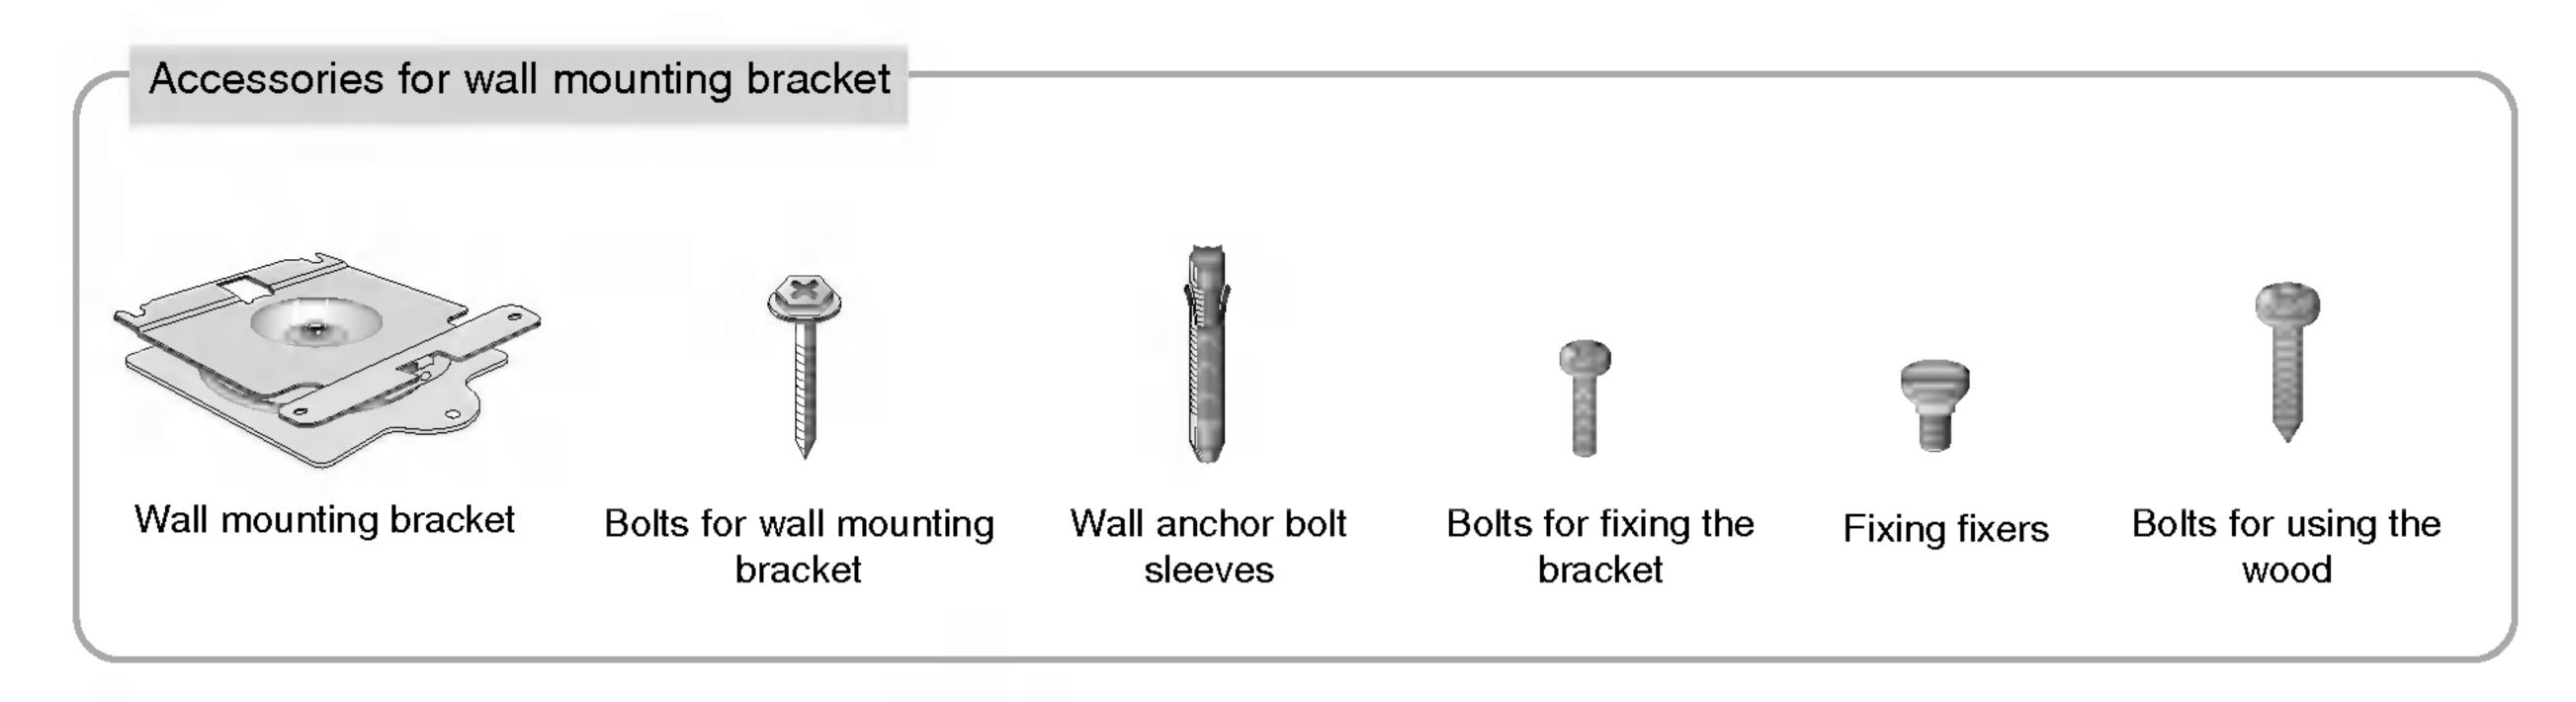

Do not install this product near a sprinkler, a sensor, a high voltage electric line, any power source or the place where impact or vibration can affect.

Unplug the product before installing.

Otherwise it may cause a fire or could give an electric shock.

Do not install this product barehanded.

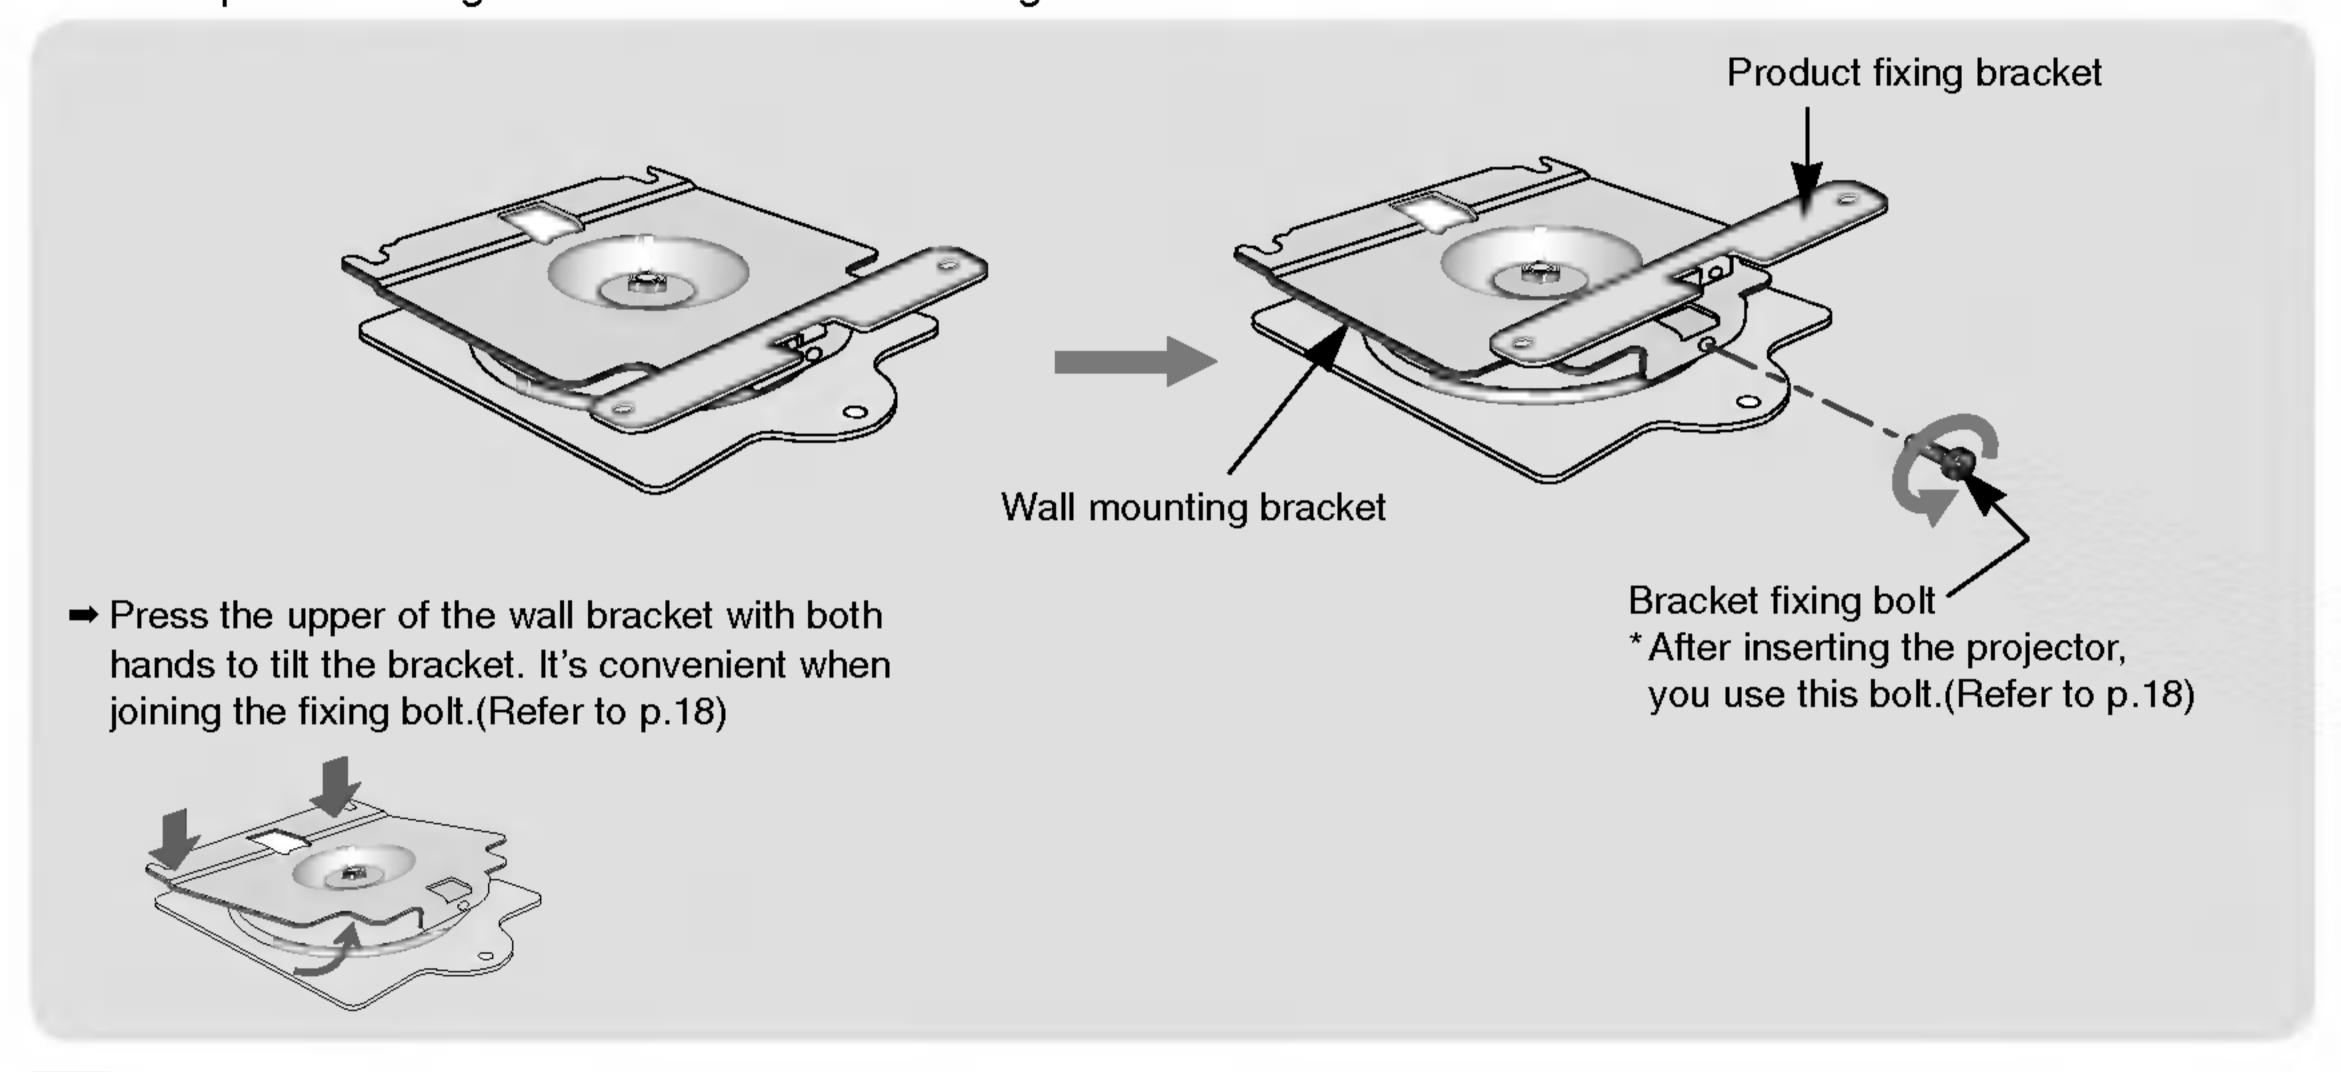

It may cause injuries.

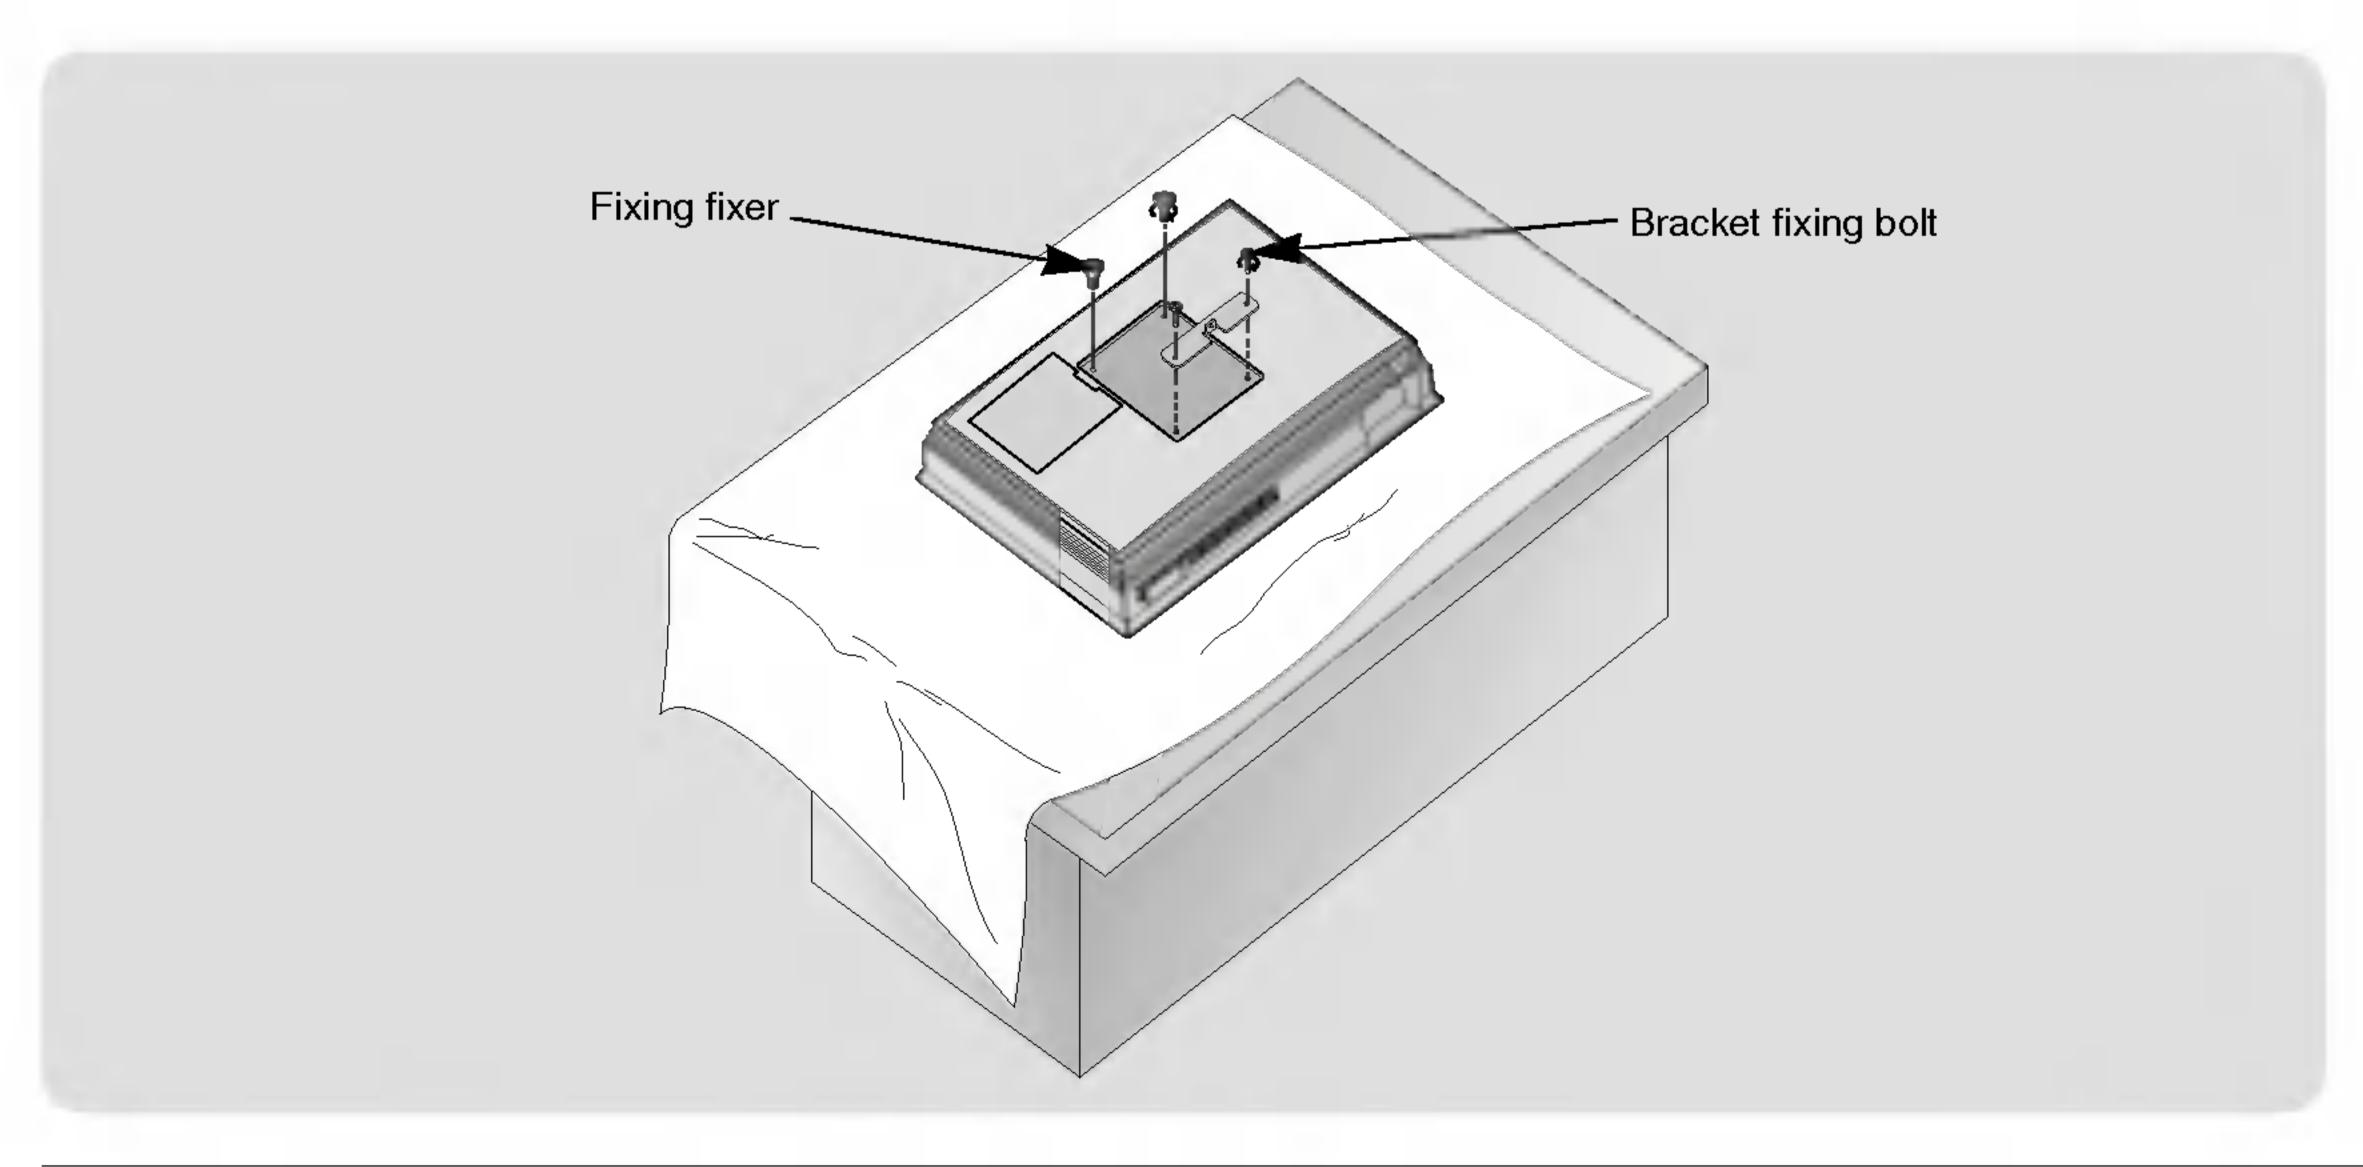

# Installing Wall mounting bracket

# Detach the products

- Detach bolt from wall mounting bracket.
- Detach product fixing bracket from Wall mounting bracket.

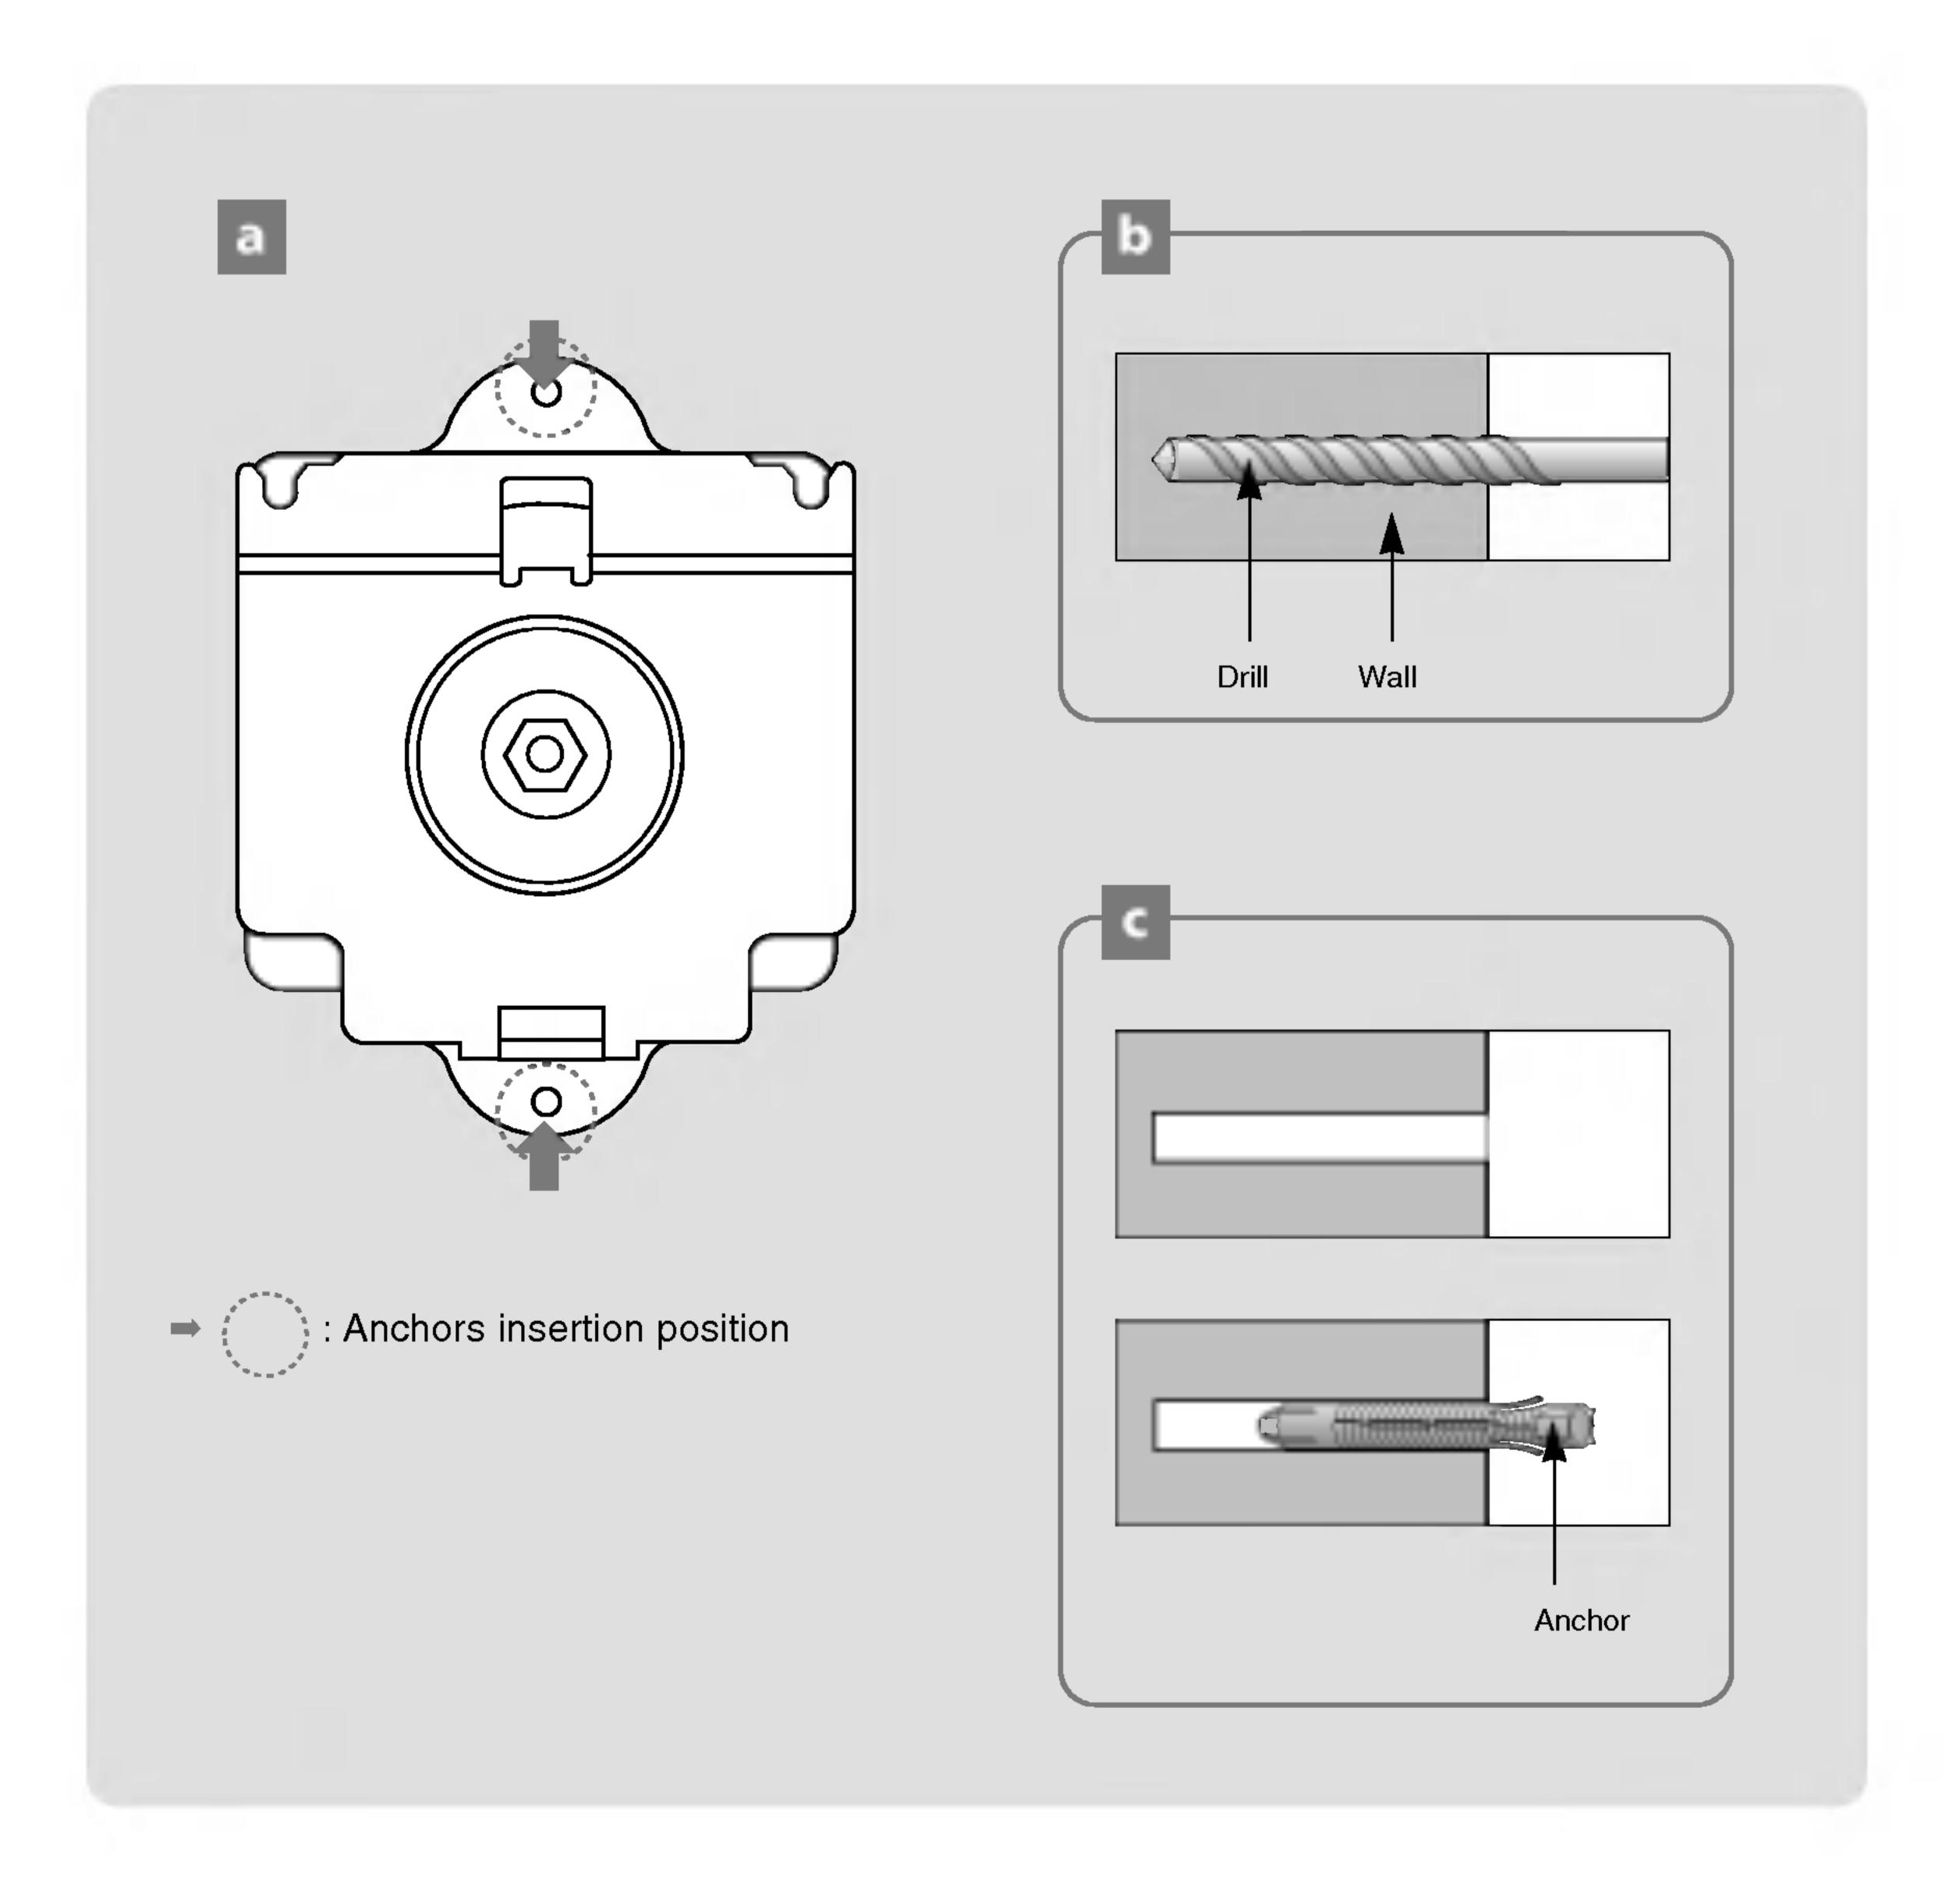

- Assemble projector with the product fixing bracket
- a. Carefully place the lens side down on a cushioned surface that will protect the lens from damage.
- b. Insert the 2 fixing fixers on the top of the projector.(It's top that the point of auto ventilation door.)
- c. Insert the product brackets detached in the fig.1 on the projector with bracket fixing bolts.

- 3
  - Insert anchors or bolts for using the wood after marking the positions where products are mounted on the wall
- Check the surface or thickness that the wall mounting bracket.
- When the surface that the wall mounting bracket is concrete, strong, weak natural rock, brick and hollow block, you can use the supplied anchors or bolts.
- Only thickness of strike off material is less than 20mm, you can use the supplied anchors or bolts.
- Only making wood into wall, you can use the supplied bolts for using the wood.
- Plasterboard is not a sufficiently strong enough material.

Using the wall anchor bolt sleeves and bolts for wall mounting bracket

- a. After matching the positions of the wall bracket, mark the positions of the anchor.
- b. At the position of anchor marked in the wall, using on 6mm drill appropriate for the material on the wall, drill each hole to a depth of above 40~50mm.
- c. Clean each drilled hole and insert an anchor supplied with the wall mounting bracket into each hole.

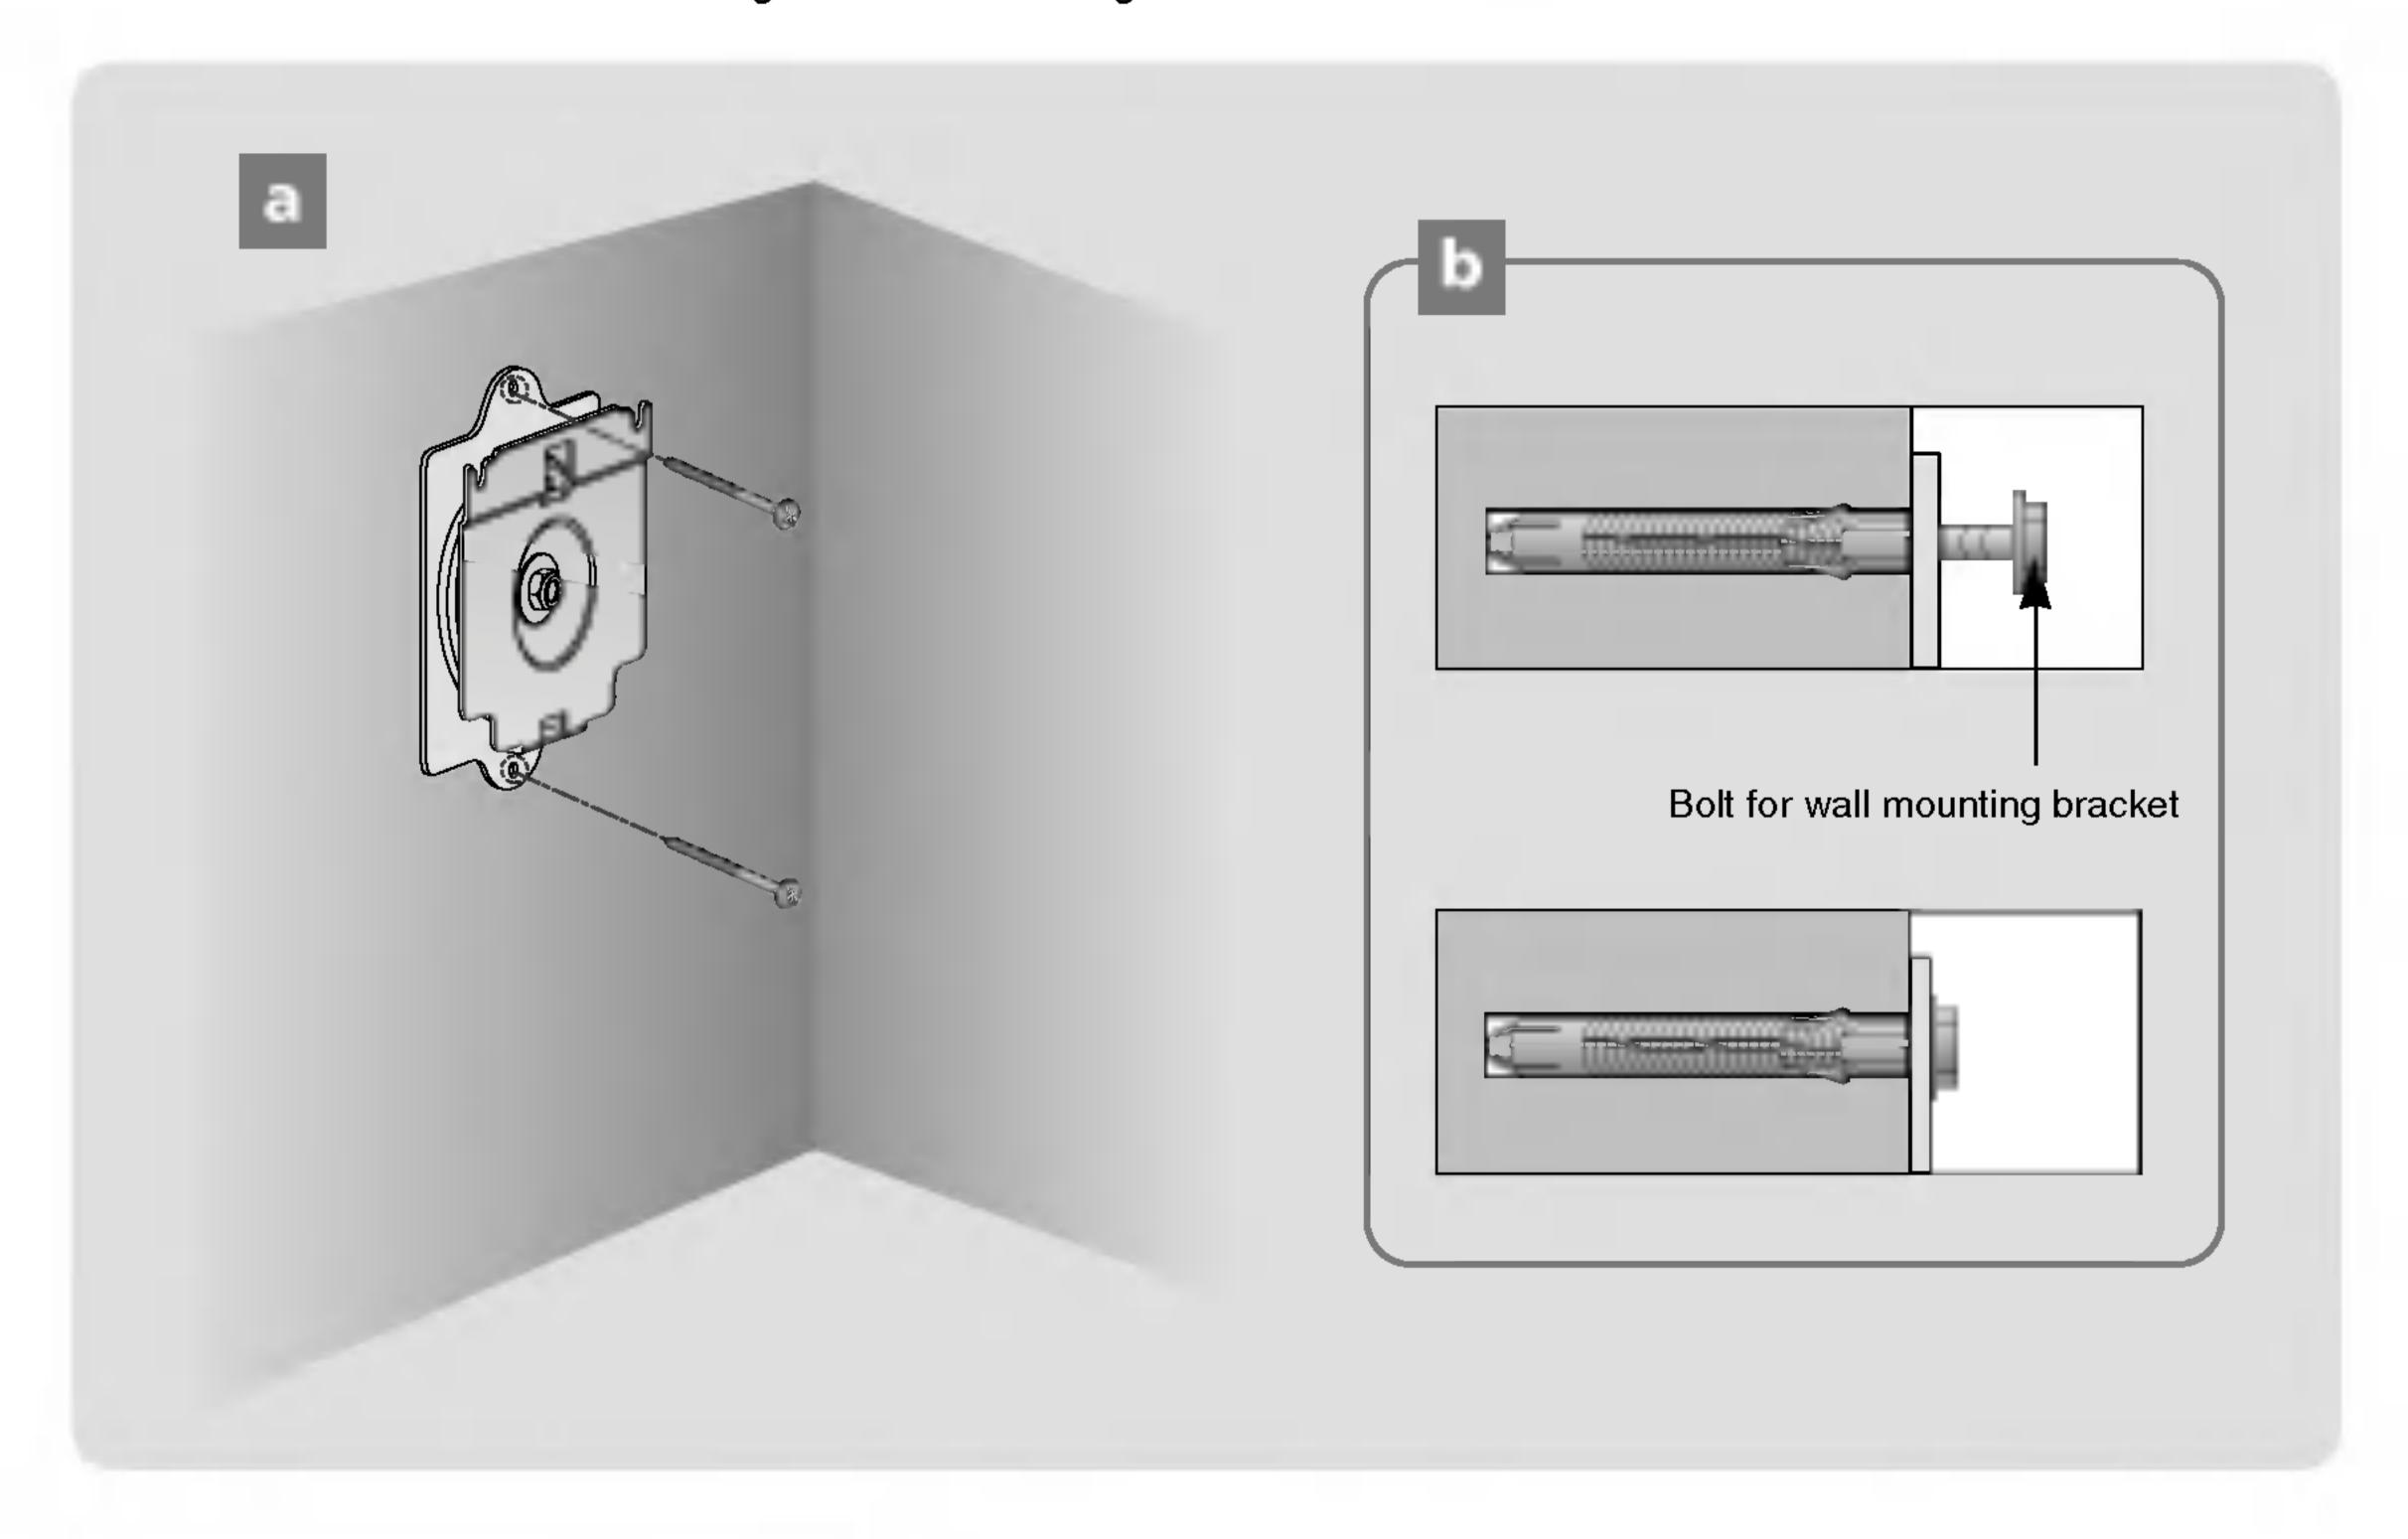

Install the wall mounting bracket on the wall

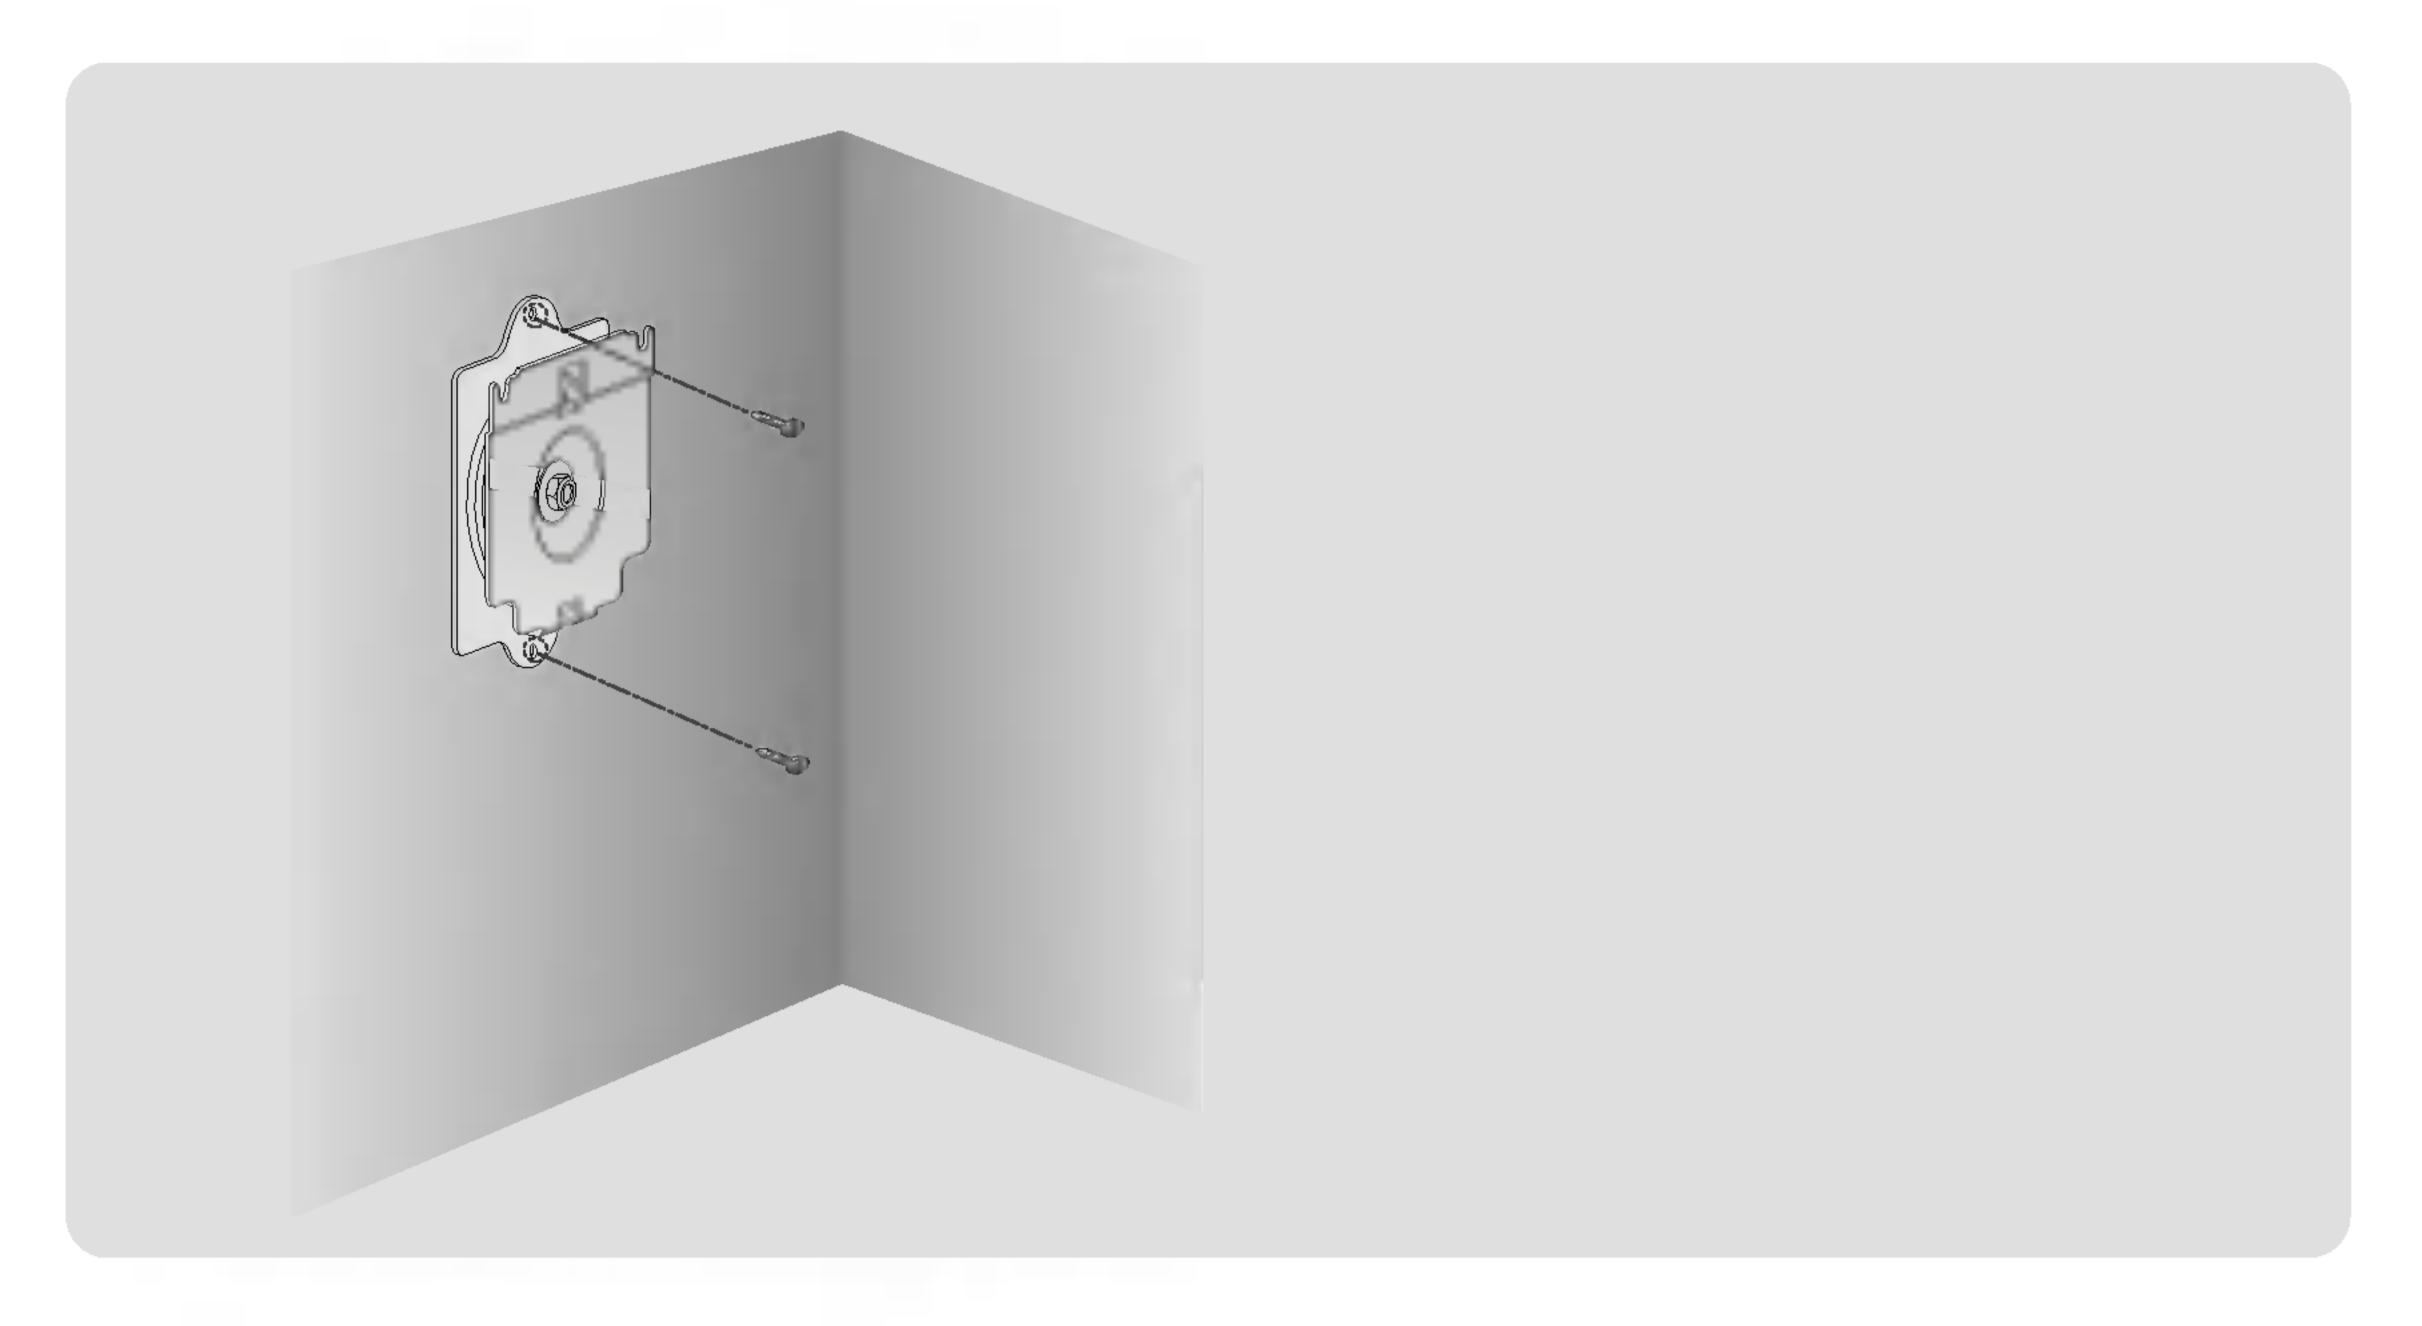

Using the wall anchor bolt sleeves and bolts for wall mounting bracket

- a. Mount the wall mounting bracket on the wall as setting the hole.
- b. Insert the bolts for wall mounting bracket as setting the each hole.

# Using the bolts for using the wood

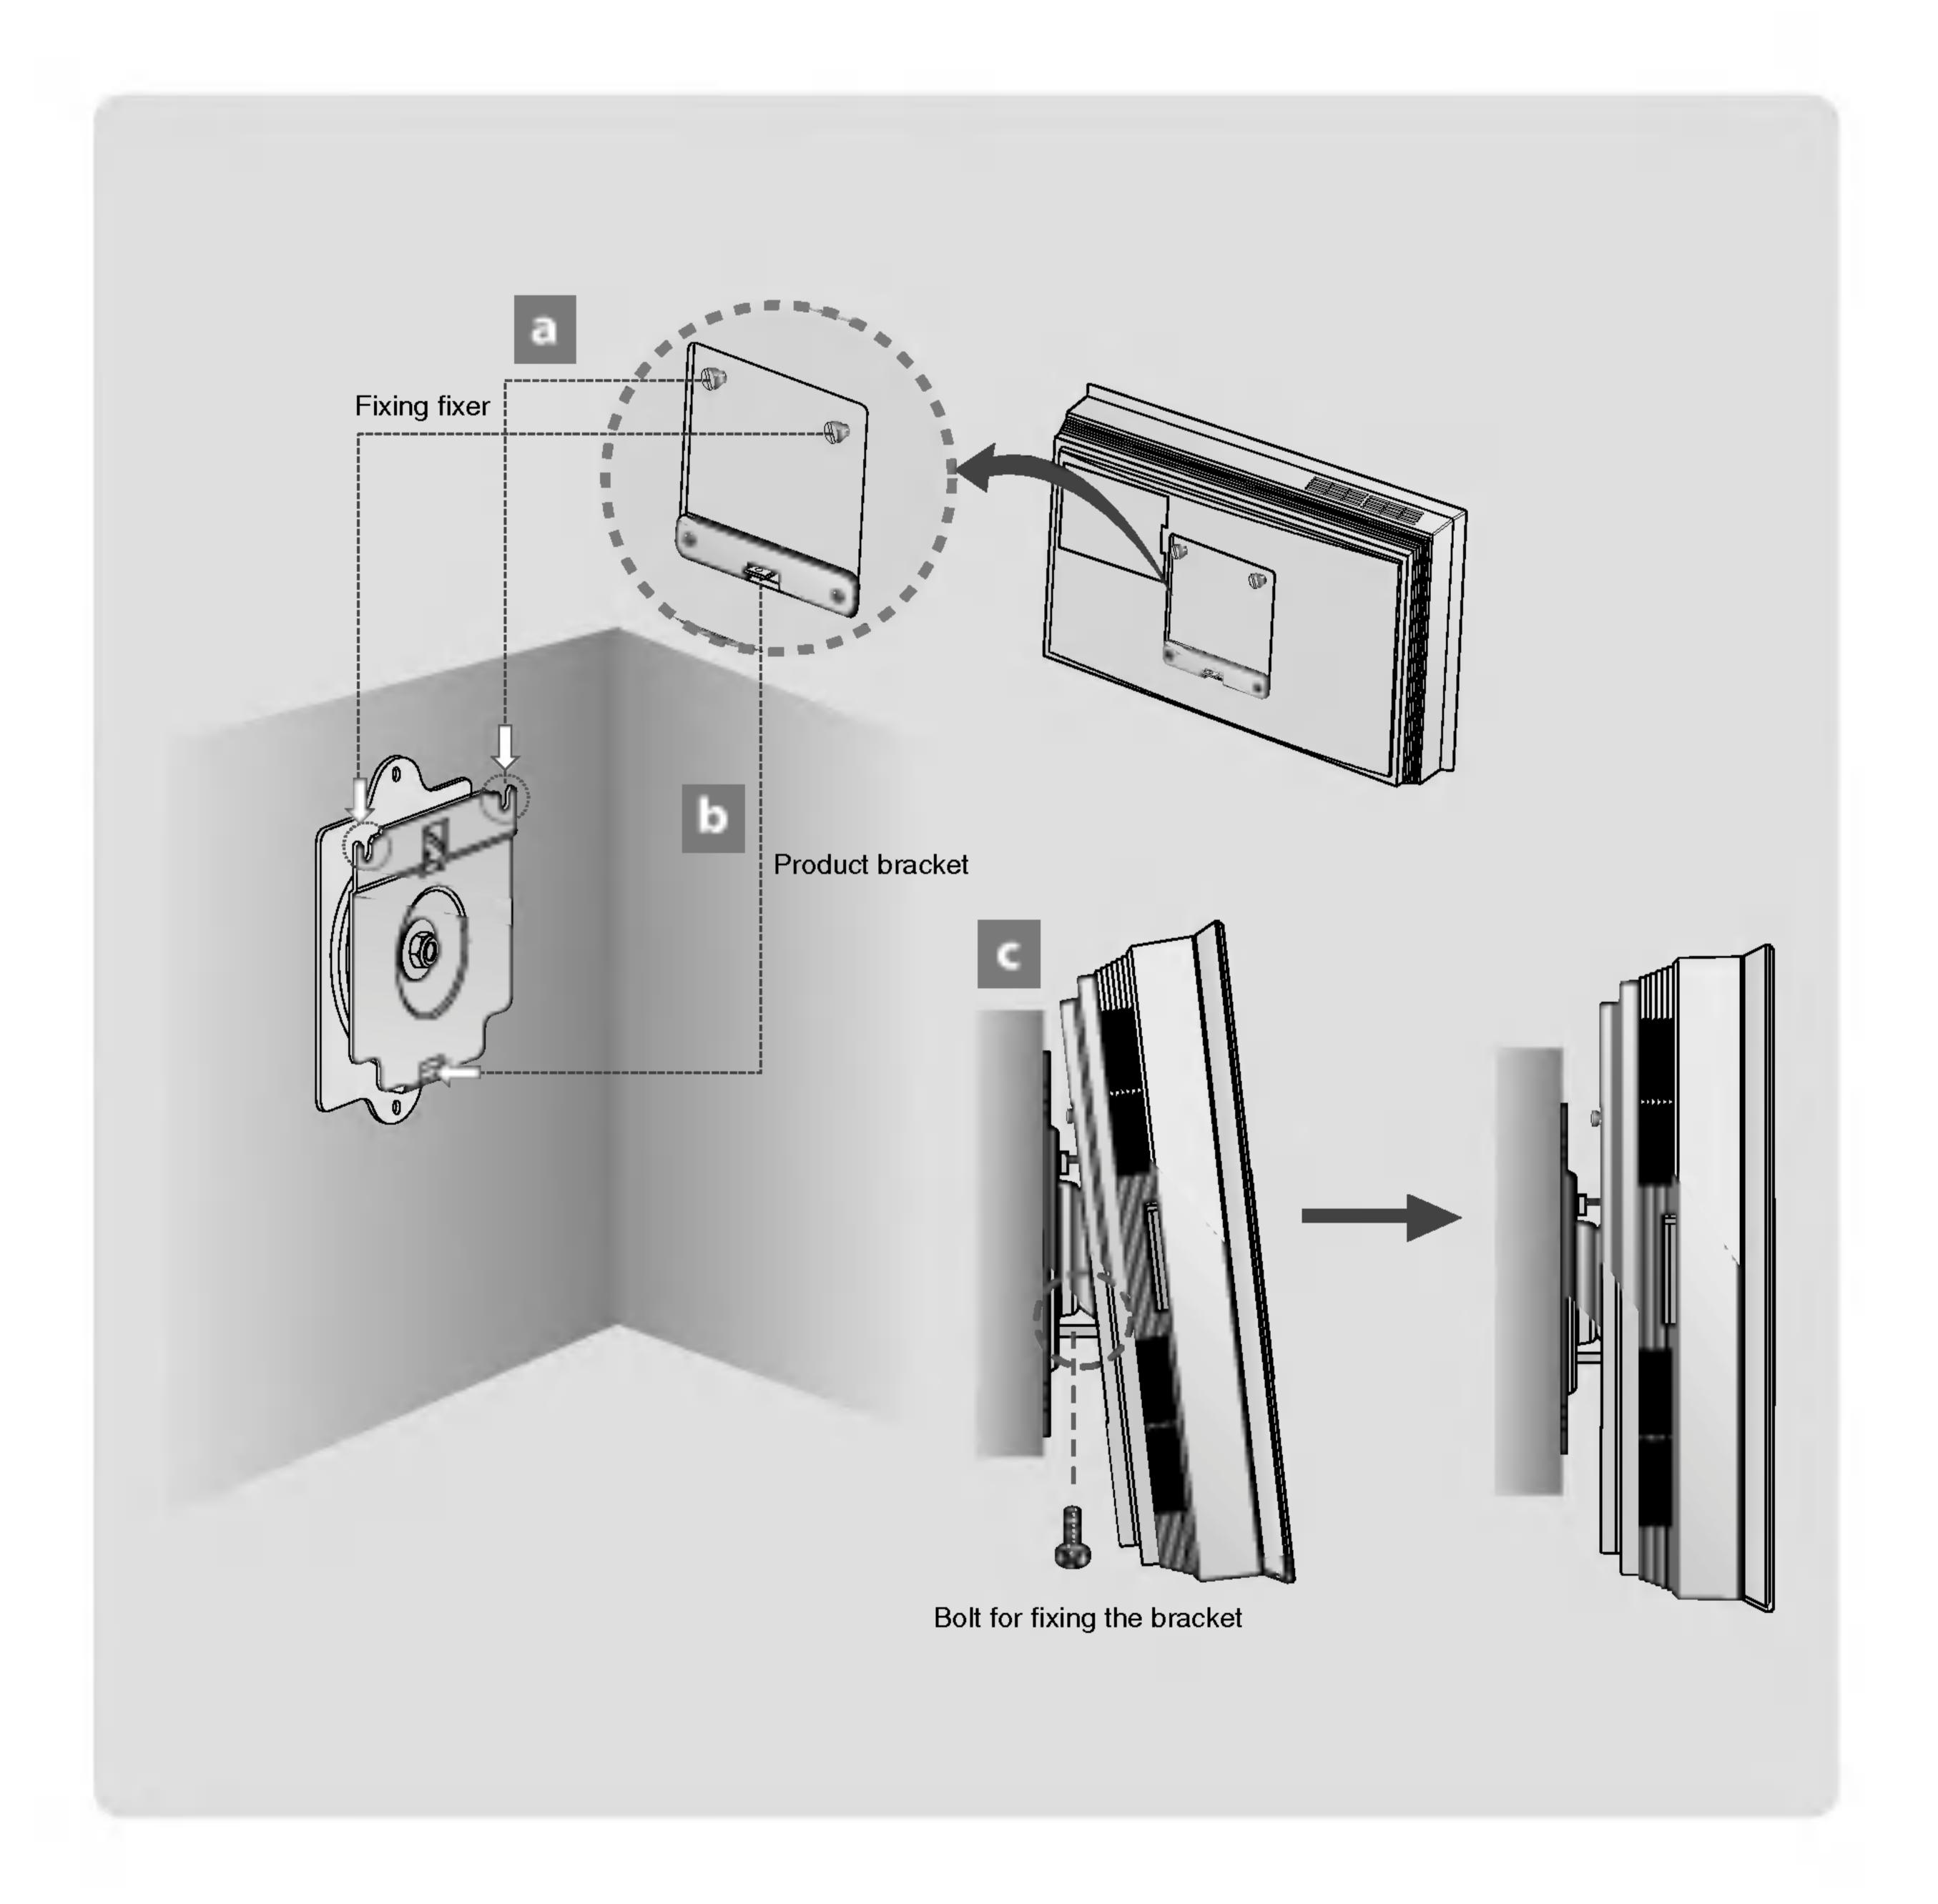

- Only making wood into wall, you can use.
- After matching the position of the wall, mount the wall mounting bracket using the bolts for using the wood supplied.

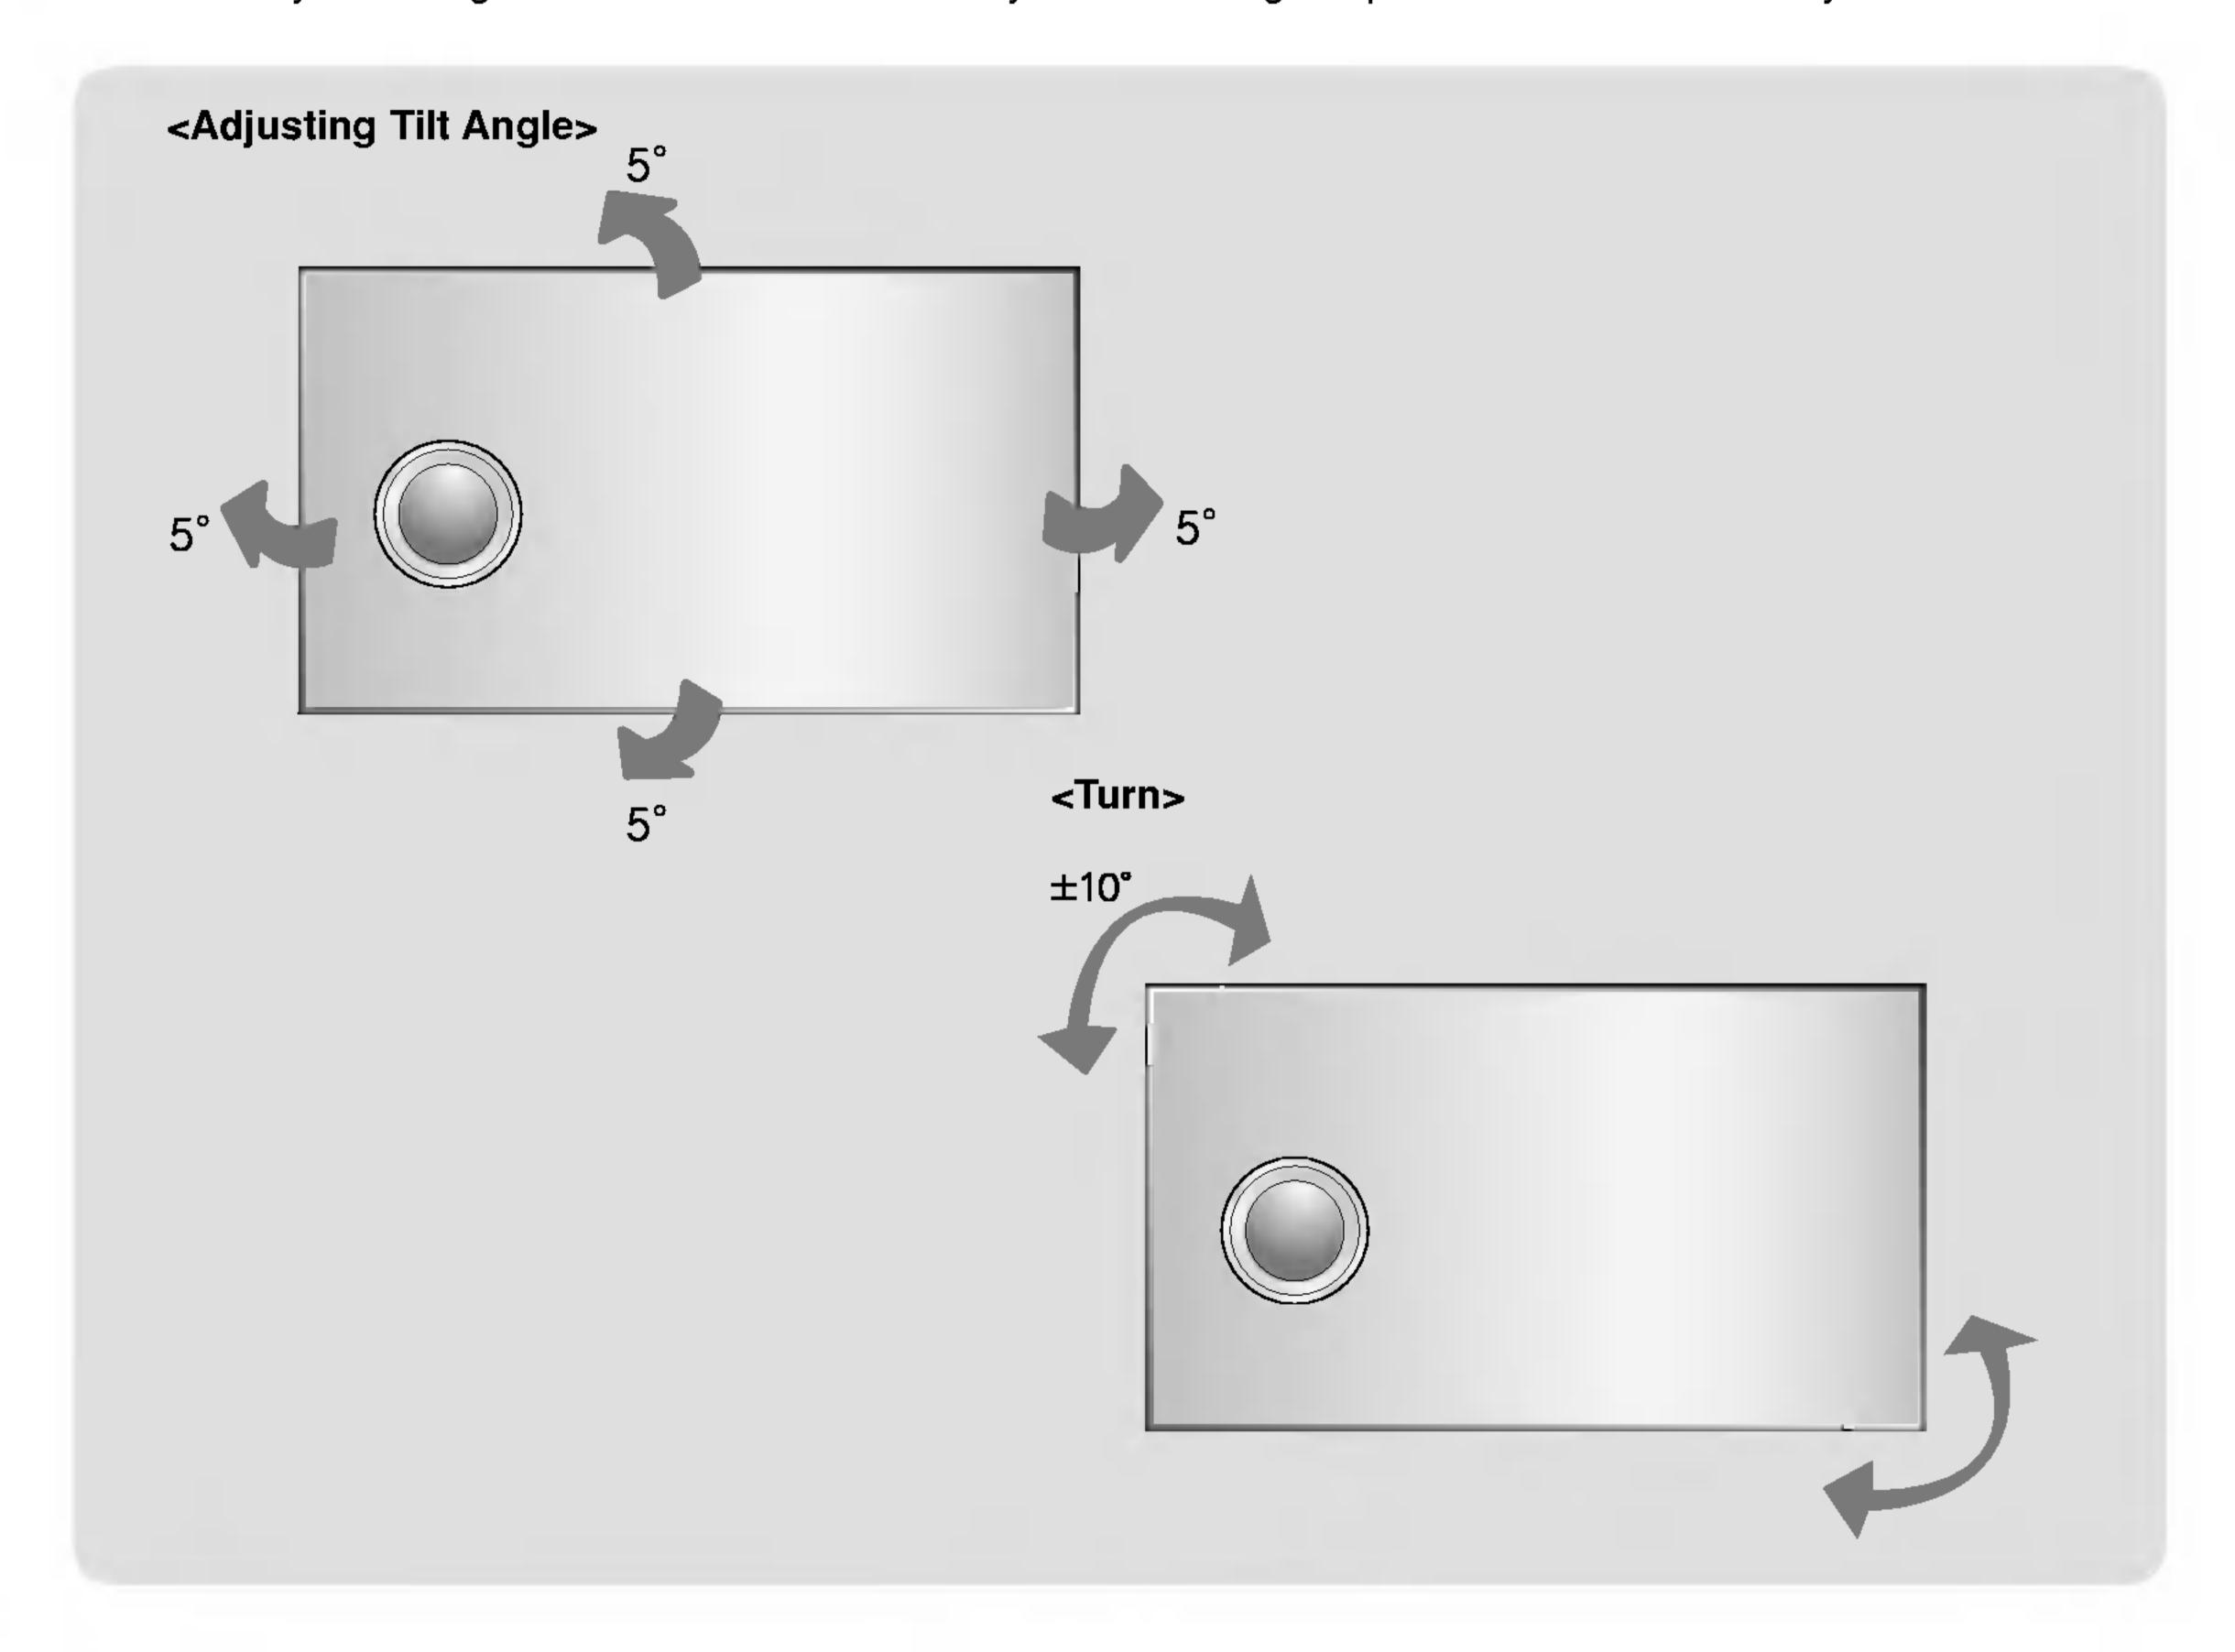

# Assemble the projector with the wall mounting bracket

- Assemble a projector with the wall mounting bracket installed on the wall as below Fig. Do not install this product by yourself.
   Get some help from others. It may cause the product to fall and could cause injuries.
- a. Hang fixing 2 fixers on a upper groove.
- b. Insert the product bracket to the groove of the lower wall mounting bracket.
- c. After assembling and fixing the projector, insert the bolts for fixing bracket to the hole.
- d. Entirely check the projector fixed as pulling the lower projector.

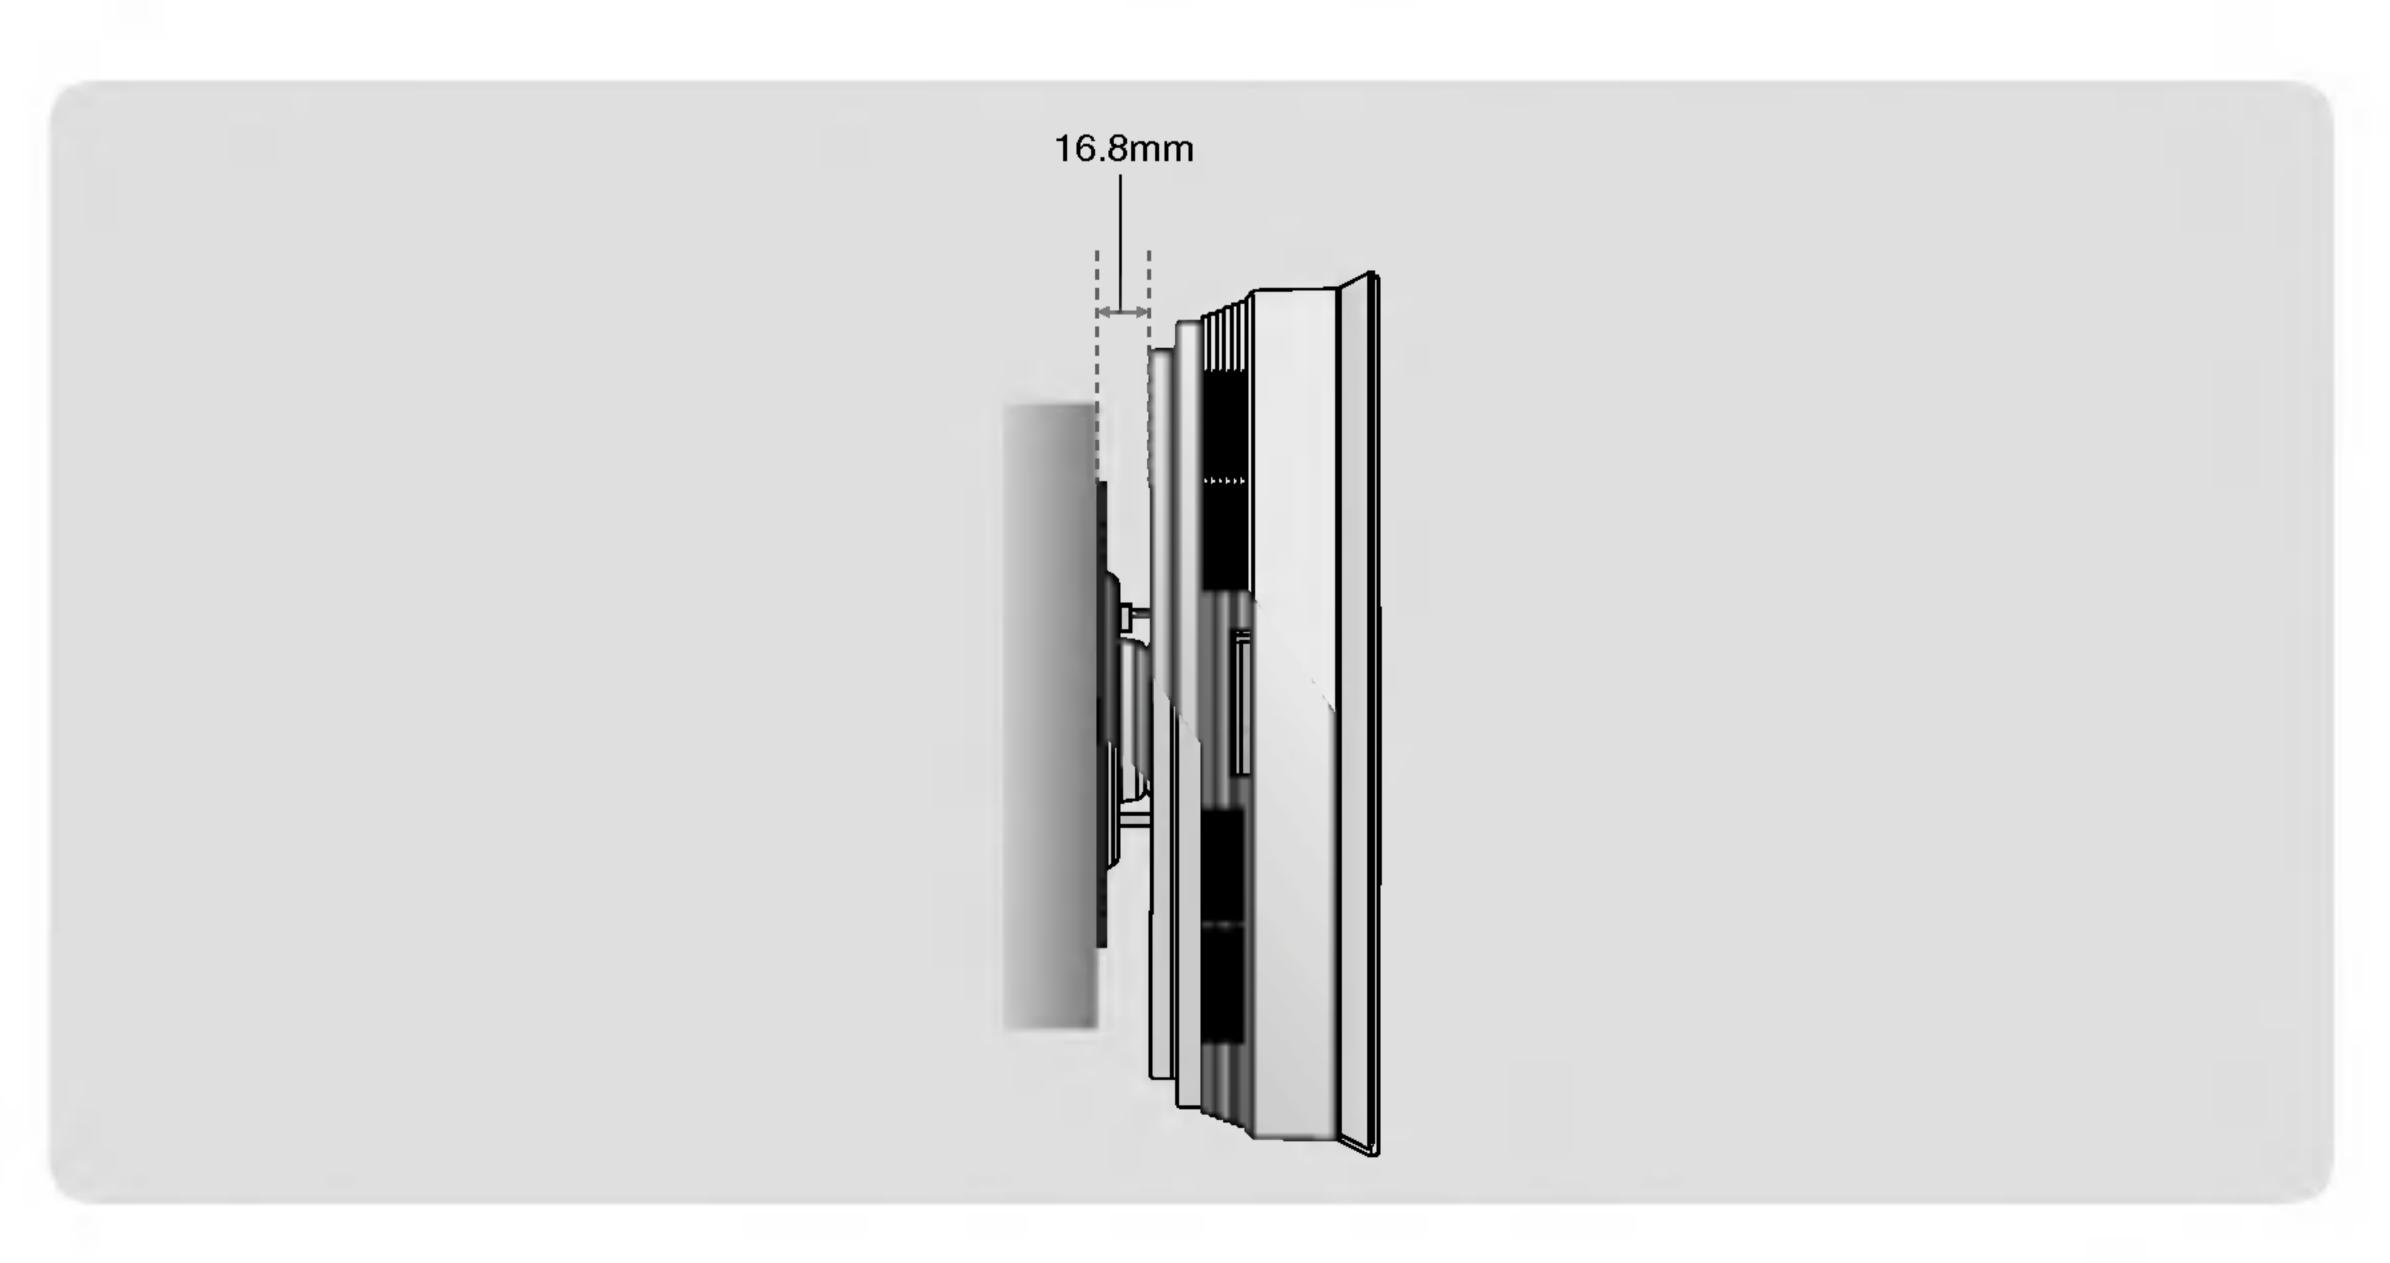

# Adjusting Tilt Angle

- Adjustable angle range is 5°(upside/downside/left/right) and turn range is ±10.
- Do not adjust tilt angle with too much force. It may cause damage of product or could cause injuries.

# Adequate installation space from the wall

- Leave 16.8 mm between the projector and the wall when installing the wall bracket on the wall.

# Turning on the Projector

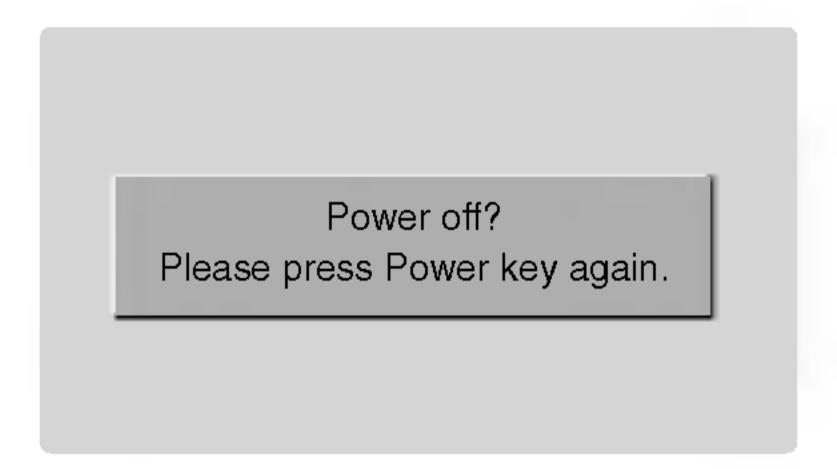

- 1. Connect power cord correctly.
- 2. Press the **POWER** button on the remote control or top cover. (Green operation indicator flashes during cooling of the lamp.)
  - When projector is turned on, auto sliding door and shutter are opened, automatically.
  - It will take about 25 second to display the picture after power on because the projector lamp has to warm up.
  - An image will appear after the operation indicator light turns (Green).
  - Select the source mode with the SOURCE button.
  - Leave the projector plugged in for at least 2 minutes after switching off the projector, as this will allow the lamp cooling to continue which will help to preserve the lamp life.

### Note!

\* Don't unplug the power cord while the ventilation fan (inlet/outlet) is working. If so, you take longer time by lamp on.

# Turning off the Projector

1. Press the **POWER** button on the top cover or remote control.

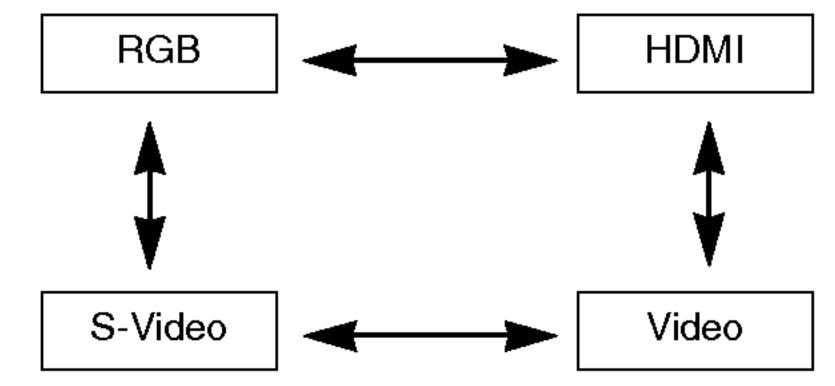

- 2. Press the **POWER** button on the top cover or remote control again to cut off the power.
- 3. If the operation indicator LED is orange and blinking, do not disconnect the mains supply until the operation indicator LED is lit up constantly (orange).
  - If the operation indicator LED is orange and blinking, the power button on the top cover or on the remote control will not operate.

# Selecting source mode

1. Press the **SOURCE** button.

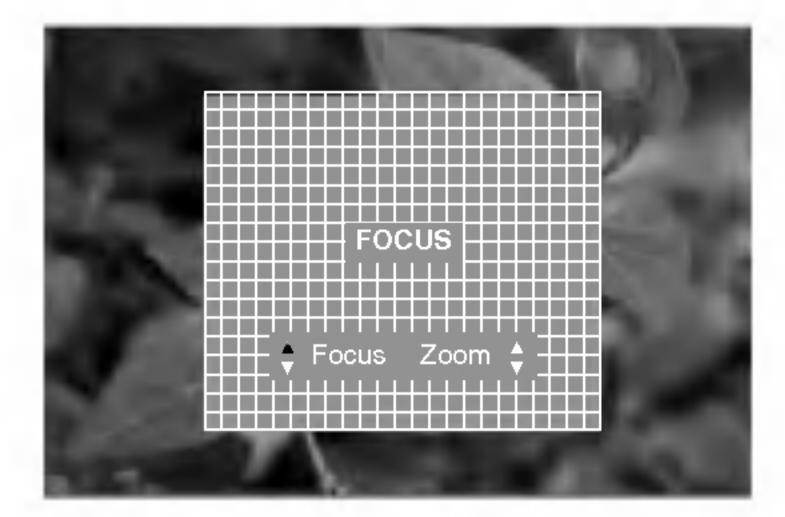

2. Each press of the ◀, ▶ button changes the display as below.

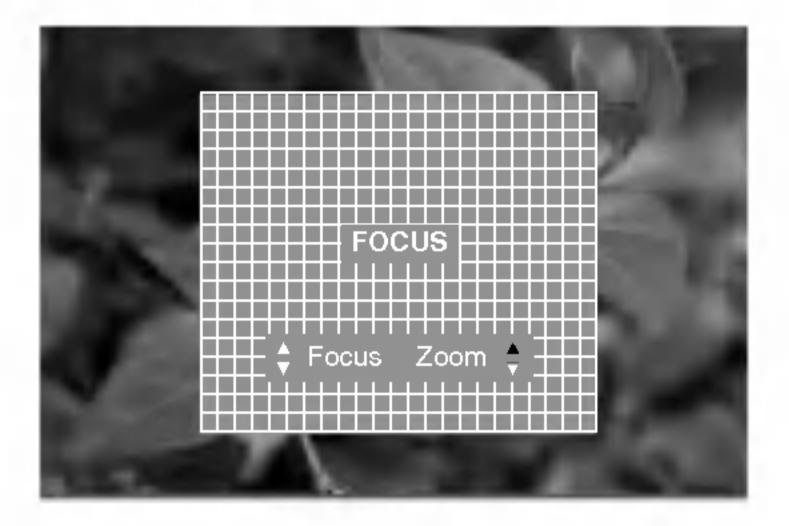

# Focus, Zoom, Position of the Screen Image

When an image appears on the screen, check if it is in focus and fits the screen.

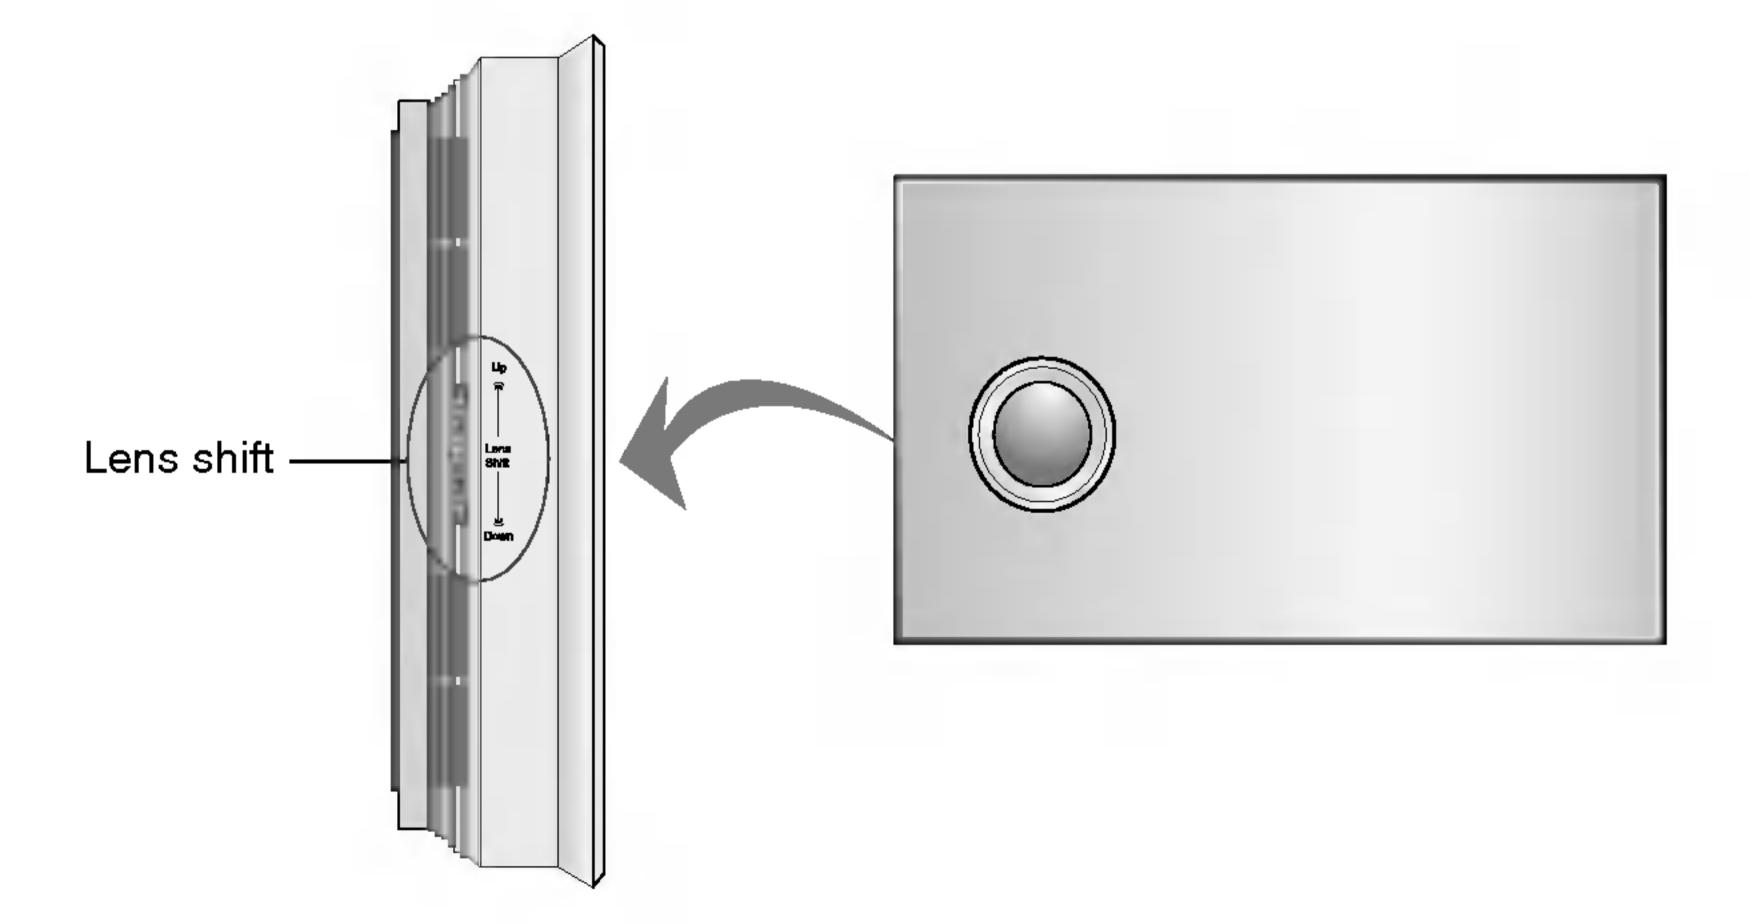

• Adjust the focus by using FOCUS button of the remote control or the control panel.

• Adjust the screen size by using **ZOOM** button of the remote control or the control panel.

If you want to adjust the screen image to upside/downside, adjust the lens shift as shown below.

• Adjust the Lens shift to upside/downside the set the wanted position of screen.

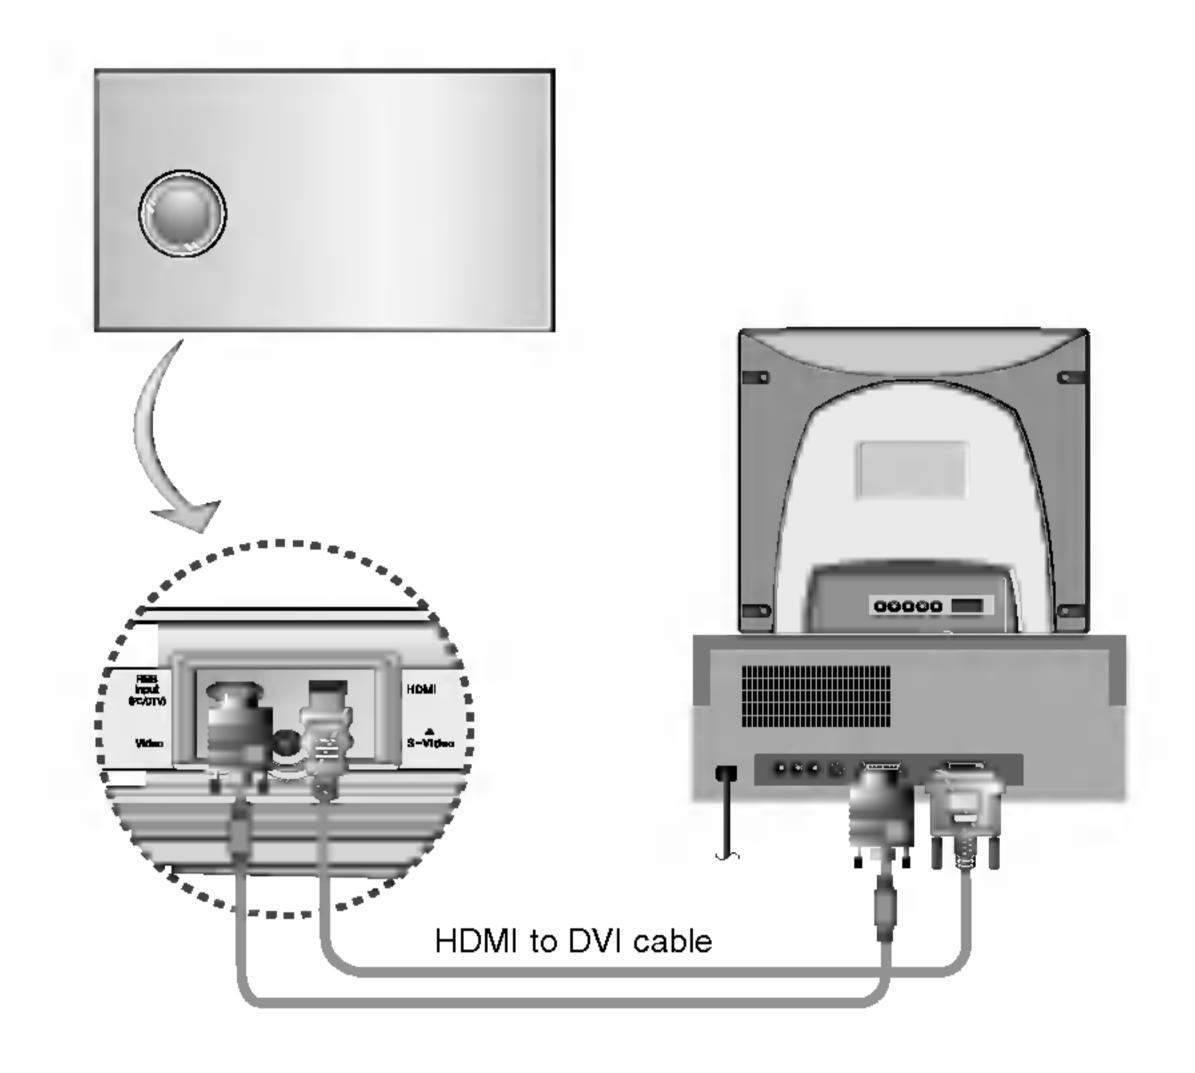

# Connection

# Connecting to a Desktop PC

- \* You can connect the projector to a computer that has VGA, SVGA, XGA and SXGA output.
- \* Refer to page 41 for the supported monitor displays of the projector.

#### < How to connect >

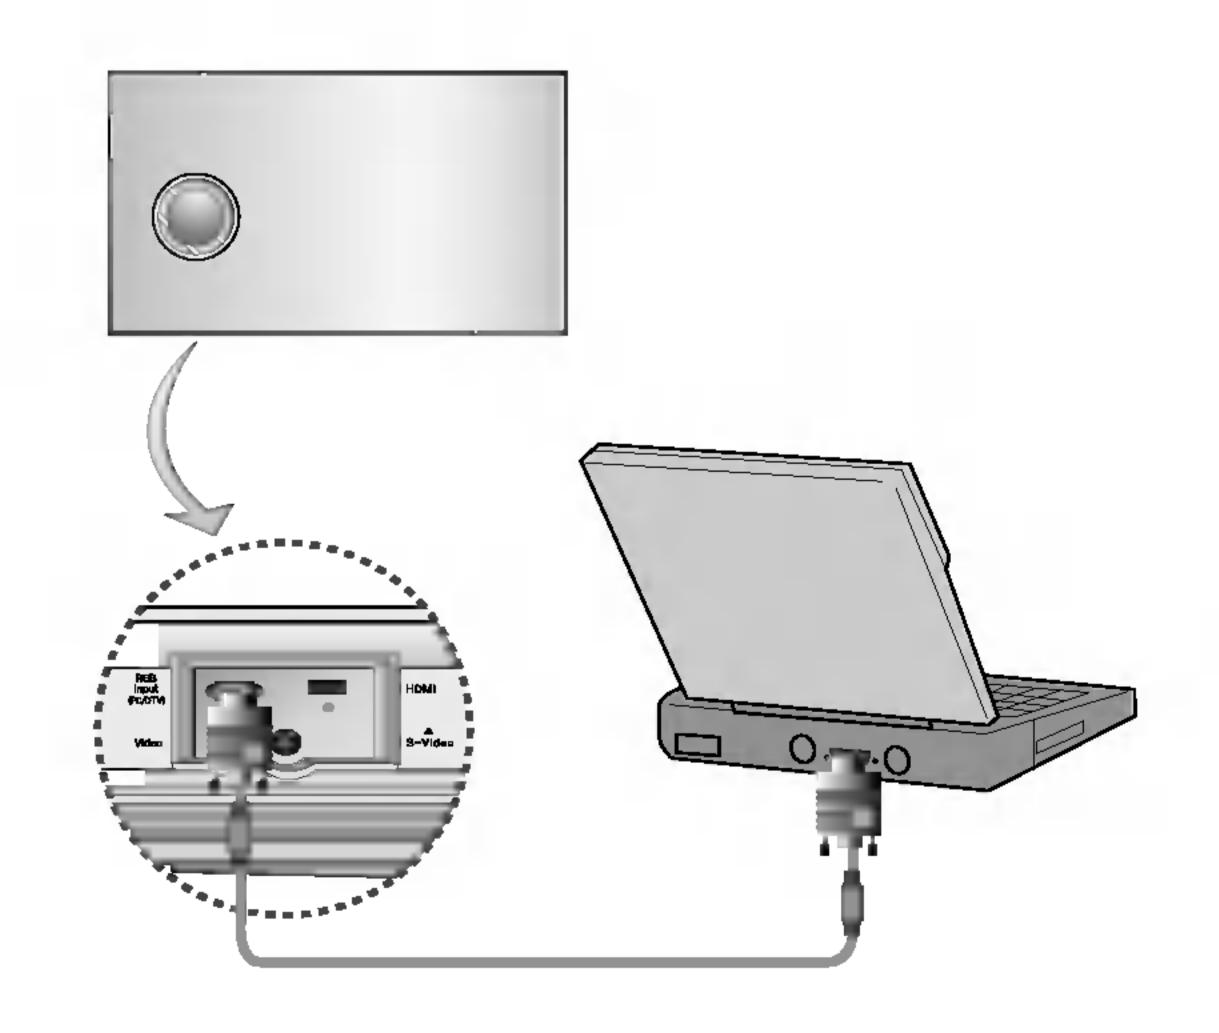

- a. Connect computer cable to **RGB Input (PC/DTV)** of the projector.
- b. If the PC has HDMI output, connect HDMI to DVI cable to **HDMI** Input of the projector.
  - \* If connecting the HDMI, audio is not supported.

# Connecting to a Notebook PC

## < How to connect >

- Connect computer cable to RGB Input (PC/DTV) of the projector.
  - \* If you set your computer, such as a notebook type IBM PC/AT compatible, to output the signal to both the display of your computer and the external monitor, the picture of the external monitor may not appear properly. In such cases, set the output mode of your computer to output the signal only to the external monitor. For details, refer to the operating instructions supplied with your computer.

# Connecting to a Video Source

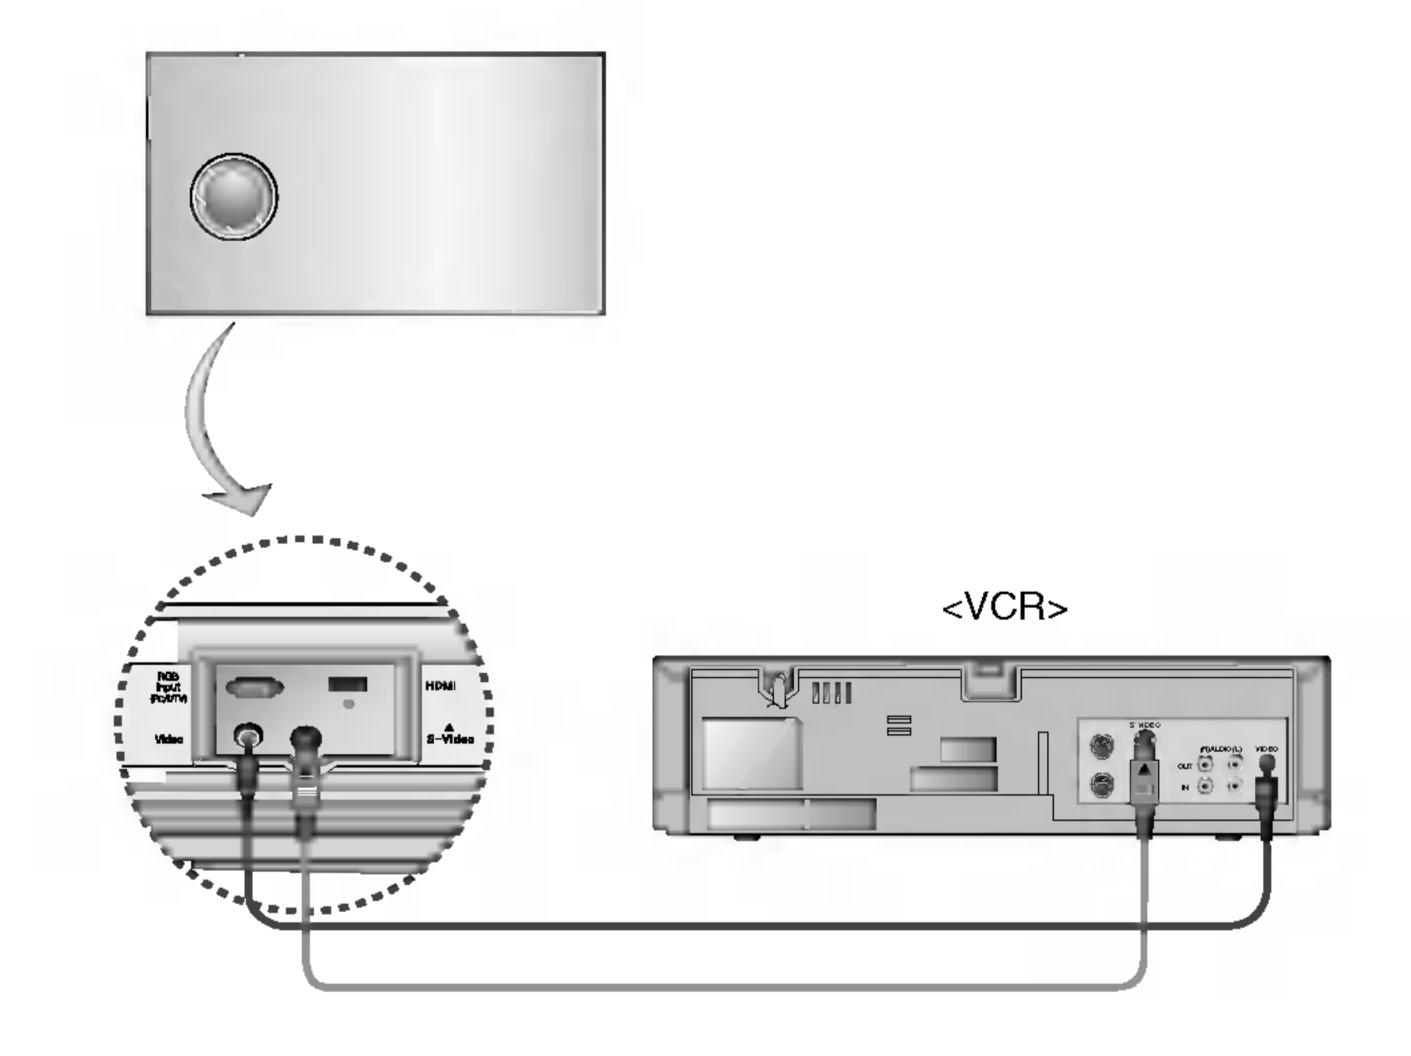

\* You can connect a VTR, a camcorder, a LDP or any other compatible video image source to the projector.

#### < How to connect 1 >

a. Connect the Video input jacks of the projector to the output jacks of the A/V source with Video cable.

#### < How to connect 2 >

- b. Connect the S-Video input jack of the projector to the S-Video output jack of an A/V source with an S-Video cable.
  - \* You can get better picture quality when connecting S-Video source to the projector.

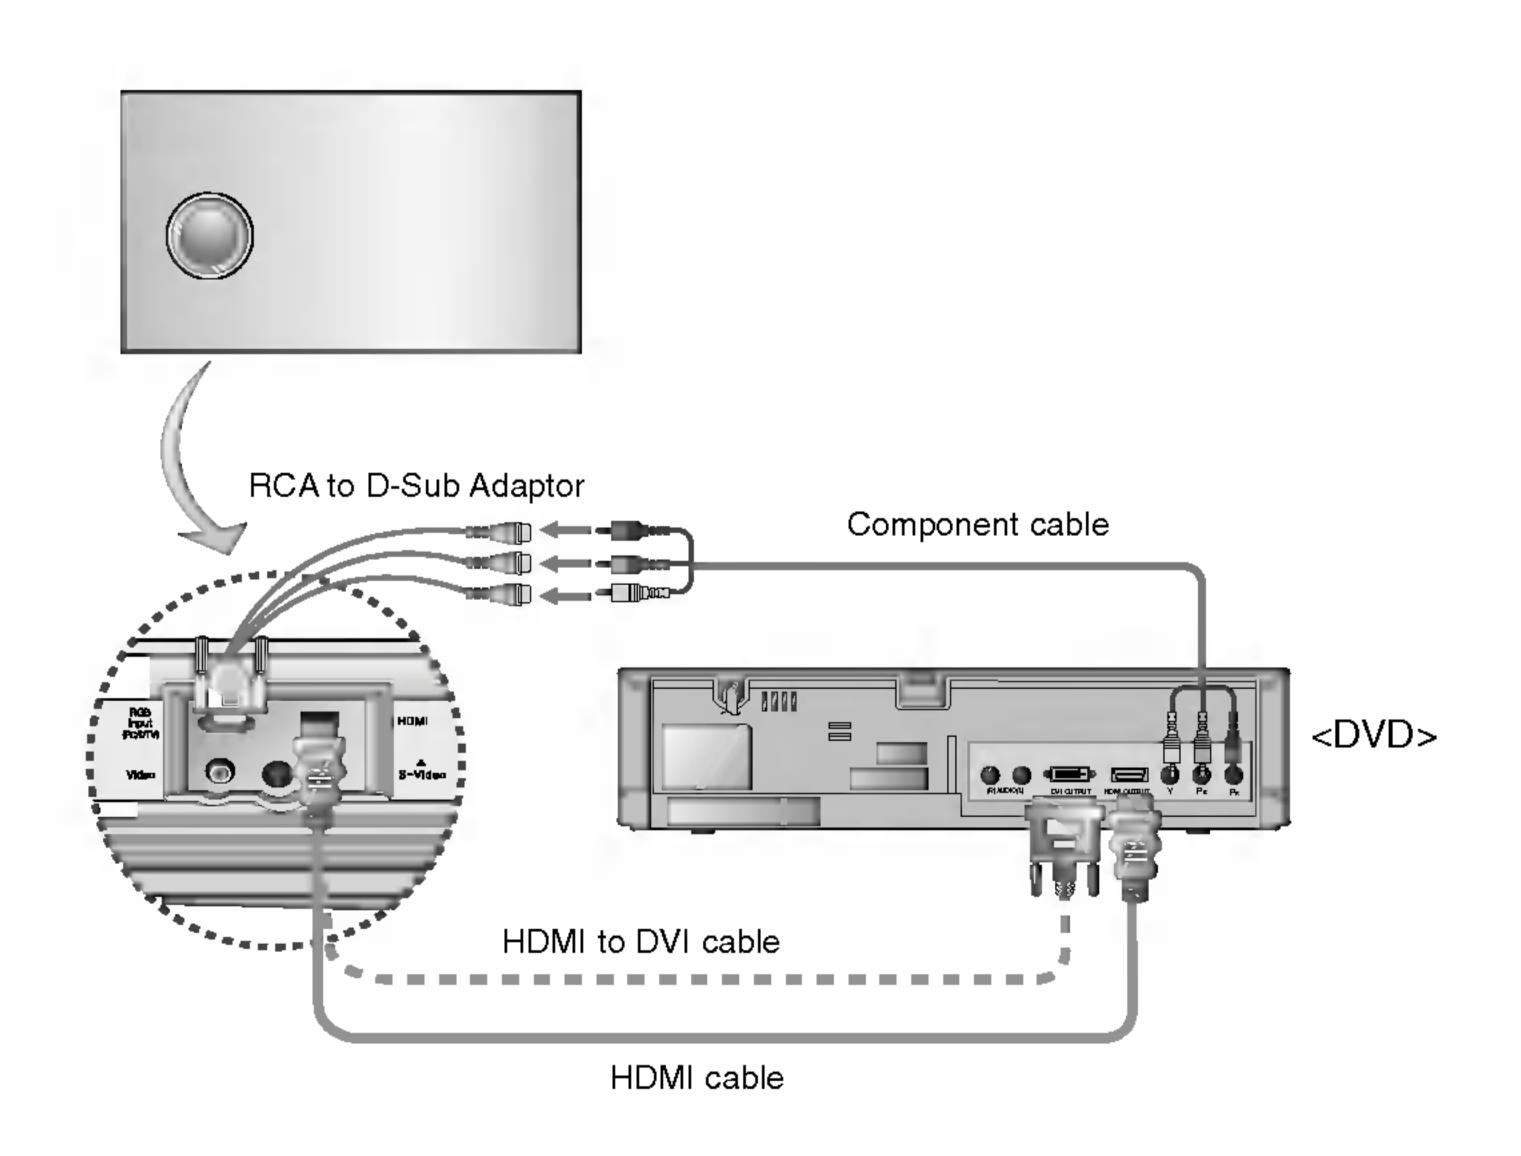

# Connecting to a DVD

\* The output jacks (Y, PB, PR) of the DVD might be labelled as Y, Pb, Pr / Y, B-Y, R-Y / Y, Cb, Cr according to the equipment.

#### < How to connect >

- a. Connect the DVD Component cable to the RCA to D-Sub Adaptor and then connect the RCA to D-Sub Adaptor to **RGB Input** (**PC/DTV**) of the projector.
  - \* When connecting the component cable, match the jack colors with the component cable.(Y=green, PB=blue, PR=red)
- b. If the DVD has HDMI output, connect HDMI cable to **HDMI** Input of the projector.
- c. If the DVD has DVI output, connect HDMI to DVI cable to **HDMI** Input of the projector.
  - \* If connecting the HDMI, audio is not supported.
- d. Use a DVD with Component 480i(576i)/ 480p(576p)/720p/1080i mode.

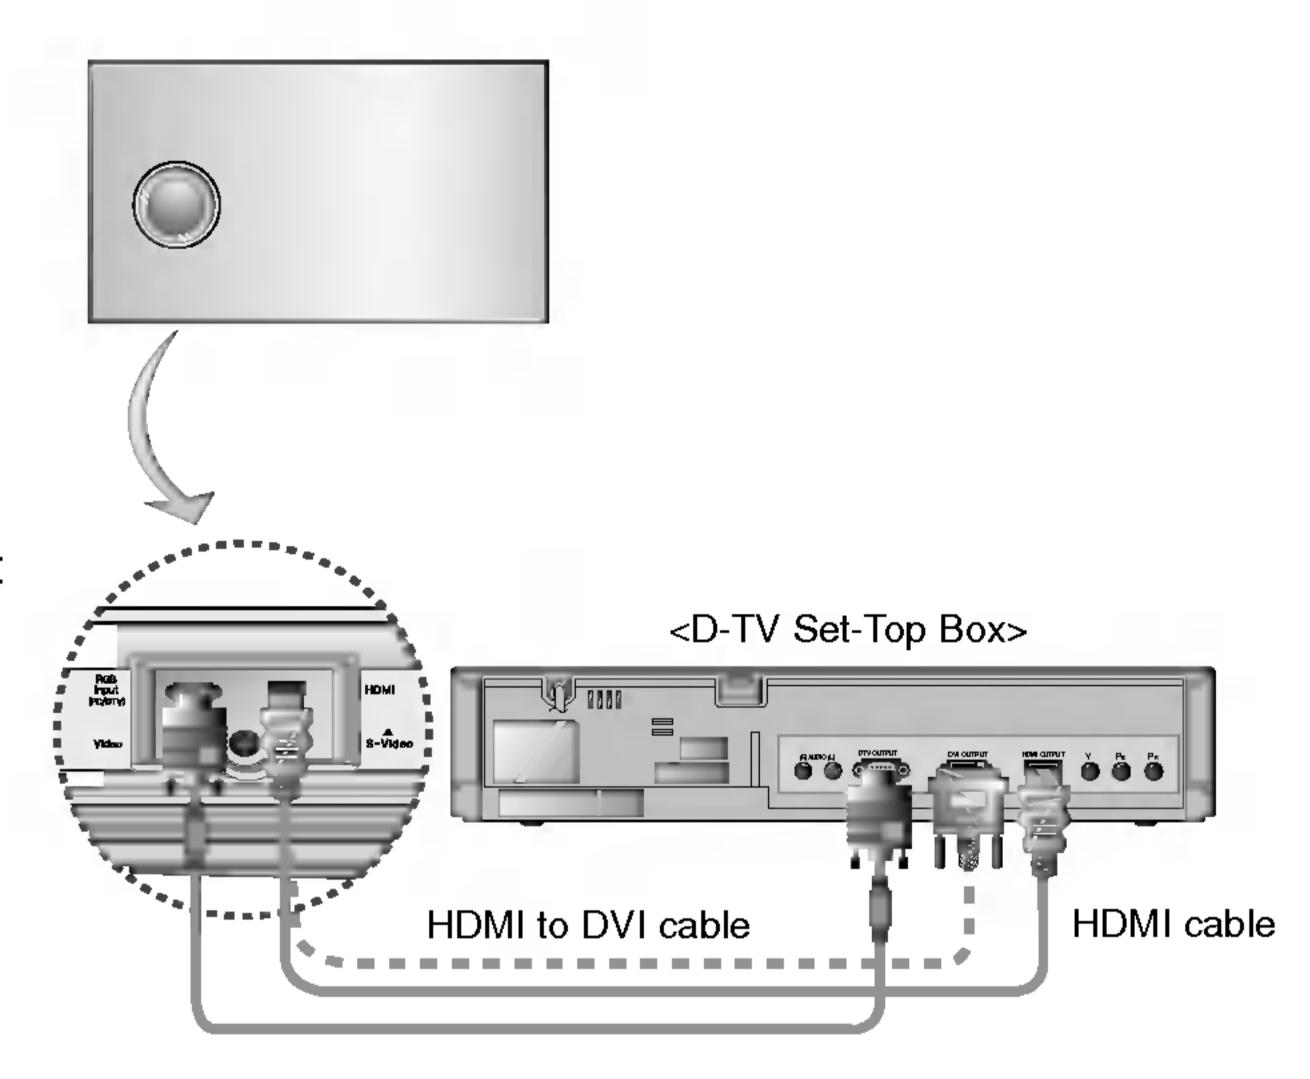

# Connecting to a D-TV Set-Top Box

- \* To receive Digital TV (D-TV) programs, it is necessary to purchase a D-TV receiver (Set-Top Box) and connect it to the projector.
- \* Please refer to the owner's manual of the D-TV Set-Top Box for the connection between projector and D-TV Set-Top Box.

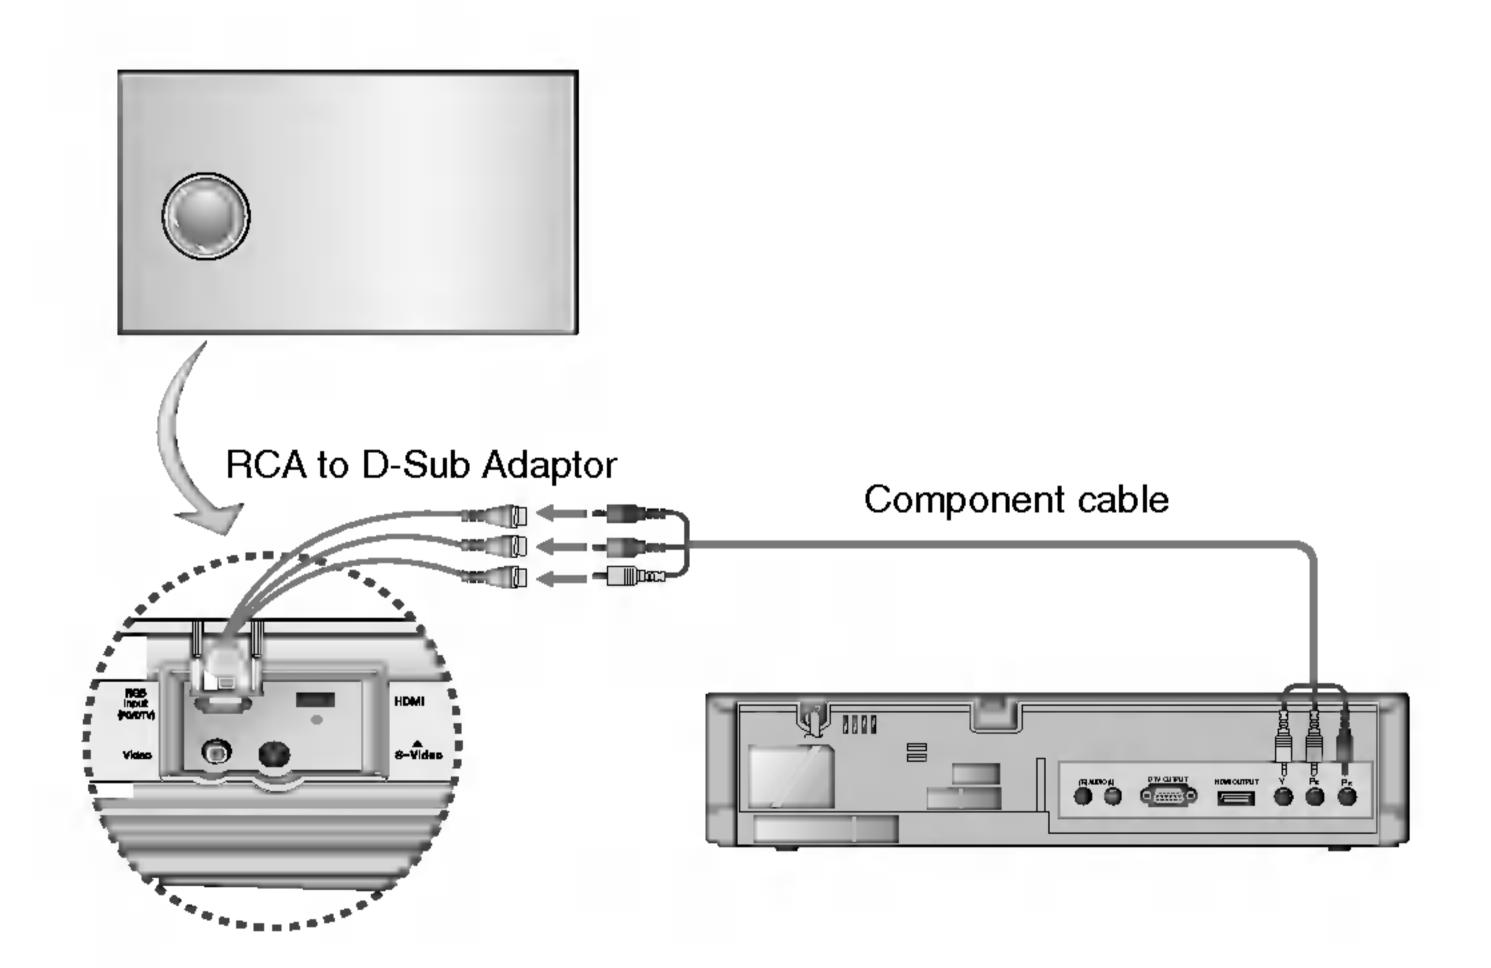

#### < How to connect an RGB/HDMI source >

- a. Connect computer cable to RGB Input (PC/DTV) of the projector.
- b. If the D-TV Set-Top Box has HDMI output, connect HDMI cable to **HDMI** Input of the projector.
- c. If the D-TV Set-Top Box has DVI output, connect HDMI to DVI cable to **HDMI** Input of the projector.
  - \* If connecting the HDMI, audio is not supported.
- d. Use a DTV receiver with DTV 480p(576p)/720p/1080i mode.
  - \* It can be supported the DVI/HDCP.

# < How to connect a Component source >

- a. Connect the D-TV Set-Top Box Component cable to the RCA to D-Sub Adaptor and then connect the RCA to D-Sub Adaptor to RGB Input (PC/DTV) of the projector.
  - \* When connecting the component cable, match the jack colors with the component cable.(Y=green, PB=blue, PR=red)
- b. Use a DTV receiver with DTV 480p(576p)/720p/1080i mode.

## HDMI

- HDMI™, the HDMI logo and High-Definition Multimedia Interface is a trademark or registered trademark of HDMI Licensing."
- This TV can receive the High-Definition Multimedia Interface(HDMI) or the Digital Visual Interface(DVI).
- This TV supports HDCP(High-bandwidth Digital Contents Protection) Protocol for 720x480p, 1280x720p, and 1920x1080i resolution.
- When you connect this TV with a source device(DVD player, Set Top Box or PC) supporting Auto HDMI/DVI function, the output resolution of the source device will be automatically set to 1280x720p.
- If the source device does not support Auto HDMI1/DVI, you need to set the output resolution appropriately.
- If the source device has a DVI output and no HDMI output, a separated audio connection is necessary.

#### < How to connect >

# 1. When the source device (DVD player or Set Top Box) supports HDMI

- Connect the source device to HDMI1/DVI or HDMI2 port of this TV with an HDMI cable(not supplied with this product).
- If the source device supports Auto HDMI function, the output resolution of the source device will be automatically set to 1280x720p. If the source device does not support Auto HDMI, you need to set the output resolution appropriately.
- To get the best picture quality, adjust the DVD Player or Set Top Box's output resolution to 1280x720p, and the PC graphics card's output resolution to 1024x768, 60Hz.
- If the source device has an HDMI output, no other audio connection is necessary because HDMI-to-HDMI connection includes both video and audio.
  - But a separated audio connection is necessary.

# 2. When the source device(DVD player or Set Top Box) supports DVI

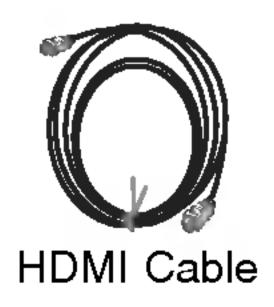

- Connect the source device to HDMI1/DVI port of this TV with a HDMI-to-DVI cable(not supplied with this product). Do not use HDMI2 port for DVI connection if you want to connect audio.
- If the source device supports Auto DVI function, the output resolution of the source device will be automatically set to 1280x720p. If the source device does not support Auto DVI, you need to set the output resolution appropriately.
- To get the best picture quality, adjust the DVD Player or Set Top Box's output resolution to 1280x720p, and the PC graphics card's output resolution to 1024x768, 60Hz.
- A separated audio connection is necessary.

# 3. When the computer supports DVI

- -If the computer has an DVi output, connect the source device to HDMI of this DTV with a DVI cable.
- -To get the best picture quality, adjust the PC mode the 1024x768, 60Hz.

## < HDMI Accessories >

HDMI cable is not supplied with the product.

# **Function**

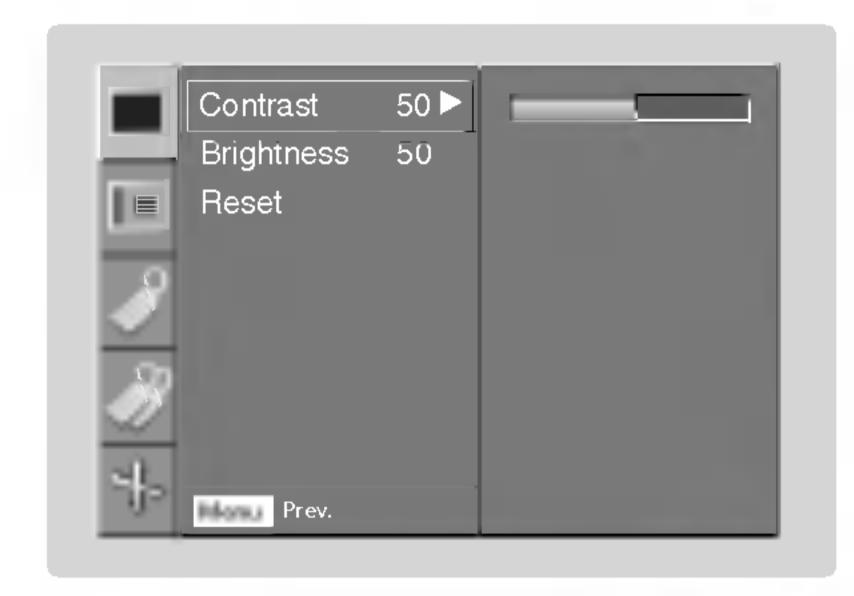

- \* In this manual, the OSD(On Screen Display) may be different from your Projector's because it is just example to help with the Projector operation.
- \* If there is no input signal present, the Menu will not be displayed on the screen.
- \* This operating guide explains operation of RGB(PC) mode mainly.

# Video Menu Options

# Adjusting Video

- 1. Press the **MENU** button and then use ▲, ▼ button to select the **menu**.
- 2. Press the ▶ button and then use ▲ , ▼ button to select a video item you want to adjust.
- 3. Press the ◀, ▶ button to adjust the screen condition as you want.
- 4. Press the ■OK button to save.
  - Each adjustment of menu options will not affect other input source.
     As required, re-adjust menu options for the following input source:
     Video/S-Video/Component (480i(576i)), Component (480p(576p), 720p, 1080i)
  - To restore the original image condition after changing it, press ■OK button after selecting [Reset] item.
  - In the broadcasting system NTSC, the picture item **Tint** is displayed and can be adjusted.
  - To exit the menu display, repeatedly, press the MENU button.

#### < RGB mode >

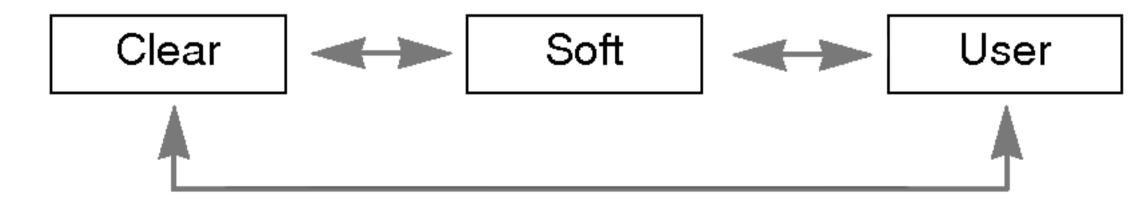

< Video mode >

# APC (Auto Picture Control)

- \* Use APC to set the projector for the best picture appearance.
- \* This function will not work in RGB mode.
- 1. Press the **MENU** button and then use **▲**, **▼** button to select the **■** menu.
- 2. Press the  $\triangleright$  button and then use  $\triangle$ ,  $\nabla$  button to select **APC** item.
- Press the ► button and then use ▲ , ▼ button to adjust the screen condition as you want.
- 4. Press the ■OK button to save.
  - Each press of the ▲, ▼ button changes the screen as shown below.

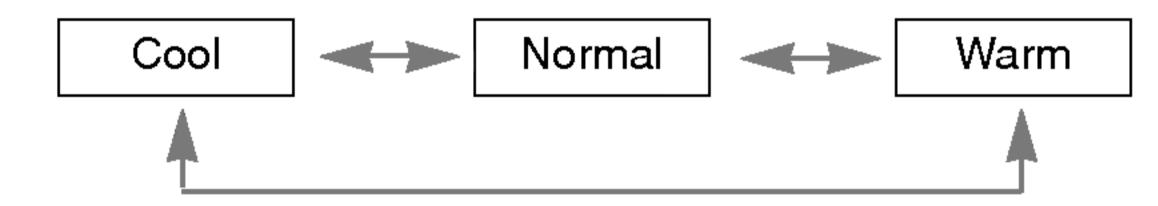

• To exit the menu display, repeatedly, press the MENU button.

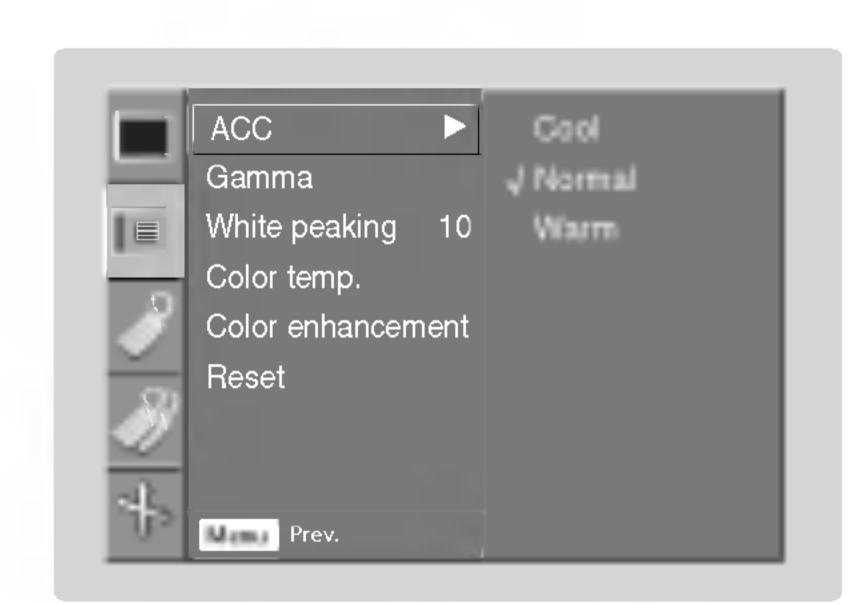

# Auto Color Temperature Control

- To initialize values (reset to default settings), select the Normαl option.
- 1. Press the **MENU** button and then use ▲, ▼ button to select the menu.
- 2. Press the ▶ button and then use ▲, ▼ button to select **ACC** item.
- 3. Press the  $\triangleright$  button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to make appropriate adjustments.
- 4. Press the ■OK button to save.
  - Each press of the ▲, ▼ button changes the screen as shown below.

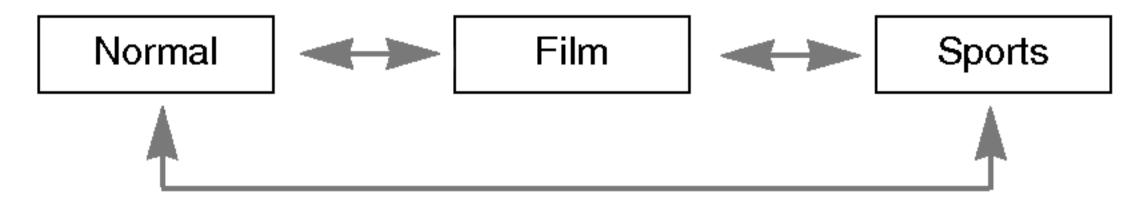

To exit the menu display, repeatedly, press the MENU button.

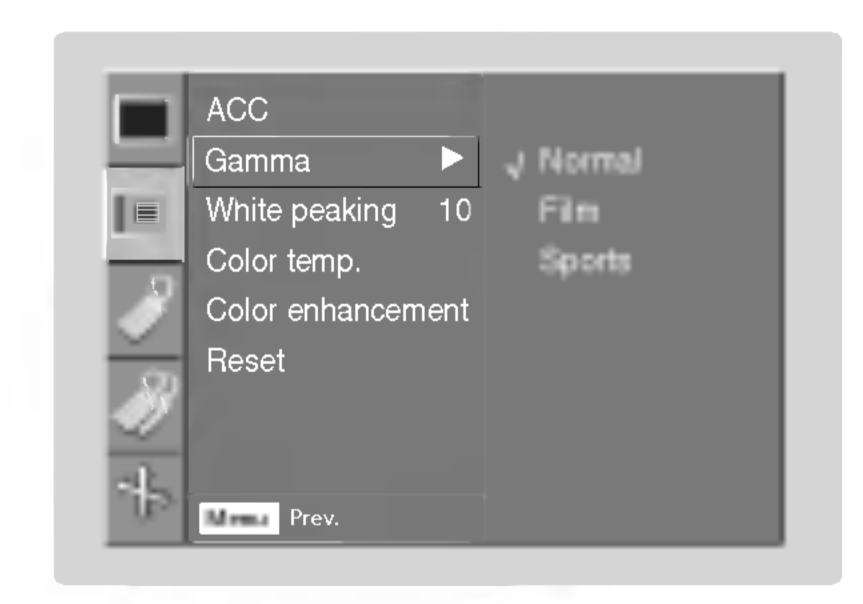

# Gamma Function

- 1. Press the **MENU** button and then use ▲, ▼ button to select the menu.
- 2. Press the ▶ button and then use ▲, ▼ button to select **Gamma** item.
- 3. Press the ▶ button and then use ▲, ▼ button to adjust the screen condition as you want.
- 4. Press the ■OK button to save.
  - Each press of the ▲, ▼ button changes the screen as shown below.

To exit the menu display, repeatedly, press the MENU button.

# White peaking Function

- 1. Press the **MENU** button and then use **▲**, **▼** button to select the **■** menu.
- 2. Press the  $\triangleright$  button and then use  $\triangle$ ,  $\nabla$  button to select **White peaking** item.
- Press the ◀, ► button to adjust the screen condition as you want.
- Press the ■OK button to save.
  - It's available to adjust [White peaking] in RGB(PC) and HDMI(DVI) mode only.
  - The default value may changed based on input mode.
  - Adjust to higher value to see the bright picture and adjust to lower value to see the quality picture.
  - To exit the menu display, repeatedly, press the MENU button.

# Color Temperature Control

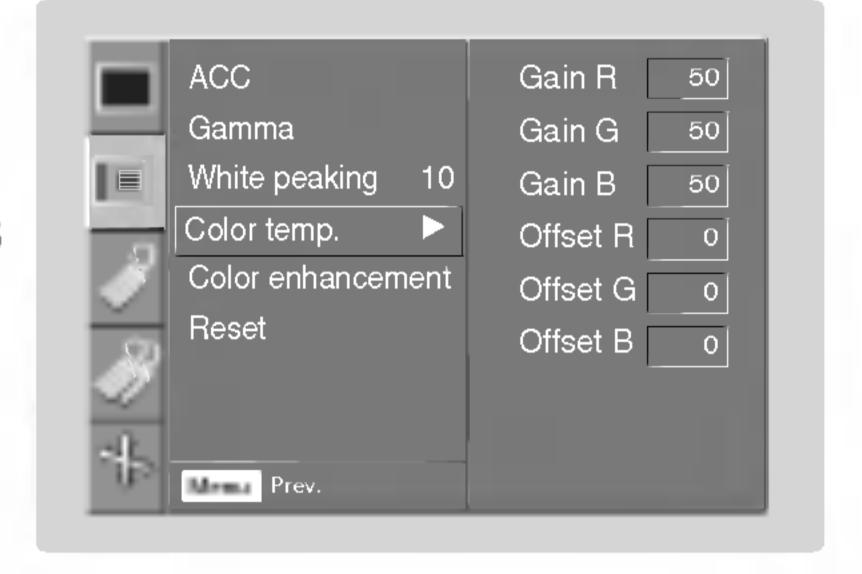

- \* You can adjust color to any color temperature you prefer.
- 1. Press the **MENU** button and then use **▲**, **▼** button to select the **■** menu.
- 2. Press the  $\triangleright$  button and then use  $\triangle$ ,  $\nabla$  button to select **Color temp.** item.
- 3. Press the ▶ button and then use ▲ , ▼ button to select **Gain R**, **Gain G**, **Gain B** or **Offset R**, **Offset G**, **Offset B**.
- 4. Use the ◀, ▶ button to make appropriate adjustments.
  - The Gain R, Gain G, Gain B adjustment range is 0 ~ 100.
  - The Offset R, Offset G, Offset B adjustment range is -50 ~ +50.
- 5. Press the ■OK button to save.
  - To exit the menu display, repeatedly, press the MENU button.

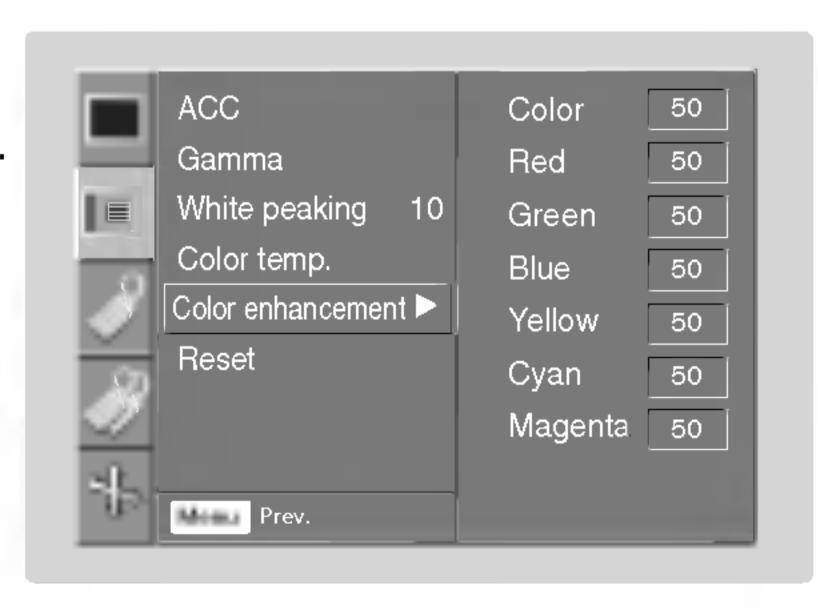

# Color enhancement Control

- \* You can adjust color to any color enhancement you prefer.
- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the  $\blacksquare$  menu.
- 2. Press the  $\triangleright$  button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select **Color enhancement** item.
- 3. Press the ▶ button and then use ▲, ▼ button to select **Color**, **Red**, **Green** or **Blue**, **Yellow**, **Cyan**, **Magenta**.
- Use the ◀, ► button to adjust the screen condition as you want.
  - The adjustment range of Color, Red, Green and Blue, Yellow, Cyan, Magenta is 0~ 100.
- Press the ■OK button to save.
  - To exit the menu display, repeatedly, press the MENU button.

# Reset (Reset to original factory value)

To restore the original image condition after changing it, press ■OK button after selecting [Reset] item.

# Special Menu Options

# Selecting Language

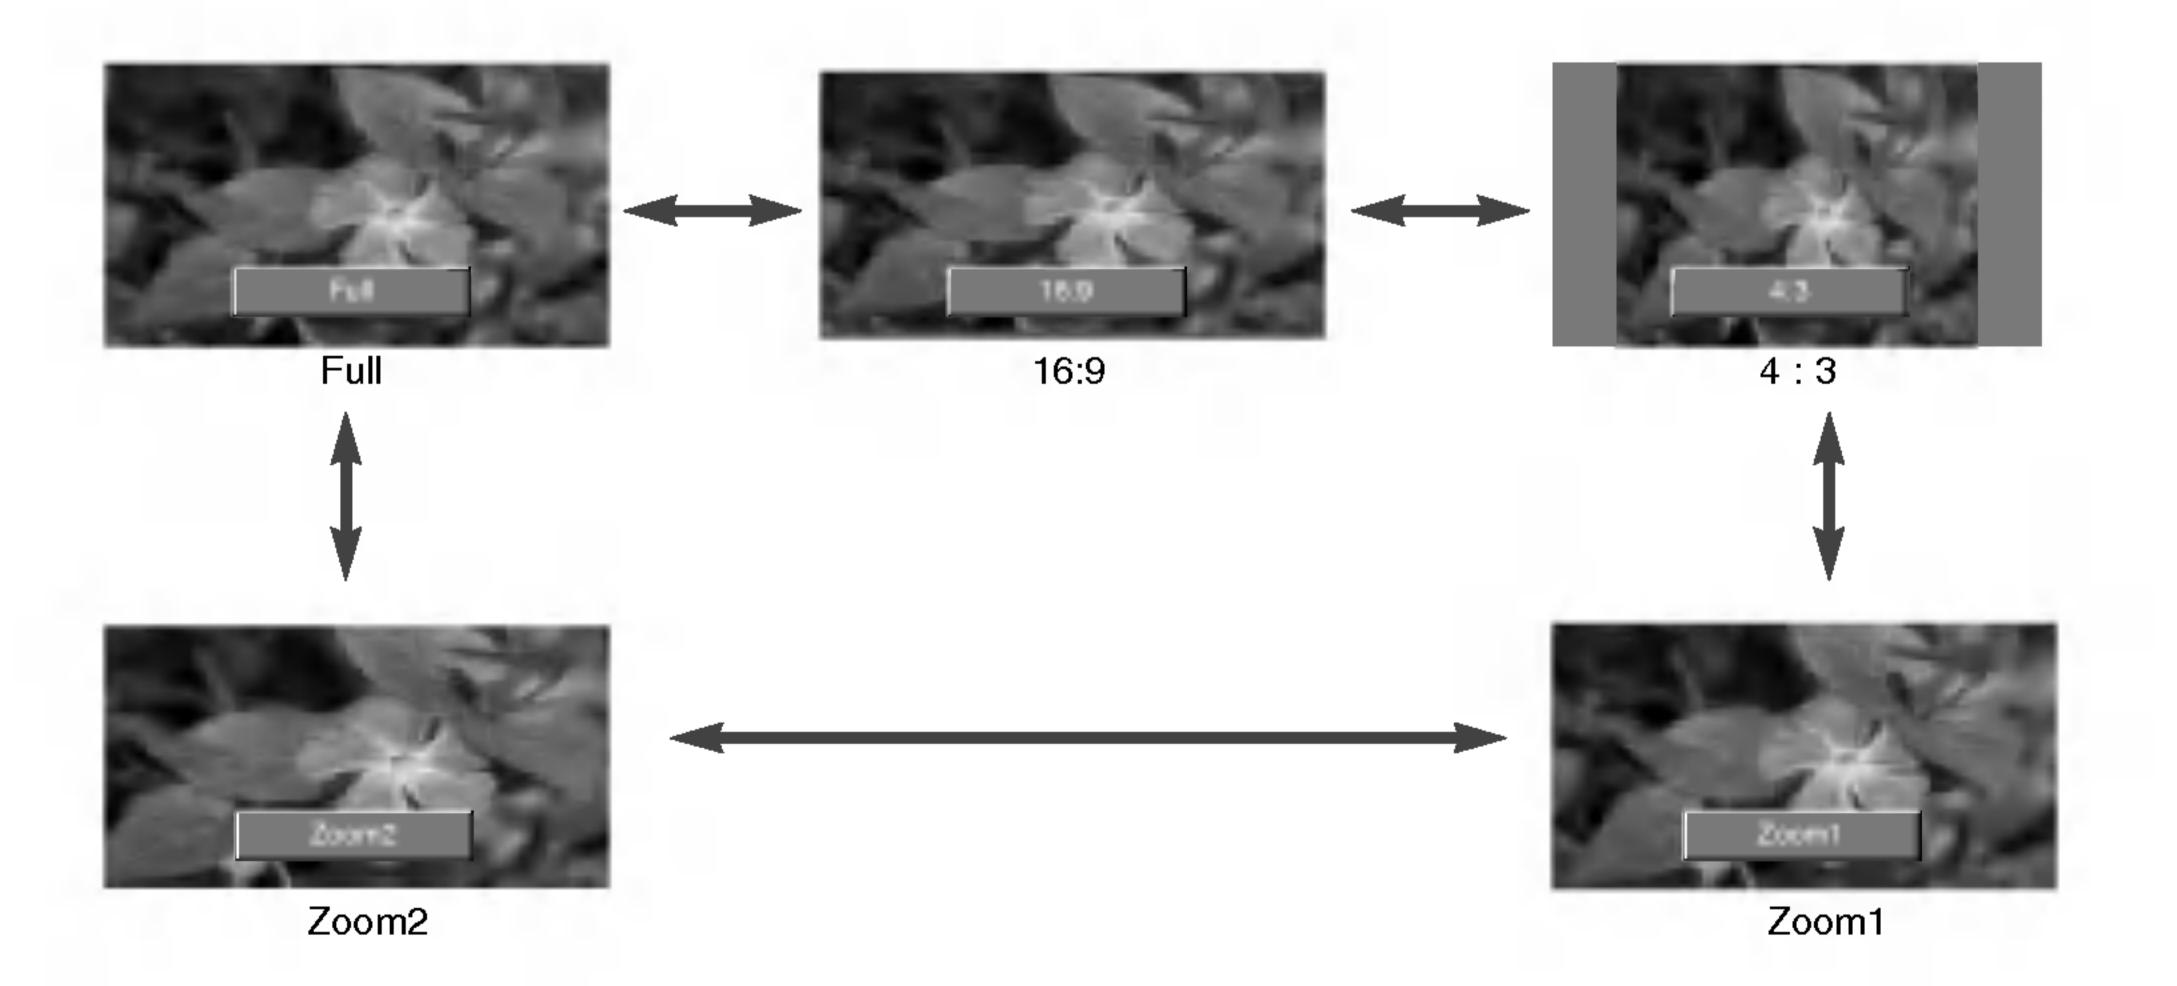

- 1. Press the **MENU** button and then use ▲, ▼ button to select the
- menu
- 2. Press the  $\triangleright$  button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select **Language** item.
- 3. Press the ▶ button and then use ▲, ▼ button to select the language you want to use.
- 4. Press the ■OK button to save.
  - On-Screen-Display (OSD) is marked in the selected language from this point.
  - To exit the menu display, repeatedly, press the MENU button.

# Using ARC Function

1. Press the **ARC** button.

Each press of the button changes the display as below.

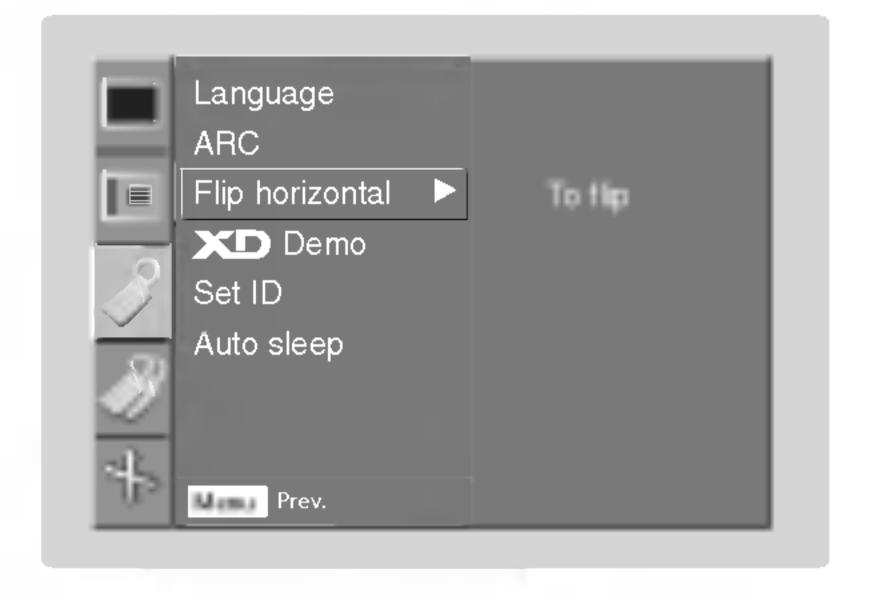

#### Note!

You can also use this function by using the MENU button.

# Flip horizontal Function

- \* This function reverses the projected image horizontally. Use this function when rear projecting an image.
- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the
- 2. Press the  $\triangleright$  button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select **Flip horizontal** item.
- Press the ► button to see reversed image.
  - Each time you press the button, the image will be reversed.
  - To exit the menu display, repeatedly, press the MENU button.

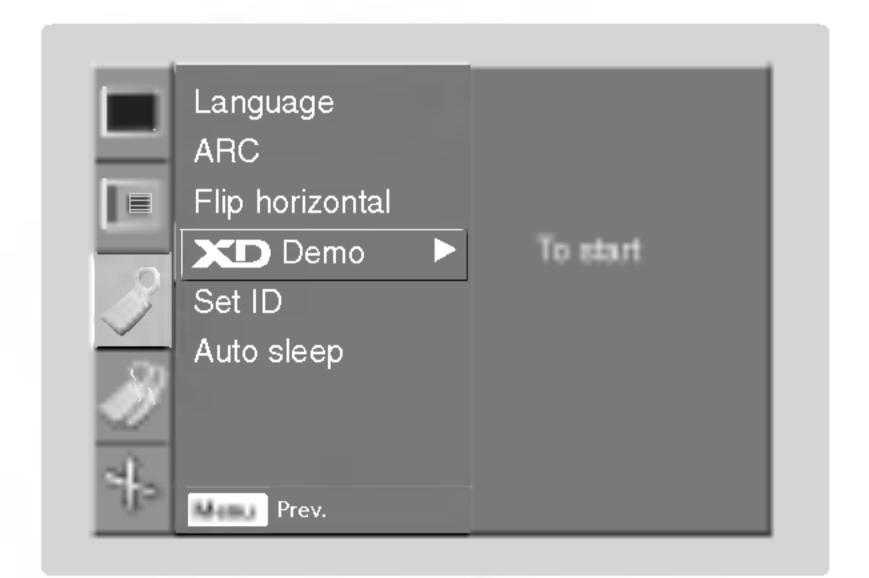

# XD Demo

- \* Use it to see the difference between XD Demo on and XD Demo off.
- 1. Press the **MENU** button and then use ▲, ▼ button to select the

- 2. Press the ▶ button and then use ▲, ▼ button to select **XD Demo** item.
- 3. Press the ▶ button to begin **XD Demo**.
- 4. Press the **MENU** button to stop **XD Demo**.
  - To exit the menu display, repeatedly, press the MENU button.

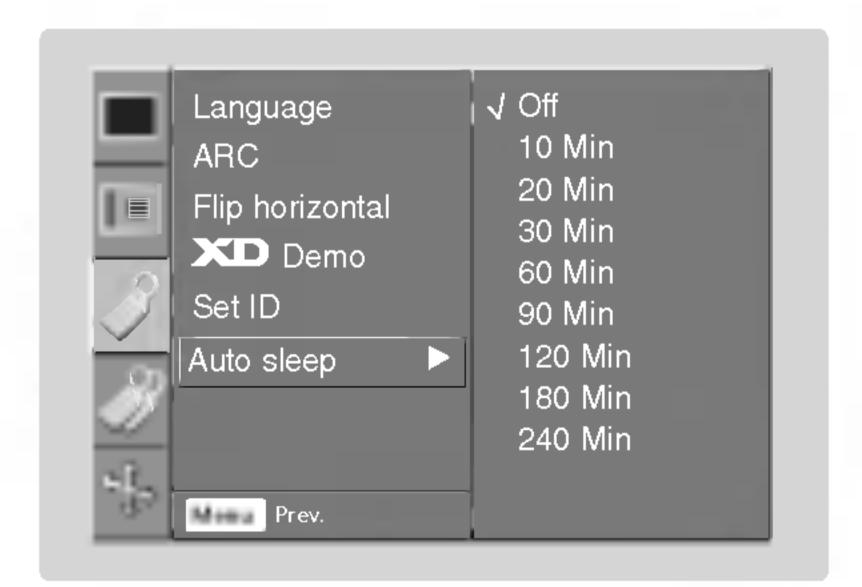

# Auto sleep Function

- \* The sleep timer turns the projector off at the preset time.
- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the

- 2. Press the  $\triangleright$  button and then use  $\triangle$ ,  $\nabla$  button to select **Auto sleep** item.
- 3. Press the  $\triangleright$  button and then use  $\triangle$ ,  $\nabla$  button to select the wanted preset time.
- Press the ■OK button to save.
  - To exit the menu display, repeatedly, press the MENU button.

# Special Menu Options

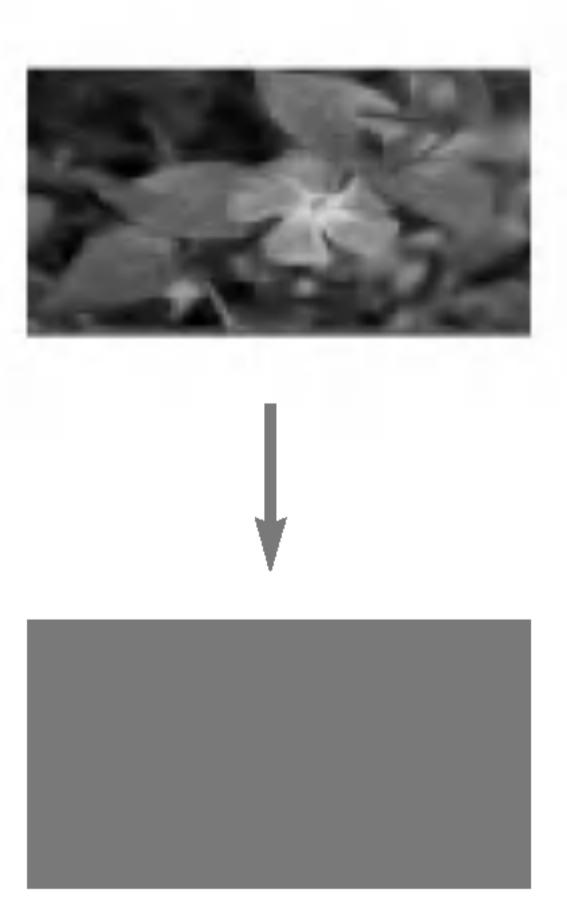

# Using Keystone function

- \* Use this function when the screen is not at a right angle to the projector and the image is a trapezoid shape.
- \*Only use the **Keystone** function when you can't get the best angle of projection, because it may cause a blazing fire of the screen.
- 1. Press the **KEYSTONE** + or **KEYSTONE** button.
- 2. Press the **KEYSTONE** + or **KEYSTONE** button to adjust the screen condition as you want.
  - **Keystone** are adjusted from -20 to +20.
  - You can also use this function by using the MENU button.

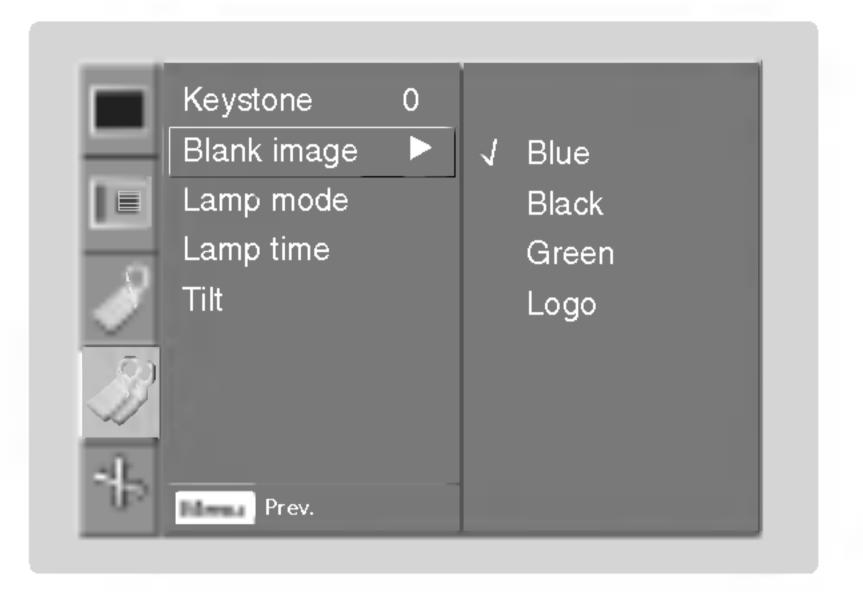

# Using Blank function

- \*This function may be effective if you need to get attention of the audience during presentations, meetings or briefings.
- 1. Press the **BLANK** button.
  - The screen turns off to a background color.
  - You can choose the background color.
     (Refer to 'Selecting blank image color')
- 2. Press any button to cancel the blank function.

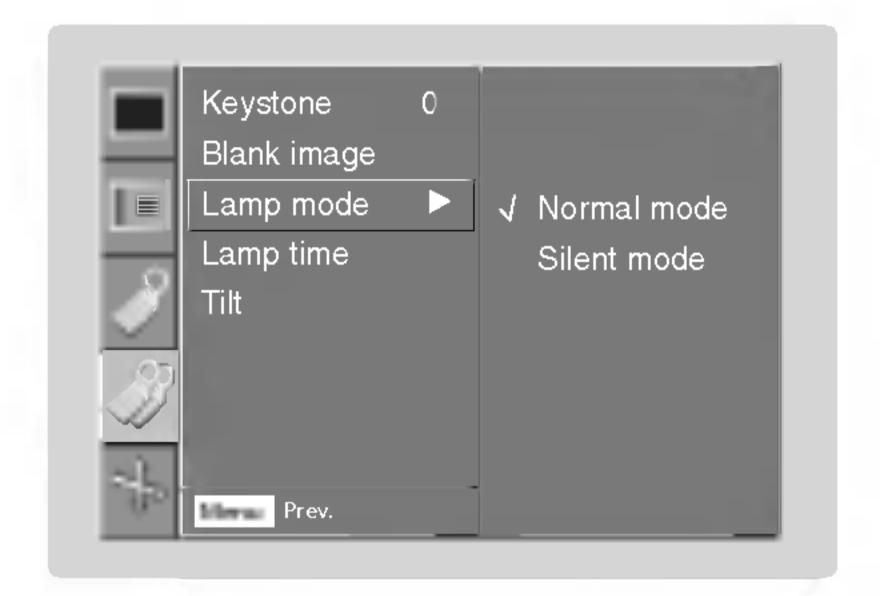

# Selecting Blank image color

- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the  $\Longrightarrow$  menu
- 2. Press the ▶ button and then use ▲, ▼ button to select **Blank image** item.
- 3. Press the ▶ button and then use ▲, ▼ button to select the color you want to use.
- 4. Press the ■OK button to save.
  - Background color will be changed to the selected Blank function color from this point.
  - To exit the menu display, repeatedly, press the MENU button.

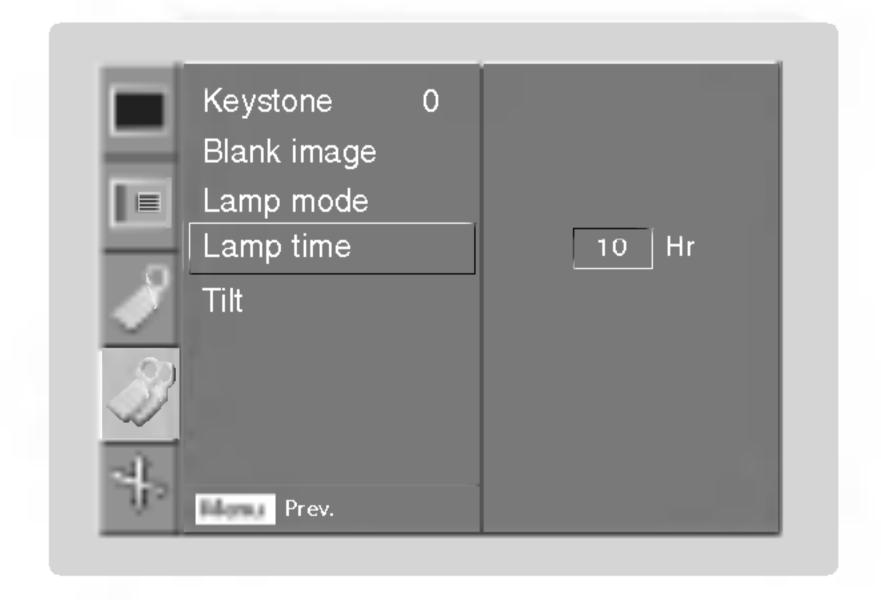

# Lamp mode Function

- 1. Press the **MENU** button and then use ▲, ▼ button to select the 🎻 men
- 2. Press the ▶ button and then use ▲, ▼ button to select **Lamp mode** item.
- 3. Press the ▶ button and then use ▲, ▼ button to select **Normal mode** or **Silent mode**.
- Press the ■OK button to save.
  - To exit the menu display, repeatedly, press the MENU button.

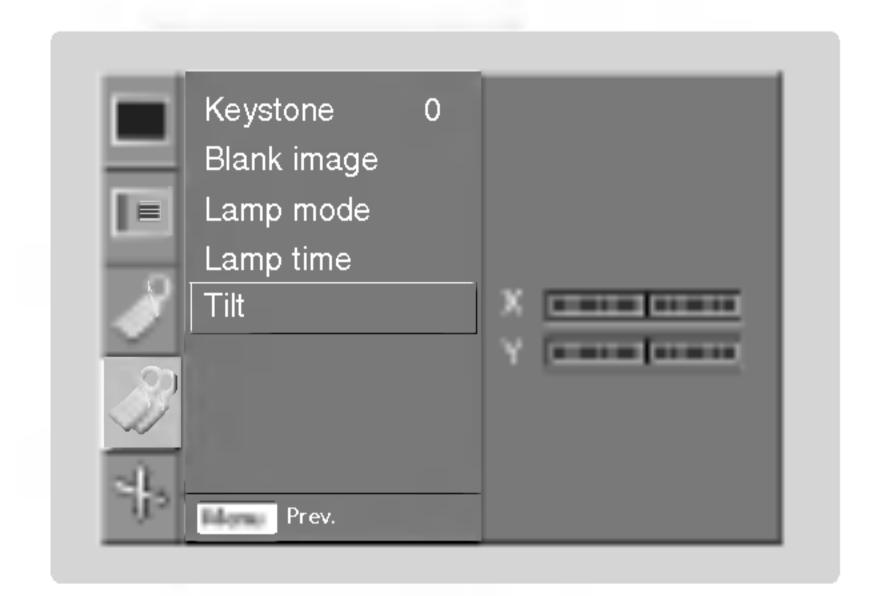

# Checking Lamp time

- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the  $\Longrightarrow$  menu.
- 2. Press the  $\triangleright$  button and then use  $\triangle$ ,  $\nabla$  button to select **Lamp time** item.
  - •The used lamp time is displayed.
  - When projector lamp is reaching the end of its life (over 4000 hours), the lamp indicator will be turned red.
  - •The lamp warning LED illuminates red continuously in the case of excessive lamp time.
  - To exit the menu display, repeatedly, press the MENU button.

# Tilt function

- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the  $\longrightarrow$  menu.
- 2. Press the ▶ button and then use ▲, ▼ button to select **Tilt** item.
- 3. You can check tilt state of the projector.
  - If tilt state is out of the safety area(avobe 15°), warning message is displayed and then automatically, power turns off.
  - To exit the menu display, repeatedly, press the MENU button.

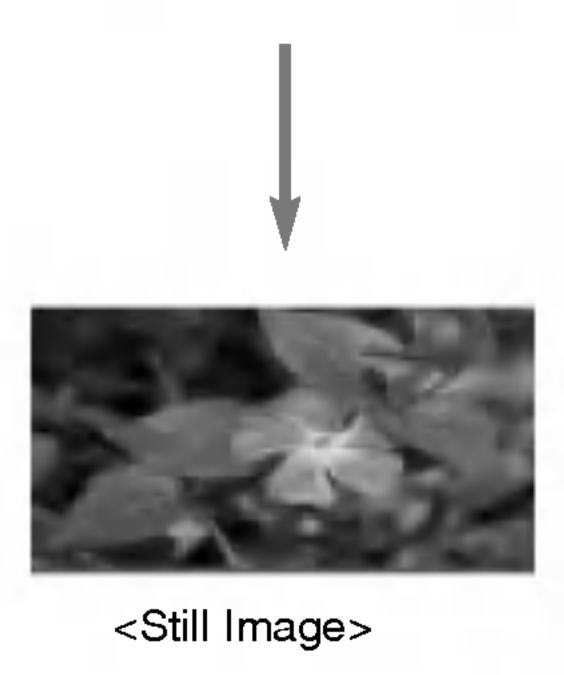

# Using Still function

- 1. Press the **STILL** button.
  - \* You can freeze the input image.

<Moving Image>

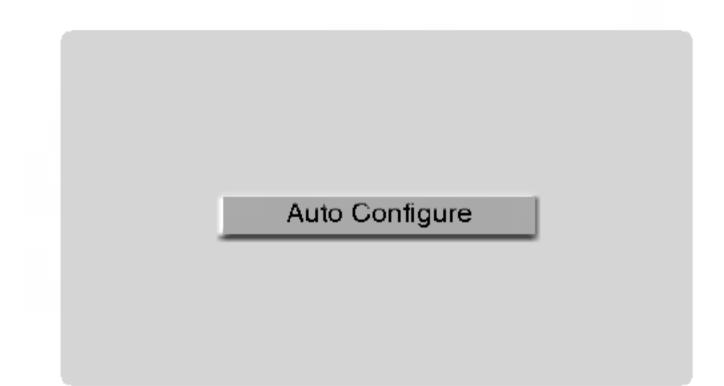

- 2. To exit Pause, press any button .
  - \* The STILL function would release automatically after about 10 minutes.

# Screen Menu Options

# Auto configure Function

- \* This function assures you of getting the best video quality by automatically adjusting the difference of horizontal size and synchronization of the image.
- \* Auto Tracking function works in RGB input only.
- 1. Press the **AUTO** button.
  - Image positioning and synchronization are automatically adjusted.
- 2. Adjust **Manual configure** in menu after operation of **Auto configure** if you want to get better picture quality in accordance with diverse PC input modes. In certain circumstances, you can't get the best picture quality only with auto-correction.

# Note!

You can also use this function by using the MENU button. (Only in RGB mode) For best results, perform this function while displaying a still image.

# Manual configure

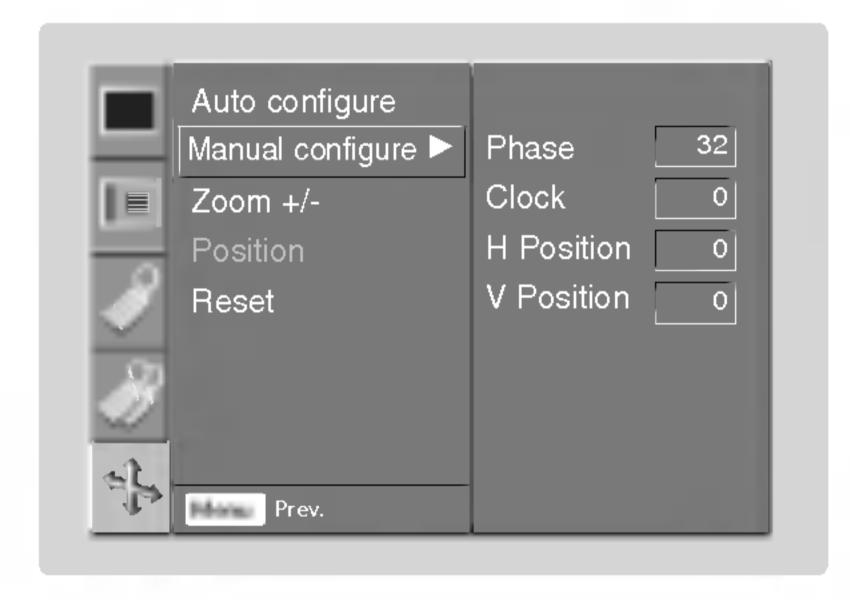

- \* It's available to adjust [Manual Configure] in RGB mode only.
- \* Phase Function

This function is for the detailed adjustment of the clock function.

\* Clock Function

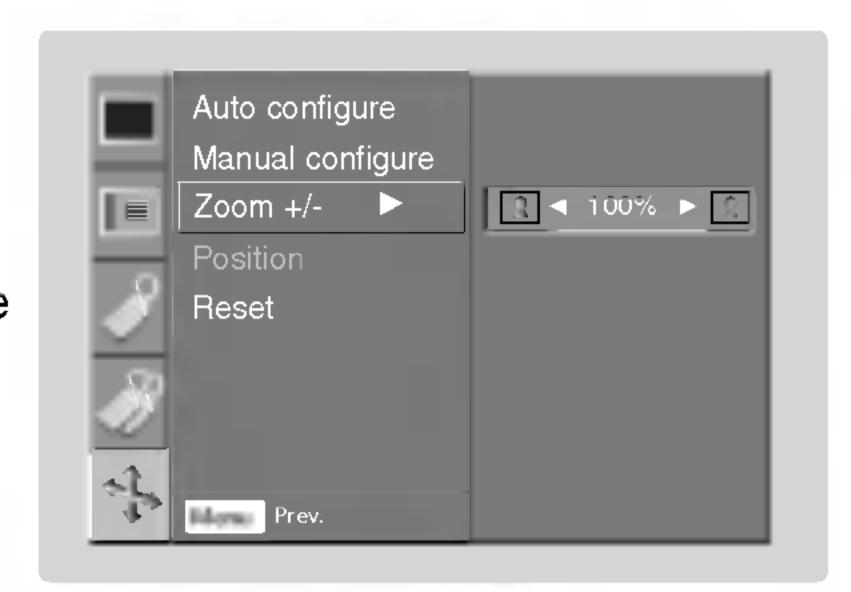

This function adjusts the horizontal width of the projected image to get the image to fit on the screen size.

- 1. Press the **MENU** button and then use ▲, ▼ button to select the 🐪 menu.
- Press the ► button and then use ▲, ▼ button to select Manual configure item.
- 3. Press the ▶ button and then use ▲, ▼ button to select Phase, Clock, H Position or V Position.
- 4. Press the ◀, ▶ button to adjust the screen condition.
  - The **Phase** adjustment range is 0 ~ 63.
  - The Clock adjustment range is -50 ~ +50.
  - Based on the input mode, the adjustment range may be changed.
- 5. Press the ■OK button to save.
  - To exit the menu display, repeatedly, press the MENU button.

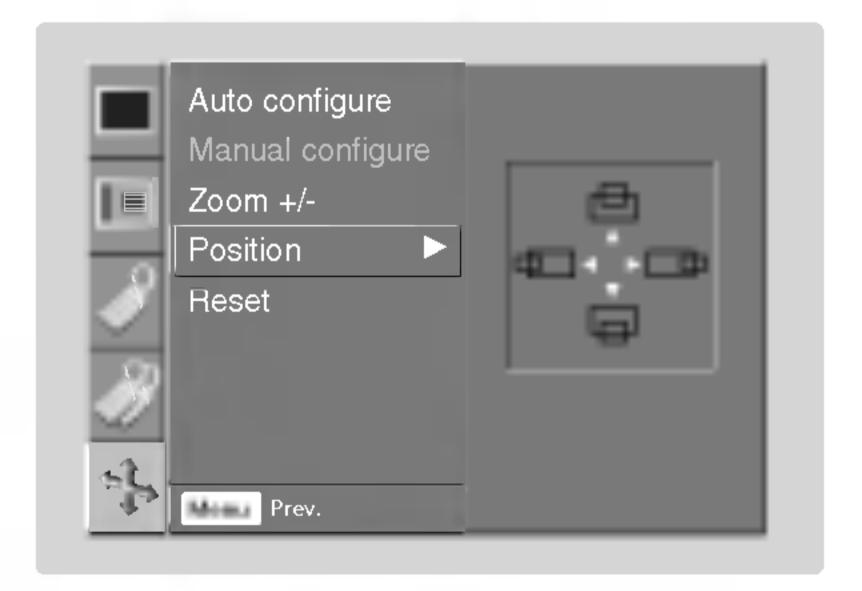

# Using ZOOM function

- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the  $\overset{\bullet}{\Rightarrow}$  menu.
- 2. Press the ▶ button and then use ▲, ▼ button to select **Zoom** +/- item.
- 3. Press the ▶ button and then use ◄, ▶ button to zoom in or out the picture size condition as you want.
  - **Zoom** +/- adjustment range is 100% ~ 250%.
  - To exit the menu display, repeatedly, press the MENU button.

# Screen Position

- \* You are available o this function after adjusting Zoom +/-.
- 1. Press the **MENU** button and then use ▲, ▼ button to select the 🤲 menu.
- 2. Press the ▶ button and then use ▲, ▼ button to select **Position** item.
- 3. Press the  $\triangleright$  button and then use  $\blacktriangle$ ,  $\blacktriangledown$ ,  $\blacktriangleleft$ ,  $\triangleright$  button to adjust the position.
- 4. Press the ■OK button to save.
  - To exit the menu display, repeatedly, press the MENU button.

# Reset (Reset to original factory value)

- To restore the original image condition after changing it, press ■OK button after selecting [Reset] item.
- You can initialize Manual configure, Zoom +/-, Position.

# **External Control Device Setup**

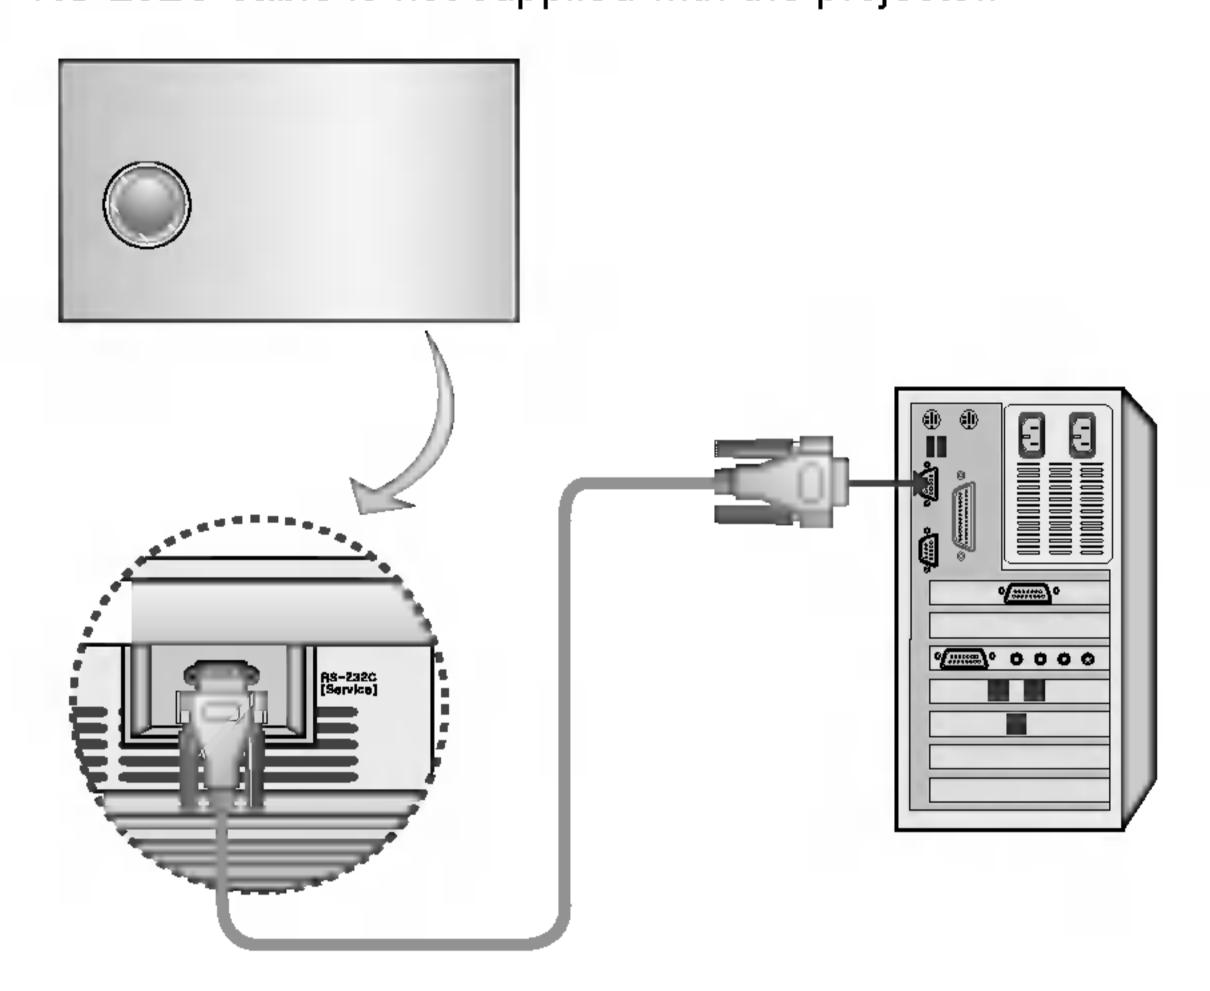

\* Connect the RS-232C input jack to an external control device (such as a computer or a video control system) and control the Projector's functions externally.

### SET ID

- 1. Press the **MENU** button and then use  $\blacktriangle$ ,  $\blacktriangledown$  button to select the  $\longrightarrow$  menu
- 2. Press the ▶ button and then use ▲, ▼ button to select **Set ID** item.
- Press the ► button and then use ◄, ► button to adjust Set ID to select the desired projector ID number.
- 4. Press the ■OK button to save.
  - The adjustment range of Set ID is 1~99.
  - Only the projector with the specified ID number will operate from the remote control.
  - To exit the menu display, repeatedly, press the MENU button.

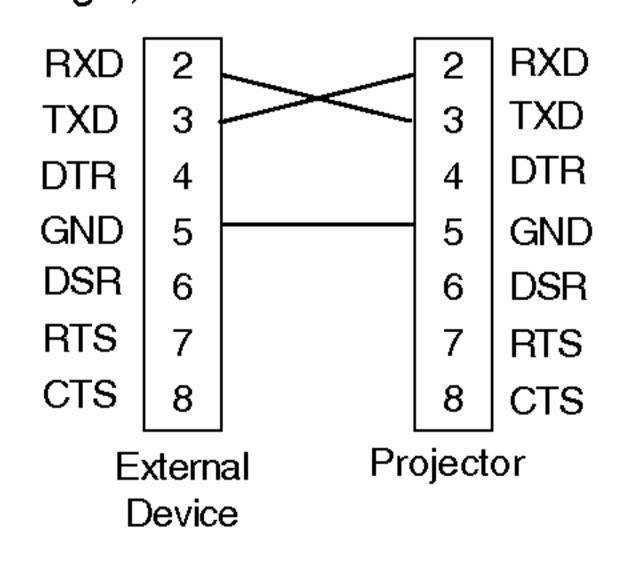

# How to connect external control equipment

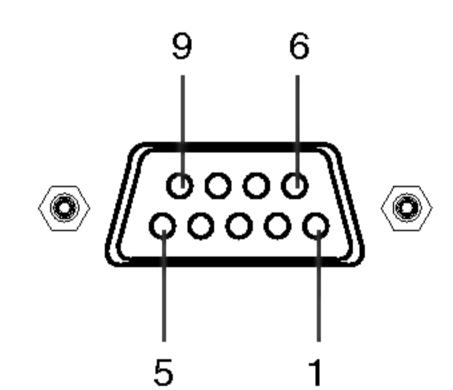

- Connect the serial port of the PC to the RS-232C jack on the projector back panel.
- RS-232C cable is not supplied with the projector.

Use the RS232C cable to control the projector externally (Refer to Fig.1).

<Fig.1, RS-232 Interface Cable>

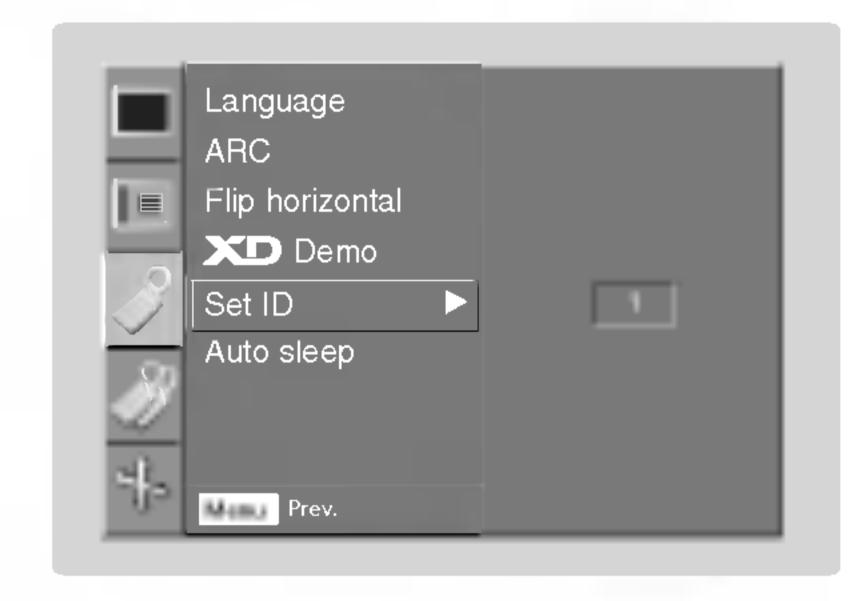

\* 1, 9 Pin No Connection

# **Communication Parameter Setup**

#### □ Communication Protocol

#### 1. Transmission

#### [Command1][Command2][ ][Set ID][ ][Data][Cr]

\* [Command 1]: First command to control the set.(k, j, x, ASCII code, 1 Character)
\* [Command 2]: Second command to control the set..(ASCII code, 1 Character)

\* [Set ID] : You can adjust the set ID to choose desired projector ID number in special menu. See previous

page. Adjustment range is '01 ~ 99(0x01~0x63)'. When selecting Set ID '0', every connected

projector set is controlled.

In command Line, Set ID is used to 16 antilogarithm value.

\* [DATA] : To transmit command data. Transmit 2 character when organized ASCII code.

\* Transmit 'FF' data to read status of command.

\* [Cr] : Carriage Return

ASCII code '0x0D'

\* [ ] : ASCII code character correspond to "Space Bar" which is in order to classify command, set ID and

Data.

## 2. OK Acknowledgement

# [Command2] [ ] [Set ID] [ ] [OK] [Data] [x]

## 3. Error Acknowledgement

# [Command2] [ ] [Set ID] [ ] [NG] [Data] [x]

Data: [1]: illegal code(This command is not supported.)

[2]: not support function(This function doesn't work.)

[3]: wait more time(Try again a few minute later.)

<sup>\*</sup> The Projector transmits ACK (acknowledgement) based on this format when receiving normal data. At this time, if the data is data read mode, it indicates present status data. If the data is data write mode, it returns the data of the PC computer.

<sup>\*</sup> The Projector transmits ACK (acknowledgement) based on this format when receiving abnormal data from non-viable functions or communication errors.

#### 01. Power (Command2:a)

→ To control Power On/Off of the Projector.

	1080i	0	0

- \* Cable type
- 1- RCA to D-Sub Adaptor
- 2- Computer Cable

# Maintenance

\* The projector needs little maintenance. You should keep the lens clean because any dirt or stains may appear on the screen. If any parts need to be replaced, contact your dealer. When cleaning any part of the projector, always turn the power off and unplug the projector first.

# Cleaning the lens

Clean the lens whenever you notice dirt or dust on the surface of it. Wipe the lens surface gently with an air spray or a soft, dry lint-free cloth.

To remove dirt or stains on the lens, moisten a soft cloth with water and a neutral detergent and wipe the lens surface gently.

# Cleaning the Projector Case

To clean the projector case, first unplug the power cable. To remove dirt or dust, wipe the casing with a soft, dry, lint-free cloth. To remove stubborn dirt or stains, moisten a soft cloth with water and a neutral detergent and then wipe the casing.

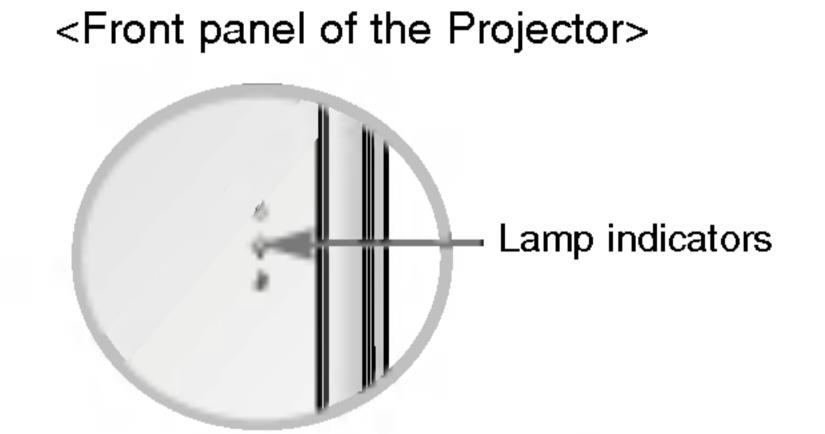

Do not use alcohol, benzene, thinners or other chemical detergents as these can cause the casing to be warped or discolored.

# Replacing the Lamp

### Last of Lamp unit replacement

The projector lamp usually lasts for about 4000 hours. You can see the used lamp time in the Selecting Function section. You must replace the lamp when:

- The projected image gets darker or starts to be deteriorated.
- The lamp indicator is red.
- The message "Replace the lamp" appears on the screen when turning the projector lamp on.

# Be careful when replacing lamp

- Press the POWER button on the control panel or remote control to cut off the power.
- If the operation indicator LED is orange and blinking, do not disconnect the mains supply until the operation indicator LED is lit up constantly (orange).
- Allow the lamp to cool for 1 hour before replacing it.
- Replace only with the same type lamp from a LG Electronics Service Center using and other lamp may cause damage to the Projector and lamp.
- Pull out the lamp only when replacing the lamp.
- Keep the lamp unit out of reach of children or and heat sources such as radiators, stoves.
- To reduce the risk of fire, lamp shall not be exposed to liquids or foreign material.
- Do not place the lamp near any heat source.
- Make sure the new lamp is securely tightened with screws. If not, the image may be dark or there could be a risk of fire.
- Never touch the lamp unit glass or otherwise image quality may be worse or lamp life may be reduced.

### To obtain a replacement Lamp unit

Lamp model number is on page 47. Check the lamp model and then purchase it at LG Electronics Service Center. Using other lamp may cause damage to the projector.

## Lamp unit disposal

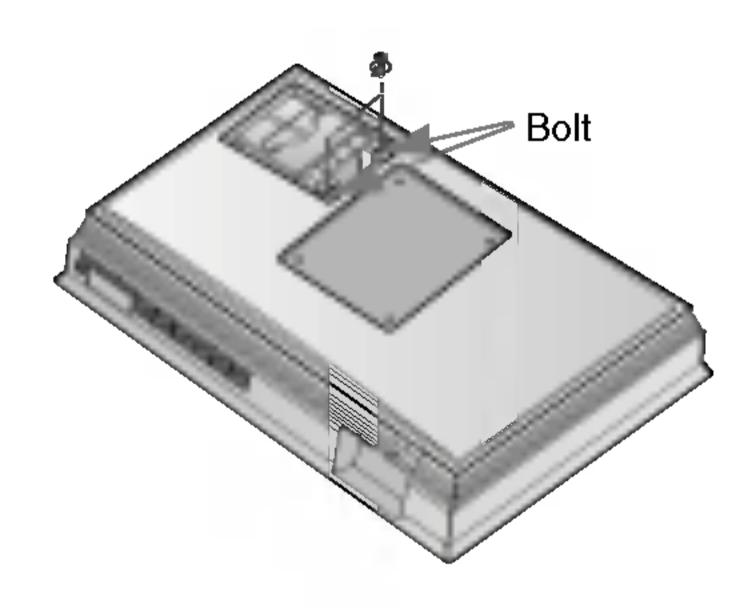

Dispose of the used lamp by returning it to the LG electronic service center.

# Replacing the Lamp

Turn off the projector and unplug the power cable. Carefully place the lens side down on a cushioned surface that will protect the lens from damage.

(Allow the lamp to cool for 1 hour before replacing it.)

After lifting the lamp cover off, remove the two retaining screws on the lamp case with a screw-driver or similar objects.

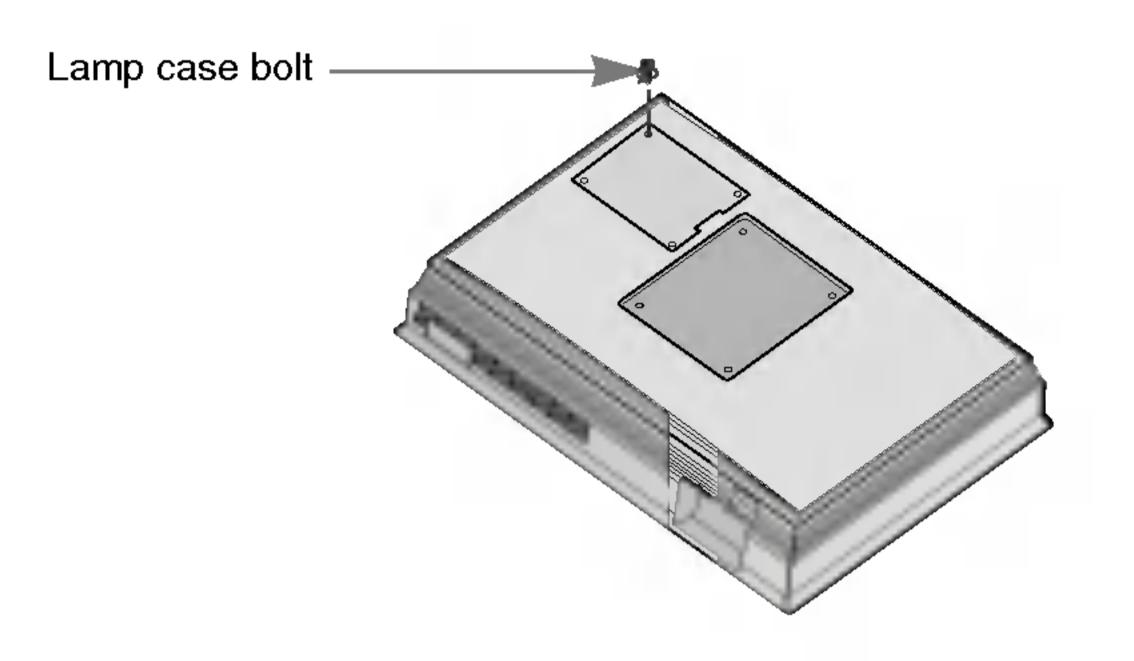

Pull out the handle slowly and remove the lamp case.

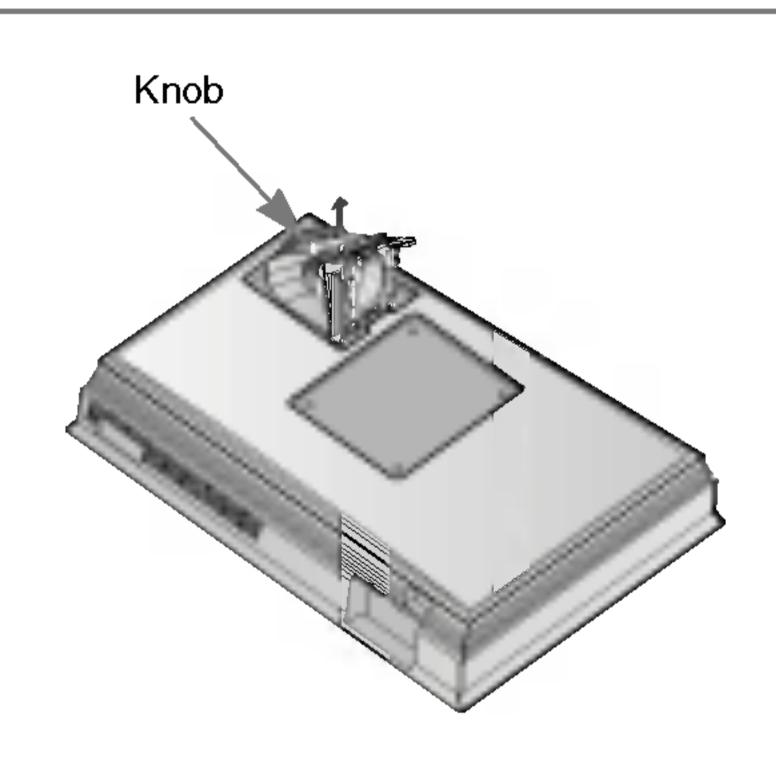

Tighten the screws you removed in step 3.

(Make sure it is fixed hardly.)

Remove the two retaining screws on the lamp cover with a screwdriver or similar objects and then lift off the lamp cover.

Lift up the fixed wire knob on the lamp.

Insert the new lamp gently into the correct position.

Make sure it is inserted correctly.

Replace the lamp cover and tighten the cover screws.

(If the lamp cover is open, the lamp indicator flashes green and the projector is not turned on.)

Note!

Using and other lamp may cause damage to the projector or lamp.

Make sure the lamp cover is securely fastened. If the lamp cover is open, and the projector is not turned on. In this case, contact your service center after checking the lamp to fix well.
