LG

Super Blu Player
Owner's Manual

Model: BH200

Before connecting, operating or adjusting this product, please read this instruction booklet carefully and completely.

CAUTION

**RISK OF ELECTRIC SHOCK
DO NOT OPEN**

CAUTION: TO REDUCE THE RISK
OF ELECTRIC SHOCK
DO NOT REMOVE COVER (OR BACK)
NO USER-SERVICEABLE PARTS INSIDE
REFER SERVICING TO QUALIFIED SERVICE
PERSONNEL.

This lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated dangerous voltage within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

**WARNING:** TO PREVENT FIRE OR ELECTRIC SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

WARNING: Do not install this equipment in a confined space such as a book case or similar unit.

CAUTION:
Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.

Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from over heating.
The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface.This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instruction have been adhered to.

CLASS 1 LASER PRODUCT
KLASSE 1 LASER PRODUKT
LUOKAN 1 LASER LAITE
KLASS 1 LASER APPARAT
CLASSE 1 PRODUIT LASER

CAUTION:
This product employs a Laser System.
To ensure proper use of this product, please read this owner's manual carefully and retain it for future reference. Should the unit require maintenance, contact an authorized service center.
Use of any controls, adjustments, or procedures other than those specified herein may result in hazardous radiation exposure.
To prevent direct exposure to laser beam, do not try to open the enclosure. Visible laser radiation when open. DO NOT STARE INTO BEAM.

CAUTION: The apparatus should not be exposed to water (dripping or splashing) and no objects filled with liquids, such as vases, should be placed on the apparatus.

CAUTION concerning the Power Cord

Most appliances recommend they be placed upon a dedicated circuit;
That is, a single outlet circuit which powers only that appliance and has no additional outlets or branch circuits. Check the specification page of this owner's manual to be certain.
Do not overload wall outlets. Overloaded wall outlets, loose or damaged wall outlets, extension cords, frayed power cords, or damaged or cracked wire insulation are dangerous. Any of these conditions could result in electric shock or fire. Periodically examine the cord of your appliance, and if its appearance indicates damage or deterioration, unplug it, discontinue use of the appliance, and have the cord replaced with an exact replacement part by an authorized servicer.
Protect the power cord from physical or mechanical abuse, such as being twisted, kinked, pinched, closed in a door, or walked upon. Pay particular attention to plugs, wall outlets, and the point where the cord exits the appliance.
To disconnect power from the mains, pull out the mains cord plug. When installing the product, ensure that the plug is easily accessible.

Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Contents

Notes on Copyrights

- Because AACS (Advanced Access Content System) is approved as content protection system for BD and HD DVD format, similar to use of CSS (Content Scramble System) for DVD format, certain restrictions are imposed on playback, analog signal output, etc., of AACS protected contents. The operation of this product and restrictions on this product may vary depending on your time of purchase as those restrictions may be adopted and/or changed by AACS after the production of this product.
Furthermore, BD-ROM Mark and BD+ are additionally used as content protection systems for BD format, which imposes certain restrictions including playback restrictions for BD-ROM Mark and/or BD+ protected contents. To obtain additional information on AACS, BD-ROM Mark, BD+, or this product, please contact an authorized Customer Service Center.

- Many HD DVD/BD-ROM/DVD discs are encoded with copy protection. Because of this, you should only connect your player directly to your TV, not to a VCR. Connecting to a VCR results in a distorted picture from copy-protected discs.

- This product incorporates copyright protection technologies that are protected by certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation and is intended for home and other limited viewing uses only, unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

- Under the U.S. Copyright laws and Copyright laws of other countries, unauthorized recording, use, display, distribution, or revision of television programs, videotapes, HD DVDs, BD-ROM discs, DVDs, CDs and other materials may subject you to civil and/or criminal liability.

Manufactured under license from Dolby Laboratories. Dolby and the double-D symbol are trademarks of Dolby Laboratories.

Manufactured under license under U.S. Patent #'s: 5,451,942; 5,956,674; 5,974,380; 5,978,762; 6,487,535 & other U.S. and worldwide patents issued & pending. DTS and DTS Digital Surround are registered trademarks and the DTS logos and Symbol are trademarks of DTS, Inc. © 1996-2007 DTS, Inc. All Rights Reserved.

HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI licensing LLC.

SIMPLINK

What is SIMPLINK?

Some functions of this unit are controlled by the TV's remote control when this unit and LG TV's with SIMPLINK are connected through HDMI connection.

- Controllable functions by LG TV's remote control; Play, Pause, Scan, Skip, Stop, Power Off, etc.
- Refer to the TV owner's manual for the details of SIMPLINK function.
- LG TV's with SIMPLINK function have the logo as shown above.

Note:

Depending on the disc type or playing status, some SIMPLINK operation may differ from your purpose or not work.

Introduction

To ensure proper use of this product, please read this owner's manual carefully and retain for future reference.

This manual provides information on the operation and maintenance of your player. Should the unit require service, contact an authorized service location.

About the ⊘ Symbol Display

" ⊘ " may appear on your TV display during operation and indicates that the function explained in this owner's manual is not available on that specific media.

Symbols Used in this Manual

Note:
Indicates special notes and operating features.

Tip:
Indicates tips and hints for making the task easier.

A section whose title has one of the following symbols are applicable only to the disc represented by the symbol.

BD BD-ROM disc
HD DVD HD DVD-Video disc
DVD DVD-Video disc
ACD Audio CDs
MP3 MP3 files
WMA WMA files
JPEG JPEG files

Notes on Discs

Handling Discs
Do not touch the playback side of the disc. Hold the disc by the edges so that fingerprints do not get on the surface. Never stick paper or tape on the disc.

Storing Discs
After playing, store the disc in its case. Do not expose the disc to direct sunlight or sources of heat and never leave it in a parked car exposed to direct sunlight.

Cleaning Discs
Fingerprints and dust on the disc can cause poor picture quality and sound distortion. Before playing, clean the disc with a clean cloth. Wipe the disc from the center out.
Do not use strong solvents such as alcohol, benzine, thinner, commercially available cleaners, or anti-static spray intended for older vinyl records.

Moisture Condensation

Never operate this product immediately after moving it from a cold location to a warm location. Leave it for two or three hours without operating it. If you use this product in such a situation, it may damage discs and internal parts.

Handling the Unit

When shipping the unit
Please save the original shipping carton and packing materials. If you need to ship the unit, for maximum protection, re-pack the unit as it was originally packed at the factory.

Keeping the exterior surfaces clean
Use the supplied cloth for cleaning the surfaces of the player.

- Do not use volatile liquids such as insecticide spray near the unit.
- Wiping with strong pressure may damage the surface.
- Do not leave rubber or plastic products in contact with the unit for a long period of time.

Cleaning the unit
To clean the player, use a soft, dry cloth. If the surfaces are extremely dirty, use a soft cloth lightly moistened with a mild detergent solution.
Do not use strong solvents such as alcohol, benzine, or thinner, as these might damage the surface of the unit.

Maintaining the Unit
The unit is a high-tech, precision device. If the optical pick-up lens and disc drive parts are dirty or worn, the picture quality could be diminished.

For details, please contact your nearest authorized service center.

Introduction

5

Playable Discs

Blu-ray Disc
Discs such as movies that can be purchased or rented

HD DVD Disc
Discs such as movies that can be purchased or rented

DVD-VIDEO (8 cm / 12 cm disc)
Discs such as movies that can be purchased or rented

DVD-R (8 cm / 12 cm disc)
Video mode and finalized only
Supports the dual layer disc also

DVD-RW (8 cm / 12 cm disc)
Video mode and finalized only

DVD-RAM (8 cm / 12 cm disc)
Standard version 2.0 only

DVD+R
Finalized disc only
Supports the dual layer disc also

DVD+RW
Video mode and finalized only

Audio CD (8 cm / 12 cm disc)
Music CDs or CD-Rs/CD-RWs in music CD format that can be purchased

CD-R/CD-RW (8 cm / 12 cm disc)
CD-R/CD-RW discs that contain audio titles, MP3, WMA, or JPEG files.

Regional Code

This unit has a regional code printed on the rear of the unit. This unit can play only BD-ROM, HD DVD, or DVD discs labeled same as the rear of the unit or "ALL".

Notes:

● Depending on the conditions of the recording equipment or the CD-R/RW (or DVD±R/RW) disc itself, some CD-R/RW (or DVD±R/RW) discs cannot be played on the unit.

● Do not attach any seal or label to either side (the labeled side or the recorded side) of a disc.

● Do not use irregularly shaped CDs (e.g., heart-shaped or octagonal). Doing so may result in malfunctions.

● Depending on the recording software & the finalization, some recorded discs (CD-R/RW or DVD±R/RW) may not be playable.

● DVD±R/RW and CD-R/RW discs recorded using a personal computer or a DVD or CD Recorder may not play if the disc is damaged or dirty, or if there is dirt or condensation on the player's lens.

● If you record a disc using a personal computer, even if it is recorded in a compatible format, there are cases in which it may not play because of the settings of the application software used to create the disc. (Check with the software publisher for more detailed information.)

● This player requires discs and recordings to meet certain technical standards in order to achieve optimal playback quality. Pre-recorded DVDs are automatically set to these standards. There are many different types of recordable disc formats (including CD-R containing MP3 or WMA files) and these require certain pre-existing conditions to ensure compatible playback.

● Customers should note that permission is required in order to download MP3 / WMA files and music from the Internet. Our company has no right to grant such permission. Permission should always be sought from the copyright owner.
BD-ROM Disc Features

BD-ROM Discs can store 25 GB (single layer) or 50 GB (dual layer) on a single sided disc - about 5 to 10 times the capacity of a DVD.
BD-ROM Discs also support the highest quality HD video available in the industry (up to 1920 x 1080) - Large capacity means no compromise on video quality. Furthermore, a BD-ROM disc has the same familiar size and look as DVD.

- The following BD-ROM disc features are disc dependent and will vary.
- Appearance and navigation of features will also vary from disc to disc.
- Not all discs will have the features described below.
- BD-ROM, Hybrid disc have both BD-ROM and DVD (or CD) layers on one side. Because this type of disc is a technology currently in development, such discs may not operate properly in this player.

Video highlights
The BD-ROM format for movie distribution supports three highly advanced video codecs, including MPEG-2, MPEG4 AVC (H.264), and SMPTE VC1.
HD video resolutions are also available:
- 1920 x 1080 HD
- 1280 x 720 HD

For High-Definition Playback
To view high-definition contents from BD-ROM discs, an HDTV is required. Some discs may require HDMI OUT for viewing of high-definition contents. Ability to view high-definition contents in BD-ROM discs may be limited depending on the resolution of your TV.

Graphic planes
Two individual, full HD resolution (1920x1080) graphic planes (layers) are available, on top of the HD video layer. One plane is assigned to video-related, frame accurate graphics (like subtitles), and the other plane is assigned to interactive graphic elements, such as buttons or menus.
For both planes, various wipes, fades and scroll effects may be available.

Graphic Plane

HD Video

Menu sounds
When you highlight or select a menu option, sounds can be heard such as button clicks or a voice-over explaining the highlighted menu choice.

Multi-page/PopUp Menus
With DVD-Video, playback is interrupted each time a new menu screen is accessed. Due to BD-ROM disc's ability to preload data from the disc without interrupting playback, a menu can consist of several pages.
You can browse through the menu pages or select different menu paths, while the audio and video remain playing in the background.

Interactivity
Certain BD-ROM Discs may contain animated menus and/or trivia games.

User Browsable Slideshows
With BD-ROM Discs, you can browse through various still pictures while the audio remains playing.

Subtitles
Depending on what is contained on the BD-ROM disc, you may be able to select different font styles, sizes and colors for some subtitles. Subtitles may also be animated, scrolled or faded in and out.

BD-J Interactive Capability
The BD-ROM format supports Java for interactive functions. "BD-J" offers content providers almost unlimited functionality when creating interactive BD-ROM titles.

BD-ROM Disc Compatibility
This player supports BD-ROM Profile 1 version 1.0 only. Other profiles (i.e., BD-ROM Profile 1 version 1.1 or Profile 2) could be supported through updating player's firmware later. It may be required to update the firmware in case of playing a certain newly released commercial BD-ROM disc. For updating player's firmware, please refer to http://pa.lgservice.com.

Introduction
HD DVD Disc Features

HD DVD video discs are high-density, high-capacity discs.

● There are 2 types of HD DVD disc; one is standard content disc and the other is advanced content disc. Standard content disc is pure extension of DVD Video. Advanced content disc realizes more interactivity in addition to the extension of audio and video realized by standard disc.

● The HD DVD disc standard has been approved by the DVD forum.

● HD DVD (single layer): Maximum capacity of 15 GB
HD DVD (dual layer): Maximum capacity of 30 GB
A single layer single sided disc (15 GB) has capacity of about maximum 8 hours in 1125 line high definition picture; about maximum 48 hours in 525 line standard definition picture (depending on bitrate of pre-recorded contents).

● HD DVD Twin Format Discs have both HD DVD and DVD layers on one side. HD DVD Combination DVD Discs have HD DVD material on one side and standard DVD material on the other side. Because this type of disc is a technology currently in development, such discs may not operate properly in this player.

● Some titles may be played back with black "letterbox bars" because the title is recorded with bars by the contents provider.

Compatibility Notes

● Because BD-ROM and HD DVD are a new format, certain disc, digital connection and other compatibility issues are possible. If you experience compatibility problems, please contact an authorized Customer Service Center.

● Viewing high-definition content and up-converting standard DVD content may require an HDMI-capable input or HDCP-capable DVI input on your display device.

● Some BD-ROM, HD DVD and DVD discs may restrict the use of some operation commands or features.

● Dolby TrueHD, Dolby Digital Plus and DTS-HD capability is limited to 5.1 channels if you use Digital Audio or HDMI connection for the audio output of the unit.

● This player includes memory that is used to store some disc related information, including downloaded on-line content. The disc you are using will control how long this information is retained.

Certain System Requirements

For high definition video playback:

● High definition display that has COMPONENT or HDMI input jacks.

● BD-ROM or HD DVD disc with high definition content.

● HDMI or HDCP capable DVI input on your display device is required for some content (as specified by disc authors).

● For up-conversion of standard definition DVD, an HDMI or HDCP capable DVI input on your display device is required for copy protected content.

For Dolby® Digital Plus and DTS-HD multi-channel audio playback:

● An amplifier/receiver with a built-in (Dolby Digital or DTS) decoder.

● Main, center, surround speakers and subwoofer as necessary for chosen format.

Using an USB Flash Drive

This unit can play the MP3 / WMA / JPEG files contained in the USB Flash Drive.

Inserting/Removing the USB Flash Drive
Inserting the USB Flash Drive
Insert straight-in until it fits into place.

Removing the USB Flash Drive
Withdraw the USB Flash Drive carefully.

Notes:
- This unit supports only USB Flash Drives with FAT16 or FAT32 format.
- Do not extract the USB Flash Drives during operation (play, etc.).
- A USB Flash Drive which requires additional program installation when you have connected it to a computer, is not supported.
- USB Flash Drive: USB Flash Drive that support USB1.1 and USB2.0.

Using the USB Flash Drive
1. Connect a USB Flash Drive.
2. Press HOME on the Remote Control.
3. Select [Music] or [Photo] option then press ENTER.
4. Select [USB] then press ENTER.
   MUSIC (or PHOTO) menu will appear.
   Details for the menu are on page 29-30.

Using the Home Menu

From the Home Menu screen you can access all the Media for playback and setting of the unit.

1. Press HOME and the Home Menu appears.
2. Use ◄ / ► to select the desired option then press ENTER.

   [Movie] – Start video media's playback.

   [Photo] – Displays PHOTO menu.

   [Music] – Displays MUSIC menu.

   [Setup] – Displays Setup menu.

Tip:
If you select the [Photo] or [Music] option when the USB Flash Drive is connected and a disc is inserted simultaneously, the menu for selecting a media will appear. Select a media then press ENTER.

For example:
Notes:
- The unit will be in complete stop mode then HOME menu will appear if you press HOME during playback.
- If you insert a DVD or an unplayable disc that is formatted as ISO9660 or UDF, the [Photo] or [Music] option can be selected in the HOME menu. But you cannot play it

Introduction

Front Panel
a POWER Button
Switches the unit ON or OFF.

b Disc Tray
Insert a disc here.

c Blu-ray Disc Indicator
Indicates when a BD-ROM disc is loaded.

d HD DVD Indicator
Indicates when an HD DVD disc is loaded.

e Display Window
Shows the current status of the player.

f Remote Sensor
Point the Remote Control here.

g ▲ (OPEN/CLOSE)
Opens or closes the disc tray.

h ► / II (PLAY / PAUSE)
Starts playback.
Pause playback temporarily, press again to exit pause mode.

i ■ (STOP)
Stops playback.

j I◄◄ / ►►I (SKIP)
Go to next or previous track/chapter.

k USB Port
Connect a USB Flash Drive.

Tip:
▲, ► / II , ■, I◄◄ and ►►I buttons are operated with a slight/brief touch.

Precautions in using the touch buttons
- Use the touch buttons with clean and dry hands.
- Do not press the touch buttons with too much force.
- Do not touch the button with any conductive material such as metallic object (Disc, etc). It may cause a malfunction.

Display Window
1 HDMI Indicator
Indicates when the HDMI output is available.

2 YPbPr Indicator
Indicates when the component video output is available.

3 Status Indicator
▶: Playing
▋▋: Paused

4 Video Output Resolution Indicator
Displays the video output resolution currently selected.
480i: 480 interlace
480p: 480 progressive
720p: 720 progressive
1080i: 1080 interlace
1080p: 1080 progressive

5 TITLE Indicator
Indicates current title number.

6 TRK (Track) Indicator
Indicates current track number.

7 CHAP (Chapter) Indicator
Indicates current chapter number.

8 Repeat Mode Indicator
Indicates when playing in repeat mode.

9 A-B Repeat Mode Indicator
Indicates when playing in A-B repeat mode.

10 RDM (Random) Indicator
Indicates when playing in random order.

11 AGL (Angle) Indicator
Indicates when playing a scene recorded with multi angles.

12 Remote Control Indicator
Indicates when Remote Control signal is received.

13 Disc Indicator
BD: Indicates when an BD-ROM disc is loaded.
HD DVD: Indicates when an HD DVD disc is loaded.
DVD: Illuminates when a DVD disc is loaded.
CD: Illuminates when a Audio CD, MP3/WMA or JPEG disc is loaded.

14 Character Indicators
Indicates total playing time, elapsed time, title number, chapter number or message, etc.

Remote Control
POWER: Switches the player ON or OFF.

TV POWER: Switches the TV ON or OFF.

OPEN/CLOSE (▲): Opens and closes the disc tray.

MARKER: Marks any point during playback.

SEARCH: Displays Marker Search menu.

AUDIO (◦◦): Selects an audio language or audio channel.

SUBTITLE ON/OFF: Switches the subtitle on or off.

SUBTITLE (▭): Selects a subtitle language.

REPEAT: Repeat a desired section.

A-B: Repeat sequence.

ANGLE (△): Selects a disc camera angle, if available.

••••• 2 •••••

Color (A, B,C, D) buttons: Are used for some BD-J or HD DVD interactivity applications. They are also used for [PHOTO] and [MUSIC] menu.

DISPLAY: Accesses On-Screen Display.

HOME: Accesses the Home Menu.

DISC MENU: Accesses menu on a disc.

Direction buttons: Select an option in the menu.

ENTER (◉): Acknowledges menu selection.

RETURN (⤴): Exits the menu.

CLEAR: Removes a mark on the Marker Search menu or a number when setting the password.

CURSOR*: Use while a HD DVD with support for cursor use is playing.

TITLE/POP UP: Displays the DVD or HD DVD's title menu or BD-ROM's popup menu, if available.

••••• 3 •••••

■ (STOP): Stops playback.

► (PLAY): Starts playback.

II (PAUSE/STEP): Pauses playback.

RESUME PLAY*: Resumes playback from the location last stopped when a disc menu appears.

◄◄ / ►► (SCAN): Search backward or forward.

I◄◄ / ►►I (SKIP): Go to next or previous chapter.

••••• 4 •••••

TV Control Buttons: See page 31.

0-9 numerical buttons: Select numbered options in a menu.

VIDEO PIP*: Switches PIP function on or off, if available (BD-ROM only).

RESOLUTION: Sets the output resolution for HDMI and COMPONENT VIDEO OUT jacks.

* Depending on a disc type or the pre-recorded contents of the HD DVD and BD, different functions may be executed than other media or there are no responses when pressing some buttons.

Remote Control Operation

Point the Remote Control at the remote sensor and press the buttons.

Caution
Do not mix old and new batteries. Never mix different types of batteries (standard, alkaline, etc.).

Remote Control Battery Installation
Remove the battery cover on the rear of the Remote Control, and insert two R03 (size AAA) batteries with ⊕ and ⊖ matched correctly.

Installation and Setup

Rear Panel
a **AC IN connector**
Connect the supplied power cord.

b **COMPONENT VIDEO OUT (Y Pb Pr)**
Connect to a TV with Y Pb Pr inputs.

c **DIGITAL AUDIO OUT (OPTICAL)**
Connect to digital (optical) audio equipment.

d **HDMI OUT (Type A)**
Connect to TV with HDMI inputs. (Interface for digital audio and video)

e **LAN port**
Connect a network with an always-on broadband connection.

f **VIDEO OUT**
Connect to a TV with video inputs.

g **2CH AUDIO OUT (Left/Right)**
Connect to a TV with 2 channel audio inputs.

Installation and Setup

13

HDMI connection

If you have a HDMI TV or monitor, you can connect it to this player using a HDMI cable.

1. Connect the HDMI jack on the player to the HDMI jack on a HDMI compatible TV or monitor **(H)**.

2. Set the TV's source to HDMI (refer to TV's Owner's manual).

Notes:

● You must select a HDMI audio output and a maximum sampling frequency that your TV accepts using [HDMI] and [Sampling Freq.] options on the setup menu (See page 21).

● If a connected HDMI device does not accept the audio output of the unit, the HDMI device's audio sound may be distorted or may not output.

Tip:

When you use HDMI connection, you can change the resolution for the HDMI output. (Refer to "Resolution Setting" on page 18.)

Cautions

● Changing the resolution when the connection has already been established may result in malfunctions. To solve the problem, turn off the player and then turn it on again.

● When the HDMI connection with HDCP is not verified, a message appears on the TV screen or TV screen is changed to black screen. In this case, check the the HDMI connection, or disconnect the HDMI cable.

● If there is noise or lines on the screen, please check the HDMI cable (length is generally limited to 15ft).

HDMI compatible TV

Rear of the player
Additional Information for HDMI

● When you connect a HDMI or DVI compatible device make sure of the followings:
  - Try switching off the HDMI/DVI device and this player. Next, switch on the HDMI/DVI device and leave it for around 30 seconds, then switch on this player.
  - The connected device's video input is set correctly for this unit.
  - The connected device is compatible with 720x480p, 1280x720p, 1920x1080i or 1920x1080p video input.

● Not all HDCP-compatible DVI devices will work with this player.
  - The picture will not be displayed properly with non-HDCP device.
  - This player does not playback and a message appears on TV screen.

Connections to Your TV

Make one of the following connections, depending on the capabilities of your existing equipment.

Tips
- Depending on your TV and other equipment you wish to connect, there are various ways you could connect the player. Use only one of the connections described below.
- Please refer to the manuals of your TV, Stereo System or other devices as necessary to make the best connections.

Caution
– Make sure the player is connected directly to the TV. Tune the TV to the correct video input channel.
– Do not connect the player's AUDIO OUT jack to the phono in jack (record player) of your audio system.
– Do not connect your player via your VCR. The image could be distorted by the copy protection system.

Component Video Connection

Connect the COMPONENT VIDEO OUT jacks on the player to the corresponding input jacks on the TV using Y Pb Pr cables **(C)**.

Tip:

When you use COMPONENT VIDEO OUT connection, you can change the resolution for the output. (Refer to "Resolution setting" on page 18.)

Video Connection

Connect the VIDEO OUT jack on the player to the video in jack on the TV using a video cable **(V)**.

Audio (Left/Right) Connection

Connect the left and right AUDIO OUT jacks of the player to the audio left and right IN jacks on the TV using the audio cables **(A)**.

Installation and Setup

15
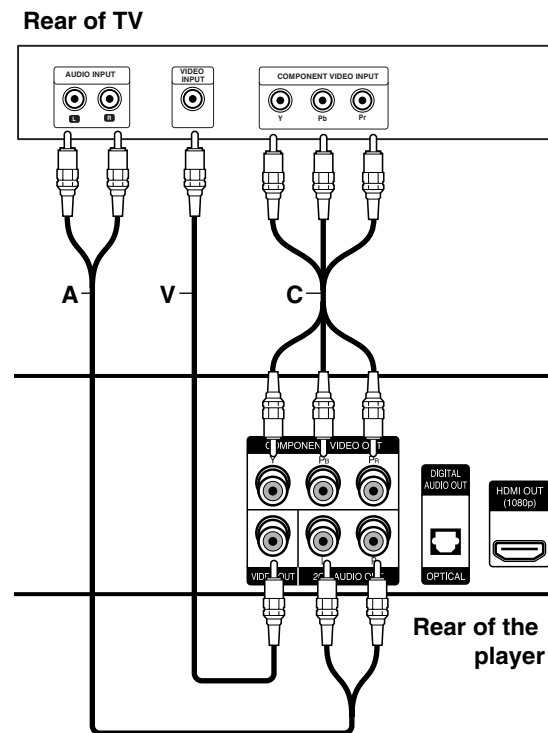

Connecting to an Amplifier

Make one of the following connections, depending on the capabilities of your existing equipment.

Note:

Since many factors affect the type of audio output, see "The unit's Audio Output Specifications" on page 36 for details.

Connecting to an Amplifier via 2 Channel Audio Output

Connect the Left and Right 2CH AUDIO OUT jacks on the player to the audio left and right in jacks on your amplifier, receiver, or stereo system, using audio cables **(A)**.

Connecting to an Amplifier via Digital Audio Output (Optical)

1. Connect the player's DIGITAL AUDIO OUT jack to the corresponding in jack on your amplifier. Use a digital audio cable **(O)**.

2. You will need to activate the player's digital output. (See "[AUDIO] Menu" on page 21.)

Connecting to an Amplifier via HDMI Output

1. Connect the player's HDMI OUT jack to the corresponding in jack on your amplifier. Use an HDMI cable **(H1)**.

2. You will need to activate the player's digital output. (See "[AUDIO] Menu" on page 21.)

Tip:

Connect the amplifier's HDMI output jack to HDMI input jack on your TV using an HDMI cable **(H2)** if your amplifier has HDMI output jack.

Digital Multi-channel sound

A digital multi-channel connection provides the best sound quality. For this you need a multi-channel Audio/Video Receiver that supports one or more of the audio formats supported by your player. Check the receiver manual and the logos on the front of the receiver. (PCM Stereo, PCM Multi-Ch, Dolby Digital and/or DTS)

Notes:

- You must select a digital audio output and a maximum sampling frequency that your Amplifier (or AV receiver) accepts using [SPDIF], [HDMI] and [Sampling Freq.] options on the setup menu (See page 21).

- With digital audio connection (SPDIF or HDMI), Disc Menu button sounds of BD-ROM or HD DVD may not be heard if the [SPDIF] or [HDMI] option is set to [Primary Pass-Thru].

- If the audio format of the digital output does not match the capabilities of your receiver, the receiver will produce a strong, distorted sound or no sound at all.

- Multi-channel Digital Surround Sound via digital connection can only be obtained if your receiver is equipped with a Digital Multi-channel decoder.

- To see the audio format of the current disc in the on-screen display, press AUDIO.

Rear of the player

Amplifier (Receiver)

HDMI compatible TV
Internet connection

This player can be connected to a local area net-work (LAN) via the LAN port on the rear panel. After making the physical connection the player needs to be set up for network communication. This is done from the [Setup] menu — see "[NETWORK] Menu" on page 23 for detailed instructions. This connection is used to access special HD DVD or BD-ROM sites.

Connect the player's LAN port to the corresponding port on your Modem or Router using a LAN cable. Use a commercially available straight LAN cable (Category 5/CAT5 or better with RJ45 connector).

Cautions:

● When plugging or unplugging the LAN cable, hold the plug portion of the cable. When unplugging, do not pull on the LAN cable but unplug while pressing down on the lock.

● Do not connect a modular phone cable to the LAN port.

● Since there are various connection configura-tions, please follow the specifications of your telecommunication carrier or internet service provider.

Rear of the player
Notes:

• Depending on the internet service provider (ISP), the number of devices that can receive internet service may be limited by the applicable terms of service. For details, contact your ISP.

• Our company is not responsible for any malfunc-tion of the player and/or the internet connection feature due to communication errors/malfunc-tions associated with your broadband internet connection, or other connected equipment.

• Our company is not responsible for any trouble in your internet connection.

• If you wish to use a wireless network to connect the player, you will need to use a wireless LAN ethernet adapter to connect the player to the net-work.

• The features of HD DVD or BD-ROM discs made available through the Internet Connection feature are not created or provided by our company, and our company is not responsible for their function-ality or continued availability. Some disc related material available by the Internet Connection may not be compatible with this player. If you have questions about such content, please con-tact the producer of the disc.

• Some internet contents may require a higher bandwidth connection.

• Even if the player is properly connected and con-figured, some internet contents may not operate properly because of internet congestion, the quality or bandwidth of your internet service, problems at the provider of the content or com-patibility issues.

• Some internet connection operations may not be possible due to certain restrictions set by the Internet service provider (ISP) supplying your broadband Internet connection.

• Any fees charged by an ISP including, without limitation, connection charges are your responsi-bility.

• A 10 Base-T or 100 Base-TX LAN port is required for connection to this player. If your internet service does not allow for such a con-nection, you will not be able to connect the play-er.

• You must use a Router to use xDSL service.

• A DSL modem is required to use DSL service and a cable modem is required to use cable modem service. Depending on the access method of and subscriber agreement with your ISP, you may not be able to use the internet con-nection feature contained in this player or you may be limited to the number of devices you can connect at the same time. (If your ISP limits sub-scription to one device, this player may not be allowed to connect when a PC is already con-nected.)

• The use of a "Router" may not be allowed or its usage may be limited depending on the policies and restrictions of your ISP. For details, contact your ISP directly.

• Your ISP may protect this player from being con-nected to network when confirming MAC ADDRESS. In that case, contact your ISP to request to initialize MAC ADDRESS.

Installation and Setup

17

Resolution Setting

The player provides several output resolutions for HDMI OUT and COMPONENT VIDEO OUT jacks. You can change the resolution using [Setup] menu or pressing the RESOLUTION button in complete stop mode.

Auto – If the HDMI OUT jack is connected for TVs providing display information (EDID), automatically selects the resolution best suited to the connected TV (1080p, 1080i, 720p or 480p). (only for HDMI connection)

1080p – Outputs 1080 lines of progressive video. (only for HDMI connection)

1080i – Outputs 1080 lines of interlaced video.

720p – Outputs 720 lines of progressive video.

480p – Outputs 480 lines progressive video.

480i – Outputs 480 lines of interlaced video. (only for COMPONENT VIDEO OUT connections)

How to change the resolution using RESOLUTION button

Press RESOLUTION button in complete stop mode.

RESOLUTION button
How to change the resolution using Setup menu

1. Press HOME and the Home Menu appears.

2. Select [Setup] and press ENTER. The Setup menu appears.

3. Use ▲ / ▼ to select [DISPLAY] option then press ► to move to the second level.

4. Use ▲ / ▼ to select the [Resolution] option then press ► to move to the third level.

5. Use ▲ / ▼ to select the desired resolution then press ENTER to confirm your selection.

Available resolution according to connection

HDMI OUT connection

• Auto, 1080p, 1080i, 720p and 480p are available.

• 480i is not available.

• If you select a resolution manually and then connect the HDMI jack to TV and your TV does not accept it, the resolution setting is set to [Auto].

• If you select a resolution that your TV does not accept, the warning message appears for a while then it disappear. You must select a resolution that your TV does accept.

• The 1080p video output frame rate may be automatically set to either 24Hz or 60Hz depending both on the capability and preference of the connected TV and based on the native video frame rate of the content on the Blu-ray disc or HD DVD.

COMPONENT VIDEO OUT connection

• 1080i, 720p, 480p and 480i are available.

• The resolution may be limited depending on the title in BD-ROM and HD DVD.

• If the disc is copy protected, the resolution will be changed to 480p automatically.

• 1080p is not available.

VIDEO OUT connection

• The resolution of the VIDEO OUT jack is fixed to 480i.

Notes:
• Depending on your display, some of the resolution settings may result in the picture disappearing or an abnormal picture appearing. In this case, press STOP twice then RESOLUTION repeatedly until the picture re-appears.

• This player supports simultaneous output of video on its HDMI OUT and COMPONENT VIDEO OUT jacks. The resolution on the HDMI output will be the same as the resolution output on the component video output. Thus, because the HDMI output can change automatically to match the maximum available resolution of your display when [Resolution] option is set to [Auto] on the setup menu, if you connect both the HDMI output and component video output, the resolution on the component video output will change if the HDMI output Auto-adjusts.

Initial Settings

By using the Setup menu, you can make various adjustments to items such as picture and sound. You can also set a language for the subtitles and the Setup menu, among other things. For details on each Setup menu item, see pages 19 to 24.

To display and exit the Menu:
Press HOME and the Home Menu appears. Select [Setup] then press ENTER, and Setup menu appears.
Press RETURN or HOME to exit the Setup menu.

To go to the next level:
Press ► on the Remote Control.

To go back to the previous level:
Press ◄ on the Remote Control.

General Operation

1. Press HOME and the Home Menu appears.

2. Select [Setup] and press ENTER. The Setup menu appears.

3. Use ▲ / ▼ to select the desired option then press ► to move to the second level. The screen shows the current setting for the selected item, as well as alternate setting(s).

4. Use ▲ / ▼ to select the second desired option then press ► to move to the third level.

5. Use ▲ / ▼ to select the desired setting then press ENTER to confirm your selection. Some items require additional steps.

6. Press RETURN or HOME to exit the Setup menu.

[DISPLAY] Menu

TV Aspect Ratio

[4:3 Letter Box] – Select when a standard 4:3 TV is connected. Displays theatrical images with masking bars above and below the picture.

[4:3 Pan Scan] – Select when a standard 4:3 TV is connected. Displays pictures cropped to fill your TV screen. Both sides of the picture are cut off.

[16:9 Wide] – Select when a 16:9 wide TV is connected.

Note:
You cannot select [4:3 Letter Box] and [4:3 Pan Scan] option when the resolution is set to higher than 720p.

Resolution

Sets the output resolution of the Component and HDMI video signal.
Refer to "Resolution Setting" on page 18 for details about the resolution.

Installation and Setup

[DISPLAY] Menu (Continued)

Video Mode

Select the video mode during play.

[Default] Qᴅᴇᴏ **–** The video is adjusted automatically. Qdeo delivers rich high-definition video quality through a suite of advanced QuietVideo™ technologies. You cannot adjust other video adjustment options.

[User] – You can make further adjustments for video using [Video Adjustment], [Color Adjustment], [White NR], [Block NR], and [Mosquito NR] options.

Video Adjustment

You can adjust Contrast, Brightness, Sharpness or Color.

1. Select [Video Adjustment] option then press ENTER.
    The menu for video adjustment will appear

2. Use ▲ / ▼ to select a desired option then use ◄ / ► to adjust the value.
    • Select [Default] option then press ENTER to reset the video adjustment.
    • Select [Close] option then press ENTER to exit the [Video Adjustment] menu.

Color Adjustment

You can adjust picture's color.

1. Select [Color Adjustment] option then press ENTER.
    The menu for color adjustment will appear

2. Use ▲ / ▼ to select a desired option then use ◄ / ► to adjust the value.
    • Select [Default] option then press ENTER to reset the color adjustment.
    • Select [Close] option then press ENTER to exit the [Color Adjustment] menu.

White NR (White Noise Reduction)

Enhance the video quality by reducing the white (random) noise of the digital video.
The higher White NR level makes the video softer.

Block NR (Block Noise Reduction)

Set to [On] to reduce the block noise, which may appear especially on fast-moving pictures, produced in the MPEG compression process.

Mosquito NR (Mosquito Noise Reduction)

Set to [On] to reduce the mosquito (scattering) noise produced in the MPEG compression process.

Black Level

You can adjust the black level of the output signal.

[Off] – Normal black level. (7.5 IRE)

[On] – To display deeper, richer black than in [Off] setting. (0 IRE)

Note:
Black Level control is only valid in component 480i case.

[LANGUAGE] Menu

Display Menu

Select a language for the Setup menu and on-screen display.

Disc Menu / Disc Audio / Disc Subtitle

Select the language you prefer for the audio track (disc audio), subtitles, and the disc menu.

[Original] – Refers to the original language in which the disc was recorded.

[Other] – To select another language, press number buttons then ENTER to enter the corresponding 4-digit number according to the language code list on page 33.

[Off] (for Disc Subtitle) – Turn off Subtitle.

Note:
Depending on a disc, your language setting may not be worked for some disc.

[AUDIO] Menu

Each disc has a variety of audio output options. Set the player's Audio options according to the type of audio system you use.

Note:

Since many factors affect the type of audio output, see "The unit's Audio Output Specifications" on page 36 for details.
HDMI / SPDIF (Digital Audio Output)

Select the output sound format when a device equipped with an HDMI or Digital Audio input jack is connected to the HDMI OUT or DIGITAL AUDIO OUT jack on this player.

[PCM Stereo] – Select if you connect this unit's HDMI OUT or DIGITAL AUDIO OUT jack to a device with two-channel digital stereo decoder.

[PCM Multi-Ch] (HDMI only) – Select if you connect this unit's HDMI OUT jack to a device with multi-channel digital decoder.

[DTS Re-Encode] – Select if you connect this unit's HDMI OUT or DIGITAL AUDIO OUT jack to a device with DTS decoder.

[Primary Pass-Thru] – Select if you connect this unit's DIGITAL AUDIO OUT and HDMI OUT jack to a device with LPCM, Dolby Digital and DTS.

Notes:

• When [HDMI] option is set to [PCM Multi-CH], the audio may output as PCM Stereo if the PCM Multi-Ch information is not detected from HDMI device with EDID.

• When [HDMI] and [SPDIF] options are set to [DTS Re-Encode], the DTS audio will output on BD and HD DVD advanced disc, and the original audio will output on the other discs.

Sampling Freq. (Maximum Sampling Frequency)

[192KHz] – Select this if your A/V Receiver or Amplifier is capable of handling 192 KHz signals.

[96KHz] – Select this if your A/V Receiver or Amplifier is NOT capable of handling 192 KHz signals. When this choice is made, this unit automatically converts any 192 KHz signals to 96 KHz so your system can decode them.

[48KHz] – Select this if your A/V Receiver or Amplifier is NOT capable of handling 192 KHz and 96 KHz signal. When this choice is made, this unit automatically converts any 192 KHz and 96 KHz signals to 48 KHz so your system can decode them.

Check the documentation for your A/V Receiver or Amplifier to verify its capabilities.

DRC (Dynamic Range Control)

During the disc encoded in Dolby Digital or Dolby Digital Plus is playing back, you may wish to compress the dynamic range of the audio output (the difference between the loudest sounds and the quietest ones). This allows you to listen to a movie at a lower volume without losing clarity of sound. Set DRC to [On] for this effect.

Installation and Setup

[LOCK] Menu (Parental Control)
Password

You can enter or change the password.

1. Select [Password] option on the [LOCK] menu then press ►.

2. To create new password, press ENTER when the [New] option is highlighted. Input new password and press ENTER. Enter it again and press ENTER to verify.

   To change the password, press ENTER when the [Change] option is highlighted, then input old password and press ENTER. Input new password and press ENTER. Enter it again and press ENTER to verify.

   To delete the password, select [Delete] option then press ENTER, then input old password and press ENTER. The password is deleted.

Tip:
If you make a mistake before pressing ENTER, press CLEAR. Then input the correct password.

If you forget your password

If you forget your password, you can clear it using the following steps:

1. Remove any disc that might be in the player.

2. Select [Password] option.

3. Use Number buttons to enter the 6-digit number "210499".
   The "PIN CLEAR" appears in the display window and the password is deleted.

Rating

Blocks playback of rated disc based on their content. (Not all discs are rated.)

1. Select [Rating] on the [LOCK] menu then press ►.

2. To access this option, you must input the password you have created. If you have not yet entered password, you will be prompted to do so. Input a password and press ENTER. Enter it again and press ENTER to verify. If you make a mistake before pressing ENTER, press CLEAR.

3. Select a rating from 1 to 8 using the ▲ / ▼ buttons.

   [Rating 1-8] – Rating one (1) has the most restrictions and rating eight (8) is the least restrictive.

   [Unlock] – If you select unlock, parental control is not active and the disc plays in full.

4. Press ENTER to confirm your rating selection.

BD Age

Set an age limit of BD-ROM play.

1. Select [BD Age] on the [LOCK] menu then press ►.

2. Follow step 2 as shown above (Rating).

3. Use number buttons to input an age limit for BD-ROM viewing.

   [255] – All BD-ROM can be played.

   [0-254] – Prohibits play of BD-ROM with corresponding ratings recorded on them.

4. Press ENTER to confirm your selection.

Area Code

Enter the code of the area whose standards were used to rate the DVD video disc, based on the list on page 33.

1. Select [Area Code] on the [LOCK] menu then press ►.

2. Follow step 2 as shown above (Rating).

3. Select the first character using ▲ / ▼ buttons then press ENTER.

4. Select the second character using ▲ / ▼ buttons then press ENTER to confirm your selection.

[NETWORK] Menu

Some HD DVD or BD-ROM discs may enable you to access special HD DVD or BD-ROM sites, if you connect the player to the Internet. For example, if an HD DVD or BD-ROM site includes content such as links to future movie trailers, you can watch the downloaded on-line content on the player.
You do not need to connect to a PC to use this function.

Preparations:

- This feature requires an always-on broadband internet connection. (See page 17.)
- An BD-ROM or HD DVD disc compatible with this feature is required. Not all BD-ROM or HD DVD discs are compatible.
IP Mode

If there is a DHCP server on the local area network (LAN), this player will automatically be allocated an IP address. If you're using a broadband router or broadband modem that has a DHCP (Dynamic Host Configuration Protocol) server function, select [Dynamic IP]. The IP address will automatically be determined.
If there is no DHCP server on the network and you want to set the IP address manually, select [Static IP] then set the [IP Address], [Subnet Mask], [Gateway] and [DNS Server] using [IP Setting] option.

Note:

The [IP Mode] menu shows if the internet is connected or not. "⊘" will appear when connection is failed.

IP Setting

This option is available only if [IP Mode] option is set to [Static IP].
Use the ▲ / ▼ / ◄ / ► buttons to select a field; use the number buttons to enter a value. Press ENTER when [OK] is highlighted to finish and exit the screen.

User Information

Although not directly related to the Internet connection, some BD-ROM or HD DVD discs may require the following settings to be configured.

1. Select [User Information] on the [NETWORK] menu then press ►.

2. Input characters for user ID by pressing ▲ / ▼. To shift the position, press ◄ / ► . Up to 10 characters can be input.

3. Press ENTER to shift to [Password] option.

4. Input characters for password by pressing ▲ / ▼. To shift the position, press ◄ / ► . Up to 10 characters can be input.

Tip:

If you make a mistake, press CLEAR. Then input the correct characters.

Network Speed

Select a speed according to the specification of your LAN.

[Low Speed] – Lower than 1 Mbps

[Mid Speed] – 1-10 Mbps

[High Speed] – Higher than 10 Mbps

Cookie Setting

Select whether you wish to accept "cookies" or not.
[Accept] – Cookies are accepted.
**[Not Accept] –** Cookies are rejected. This may disable some services on web pages.

Note:

If you select to accept "cookies", the BD-ROM or HD DVD internet services you use may record or track information about your use of the player and/or those sites. If you do not choose to allow cookies, some or all features of a site may not properly function.

Installation and Setup

[OTHERS] Menu
Button Sound

You can hear beep sound when you press a touch button on the front panel. Set [On] for this effect.

Java Font Size **BD**

You can adjust the default text size displayed for the BD-J contents during BD-ROM playback.
This setting is only valid when BD-J contents do not set the size of text.
Please select a font size bigger than 24 when the player is connected with an HD TV.

Slow/Step **DVD** **HD DVD** **BD**

You can set up the operations of the **II** (Pause) and ▶▶ (Forward Scan) while the playback is paused.

[Off] – If you press **II** while the playback is paused and the picture play backs in normal.
If you press ▶▶ while the playback is paused and the picture play backs in fast forward.

[On] – If you press **II** while the playback is paused and the picture play backs in frame-by-frame.
If you press ▶▶ while the playback is paused and the picture play backs in slow motion.

Note:
We recommend setting the [Slow/Step] option to [Off] for HD DVD interactivity.

BD Storage **BD**

This player includes memory that is used to store some BD-ROM disc related information, including downloaded on-line content. The disc you are using will control how long this information is retained.

[Built-In Memory] – Saves the downloaded on-line contents in built-in memory.

[USB Memory] – Saves the downloaded on-line contents in the USB Flash Drive if connected.

HD-DVD Storage **HD DVD**

You can erase or copy the downloaded on-line content for HD DVD in the built-in memory or USB Flash Drive.

1. Select [HD-DVD Storage] on the [OTHERS] menu then press ▶.
   The [Persistence Storage] menu will appear.

2. Select [Built In Memory] or [USB1] then press ▶.
   [Built-In Memory] – Shows the contents in the built-in memory.
   [USB 1] – Shows the contents in the USB Flash Drive.

3. Select a folder then press press ▶.
   The contents in the folder will appear.

4. Highlight an option and then press ENTER.
   [Copy] – Copies the contents from the built-in memory to USB Flash Drive. (or from USB Flash Drive to the built-in memory).
   [Delete] – Deletes the contents in the built-in memory or USB Flash Drive.
   [Close] – Returns to the [Persistence Storage] menu.

5. Select an option then press ENTER.

Note:
The [Common Area] folder is created by default if this folder is not existed in the [Built-In Memory].

Initialize

You can reset the player to its original factory settings and initialize the BD Storage or HD-DVD Storage.

1. Select [Initialize] option then press ▶.

2. Press ▲ / ▼ to select the desired option then press ENTER.
   The confirm message will appear.

   [Factory Set] – If you need to, you can reset the player to all its factory settings. Some options cannot be reset. (Rating, Password, Area Code and BD/HD Storage)

   [BD Flash Format] – Initializes the BD contents from the built-in memory: BD contents recorded on the built-in memory will be erased.

   [HD-DVD Flash Format] – Initializes the HD-DVD contents from the built-in memory: HD-DVD contents recorded on the built-in memory will be erased.

3. Use ◀ / ▶ to select [Yes] or [No] then press ENTER.

Operations

General playback features

1. Load your chosen disc in the tray, with the playback side down.
2. Start playback using the HOME menu (See page 9).

Buttons	Operations	Discs
OPEN / CLOSE (⏏)	Opens or closes the disc tray.	All Discs
■ (STOP)	Stops the playback.	All Discs
	The unit records the stopped point, depending on the disc. "❚❚■" appears on the screen briefly. Press ▶ (PLAY) to resume playback (from the scene point). If you press STOP (■) again or unload the disc ("■" appears on the screen.), the unit will clear the stopped point. (**❚❚■ = Resume Stop, ■ = Complete Stop**) *Note:* The resume point may be cleared when a button is pressed (for example; POWER, OPEN/CLOSE, etc).	**DVD** **ACD** **MP3** **WMA**
	On HD DVD advanced title and BD interactive title, the unit will be in Complete Stop mode if you press STOP once during playback.	**HD DVD** **BD**
RESUME PLAY	Disc menu will appear if you press DISC MENU once. To resume playback, press RESUME PLAY. *Notes:* • The RESUME PLAY may not work on some discs. • On other disc, RESUME PLAY is operated as ▶ (PLAY).	**HD DVD** **BD**
❚❚ (PAUSE)	During playback, press ❚❚ to pause playback. *Tip:* During Audio CD or MP3/WMA playback, press ❚❚ once again to resume playback.	All Discs
	Press ❚❚ repeatedly to play Frame-by-Frame.	**DVD** **HD DVD** **BD**
	Note: ❚❚ (PAUSE) button's operation are differ depending on the [Slow/Step] option setting on the setup menu. (See page 24.)	
◀◀ / ▶▶� (SKIP)	During playback, press ◀◀ or ▶▶◄ to go to the next chapter/track/file or to return to the beginning of the current chapter/track/file. Press ◀◀ twice briefly to step back to the previous chapter/track/file.	All Discs
◀◀ / ▶▶ (SCAN)	During playback, press SCAN (◀◀ or ▶▶) repeatedly to select the required scan speed. - DVD, HD DVD, BD: 5 steps, - Audio CD, MP3, WMA: 3 steps	All Discs
	While the playback is paused, press SCAN ▶▶ repeatedly to play in slow motion (4 steps, forward only).	**DVD** **HD DVD** **BD**
	Note: ▶▶ (SCAN) button's operation are differ depending on the [Slow/Step] option setting on the setup menu. (See page 24.)	

Operation

General playback features (Continued)

Buttons	Operations	Discs
REPEAT	During playback, press REPEAT repeatedly to select a desired repeat mode. DVD, HD DVD, BD: Chapter/Title/Off Audio CD, MP3, WMA: Track/All/Off ***Note:*** If you press ▶▶I once during Repeat Chapter/Track playback, the repeat playback cancels.	**DVD** **BD** **ACD** **MP3** **WMA**
A-B	During playback, each press of A-B button to select point A and point B and repeats a sequence from point A (Starting point) to point B (End point). To cancel the sequence, press A-B.	**DVD** **BD** **ACD**
TITLE/POP UP	If the current DVD, HD DVD or BD-ROM disc has a menu, the Title menu or Popup menu appears on the screen. Depending on the disc, the menu may not be available.	**DVD** **HD DVD** **BD**
DISC MENU	The menu appears on the screen. Depending on the disc, the menu may not be available.	**DVD** **HD DVD** **BD**
ANGLE (📷)	During playback of the disc contains scenes recorded at different camera angles, press ANGLE repeatedly to select a desired angle. ***Note:*** When you are playing a disc containing scenes recorded at different camera angles, the angle indicator will appear on the TV screen for a while and display window during scenes recorded at different angles as an indication that angle switching is possible.	**DVD** **HD DVD** **BD**
SUBTITLE (▭)	During playback, press SUBTITLE repeatedly to select a desired subtitle language.	**DVD** **HD DVD** **BD**
SUBTITLE ON/OFF	During playback, press SUBTITLE ON/OFF to switch the subtitle on or off.	**DVD** **HD DVD** **BD**
AUDIO (◁)))	During playback, press AUDIO repeatedly to hear a different audio language or audio track. ***Notes:*** • Some discs allow you to change audio selections only via the disc menu. If this is the case, press TITLE/POPUP or DISC MENU button and choose the appropriate audio from the selections on the disc menu. • Immediately after you have switched sound, there may be a temporary discrepancy between the display and actual sound. • On BD-ROM disc, the multi audio format (5.1CH or 7.1CH) is displayed with [MultiCH] in the on-screen display.	**DVD** **HD DVD** **BD**

Notes on general features:

• When you turn on the player or replace a disc, the player returns to the initial default setting. Depending on a disc, a specific type of audio the disc has is output.
• Depending on the pre-recorded contents of the HD DVD or BD, some functions may not be available or may be operated differently than other media.

26

If a disc menu screen is displayed
DVD **HD DVD** **BD**

The menu screen may be displayed first after loading a disc which contains a menu.

Use the ◄ / ► / ▲ / ▼ buttons to select the title/chapter you want to view, then press ENTER to start playback.

Time Search **DVD** **BD**

To start playing at any chosen time on the disc:
1. Press DISPLAY during playback.
2. Press ▲ / ▼ to select the time clock icon and "--:--:--" appears.
3. Input the required start time in hours, minutes, and seconds from left to right. For example, to find a scene at 2 hours, 10 minutes, and 20 seconds, enter "21020" and press ENTER. If you enter the wrong numbers, press CLEAR to remove the numbers you entered. Then input the correct numbers.
4. Press ENTER to confirm. Playback starts from the selected time.

Note:
This function may not work on some disc or titles.

Marker Search **DVD** **BD**

To enter a Marker

You can start playback from up to nine memorized points. To enter a marker, press MARKER at the desired point on the disc. The Marker icon appears on the TV screen briefly. Repeat to enter up to nine markers.

To Recall or Clear a Marked Scene

1. During disc playback, press SEARCH. The marker search menu appears on the screen.
2. Within 10 seconds, press ◄ / ► to select a marker number that you want to recall or clear.
3. Press ENTER and playback starts from the marked scene. Or, Press CLEAR and the marker number is erased from the list.
4. You can play any marker by inputting its number on the marker search menu.

Notes:
• This function may not work on some disc or titles.
• All marked points are cleared if you press STOP (■) twice or unload the disc. (complete stop).

Screen Saver

The screen saver appears when you leave the player in Stop mode for about five minutes.

Using Color (A, B, C, D) Buttons
BD **HD DVD**

These buttons are available only during BD-J contents playback or during HD DVD interactivity contents playback. Use the appropriate buttons as indicated by the display. Depending on the disc contents, the functions of each button may differ.

Note:
On HD DVD disc, a menu or on-screen display may be disappeared after a while depending on the disc information.

Displaying Disc Information On-Screen
DVD **HD DVD** **BD**

You can display various information about the disc loaded on-screen.

1. Press DISPLAY to show various playback information.
   The items displayed differ depending on the disc type or playing status.

2. During BD-ROM or DVD playback, you can select an item by pressing ▲ / ▼ and change or select the setting by pressing ◄ / ►.
   • Title – Current title number/total number of titles.
   • Chapter – Current chapter number/total number of chapters.
   • Time – Elapsed playing time.
   • Audio – Selected audio language or channel.
   • Subtitle – Selected subtitle.
   • Angle – Selected angle/total number of angles.

Notes:
• If no button is pressed for a few seconds, the on-screen display disappears.
• A title number cannot be selected on some discs.
• An item may not be available on some discs or titles.
• If HD DVD interactivity or BD interactive title is playing back, some setting information is displayed on the screen but prohibited to be changed.

Operation

27

Hybrid Discs `BD` `HD DVD`

If you insert a Hybrid Disc, you must select a layer to play back.
Hybrid Disc?
- HD DVD Twin Format Disc with both HD DVD and DVD layers on one side
- BD-ROM Disc with both BD and DVD (or CD) layers on one side
1. Insert a Hybrid Disc.
   The choice menu will appear.
2. Select the primary format (HD DVD or BD) or secondary format (DVD or CD) on the menu then press ENTER.
   The selected playback format begins.

Notes:
- To change the format, press HOME then select [Movie] option and press ENTER. The choice menu will appear.
  To play back the CD layer on the Hybrid Disc, select [Music] option on the HOME menu.
- You can only use ◄ / ►, ENTER, OPEN/CLOSE and POWER buttons when the choice menu is displayed.
- You cannot change the format during playback.

Last Scene Memory `DVD`

This unit memorizes last scene from the last disc that is viewed. The last scene remains in memory even if you remove the disc from the unit or switch off the unit. If you load a disc that has the scene memorized, the scene is automatically recalled.

Notes:
- Settings are stored in memory for use any time.
- This unit does not memorize settings of a disc if you switch off the unit before commencing to play it.
- Last Scene Memory function for a previous DVD title is erased once a different DVD title is played.

Using the cursor function `HD DVD`

Some HD DVD discs may include game software and drawing software. If they do you can use the cursor function for some software.

1. Press CURSOR while a disc with support for cursor use is playing.
2. Use the eight direction buttons to move the cursor.

Tip:
Example: Game/drawing software
Move the cursor to select the game target or selection item. For details on actual operations, also refer to the operations guide for the disc.

Internet connection feature
`BD` `HD DVD`

Some HD DVD or BD-ROM discs may enable you to access special HD DVD or BD-ROM sites, if you connect the player to the Internet. For example, if an HD DVD or BD-ROM site includes content such as links to future movie trailers, you can watch the content on the player via the Internet.

1. Check the internet connection and configure. (See pages 17 and 23.)
2. Insert an HD DVD or BD-ROM disc with this feature and start the playback.
3. Select an item from the menu.

Playing an Audio CD or MP3/WMA files

The player can play Audio CDs and MP3/WMA files. Before playing MP3/WMA files, read "MP3/WMA audio file requirement" on right.

1. Insert Audio CD or a disc containing MP3/WMA files, or connect the USB Flash Drive containing MP3/WMA files

2. Press HOME and Home Menu appears.

3. Select [Music] then press ENTER. The MUSIC menu appears on the TV screen.

Note:

When the USB Flash Drive is connected and a disc is inserted simultaneously, the menu for selecting a media will appear. Select a media then press ENTER.
Example) Audio CD

4. Use ▲/▼ to select a track or file then press ▶ (PLAY). Playback starts.
   You can use variable playback functions. Refer to pages 25-26.

5. To stop playback at any time, press STOP (■).

Tips:

- The playback may start automatically if the Audio CD inserted.
- Select a folder then press ENTER and you can view the files in the folder. If you want to move to the upper directory, use ▲/▼ to highlight [UP Folder] and press ENTER.
- On the MUSIC menu, use red or blue color button to move to the previous or next page.
- The equalizer indicator is not coupled with the music in play back.
- If there is impossible code to express in the file name, it may be displayed as illegible.

MUSIC menu options

1. Use ▲ / ▼ to select a track or file on the MUSIC menu then press ENTER.
   The menu options appear.

2. Use ▲ / ▼ to select an option, then press ENTER.

- **[Play]** Starts playback the selected track or file.
- **[Select Play]** Plays back only the marked track(s) or file(s). Use MARKER for selecting the multiple files or tracks.
- **[Random]** Starts or stops random playback. By pressing ▶▶I during random playback, the unit selects another track and resumes random playback.
- **[Unmark All]** Unmarks all marked files or tracks.
- **[Close]** Exits menu options. Also you can disappear it by pressing RETURN button.

Note:

You cannot use [Select Play] and [Random] functions simultaneously.

MP3/WMA audio file requirement

File extensions: ".mp3", ".wma".

Sampling frequency: 8 - 48 kHz

Bit rate: 8 - 320kbps

CD-R, DVD±R/RW/RAM, BD-R/RE Format: ISO 9660+JOLIET, UDF and UDF Bridge format.

Maximum Files/Disc: Less than 1999 (total number of files and folders)

Notes on MP3/WMA file
Depending on the size and number of the MP3/WMA files, it may take several minutes to read the contents of the media.

Operation

Viewing a JPEG file

This unit can play JPEG files. Before playing JPEG recordings, read "Photo file requirement" on below.

1. Insert a disc containing JPEG files, or connect the USB Flash Drive containing JPEG files

2. Press HOME and Home Menu appears.

3. Select [Photo] then press ENTER.
   The PHOTO menu appears on the TV screen.

   ### Note:
   When the USB Flash Drive is connected and a disc is inserted simultaneously, the menu for selecting a media will appear. Select a media then press ENTER.
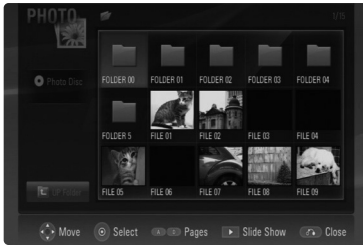

4. Use ▲ ▼ ◄ ► to select a file and press ENTER.
   The selected image is displayed in full screen.

5. To stop viewing at any time, press STOP (■).
   The PHOTO menu appears.

Tips:
- You can advance to the previous or next file by pressing ◄◄ or ►►I during viewing a photo file in full screen.
- You can start the slide show by pressing ► (PLAY) while the PHOTO menu appears.
- Select a folder then press ENTER and you can view the files in the folder. If you want to move to the upper directory, use ▲/▼ to highlight [UP Folder] and press ENTER.
- On the PHOTO menu, use red or blue color button to move to the previous or next page.
- If there is impossible code to express in the file name, it may be displayed as illegible.

Options during viewing a photo file in full screen

1. Follow steps 1-4 as shown left (Viewing a JPEG file).

2. You can use variable options during viewing a picture.

3. Use ▲ ▼ ◄ ► to select an option.
1 Use ◄/► to advance to the previous or next file.

2 Use ENTER to start or pause the slide show.

3 Use ENTER to play or pause the background music. This option is available after the background music is selected using [Music Select] option.

4 Use ENTER to rotate the picture clockwise. This option is not available during slide show.

5 Use ENTER to set the Slide Show speed.

6 Selects the background music.
   1) Press ENTER and the menu will appear.
   2) Use ▲ ▼ ◄ ► to select a media or folder that there are music file(s).
   3) Press ENTER to confirm your selection.

7 Press ENTER to exit the option menu. To appear the menu again, press ENTER.

Photo file requirement

File extensions: ".jpg", ".jpeg", ".png"

Recommended size:
Less than 3,000 x 3,000 x 24 bit/pixel
Less than 3,000 x 2,250 x 32 bit/pixel

CD-R, DVD±R/RW/RAM, BD-R/RE Format:
ISO 9660+JOLIET, UDF and UDF Bridge format.

Maximum Files/Disc:
Less than 1999 (total number of files and folders)

Notes on JPEG file
- Progressive and lossless compression JPEG image files are not supported.
- Depending on the size and number of the JPEG files, it may take several minutes to read the contents of the media.

Controlling a TV with the Supplied Universal Remote Control

You can control the volume, input source, and power state of your TV with the supplied Universal Remote Control.
If your TV is listed in the table on page 32, set the appropriate manufacturer code. Follow steps 1-2 as shown right.
You can control your TV using the buttons below.

TV POWER Button — TV POWER / POWER / OPEN/CLOSE
MARKER / REPEAT
SEARCH / SUBTITLE ON/OFF / A-B
AUDIO / SUBTITLE / ANGLE

TV

VOL + − / MUTE / INPUT / CH + − — **TV Control Buttons**

1 2 3
4 5 6
7 8 9
VIDEO PIP 0 RESOLUTION — **Number Buttons**

By pressing	You can
TV POWER	Turn the TV on or off.
INPUT	Switch the TV's input source between the TV and other input sources.
CH +/–	Scan up or down through memorized channels.
VOL +/–	Adjust the volume of the TV.
MUTE	Temporarily turns TV sound OFF, press again to restore.

Note:
Depending on the unit being connected, you may not be able to control your TV using some of the buttons.

To program the remote to control the TV using the manufacturer code

If your TV is listed in the table on the next page, set the appropriate manufacturer code.

1. While holding down TV POWER button, press the number buttons to select the manufacturer code for your TV (Refer to table on the next page).
   • If more than one code number is listed, try entering them one at a time until you find the one that works with your TV.
2. Release TV POWER button.

Notes:
• Depending on your TV, some or all buttons may not function on the TV, even after entering the correct manufacturer code.

• If you enter a new code number, the code number previously entered will be erased.

• When you replace the batteries of the remote, the code number you have set may be reset to the default setting. Set the appropriate code number again.

Troubleshooting

Symptom	Possible Cause	Correction
No power.	• The power cord is disconnected.	• Plug the power cord into the wall outlet securely.
The power is on, but the player does not work.	• No disc is inserted.	• Insert a disc. (Check the disc indicator in the display window is lit.)
No picture.	• The TV is not set to receive DVD signal output.	• Select the appropriate video input mode on the TV.
	• The video cable is not connected securely.	• Connect the video cable securely.
	• The selected resolution is not capable with your TV.	• Select another resolution using RESOLUTION button.
No sound.	• The equipment connected with the audio cable is not set to receive disc signal output.	• Select the correct input mode of the audio receiver so you can listen to the sound from the player.
	• The power of the equipment connected with the audio cable is turned off.	• Turn on the equipment connected with the audio cable.
	• The [AUDIO] options are set to the wrong position.	• Set the [AUDIO] options to the correct position. (See page 21)
The player does not start playback.	• An unplayable disc is inserted.	• Insert a playable disc. (Check the disc type and regional code.)
	• The rating level is set.	• Change the rating level.
The Remote Control does not work properly.	• The Remote Control is not pointed at the remote sensor on the player.	• Point the Remote Control at the remote sensor of the player.
	• The Remote Control is too far from the player.	• Operate the Remote Control closer to the player.

Resetting the Player

If you observe any of the following symptoms...
• When the Player is plugged in, but the power will not turn on or off.
• When the display window is not working.
• When the Player does not operate normally.

You can reset the Player as follows:
• Press and hold the POWER button for more than five seconds. This will force the Player to power off. Press the POWER button again to turn the Player back on.
• Unplug the power cord and then plug the power cord again after more than five seconds.

Customer Support

You can update the Player using the latest software to enhance the products operation and/or add new features.
To obtain the latest software for this player (if updates have been made), please visit http://pa.lgservice.com.

Specifications

General

Power requirements:	AC 110-240 V~, 50/60 Hz
Power consumption:	25W
Dimensions (W x H x D):	Approx. 430 x 77 x 269 mm (16.9 x 3.0 x 10.6 inches)
Net Weight (Approx.):	3.8 kg (8.3 lbs)
Operating temperature:	5 °C to 35 °C (41 °F to 95 °F)
Operating humidity:	5 % to 90 %

Outputs

VIDEO OUT:	1.0 V (p-p), 75 Ω, sync negative, RCA jack x 1
COMPONENT VIDEO OUT:	(Y) 1.0 V (p-p), 75 Ω, sync negative, RCA jack x 1 (Pb)/(Pr) 0.7 V (p-p), 75 Ω, RCA jack x 2
HDMI OUT (video/audio):	19 pin (HDMI standard, Type A)
ANALOG AUDIO OUT:	2.0 Vrms (1 kHz, 0 dB), 600 Ω, RCA jack (L, R) x 1
DIGITAL OUT (OPTICAL):	3 V (p-p), Optical jack x 1

System

Laser:	Semiconductor laser, wavelength: 405nm / 650 nm
Signal system:	Standard NTSC Color TV system
Frequency response:	20 Hz to 20 kHz (48 kHz, 96 kHz, 192 kHz sampling)
Signal-to-noise ratio:	More than 100 dB (ANALOG OUT connectors only)
Harmonic distortion:	Less than 0.008%
Dynamic range:	More than 95 dB
LAN port:	Ethernet jack x 1, 10BASE-T/100BASE-TX
Accessories:	HDMI cable (1) Component video cable (1) Video cable (1) Audio cable (1) Remote control (1) Batteries (2) Cloth for cleaning the surfaces of the player (1)

Note: Design and specifications are subject to change without prior notice.

Notes:

*1 The secondary and interactive audios may not be included in the output bitstream if [SPDIF] or [HDMI] option is set to [Primary Pass-Thru].

*2 This player automatically selects the HDMI audio according to the decoding capability of the connected HDMI device if [HDMI] option is set to [Primary Pass-Thru].

*3 The [PCM Multi-CH]/[Primary Pass-Thru] setting of the [HDMI] option and [DTS re-encode] setting of the [SPDIF] option cannot be set together. If you set the [HDMI] option to [PCM Multi-CH] or [Primary Pass-Thru], the [SPDIF] option is set to [PCM Stereo] automatically. Also, if you set the [SPDIF] option to [DTS Re-encode] and the [HDMI] option is set to [PCM Stereo] automatically.
(The Linear PCM audio source may output as PCM stereo audio from DIGITAL AUDIO OUT jack if the [HDMI] option is set to [Primary Pass-Thru] or the [SPDIF] option is set to [DTS Re-encode].)

*4 The Linear PCM 5.1ch/7.1ch audio source recorded at 192 kHz sampling frequency will output as PCM stereo audio.

*5 The sampling frequency of HDMI/SPDIF (DIGITAL AUDIO OUT) is limited to 96 kHz.

*6 The audio is limited to 48 kHz and 5.1 ch if [HDMI] or [SPDIF] option is set to [DTS re-encode].
The DTS audio will output on BD and HD DVD advanced disc, and the original audio will output on the other discs.

• The audio is always output as PCM 48kHz/16 bit during Audio CD or MP3/WMA file is playing back.

• The MPEG audio source is always output as PCM 2ch.
