## Using the IR Receiver

This allows a remote control sensor to be placed in a custom location. It is recommended to attach it to the location illustrated in the figure below.

## Portrait Layout

To install in portrait mode, rotate the set counterclockwise 90 degrees when looking from the front.

### NOTE

- Do not attach the IR receiver to the surface of the monitor or within 50 cm of it in any direction.

## Mounting on a Wall

For proper ventilation, allow a clearance of 10 cm on each side and from the wall. Detailed installation instructions are available from your dealer, see the optional Tilt Wall Mounting Bracket Installation and Setup Guide.

If you intend to mount the monitor to a wall, attach a wall mounting interface (optional parts) to the back of the set.

When you install the monitor using a wall mounting interface (optional parts), attach it carefully so it will not fall.

- 1 Please, use a wall mount and screws in accordance with VESA Standards.
- 2 If you use screws longer than standard, the monitor might be damaged internally.
- 3 If you use improper screws, the product might be damaged and drop from mounted position. In this case, LG Electronics is not responsible for damage.
- 4 Please use VESA standard as below.
  - 785mm or greater
  - \* Fastening screw: Diameter 6.0 mm x Pitch 1.0 mm x Length 12 mm

### CAUTION

- Disconnect the power cord first, and then move or install the monitor set. Otherwise electric shock may occur.
- If you install the monitor set on a ceiling or slanted wall, it may fall and result in severe injury.
- Use an authorized LG wall mount and contact the local dealer or qualified personnel.
- Do not over tighten the screws as this may cause damage to the monitor set and void your warranty.
- Use the screws and wall mounts that meet the VESA standard. Any damages or injuries by misuse or using an improper accessory are not covered by the warranty.
- To prevent injury, this apparatus must be securely attached to the wall in accordance with the installation instructions. (This only pertains to Australia and New Zealand.)

### NOTE

- The wall mount kit includes an installation manual and necessary parts.
- The wall mount bracket is optional. You can obtain additional accessories from your local dealer.
- The length of screws may differ depending on the wall mount. Be sure to use the proper length.
- For more information, refer to the instructions supplied with the wall mount.

**Securing the product to a wall (optional)**

(Depending on model)

- 1 Insert and tighten the eye-bolts, or product brackets and bolts on the back of the product.  
- If there are bolts inserted at the eye-bolts position, remove the bolts first.
- 2 Mount the wall brackets with the bolts to the wall.  
Match the location of the wall bracket and the eye-bolts on the rear of the product.
- 3 Connect the eye-bolts and wall brackets tightly with a sturdy rope.  
Make sure to keep the rope horizontal with the flat surface.

**CAUTION**

- Make sure that children do not climb on or hang on the product.

**NOTE**

- Use a platform or cabinet that is strong and large enough to support the product securely.
- Brackets, bolts and ropes are optional. You can obtain additional accessories from your local dealer.

**WARNING**

- If a product is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
  - » Using cabinets or stands recommended by the manufacturer of the product.
  - » Only using furniture that can safely support the product.
  - » Ensuring the product is not overhanging the edge of the supporting furniture.
  - » Not placing the product on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the product to a suitable support.
  - » Not standing the product on cloth or other materials placed between the product and supporting furniture.
  - » Educating children about the dangers of climbing on furniture to reach the product or its controls.

# REMOTE CONTROL

The descriptions in this manual are based on the buttons of the remote control. Please read this manual carefully and use the monitor set correctly.

To replace batteries, open the battery cover, replace batteries (1.5 V AAA) matching ⊕ and ⊖ ends to the label inside the compartment, and close the battery cover.

To remove the batteries, perform the installation actions in reverse.

**CAUTION**

- Do not mix old and new batteries, as this may damage the remote control.
- Make sure to point the remote control to the remote control sensor on the monitor set.

# USING THE MONITOR

## Connecting to a PC

Your monitor supports the Plug & Play\* feature.

\* Plug & Play: A PC will have a built-in driver for the monitor; no extra software is needed.

### NOTE

- It is recommended you use an HDMI connection for the best image quality.
- Use a shielded signal interface cable, such as D-sub 15-pin signal cable and DVI/HDMI cable, with a ferrite core to maintain standard compliance for the product.
- If you turn the monitor set on when the set is cold, the screen may flicker. This is normal.
- Some red, green, or blue spots may appear on the screen. This is normal.
- If you use a cable longer than the D-sub 15-pin signal cable provided, certain images may appear blurry.

### CAUTION

- Connect the signal input cable and tighten it by turning the screws clockwise.
- Do not press the screen with your finger for a long time as this may result in temporary distortion on the screen.
- Avoid displaying a fixed image on the screen for a long period of time to prevent image burn. Use a screensaver if possible.

## RGB Connection

Transmits an analog video signal from your PC to the monitor. Connect the PC and the monitor with the 15-pin signal cable as shown in the following illustration. Select RGB input. To transmit an audio signal, connect an optional audio cable.

### NOTE

- Use the standard Macintosh adapter since an incompatible adapter is available in the market. (Different signaling system)
- Apple computers may require an adapter to connect to this monitor. Call or visit their web site for more information.

## DVI Connection

Transmits a digital video signal from your PC to the monitor. Connect the PC and the monitor with a DVI cable as shown in the following illustration. Select DVI input. To transmit an audio signal, connect an optional audio cable.

## HDMI Connection

Transmits the digital video and audio signals from your PC to the monitor. Connect the PC and the monitor with an HDMI cable as shown in the following illustration. Select HDMI input.

### NOTE

- Use a High Speed HDMI™ Cable.
- Please check the PC environment if you cannot hear audio in HDMI mode. Some PCs require you to manually change the default audio output to HDMI.
- If you want to use HDMI-PC mode, you must set the input label to PC mode.
- When HDMI PC is used, a compatibility problem might occur.

## Display Port Connection

Transmits the digital video and audio signals from your PC to the monitor. Connect the PC and the monitor with a Display Port cable as shown in the following illustrations. Select Display Port input source.

## IR Receiver Connection

Allows the use of a wired remote or IR receiver extension.

**NOTE**

- Make sure the power cable is disconnected.
- Installing the IR receiver on the front or upper part of the product may cause interference with the TOUCH IR. Install the IR receiver on the back of the product.

## Touch USB Cable Connection

Plug a USB cable into the Touch USB port on the back of the monitor.

# ENTERTAINMENT

## Using the Network

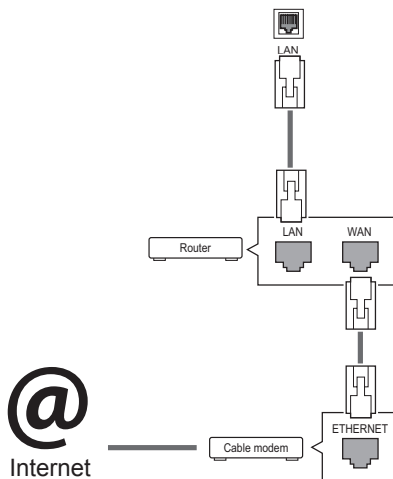

### Connecting to a Wired Network

Connect the display to a local area network (LAN) via the LAN port as shown in the following illustration and set up the network settings.

Only supports wired network connection.

After making a physical connection, a small number of home networks may require the display network settings to be adjusted. For most home networks, the display will connect to automatically without any adjustments.

For detail information, contact your internet provider or router manual.

To set up the network settings: (Even if your display has already connected automatically, running setup again will not harm anything),

- 1 Press **SETTINGS** to access the main menus.
- 2 Press the navigation buttons to scroll to **NETWORK** and press **OK**.
- 3 Press the navigation buttons to select **Network Setting** and press **OK**.
- 4 If you already set network setting, select **Resetting**. The new connection settings resets the current network settings.
- 5 Select **IP Auto Setting** or **IP Manual Setting**.
  - If selecting **IP Manual Setting**, press the navigation and Number buttons. IP addresses will need to be input manually.
  - **IP Auto Setting**: Select this if there is a DHCP server (Router) on the local area network (LAN) via wired connection, the display will automatically be allocated an IP address. If you're using a broadband router or broadband modem that has a DHCP (Dynamic Host Configuration Protocol) server function. The IP address will automatically be determined.
- 6 When you are finished, press **EXIT**.

#### ! CAUTION

- Do not connect a modular phone cable to the LAN port.
- Since there are various connection methods, please follow the specifications of your telecommunication carrier or internet service provider.

#### ! CAUTION

- Network setting menu will not be available until the display connected to physical network.
- Since there are various connection methods, please follow the specifications of your telecommunication carrier or internet service provider.

### ! NOTE

- If you want to access the Internet directly on your display, the Internet connection should be always on.
- If you cannot access the Internet, check the network conditions from a PC on your network.
- When you use **Network Setting**, check the LAN cable or check if DHCP in the router is turned on.
- If you do not complete the network settings, the network may not work properly.

### Tips for Network setting

- Use a standard LAN cable with this display. Cat5 or better with a RJ45 connector.
- Many network connection problems during set up can often be fixed by re-setting the router or modem. After connecting the display to the home network, quickly power off and/or disconnect the power cable of the home network router or cable modem. Then power on and/or connect the power cable again.
- Depending on the internet service provider (ISP), the number of devices that can receive internet service may be limited by the applicable terms of service. For details, contact your ISP.
- LG is not responsible for any malfunction of the display and/or the internet connection feature due to communication errors/malfunctions associated with your internet connection, or other connected equipment.
- LG is not responsible for problems within your internet connection.
- You may experience undesired results if the network connection speed does not meet the requirements of the content being accessed.
- Some Internet connection operations may not be possible due to certain restrictions set by the Internet service provider (ISP) supplying your Internet connection.
- Any fees charged by an ISP including, without limitation, connection charges are your responsibility.
- A 10 Base-T or 100 Base-TX LAN port is required when using a wired connection to this display. If your Internet service does not allow for such a connection, you will not be able to connect the display.

- A DSL modem is required to use DSL service and a cable modem is required to use cable modem service. Depending on the access method of and subscriber agreement with your ISP, you may not be able to use the internet connection feature contained in this display or you may be limited to the number of devices you can connect at the same time. (If your ISP limits subscription to one device, this display may not be allowed to connect when a PC is already connected.)
- The use of a router may not be allowed or its usage may be limited depending on the policies and restrictions of your ISP. For details, contact your ISP directly.

## Network Status

- 1 Press **SETTINGS** to access the main menus.
- 2 Press the navigation buttons to scroll to **NETWORK** and press **OK**.
- 3 Press the navigation buttons to select **Network Status**.
- 4 Press **OK** to check the network status.
- 5 When you are finished, press **EXIT**.

Option	Description
<b>Setting</b>	Return to the network setting menu.
<b>Test</b>	Test the current network status after setting the network.
<b>Close</b>	Return to the previous menu.

## Using the My Media

### Connecting USB Storage Device

Connect an external hard drive to the monitor to use multimedia features.

#### Tips for using USB storage devices

- Only a USB storage device is recognizable.
- If the USB storage device is connected through a USB hub, the device is not recognizable.
- A USB storage device using an automatic recognition program may not be recognized.
- A USB storage device which uses its own driver will not be recognized.
- The recognition speed of a USB storage device may depend on each device.
- Please do not turn off the display or unplug the USB device when the connected USB storage device is working. When such a device is suddenly separated or unplugged, the stored files or the USB storage device may be damaged.
- Please do not connect the USB storage device which was artificially maneuvered on the PC. The device may cause the product to malfunction. Only use a USB storage device which has normal music files, image files or movie files.
- Please use only a USB storage device which was formatted as a FAT32 file system or NTFS file system by with the Windows operating system. In case of a storage device formatted with a different utility programme which is not supported by Windows, it may not be recognized.
- Please connect power to a USB storage device (over 0.5 A) which requires an external power supply. If not, the device may not be recognized.
- Please connect a USB storage device with the cable included by the device maker.
- Some USB storage devices may not be supported or operate smoothly.
- File alignment method of USB storage devices is similar to Window XP and the monitor can recognize up to 100 English characters.
- Be sure to back up important files since data stored on a USB memory device may be damaged. We will not be responsible for any data loss.

- If the USB HDD does not have an external power source, the USB device may not be detected. So be sure to connect the external power source.
  - Please use a power adaptor for an external power source.
- If your USB memory device has multiple partitions, or if you use a USB multi-card reader, you can use up to 4 partitions or USB memory devices.
- If a USB memory device is connected to a USB multi-card reader, its volume data may not be detected.
- If the USB memory device does not work properly, disconnect and reconnect it.
- How fast a USB memory device is detected differs from device to device.
- If the USB is connected in Standby Mode, that drive will automatically be loaded when the display is turned on.
- The recommended capacity is 1 TB or less for a USB external hard disk and 32 GB or less for USB memory.
- Any device with more than the recommended capacity may not work properly.
- If a USB external hard disk with a Energy Saving function does not work, turn the hard disk off and on again to make it work properly.
- USB storage devices below USB 2.0 are supported as well. But they may not work properly with videos.
- A maximum of 999 folders or files can be recognized under one folder.
- It is recommended you use a certified USB storage device and cable. Otherwise, a USB storage device may not be detected or a playback error may occur.
- Only a USB memory device can be used to play back the files distributed and stored by SuperSign Manager. A USB hard disk or multi-card reader will not work.
- Only an FAT 32 file formatted storage device can play back the files distributed and stored by SuperSign manager.
- A USB 3.0 storage device may not work.

## Picture ID Settings

**Picture ID** is used to change the settings of a specific display using a single IR receiver for multi-vision. Communication is possible between a monitor with an IR receiver and other monitors using RS232C cables. Each monitor is identified by a **Set ID**. If you assign the **Picture ID** using the remote control, only displays with the same **Picture ID** and **Set ID** can be controlled remotely.

- 1 Assign the **Set ID** to the installed monitors as shown below:

2X2 Multi-Vision (Total Set ID: 4)  
Set IDs are assigned as shown in the picture.

- 2 Press the **ON** (Red) button on the remote control to assign the **PICTURE ID**.

- 3 If you press the left/right buttons or the red ON button for **PICTURE ID** repeatedly, the **Picture ID** toggles between **OFF** and 1 to 4. Assign the **Set ID** as you like.

- A set with a different **Set ID** than the **Picture ID** cannot be controlled by IR signals.
- Please refer to the **Installation Manual** for more information on the assigning **Total Set ID**.

### NOTE

- If **Picture ID** is set to 2, the upper right monitor, that has a **Set ID** of 2, can be controlled by IR signals.
- If you press the green **OFF** button for **PICTURE ID**, the **Picture IDs** for all monitors are turned off. If you then press any button on the remote control, all monitors can be controlled by IR signals regardless of **Set ID**.
- The **Picture ID** function may not work while **MY MEDIA** is operating.

## NETWORK Settings

- 1 Press **SETTINGS** to access the main menus.
- 2 Press the navigation buttons to scroll to **NETWORK** and press **OK**.
- 3 Press the navigation buttons to scroll to the setting or option you want and press **OK**.
  - To return to the previous level, press **BACK**.
- 4 When you are finished, press **EXIT**.
  - When you return to the previous menu, press **BACK**.

The available option settings are described in the following:

Setting	Description
<b>Player Name Setting</b>	Sets the player name used in SuperSign Manager. (Up to 20 characters)
<b>Network Setting</b>	Configure the network settings.
<b>Network Status</b>	Display the network status. - Internet is connected : Externally connected - Home network is connected : Only internally connected - Not connected : When there is no network connection
<b>Server IP Setting</b>	Sets the IP address of the computer (server) on which SuperSign Manager is installed.
<b>Server IP Status</b>	Displays the connection status with the server. - Not connected : When there is no network connection with SuperSign server. - Waiting for approval : When network connection with SuperSign server has been made, but access to server has not been approved by the server. - Rejected : When network connection with SuperSign server has been made, but access to server has been rejected by the server. - Internet is connected : When network connection with SuperSign server has been made and access to server has also been approved by the server.

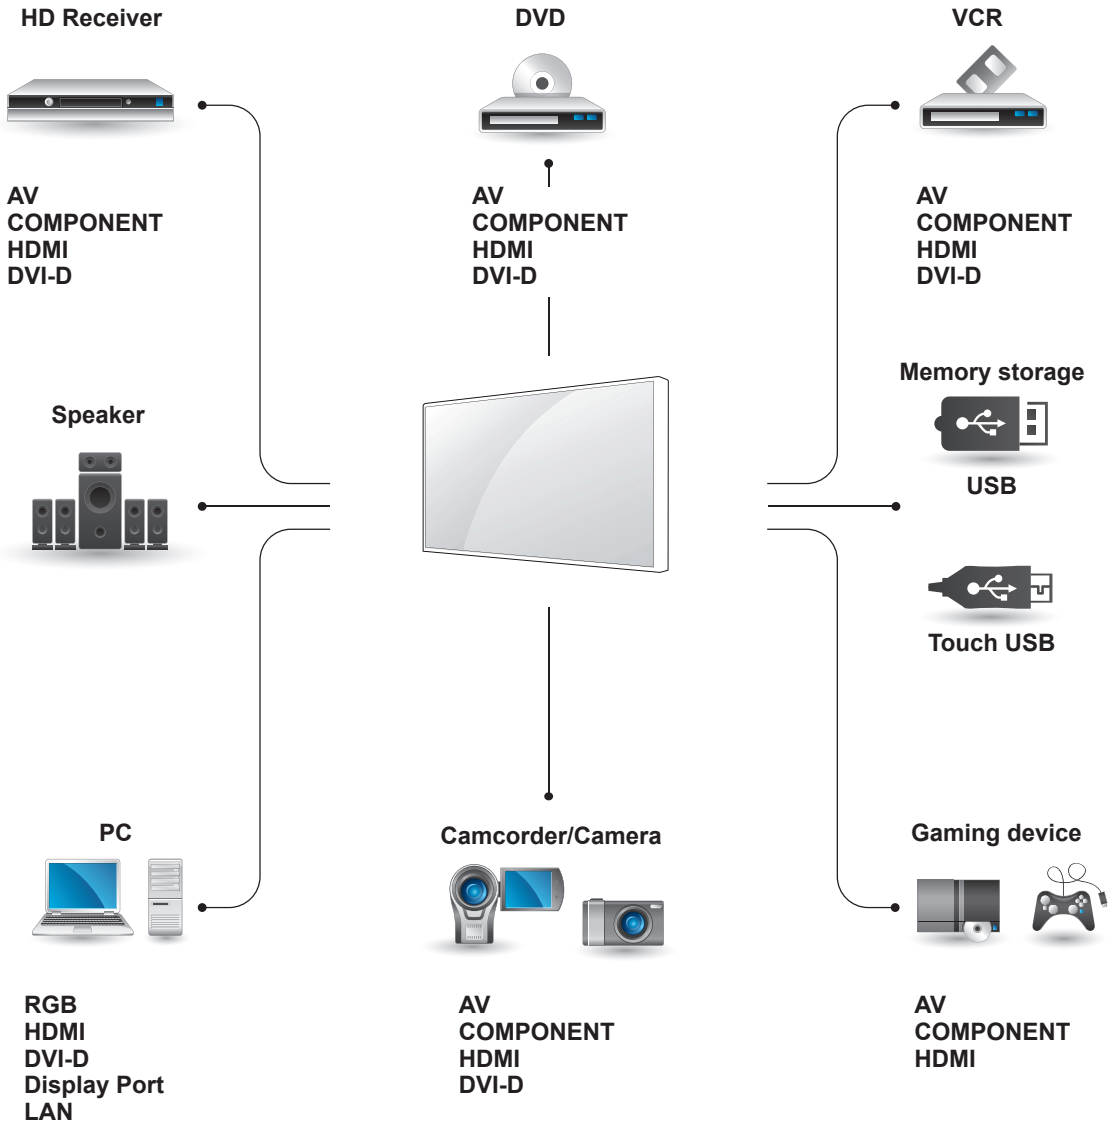

### CAUTION

- When setting the **Player Name**, press the remote buttons one at a time to avoid an input error.

# MAKING CONNECTIONS

Connect various external devices to the ports on the monitor set's back panel.

- 1 Find an external device you want to connect to your monitor set shown on the following illustration.
- 2 Check the connection type of the external device.
- 3 Go to the appropriate illustration and check the connection details.

**NOTE**

- If you connect a gaming device to the monitor set, use the cable supplied with the gaming device.
- It is recommended you to use the optional speaker provided.

## External Device Connection

Connect a HD receiver, DVD, or VCR player to the monitor set and select an appropriate input mode.

## AV (CVBS) Connection

Transmits the analog video and audio signals from an external device to the monitor. Connect the external device and the monitor with the 15 pin signal to RCA cable as shown on the following illustration.

## COMPONENT Connection

Transmits the analog video and audio signals from an external device to the monitor set. Connect the external device and the monitor set with the 15 pin signal to RCA cable as shown on the following illustration. To display images by using progressive scan, make sure to use the component cable.

**NOTE**

- When connecting to the component port using the shared interface, the port must match to the input source. Otherwise, noise may occur.

## HDMI Connection

Transmits the digital video and audio signals from an external device to the monitor set. Connect the external device and the monitor set with the HDMI cable as shown on the following illustration.

## DVI Connection

Transmits the digital video signal from an external device to the monitor set. Connect the external device and the monitor set with the DVI cable as shown in the following illustration. To transmit an audio signal, connect an optional audio cable.

**NOTE**

- Use a High Speed HDMI™ Cable.
- High Speed HDMI™ Cables are tested to carry an HD signal up to 1080p and higher.

## USB Connection

Connect a USB storage device such as a USB flash memory, external hard drive, MP3 player or a USB memory card reader to the monitor set and access the USB menu to use various multimedia files.

## LAN Connection

### A Using a router (Switch)

### B Using the Internet.

# USING THE TOUCH SCREEN

## To Use the Touch Screen on Windows 7

Plug a USB cable into the Touch USB port on the back of the monitor.

Then, connect the USB cable to your PC so that it automatically recognizes the touch screen monitor.

Go to Control Panel > System and Security > System. You will see the number of touch-points supported under Pen and Touch.

### CAUTION

- Once your PC recognizes the monitor, you will be able to use the touch screen.

### NOTE

- The monitor can respond to 10 Touch Points when connected to a Windows 7 computer.
- When using the touch screen monitor, it is recommended to set the screen aspect ratio to Just Scan.
- For more information about gestures and settings on Windows 7, refer to Windows Help.

## Gestures and Settings on Windows 7

For information about gestures and settings on Windows 7, refer to the Windows Help.

## To Use the Touch Screen on Windows XP

Plug a USB cable into the Touch USB port on the back of the monitor.

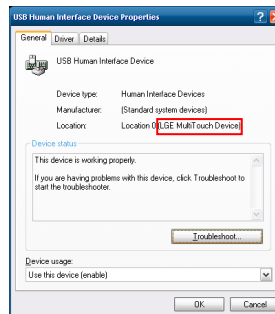

Then, connect the USB cable to your PC so that it automatically recognizes the touch screen monitor.

### CAUTION

- Once your PC recognizes the monitor, you will be able to use the touch screen.

You can see the details of the current touch screen on the Device Manager window. Go to Control Panel > System > Hardware > Device Manager > Human Interface Devices.

You can see **LGE MultiTouch Device** on the USB Human Interface Device Properties window.

## Touch Response to Windows XP

Touch: Mouse click (action)

Long-press: Mouse right click (context menu)

### ! NOTE

- LG TDS is only supported in Windows XP.
- You must install .NET Framework 3.5 on Windows XP before installing this program.

## Precautions When Using the Touch Screen

### CAUTION

- The monitor is optimized for indoor use.
- The touch screen monitor is optimized for Windows 7.
- Do not remove the USB cable when using the touch screen monitor.
- Use LG TDS(Touch Display Settings) provided with the monitor to set touch coordinates when rotating the monitor connected to a Windows XP computer.
- The LG TDS provided with the monitor only supports the following graphic cards: nVidia, AMD (ATI) and Intel.
- If touch does not respond, remove the USB cable and connect it back in ten seconds.
- Touch responds when the monitor is powered on.
- Up to 10 touch-points are supported when the monitor is connected to a Windows 7 computer; one when connected to a Windows XP computer.
- Set the monitor as the primary monitor in Windows XP.
- Touch accuracy is optimized by using full screen mode.
- Your action may not work properly on the edge area of the touch screen.
- If the 10 touch-points are not detected, restart your PC. (Windows 7)
- The touch operation (e.g. touches count, gesture, etc.) may vary depending on the content.
- The spot that you try to touch and the one which is actually touched on the screen may differ depending on the angle you view the monitor screen.

1680 x 1050	65.290	59.954
1920 x 1080	67.5	60

**!** NOTE

- PC resolutions available as the input label option in RGB and HDMI/DVI/Display Port input mode : 640 x 480 / 60 Hz, 1280 x 720 / 60 Hz, 1920 x 1080 / 60 Hz and DTV resolutions : 480p, 720p, 1080p.

**!** NOTE

- Vertical frequency: To enable the user to watch the product display, screen image should be changed tens of times every second like a fluorescent lamp. The vertical frequency or refresh rate is the times of image display per second. The unit is Hz.
- Horizontal frequency: The horizontal interval is the time to display one vertical line. When 1 is divided by the horizontal interval, the number of horizontal lines displayed every second can be tabulated as the horizontal frequency. The unit is kHz.

# CONTROLLING THE MULTIPLE PRODUCT

- Use this method to connect several products to a single PC. You can control several products at a time by connecting them to a single PC.
- In the Option menu, Set ID must be between 1 and 255 without being duplicated.

## Connecting the Cable

Connect the RS-232C cable as shown in the picture.

- The RS-232C protocol is used for communication between the PC and product. You can turn the product on/off, select an input source or adjust the OSD menu from your PC.

## RS-232C Configurations

### 7-Wire Configurations (Standard RS-232C cable)

### 3-Wire Configurations (Not Standard)

## Communication Parameter

- Baud Rate : 9600 BPS
- Data Length : 8 bit
- Parity Bit : None
- Stop Bit : 1bit
- Flow Control : None
- Communication Code : ASCII code
- Use a crossed (reverse) cable

### Acknowledgement

[Command2][ ][Set ID][ ][OK/NG][Data][x]

- \* When the product receives data normally, it sends an acknowledgement (ACK) in the format above. If data is in read mode, it indicates the data that shows the current status. If data is in read mode, it simply indicates the data that is sent from the PC.
- \* If a command is sent with Set ID '00' (=0 x 00), the data is reflected to all monitor sets and they do send any acknowledgement (ACK).
- \* If the data value 'FF' is sent in control mode via RS-232C, the current setting value of a function can be checked (only for some functions).
- \* Some commands are not supported depending on the model.
