● Avoid watering on the switch area. It may cause electric shock or fire.

Hot water
● Avoid using hot water over 50℃. It may deform plastic parts or cause malfunction.

Volatile Material
● Do not use volatile material such as Benzene, Gasoline, bug killer.
● Do not leave strong alkaline substance such as bleach inside the tub. Damage on plastic surface and rubber parts may occur.

In Operation
● Do not insert the hand inside the spin dryer basket while the machine is in operation (Do not let children climb on the machine or climb into the tub. Injury may occur.)
● Do not drain the water out of the wash tub while the spin dryer basket is in operation.Otherwise the spin motor could be damaged.

Installation
● Install the washing machine on a horizontal support. Otherwise, it may cause vibration and noise.
● Be sure to disconnect the power cord from the electric outlet before starting care and maintenance. It may cause electric shock.
● Be sure to earth the washer to prevent electric shock. To reduce the risk of electric shock, do not install the washer in humid space.

Power Cord
● If the power supply cord is damaged, it must only be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
● Do not treat the power supply cord with your wet hand. It may cause electric shock.

Electric Outlet
● Avoid connecting several electric devices to single outlet. It may cause fire.

●This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

INSTALLATION

Installation area
- Set on flat and firm floor.
- Incorrect installation may cause severe noise and break down.
- Maintain more than 10 cm. between the side of drain hose and the wall.
- A carpet must not obstruct the ventilation openings.

## Connecting the earth wire (only for models with two prong plug)
- Install the earth wire to prevent short-circuit due to leaking current and electric shock.
- It is attached at the back of the washer. Connect it to the metal water pipe. If the water pipe is made of plastic, it does not have the earth effect.
- Do not connect the earth wire to the gas pipe, lightning arrester. telephone connecter, etc.
⚠ Warning-the appliance with two-pronged plug must be grounded

Connecting the power plug
- Insert the power plug into the outlet.
- Before connecting the power plug, check if the voltage setting of the washer matches the outlet voltage.
- If AC outlet with ground terminal is used, grounding is not needed. If not, never forget earthing (earthing method above).
- The appliance must be positioned so that the plug is accessible
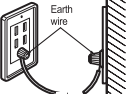

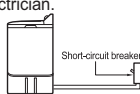

Other earthing method

- After connecting the earth wire to the earth copper plate, bury it at least 75cm deep under the wet ground.
- Connect to the earthing-only outlet.
- If grounding methods as described are not possible, a seperate circuit-breaker should be employed and installed by a qualified electrician.

Connecting the drain hose
- Push the clamp toward the body of the washing machine as shown in the figure.
- Be sure to reroute the hose so that it is not kinked; kinks or sharp bending in the hose will prevent proper drainage.
- Make sure water is drained smoothly by placing a base under the machine or by applying other appropriate mean.
INSTALLATION & HOW TO WASH

Before washing
1. Check the washing instruction labels on the clothing to be washed.
2. Remove all objects from the pockets of the clothing.Objects left in the pockets may damage clothing or break the washing machine (could cause the drain hose to clog).
3. Wash after separating oiled or dyed clothing.
4. For your convenience hang up the wash cover on the right side of the washing machine tub when not in use.
