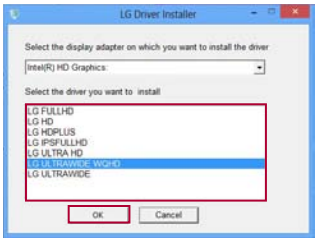
LG MONITOR DRIVER INSTALLATION GUIDE

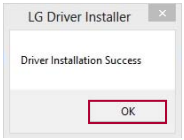
NOTE

- Installing the monitor driver optimizes your monitor's resolution and frequency, making the image on the screen appear sharper and clearer.
- The monitor driver is included in the Owner's Manual CD.
- The latest monitor driver files can be downloaded from the LG Electronics website (*www.lg.com*).
- The installation image may differ depending on the product and the version of Windows you are using.
- For information on which driver you need to install for your monitor, see the last page of the installation guide.

1 Insert the Owner's Manual CD into your PC's CD-ROM drive.
2 Select "**Monitor Driver**" from the main menu of the Owner's Manual CD.
3 Follow the instructions according to your Windows version.
4 When the "**LG Driver Installer**" window appears, select the driver that matches your monitor model.



5 Install the driver you selected by clicking "**OK**".
6 When the "**Driver Installation Success**" window appears, complete the installation by clicking "**OK**".



7 Check if the monitor driver has been installed properly on your PC in the Control Panel's Display Settings.
8 For information on the Control Panel, see your Windows User Guide.
