

# User's Guide

## W2220P

**M**ake sure to read the **Important Precautions** before using the product. Keep the User's Guide(CD) in an accessible place for future reference.

**S**ee the label attached on the product and give the information to your dealer when you ask for service.

**This unit has been engineered and manufactured to ensure your personal safety, however improper use may result in potential electrical shock or fire hazards. In order to allow the proper operation of all safeguards incorporated in this display, observe the following basic rules for its installation, use, and servicing.**

## On Safety

Use only the power cord supplied with the unit. In case you use another power cord, make sure that it is certified by the applicable national standards if not being provided by the supplier. If the power cable is faulty in any way, please contact the manufacturer or the nearest authorized repair service provider for a replacement.

The power supply cord is used as the main disconnection device. Ensure that the socket-outlet is easily accessible after installation.

Operate the display only from a power source indicated in the specifications of this manual or listed on the display. If you are not sure what type of power supply you have in your home, consult with your dealer.

Overloaded AC outlets and extension cords are dangerous. So are frayed power cords and broken plugs. They may result in a shock or fire hazard. Call your service technician for replacement.

As long as this unit is connected to the AC wall outlet, it is not disconnected from the AC power source even if the unit is turned off.

Do not Open the Display:

- There are no user serviceable components inside.
- There are Dangerous High Voltages inside, even when the power is OFF.
- Contact your dealer if the display is not operating properly.

To Avoid Personal Injury :

- Do not place the display on a sloping shelf unless properly secured.
- Use only a stand recommended by the manufacturer.
- Do not drop an object on or apply impact to the product. Do not throw any toys or objects on the product screen.  
It can cause injury to human, problem to product and damage the display.

To Prevent Fire or Hazards:

- Always turn the display OFF if you leave the room for more than a short period of time. Never leave the display ON when leaving the house.
- Keep children from dropping or pushing objects into the display's cabinet openings. Some internal parts carry hazardous voltages.
- Do not add accessories that have not been designed for this display.
- When the display is to be left unattended for an extended period of time, unplug it from the wall outlet.
- In the presence of thunder and lightning, never touch the power cord and signal cable because it can be very dangerous. It can cause electric shock.

## On Installation

Do not allow anything to rest upon or roll over the power cord, and do not place the display where the power cord is subject to damage.

Do not use this display near water such as near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool.

Displays are provided with ventilation openings in the cabinet to allow the release of heat generated during operation. If these openings are blocked, built-up heat can cause failures which may result in a fire hazard. Therefore, NEVER:

- Block the bottom ventilation slots by placing the display on a bed, sofa, rug, etc.
- Place the display in a built-in enclosure unless proper ventilation is provided.
- Cover the openings with cloth or other material.
- Place the display near or over a radiator or heat source.

Do not rub or strike the Active Matrix LCD with anything hard as this may scratch, mar, or damage the Active Matrix LCD permanently.

Do not press the LCD screen with your finger for a long time as this may cause some afterimages.

Some dot defects may appear as Red, Green or Blue spots on the screen. However, this will have no impact or effect on the display performance.

If possible, use the recommended resolution to obtain the best image quality for your LCD display. If used under any mode except the recommended resolution, some scaled or processed images may appear on the screen. However, this is characteristic of the fixed-resolution LCD panel.

Leaving a fixed image on the screen for a long time may cause damage to the screen and cause image burn-in. Make sure to use a screen saver on the product. Burn-in and related problems are not covered by the warranty on this product.

Do not shock or scratch the front and sides of the screen with metallic objects. Otherwise, it may cause damage to the screen.

Make sure the panel faces forward and hold it with both hands to move. If you drop the product, the damaged product can cause electric shock or fire. Contact an authorized the service center for repair.

Avoid high temperatures and humidity.

## On Cleaning

- Unplug the display before cleaning the face of the display screen.
- Use a slightly damp (not wet) cloth. Do not use an aerosol directly on the display screen because over-spraying may cause electrical shock.
- When cleaning the product, unplug the power cord and scrub gently with a soft cloth to prevent scratching. Do not clean with a wet cloth or spray water or other liquids directly onto the product. An electric shock may occur. (Do not use chemicals such as benzene, paint thinners or alcohol)
- Spray water onto a soft cloth 2 to 4 times, and use it to clean the front frame; wipe in one direction only. Too much moisture may cause staining.

## On Repacking

- Do not throw away the carton and packing materials. They make an ideal container in which to transport the unit. When shipping the unit to another location, repack it in its original material.

## On Disposal(Only, Hg lamp used LCD Monitor)

- The fluorescent lamp used in this product contains a small amount of mercury.
- Do not dispose of this product with general household waste.
- Disposal of this product must be carried out in accordance to the regulations of your local authority.

## !!! Thank for selecting LGE products !!!

- Please make sure the following items are included with your monitor. If any items are missing, contact your dealer.

**User's Guide/Cards**

**Power Cord**  
(Depending on the country)

**DVI-D Signal Cable**  
(This feature is not available  
in all countries.)

**15-pin D-Sub Signal Cable**  
(To set it up, this signal cable may  
be attached to this product before  
shipping out.)

### NOTE

- This accessories may look different from those shown here.
- User must use shielded signal interface cables (D-sub 15 pin cable, DVI-D cable) with ferrite cores to maintain standard compliance for the product.

- Before setting up the monitor, ensure that the power to the monitor, the computer system, and other attached devices are turned off.

## Connecting the stand base

1. Place the monitor with its front facing downward on a cushion or soft cloth.

2. Assemble the stand base into the standbody in the correct direction as shown in the picture.

3. Once assembled take the monitor up carefully and face the front side.

### WARNING

- The tape and locking pin may only be removed from those monitors equipped with a standing base when the base is pulled up. Otherwise, you may be injured by the protruding sections of the stand.
- Product Handling with Care : When you lift up or move the product, Do Not hold or touch the front part of LCD panel. It will damage the panel. (Please hold the Stand Body or plastic cover of the product.)

## Removing the stand base

1. Place the monitor with its front facing downward on a cushion or soft cloth.

2. While pressing the latches, push the stand base in the direction of the arrow to separate from the stand body.

### IMPORTANT

- This illustration depicts the general model of connection. Your monitor may differ from the items shown in the picture.
- Do not carry the product upside down holding only the stand base. The product may fall and get damaged or injure your foot.

## Positioning your display

After installation, adjust the angle as shown below.

1. Adjust the position of the panel in various ways for maximum comfort.

- **Tilt Range** :  $-5^{\circ}$  ~  $15^{\circ}$

- When adjusting the angle of the screen, do not put your finger(s) in between the head of the monitor and the stand body. You can hurt your finger(s).

# Connecting the Display

- **Swivel Range** : 355°

- **Height Range** : maximum 4.33 inches (110.0 mm)

\* Please be sure to remove the Locking pin to adjust the height.

## WARNING

- You do not need to replace the Locking pin after it is removed, to adjust its height.

## ERGONOMIC

- It is recommended that in order to maintain an ergonomic and comfortable viewing position, the forward tilt angle of the monitor should not exceed 5 degrees.

## Using the Pivot function

-The pivot function allows you to rotate the screen 90 degrees clockwise.

1. Lift the monitor to its highest height to utilize the Pivot function.

2. Landscape & Portrait : You can rotate the panel 90° clockwise.

Please be cautious and avoid contact between the monitor head and the Stand Base when rotating the screen to access the Pivot function. If the monitor head touches the Stand Base, then the Stand Base could crack.

3. Be careful with the cables when rotating the screen.

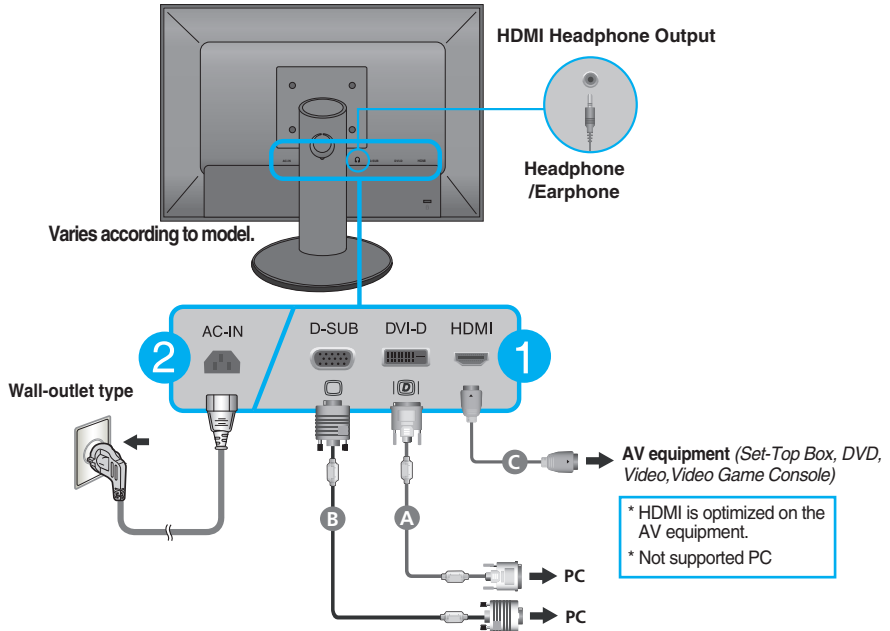

## Connecting with the PC/AV equipment

1. Before setting up the monitor, ensure that the power to the monitor, the computer system, and other attached devices is turned off.
2. Connect signal input cable **1** and power cord **2** in order, then tighten the screw of the signal cable.

- A** Connect DVI-D Cable
- B** Connect D-SUB Cable
- C** Connect HDMI Cable

### NOTE

- This is a simplified representation of the rear view.
- This rear view represents a general model; your display may differ from the view as shown.

### When using a D-Sub signal input cable connector for Macintosh

**Mac adapter** : For older Apple Macintosh use, a separate plug adapter is needed to change the 15 pin high density (3 row) D-sub VGA connector on the supplied cable to a 15 pin 2 row connector.

# Connecting the Display

- Put the power cord and cables into the cable holder.

- Press the Power Button (  ) on the front panel to turn the power on. When monitor power is turned on, the **'Self Image Setting Function'** is executed automatically. (Only for D-SUB input)

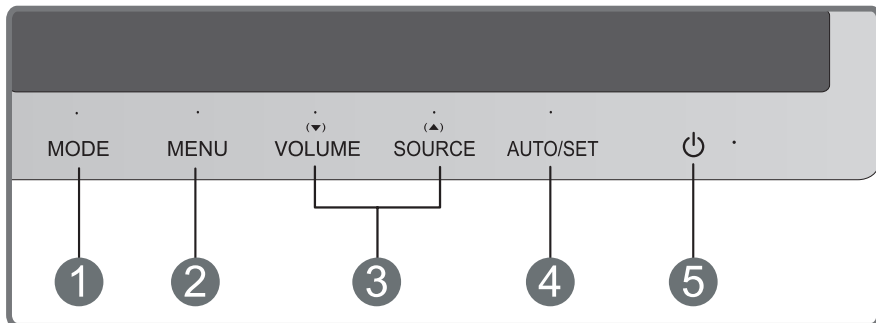

## NOTE

**'Self Image Setting Function'?** This function provides the user with optimal display settings. When the user connects the monitor for the first time, this function automatically adjusts the display to optimal settings for individual input signals.

**'AUTO/SET' Function?** When you encounter problems such as blurry screen, blurred letters, screen flicker or tilted screen while using the device or after changing screen resolution, press the AUTO/SET function button to improve resolution.

## Front Panel Controls

- 
- 1 MODE Button** Use this button to move to items in **MODE (MOVIE, TEXT, PHOTO, USER, sRGB)**.  
For more information, refer to page 16.

- 
- 2 MENU Button** Use this button to enter or exit the On Screen Display.

---

### OSD LOCKED/UNLOCKED

This function allows you to lock the current control settings, so that they cannot be inadvertently changed. Press and hold the **MENU button** for several seconds. The message "**OSD LOCKED**" should appear.

You can unlock the OSD controls at any time by pushing the **MENU button** for several seconds. The message "**OSD UNLOCKED**" should appear.

## 3 ▼ ▲ Buttons

Use these buttons to select or adjust functions in the On Screen Display.

### (▼) VOLUME

To adjust the headphone/earphone volume. Press the AUTO/SET button to MUTE ON and press it once again to MUTE OFF. (Only for HDMI input)

#### MUTE OFF

Use the ▼ ▲ buttons to adjust the volume.

#### MUTE ON

### (▲) SOURCE (SOURCE Hot key)

When two or more input signals are connected, you can select the input signal (D-SUB/DVI-D/HDMI) you want. When only one signal is connected, it is automatically detected.

The default input signal is D-SUB.

## 4 AUTO/SET Button

Use this button to enter a selection in the On Screen Display.

### AUTO IMAGE ADJUSTMENT

When adjusting your display settings, always press the **AUTO/SET** button before entering the On Screen Display(OSD). (Only for D-SUB input)

This will automatically adjust your display image to the ideal settings for the current screen resolution size (display mode).

The best display mode is

**1680 x 1050**

## 5 Power Button

Use this button to turn the display on or off.

### Power Indicator

The power indicator stays red if the display is running properly (On Mode). If the display is in Sleep Mode (Energy Saving), the power indicator is blinking red.

## Screen Adjustment

Making adjustments to the image size, position and operating parameters of the display is quick and easy with the On Screen Display Control system.

A short example is given below to familiarize you with the use of the controls. The following section is an outline of the available adjustments and selections you can make using the OSD.

To make adjustments in the On Screen Display, follow these steps:

- 1 Press the **MENU Button**, then the main menu of the OSD appears.
- 2 To access a control, use the **▼ or ▲ Buttons**. When the icon you want becomes highlighted, press the **AUTO/SET Button**.
- 3 Use the **▼ / ▲ Buttons** to adjust the image to the desired level. Use the **AUTO/SET Button** to select other sub-menu items.
- 4 Press the **MENU Button** once to return to the main menu to select another function. Press the **MENU Button** twice to exit from the OSD.

# On Screen Display(OSD) Selection and Adjustment

The following table indicates all the On Screen Display control, adjustment, and setting menus.

**DSUB** : D-SUB(Analog signal) input

**DVI** : DVI-D(Digital signal) input

**HDMI** : HDMI input

Main menu	Sub-menu	Supported signals	Description
<b>MODE</b>	MOVIE	<b>DSUB</b> <b>DVI</b> <b>HDMI</b>	It is a mode that the screen is adjusted to the best to view the videos.

# On Screen Display(OSD) Selection and Adjustment

■ ■ ■ The OSD screen will appear when you press the **MODE** button on the front of the monitor.

Main menu	Description
	<p><b>MOVIE</b></p> <p>It is a mode that the screen is adjusted to the best to view the videos.</p>
	<p><b>TEXT</b></p> <p>It is a mode that the screen is adjusted to the best for the text works.</p>
	<p><b>PHOTO</b></p> <p>It is a mode that the screen is adjusted to the best to view pictures.</p>
	<p><b>USER</b></p> <p>It is a mode that the user can adjust each element. It can adjust the color mode of the Main Menu.</p> <p>* Outside the User mode, Image(brightness, gamma) and color cannot be adjusted.</p>
	<p><b>sRGB</b></p> <p>It is a mode that the screen is adjusted to the standard sRGB.</p>

# On Screen Display(OSD) Selection and Adjustment

- ■ ■ You were introduced to the procedure of selecting and adjusting an item using the OSD system. Listed below are the icons, icon names, and icon descriptions of the all items shown on the Menu.

Press the **MENU** Button, then the main menu of the OSD appears.

■ MENU : Exit  
■ ▼ ▲ : Adjust (Decrease/Increase)  
■ SET : Enter  
    ↓ : Select another sub-menu  
    ↺ : Restart to select sub-menu

**Menu Name** — PICTURE

**Icons** —

**Button Tip** — MENU ▼ ▲ SET ↓

**Sub-menus** — BRIGHTNESS 50  
CONTRAST 50  
GAMMA  $\gamma$  2.2

## NOTE

- OSD (On Screen Display) menu languages on the monitor may differ from the manual.

Main menu	Sub menu	Description
-----------	----------	-------------

## PICTURE

D-SUB/DVI-D input

**BRIGHTNESS** To adjust the brightness of the screen.

**CONTRAST** To adjust the contrast of the screen.

**GAMMA** Set your own gamma value.  
: 1.8 ~ 2.6  
On the monitor, high gamma values display whitish images and low gamma values display blackish images.

HDMI Input

**BLACK LEVEL** You can set the offset level. If the black level value becomes higher, the screen grows brighter. If the value becomes lower, the screen grows darker.  
(Only for HDMI input)

\* **Offset?** As the criteria for video signal, it is the darkest screen the monitor can show.

- **MENU** : Exit
- ▼ : Decrease
- ▲ : Increase
- **SET** : Select another sub-menu

# On Screen Display(OSD) Selection and Adjustment

Main menu	Sub menu	Description
-----------	----------	-------------

## COLOR

### PRESET Mode

**COLOR TEMP** Select either PRESET or USER to adjust the screen color.

**PRESET** Select the preset color temperature.  
5700K-6500K: Yellow screen color.  
6500K-7500K: Red screen color.  
8500K-9300K: Blue screen color.

### USER Mode

**USER** A user can create screen color by adjusting RED, GREEN and BLUE.  
**RED GREEN BLUE** Set your own red color levels.

**SIX COLOR** Sets and stores the hue and saturation for six colors(RED/GREEN/BLUE/CYAN/MAGENTA/YELLOW) to satisfy the color requirements of a user.

**HUE** Adjusts the screen hue.

**SATURATION** Adjusts the color sharpness on the screen. Lower values make the color sharpness weaker and colors lighter while higher values make the color sharpness stronger and colors darker.

- MENU : Exit
- ▼ : Decrease
- ▲ : Increase
- SET : Select another sub-menu

Use the ▼ ▲ button to go to sub-menu.

**COLOR RESET** Resets the color settings to the factory default settings for the current input device.

- MENU : Exit
- ▼, ▲ : Move
- SET : Select another sub-menu

# On Screen Display(OSD) Selection and Adjustment

Main menu	Sub menu	Description
-----------	----------	-------------

## TRACKING

**HORIZONTAL** To move image left and right.

**VERTICAL** To move image up and down.

**CLOCK** To minimize any vertical bars or stripes visible on the screen background. The horizontal screen size will also change.

**PHASE** To adjust the focus of the display. This item allows you to remove any horizontal noise and clear or sharpen the image of characters.

- **MENU** : Exit
- ▼ : Decrease
- ▲ : Increase
- **SET** : Select another sub-menu

**SHARPNESS** To adjust the clearness of the screen.

# On Screen Display(OSD) Selection and Adjustment

Main menu	Sub menu	Description
-----------	----------	-------------

## SETUP

### LANGUAGE

To choose the language in which the control names are displayed.

### OSD POSITION

To adjust position of the OSD window on the screen.

### WHITE BALANCE

If the output of the video card is different the required specifications, the color level may deteriorate due to video signal distortion. Using this function, the signal level is adjusted to fit into the standard output level of the video card in order to provide the optimal image. Activate this function when white and black colors are present in the screen. (Only for D-SUB input)

### D-SUB input

### OVERSCAN

Removes noise that may occur at the edges of an image when HDMI is connected to an external device. When ON is selected, the image size is reduced to prevent noise. When OFF is selected, the original image size is maintained regardless of noise. (Only for HDMI input)

### POWER INDICATOR

Use this function to set the power indicator on the front side of the monitor to **ON** or **OFF**. If you set **OFF**, it will go off. If you set **ON** at any time, the power indicator will automatically be turned on.

### HDMI input

### 4:3 IN WIDE

Adjusts the aspect ratio between wide screen (full screen) and 4:3 screen.

- **WIDE** : Switch to full screen mode according to input image signal.
- **4:3** : Change the input image signal ratio to 4:3.

- **MENU** : Exit
- **▼** : Adjust
- **▲** : Adjust
- **SET** : Select another sub-menu

### FACTORY RESET

Restore all factory default settings except "**LANGUAGE**." Press the **▼**, **▲** buttons to reset immediately.

## NOTE

If this does not improve the screen image, restore the factory default settings. If necessary, execute the white balance function again. This function will be enabled only when the input is a D-SUB input.

## Check the following before calling for service.

No image appears	
<ul style="list-style-type: none"><li>● Is the power cord of the display connected?</li></ul>	<ul style="list-style-type: none"><li>• Check and see if the power cord is connected properly to the power outlet.</li></ul>
<ul style="list-style-type: none"><li>● Is the power indicator light on?</li></ul>	<ul style="list-style-type: none"><li>• Press the Power button.</li></ul>

# Installing the Wall mount plate

This monitor satisfies the specifications of the Wall mount plate or the interchange device.

1. After moving the product to face downward, make sure to place it on a soft cloth or a cushion to avoid surface damage.

2. Separate the head and the stand with the use of a screwdriver.

3. Install the Wall mount plate.

### Wall mount plate (Separate purchase)

- Be sure to use screws and a wall mount that meet VESA standards.
- Using screws longer than those recommended might damage the product.
- Using screws that do not meet VESA standards might either damage the product or result in it coming away from the wall. We will not be held responsible for any damage resulting from failure to follow these instructions.

< Screw Mounting Interface Dimension >  
Hole spacing : 100 mm x 100 mm

**Kensington Security Slot**  
Connected to a locking cable that can be purchased separately at most computer stores.
