Please read these safety precautions carefully before using the monitor.

⚠ Warning If you ignore the warning message, you may be seriously injured or there is a possibility of accident or death.

⚠ Caution If you ignore the caution message, you may be slightly injured or the product may be damaged

Precautions in installing the Monitor

⚠ Warning

■ **Keep away from heat sources like electrical heaters.**
- Electrical shock, fire, malfunction or deformation may occur.

■ **Keep the packing anti-moisture material or vinyl packing out of the reach of children.**
- Anti-moisture material is harmful if swallowed. If swallowed by mistake, force the patient to vomit and visit the nearest hospital. Additionally, vinyl packing can cause suffocation. Keep it out of the reach of children.

■ **Do not put heavy objects on the monitor or sit upon it.**
- If the monitor collapses or is dropped, you may be injured. Children must pay particular attention.

■ **Do not leave the power or signal cable unattended on the pathway.**
- The passerby can falter, which can cause electrical shock, fire, product breakdown or injury.

■ **Install the monitor in a neat and dry place.**
- Dust or moisture can cause electrical shock, fire or product damage.

■ **If you can smell smoke or other odors or hear a strange sound unplug the power cord and contact the service center.**
- If you continue to use without taking proper measures, electrical shock or fire can occur.

■ **If you dropped the monitor or the case is broken, turn off the monitor and unplug the power cord.**
- If you continue to use without taking proper measures, electrical shock or fire can occur. Contact the service center.

■ **Do not drop metallic objects such as coins, hair pins, chopsticks or wire into the monitor, or inflammable objects such as paper and matches. Children must pay particular attention.**
- Electrical shock, fire or injury can occur. If a foreign object is dropped into the monitor, unplug the power cord and contact the service center.

⚠ Caution

■ **Make sure the monitor ventilation hole is not blocked. Install the monitor in a suitably wide place (more than 10cm from the wall)**
- If you install the monitor too close to the wall, it may be deformed or fire can break out due to internal heat.

■ **Do not block the ventilation hole of the monitor by a tablecloth or curtain.**
- The monitor can be deformed or fire can break out due to overheating inside the monitor.

■ **Install the monitor on a flat and stable place that has no risk of dropping the monitor.**
- If the monitor is dropped, you may be injured or the monitor may be broken.

■ **Install the monitor where no EMI occurs.**

■ **Keep the monitor away from direct sunlight.**
- The monitor can be damaged.

Electrical Power Related Precautions

⚠ Warning

■ **Make sure to connect the power cable to the grounded current.**
- You may be electrocuted or injured.

■ **Use the rated voltage only.**
- The monitor can be damaged, or you may be electrocuted.

■ **During a thunder or lightning storm, unplug the power cable or signal cable.**
- You may be electrocuted or a fire can break out.

■ **Do not connect several extension cords, electrical appliances or electrical heaters to a single outlet. Use a power bar with a grounding terminal designed for exclusive use with the computer.**
- A fire can break out due to overheating.

■ **Do not touch the power plug with wet hands. Additionally, it the cord pin is wet or covered with dust, dry the power plug completely or wipe dust off.**
- You may be electrocuted due to excess moisture.

■ **If you don't intend to use the monitor for a long time, unplug the power cable from the monitor.**
- Covering dust can cause a fire, or insulation deterioration can cause electric leakage, electric shock or fire.

■ **Fix the power cable completely.**
- If the power cable is not fixed completely, a fire can break out.

■ **Hold the plug when pulling out the power cable. Do not bend the power cord with excessive force or put heavy objects on the power cord.**
- The power line can be damaged, which may cause electric shock or fire.

■ **Do not insert a conductor (like a metal chopstick) into one end of the power cable while the other end is connected to the input terminal on the wall. Additionally, do not touch the power cable right after plugging into the wall input terminal.**
- You may be electrocuted.

⚠ Caution

■ **Do not unplug the power cord while the monitor is in use.**
- Electrical shock can damage the monitor.

Precautions in Moving the Monitor

⚠ Warning

■ **Make sure to turn off the monitor.**
- You may be electrocuted or the monitor can be damaged.

■ **Make sure to remove all cables before moving the monitor.**
- You may be electrocuted or the monitor can be damaged.

⚠ Caution

■ **Do not shock the monitor when moving it.**
- You may be electrocuted or the monitor can be damaged

■ **Do not dispose the product-packing box. Use it when you move.**

■ **Make the panel face forward and hold it with both hands to move.**
- If you drop the monitor, the damaged monitor can cause electric shock or fire. Contact with the service center for repair.

Precautions in Using the Monitor

⚠ Warning

■ **Do not disassemble, repair or modify the monitor at your own discretion.**
- Fire or electric shock accident can occur.
- Contact the service center for check, calibration or repair.

■ **Do not spray water on the monitor or scrub with an inflammable substance (thinner or benzene). Fire or electric shock accident can occur**

■ **Keep the monitor away from water.**
- Fire or electric shock accident can occur.

⚠ Caution

■ **Do not put or store inflammable substances near the monitor.**
- There is a danger of explosion or fire due careless handling of the inflammable substances.

■ **When cleaning the brown tube surface, unplug the power cord and scrub with soft cloth to prevent scratching. Do not clean with a wet cloth.**
- The water can sink into the monitor, which can cause electric shock or serious malfunction.

■ **Take a rest from time to time to protect your vision.**

■ **Keep the monitor clean at all times.**

■ **Take a comfortable and natural position when working with a monitor to relax the muscles.**

■ **Take a regular break when working with a monitor for a long time.**

■ **Do not press strongly upon the panel with a hand or sharp object such as nail, pencil or pen, or make a scratch on it.**

■ **Keep proper distance from the monitor.**
- Your vision may be impaired if you look at the monitor too closely.

■ **Set the appropriate resolution and clock by referring to the User's Manual.**
- Your vision can be impaired.

■ **Use authorized detergent only when cleaning the monitor. (Do not use benzene, thinner or alcohol.)**
- Monitor can be deformed.

On Disposal

■ The fluorescent lamp used in this product contains a small amount of mercury.

■ Do not dispose of this product with general household waste.
Disposal of this product must be carried out in accordance to the regulations of your local authority.

Please check the accessories in the product package.
*** The monitor and the accessories can be different from the figures shown here.**

Remote Control

SOURCE

If you press the button once, the following Input Signal Window will appear. Select the signal type you want using the ▼▲ button.

TV/AV : TV/AV button

TV > AV1 > AV2 > S-Video > Component

I/II : Bilingual choice and sound mode selection (TV only)

Press this button

- to switch from **Stereo** to **Mono** sound in case of stereo transmission, or from **Nicam Stereo** to **Nicam Mono**, in case of digital transmission.
- to switch from **Nicam Dual I** to **Nicam Dual II** or **Nicam Dual I+II** in case of Nicam Dual transmission.
- to choose between **Dual I**, **Dual II** or **Dual I+II** in case of bilingual transmission :
  Dual I sends the primary broadcast language to the loudspeakers ;
  Dual II sends the secondary broadcast language to the loudspeakers ;
  Dual I+II sends a separate language to each loudspeakers.

Sound output selection (AV, RGB, DVI only)

In **AV, RGB, DVI** mode, you can select output sound for the left and right loudspeakers.

Repeatedly press the **I/II** button to select the sound output.

- L+R **:** Audio signal from audio L input is sent to the left loud speaker and audio signal from audio R input is sent to the right loud speaker.
- L+L **:** Audio signal from audio L input is sent to left and right loud-peakers.
- R+R **:** Audio signal from audio R input is sent to left and right loud-speakers.

■ **NOTE :** In case of weak stereo sound signals, with stereo or Nicam stereo transmission, select mono reception.

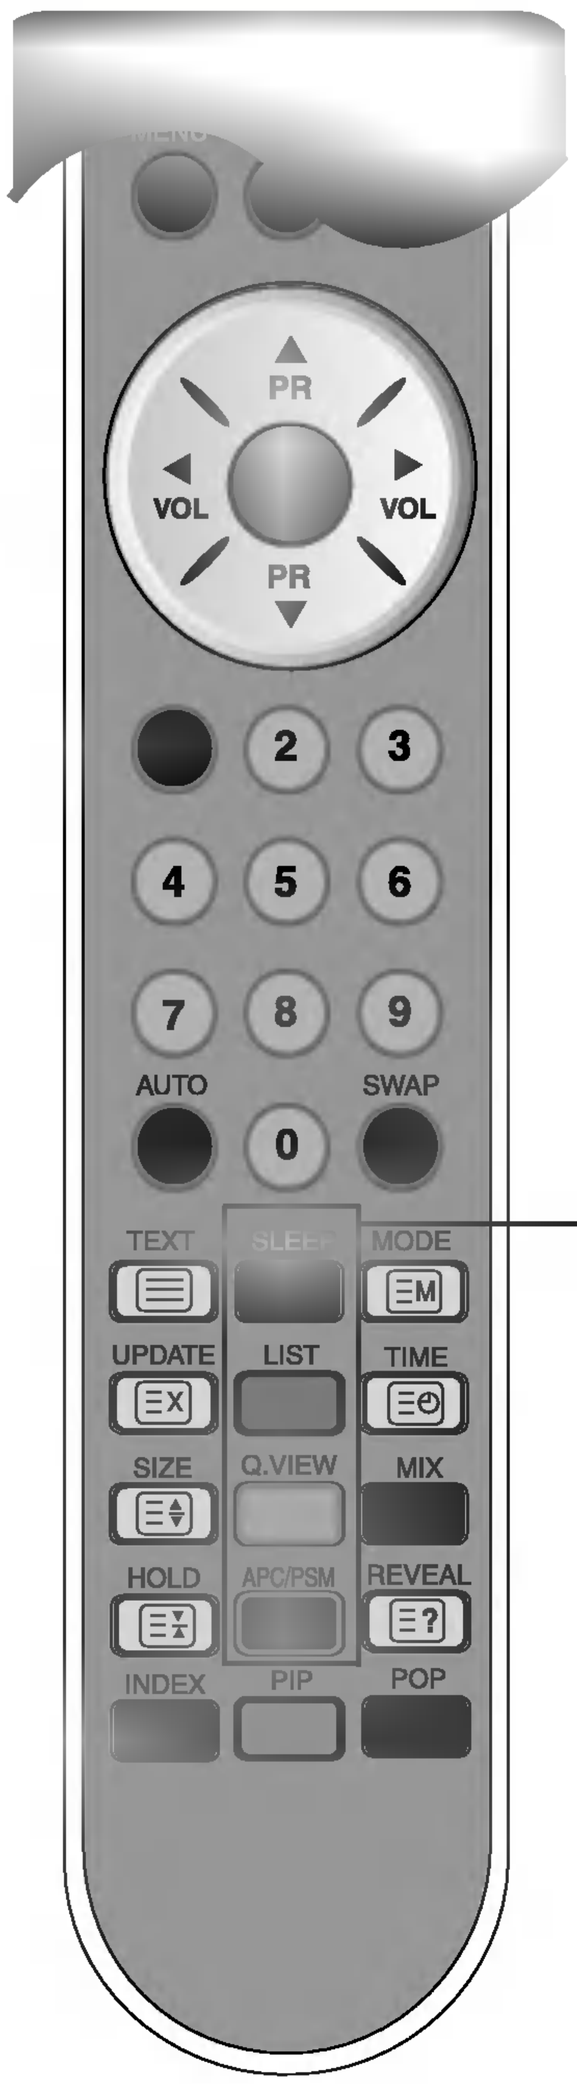
Number buttons

AUTO Button

- This function is to automatically search the available channels. It is available to the TV signal inputs only.
- This function is to automatically adjust your display image to the ideal settings for the current screen resolution size (display mode). It is available to the PC analog signal input only.

SWAP function

To switch the main-screen and sub-screen in PIP/POP/PBP mode.



SLEEP : SLEEP Timer

You can set a time period after which the **TV / AV1 / AV2 / S-Video / Component** should switch itself to standby. Press the key repeatedly to select the number of minutes.

LIST : Programme list

To display the programme list (0~ 99).

Note: TV channels displayed in blue have been setup to be skipped in the Programme Edit menu

Q.VIEW : QUICK VIEW Button (See page A27)

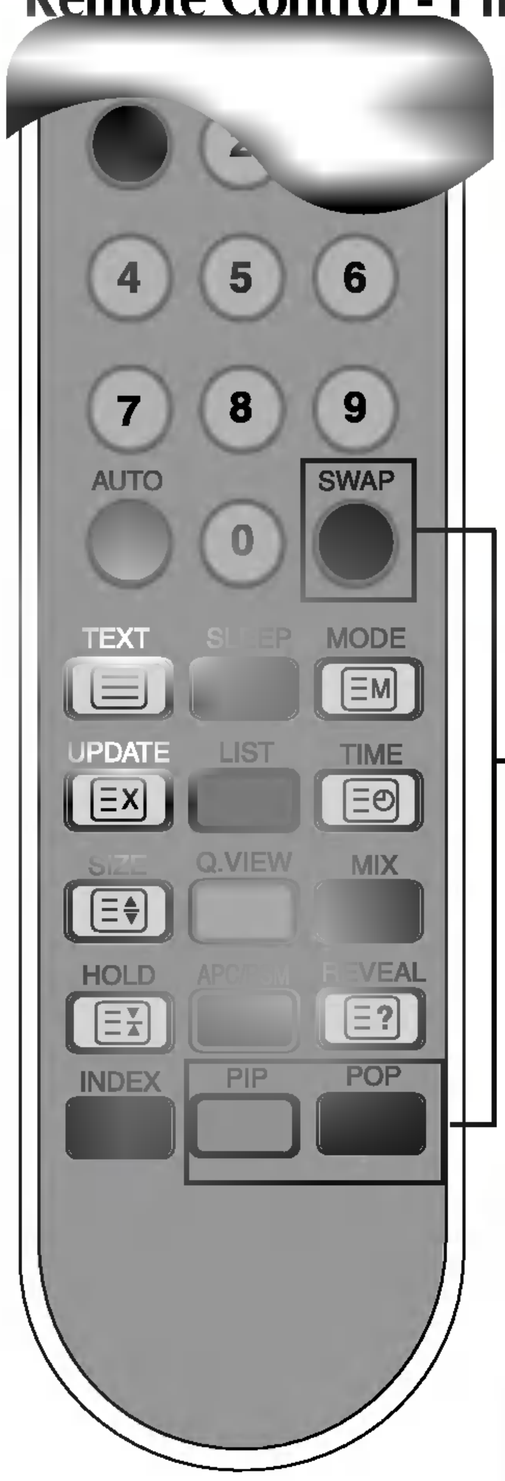
* Favourite Program On : Rotate Favourite channel.

* Favourite Program Off : To display the previously selected TV channel.

APC / PSM

Press repeatedly to select **Dynamic, Standard, Mild, Game** or **User** picture mode. This function is not supported in PC mode.

Remote Control - PIP/POP/PBP function



1. PIP (Picture in Picture)

The sub-screen is changed in the order shown below.
: SMALL -> MEDIUM -> LARGE -> OFF

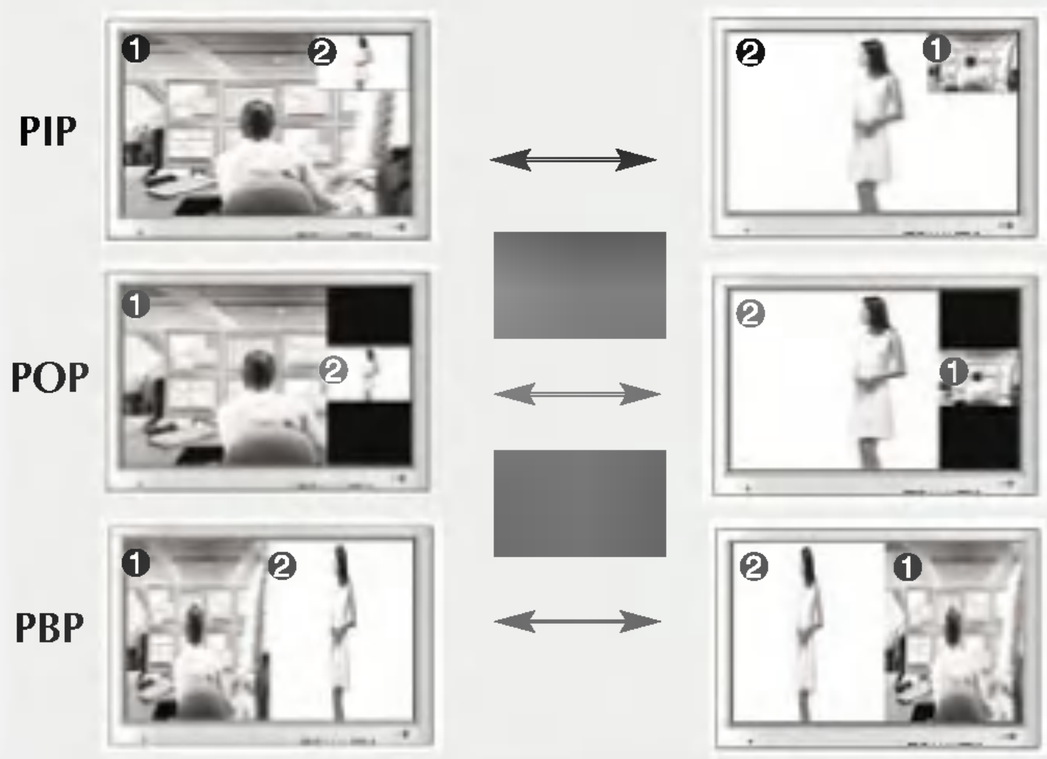
2. POP (Picture out Picture) Button

The sub-screen moves to the next mode whenever you press this button.
: POP ON -> PBP(FULL) -> PBP(4:3) -> OFF

POP ON | PBP (FULL) | PBP (4:3)

3. SWAP Button

You can swap the main screen and the sub-screen when the PIP/POP/PBP function is used.



<Table of PIP/POP/PBP Function Support>

Main Screen / Sub-Screen	TV	AV1	AV2	S-Video	COMPONENT	RGB PC	DVI PC
TV	X	X	X	X	X	●	●
AV1	X	X	X	X	X	●	●
AV2	X	X	X	X	X	●	●
S-Video	X	X	X	X	X	●	●
COMPONENT	X	X	X	X	X	●	●
RGB PC	●	●	●	●	●	X	●
DVI PC	●	●	●	●	●	●	X

When '**Input Signal 1**' comes on in the main screen, only '**Input Signal 2**' can be displayed on the sub-screen. On the contrary, if the main screen displays '**Input Signal 2**', the sub-screen can display '**Input Signal 1**' only. You can swap '**Input Signal 1**' and '**Input Signal 2**' using the SWAP button.

***PIP** function is not supported in 480i, 576i and 1080i modes.

Remote Control - Using the Teletext function

TEXT

To select the teletext on or off. The main index page or the last selected page appears on the screen together with an information headline and an option line at the bottom of the screen.

UPDATE

Press the button to appear the TV programme. At the top of screen indicates that you are still in the teletext mode. Before interrupting teletext, you may select a page number. When the page has been found, the information line appears briefly on your screen. Press the button again to reappear teletext.

SIZE

Press the button repeatedly to display the upper part, the lower part and then to return to the normal page size.

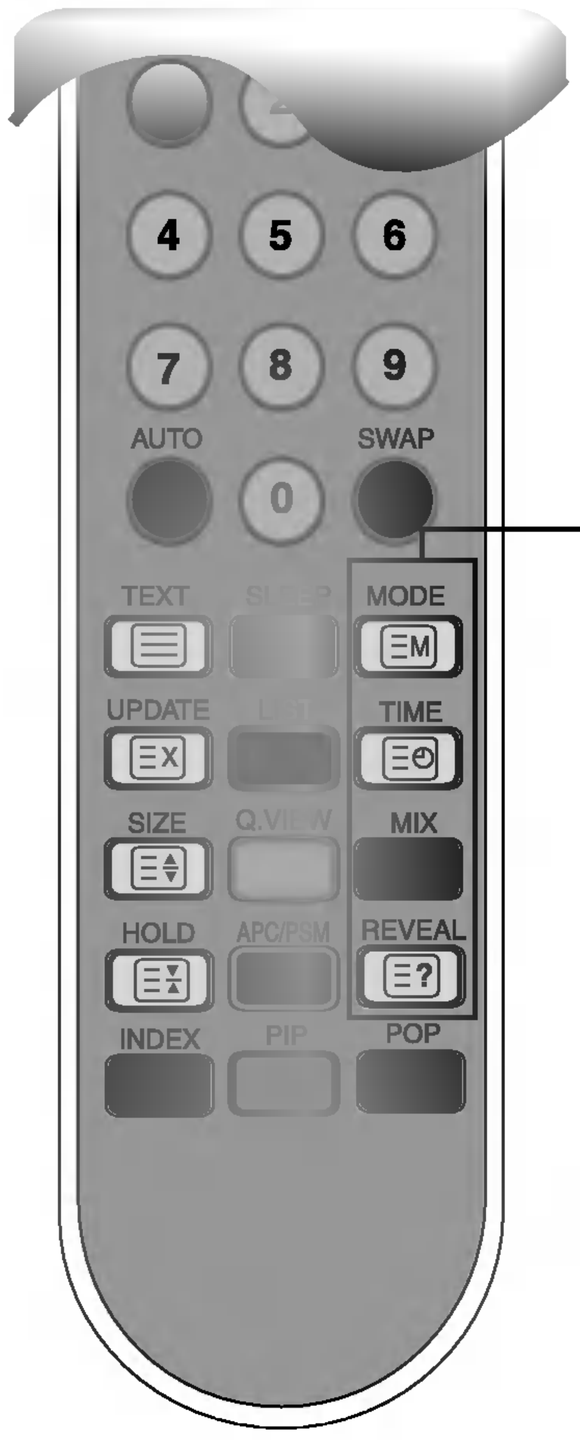
HOLD

Press the button to stop the automatically rotating of the subpages. Press the button again to continue the automatic rotating again.

INDEX

To display the main index.

Remote Control - Using the Teletext function



MODE

The mode will be switched in the Teletext mode.

TIME

press this button to select a sub page number. The sub page number is displayed at the bottom of the screen. To hold or change the sub page, press the RED/GREEN, ▲▼ or NUMBER buttons. Press again to exit this function.

MIX

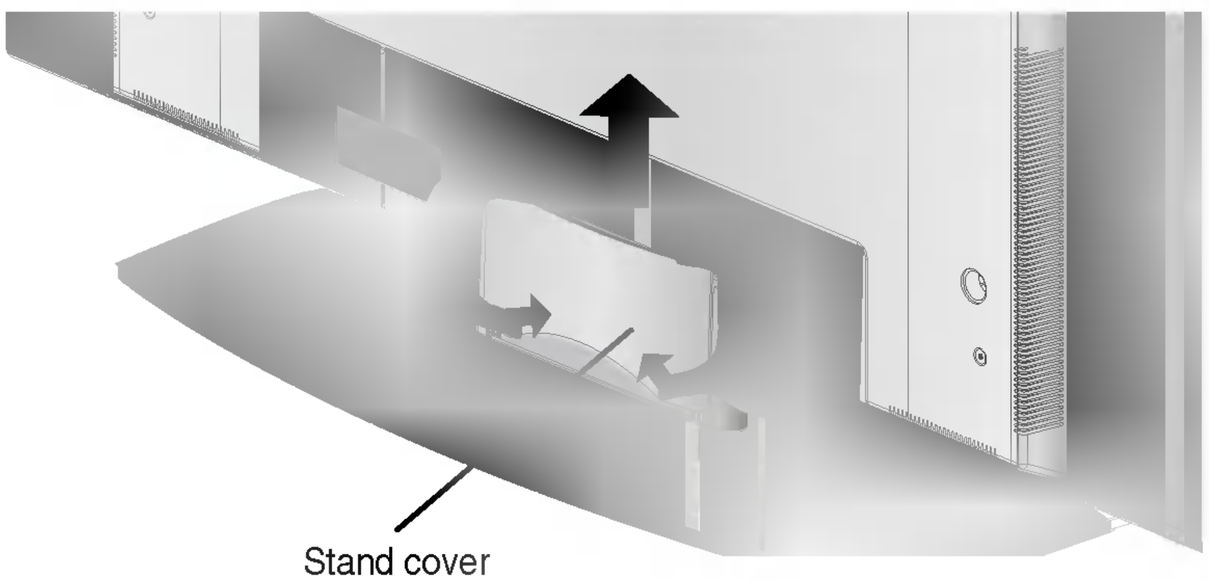
Display the teletext pages superimposed on the TV picture. To switch the TV picture off press this button again.

REVEAL

Press the button to reveal/conceal the hidden information, such as solutions to riddles and puzzles. Press this button again to remove the information from the display.

* Applicable only for models that support the stand

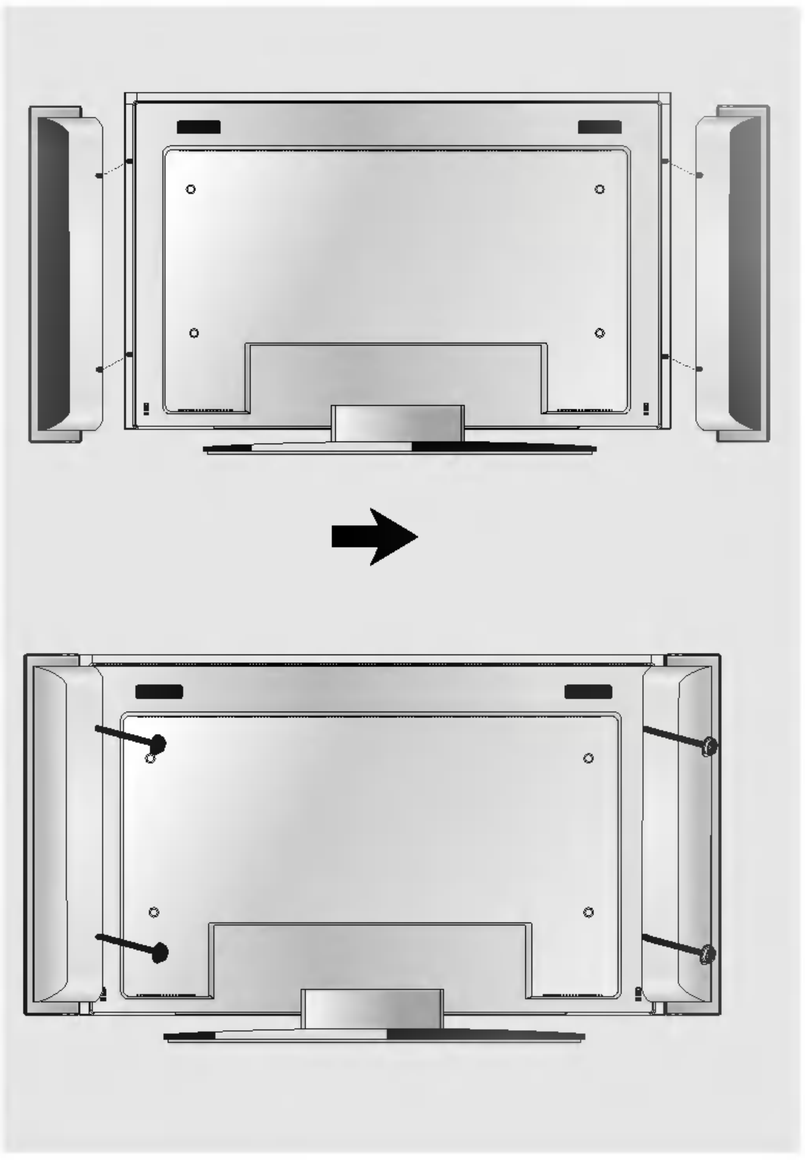
1. Disassemble the **stand cover.** The cover may be easily disassembled by pressing down on the base as shown in the figure.

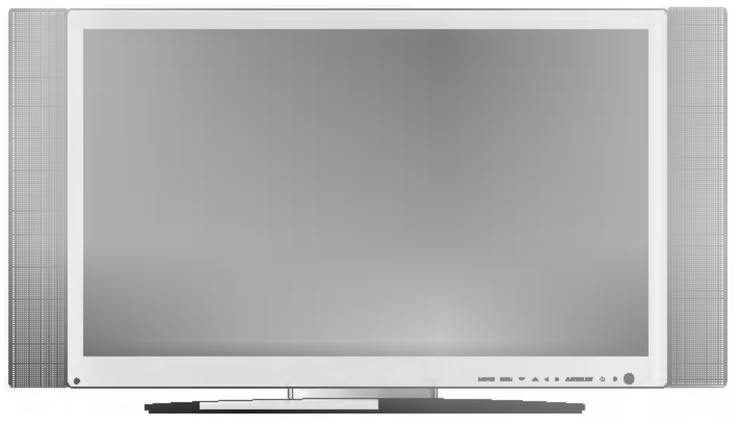


2. After connecting the cables, correctly position the stand cover into the holes on the stand. If securely connected, you will hear the latch click into place.

* Applicable only for models that support the speakers

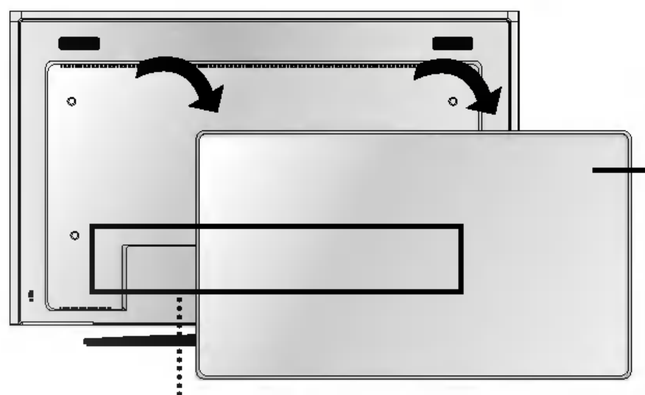
Use the screws to secure the speakers on the rear side of the monitor as shown in the below figure.



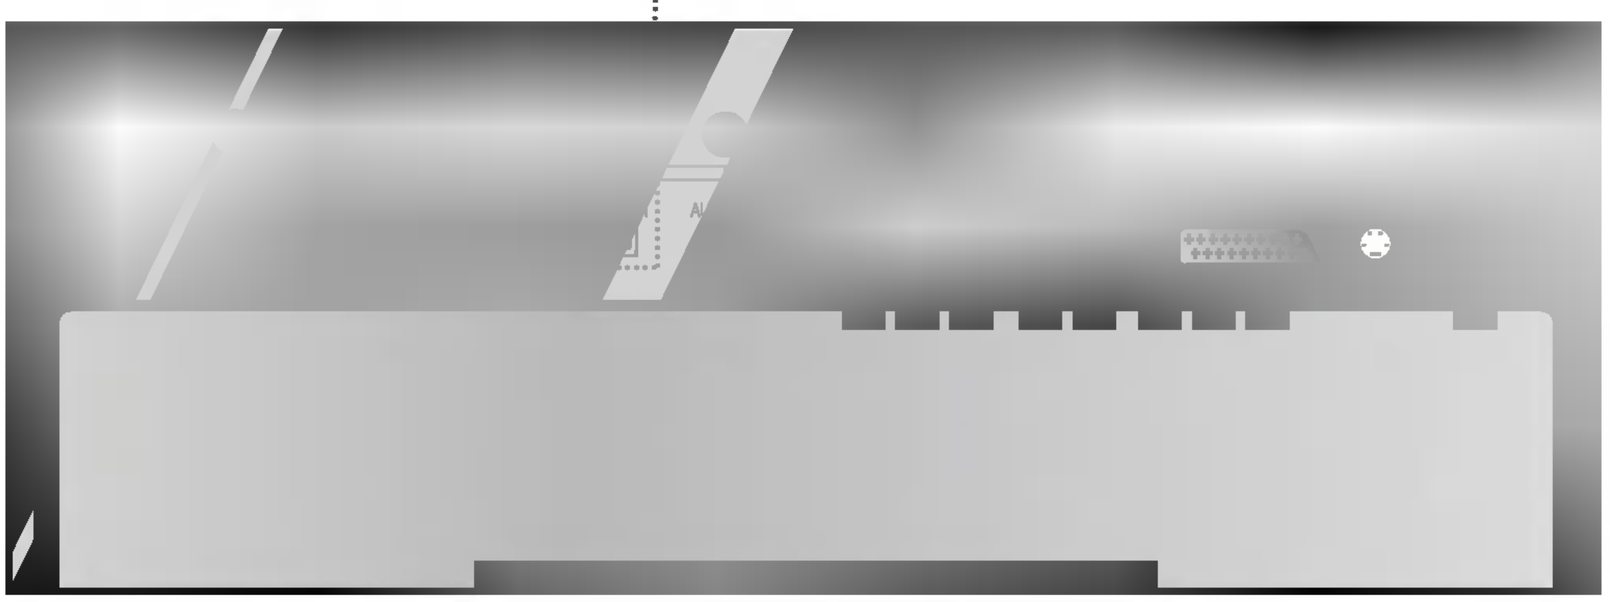


When the speaker is installed.

Rear View



Back Cap
- Open the back cap before you install the monitor.



❶ Power Connector : Connect the power cord

❷ Wired Remote Control Port

❸ RS-232C Serial Ports

❹ PC Signal Inputs

❺ PC Sound Jack
: Connect the audio cable to the *LINE OUT jack of the PC sound card.

❻ AV Input Ports

❼ TV Tuner Jack : Connect the antenna.

*LINE OUT

A terminal used to connect to the speaker including a built-in amplifier (Amp). Make sure that the connecting terminal of the PC sound card is checked before connecting. If the Audio Out of PC sound card has only Speaker Out, reduce the PC volume.

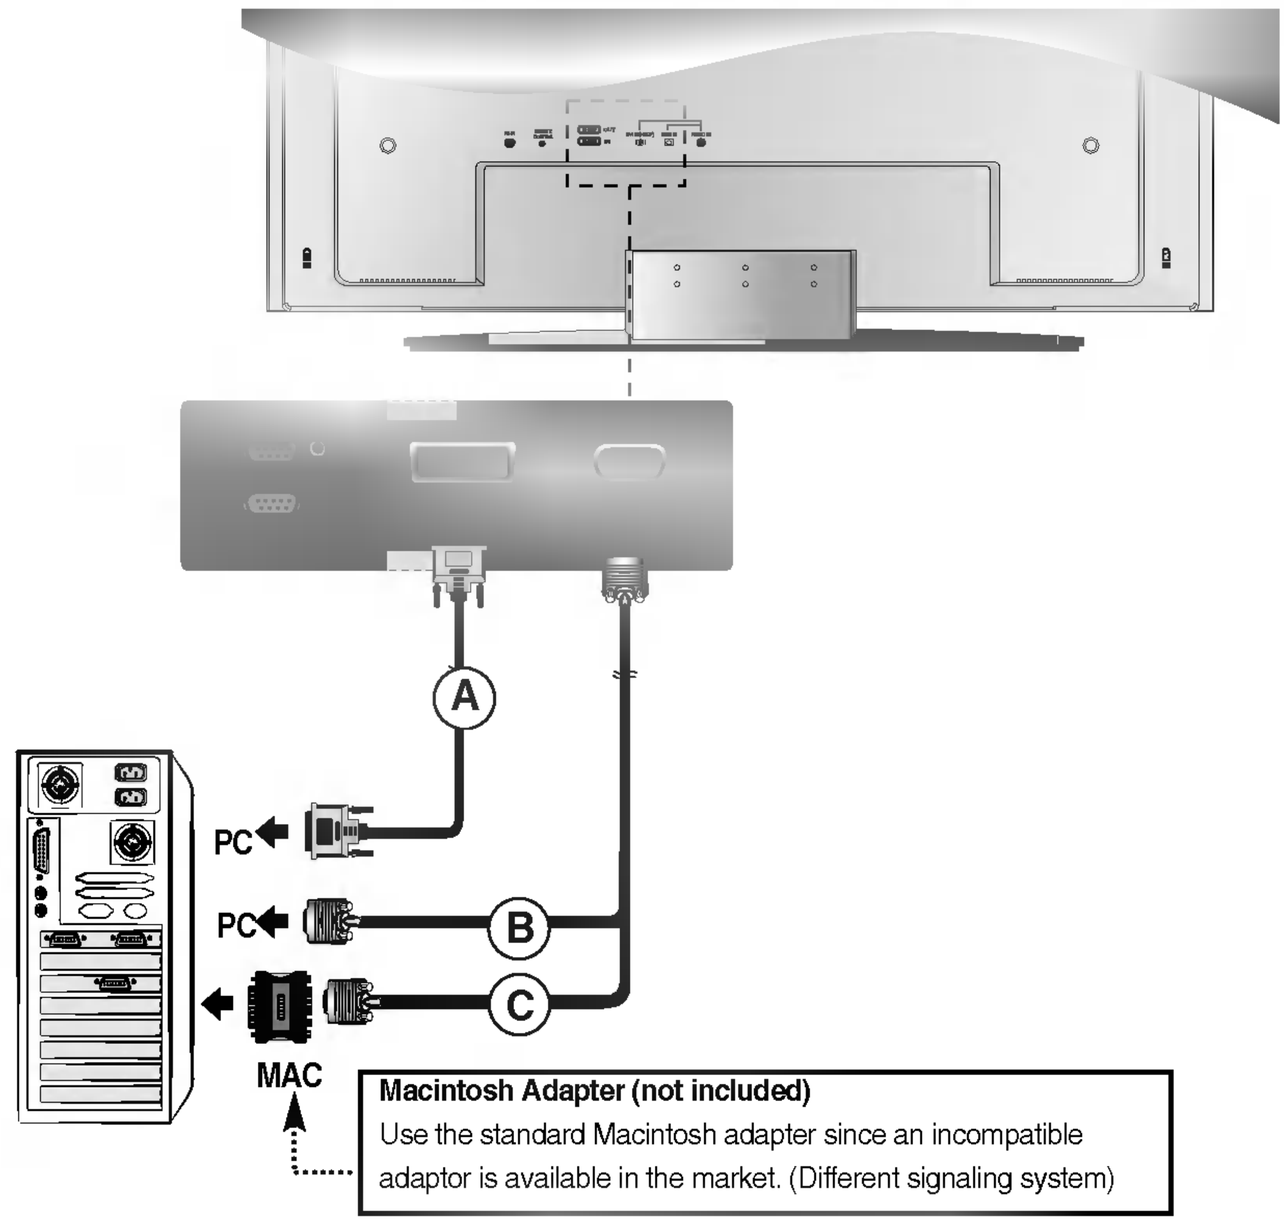
If the Audio Out of the PC sound card supports both Speaker Out and Line Out, convert to Line Out using the card jumper of the program (Refer to the Sound Card Manual).

1 First of all, see if the computer, monitor and the peripherals are turned off. Then, connect the signal input cable.

Ⓐ When connecting with the DVI signal input cable.

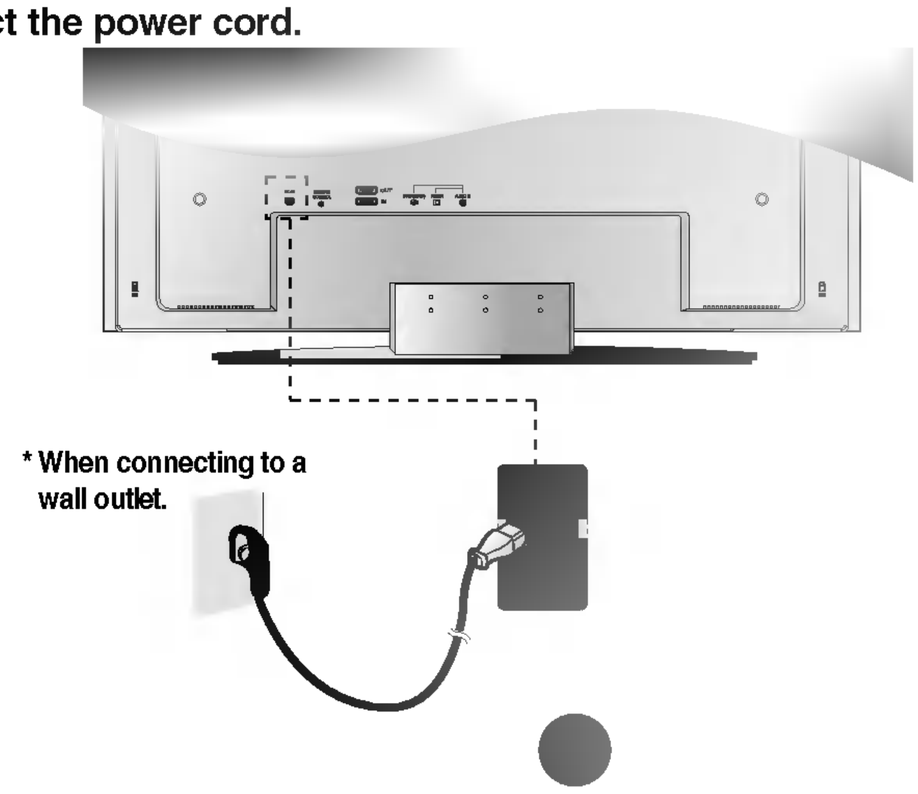
Ⓑ When connecting with the DSub signal input cable. (IBM compatible PC)

Ⓒ When connecting with the DSub signal input cable. (Macintosh)

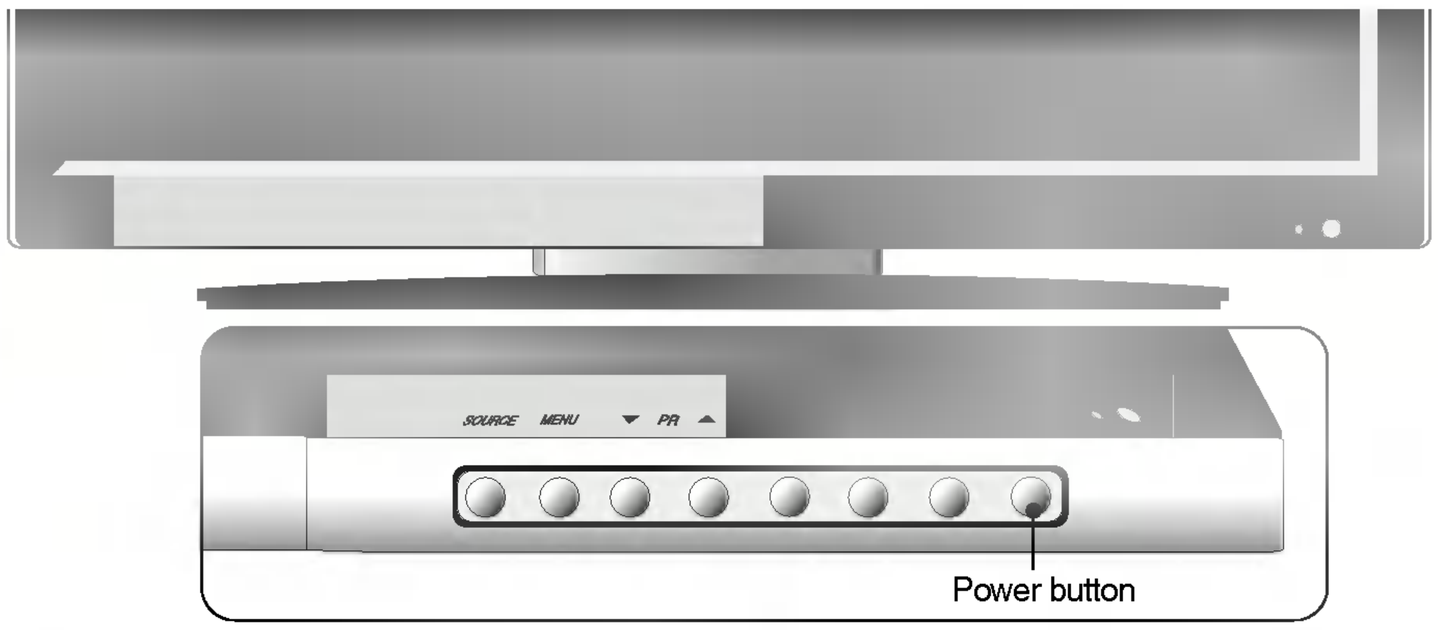


Macintosh Adapter (not included)
Use the standard Macintosh adapter since an incompatible adaptor is available in the market. (Different signaling system)

2 Connect the power cord.



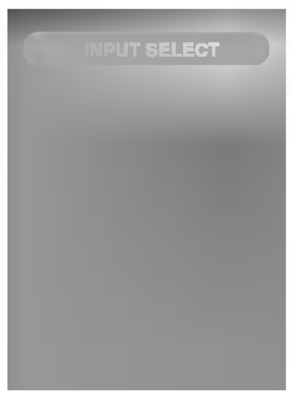
3 **Ⓐ Turn on power by pressing the power button on the monitor.**



Ⓑ Turn on the PC.

4 **Select an input signal.**
Press the SOURCE button on the remote controller to select the input signal.
Or, press the SOURCE button at the front side of the monitor.

SOURCE → ▼▲ → OK or SELECT



Ⓐ When connecting with a DVI-D signal input cable.
- Select **DVI PC**: DVI-D digital signal.

Ⓑ When connecting with a D-Sub signal input cable.
- Select **RGB PC**: 15-pin D-Sub analog signal.

Note

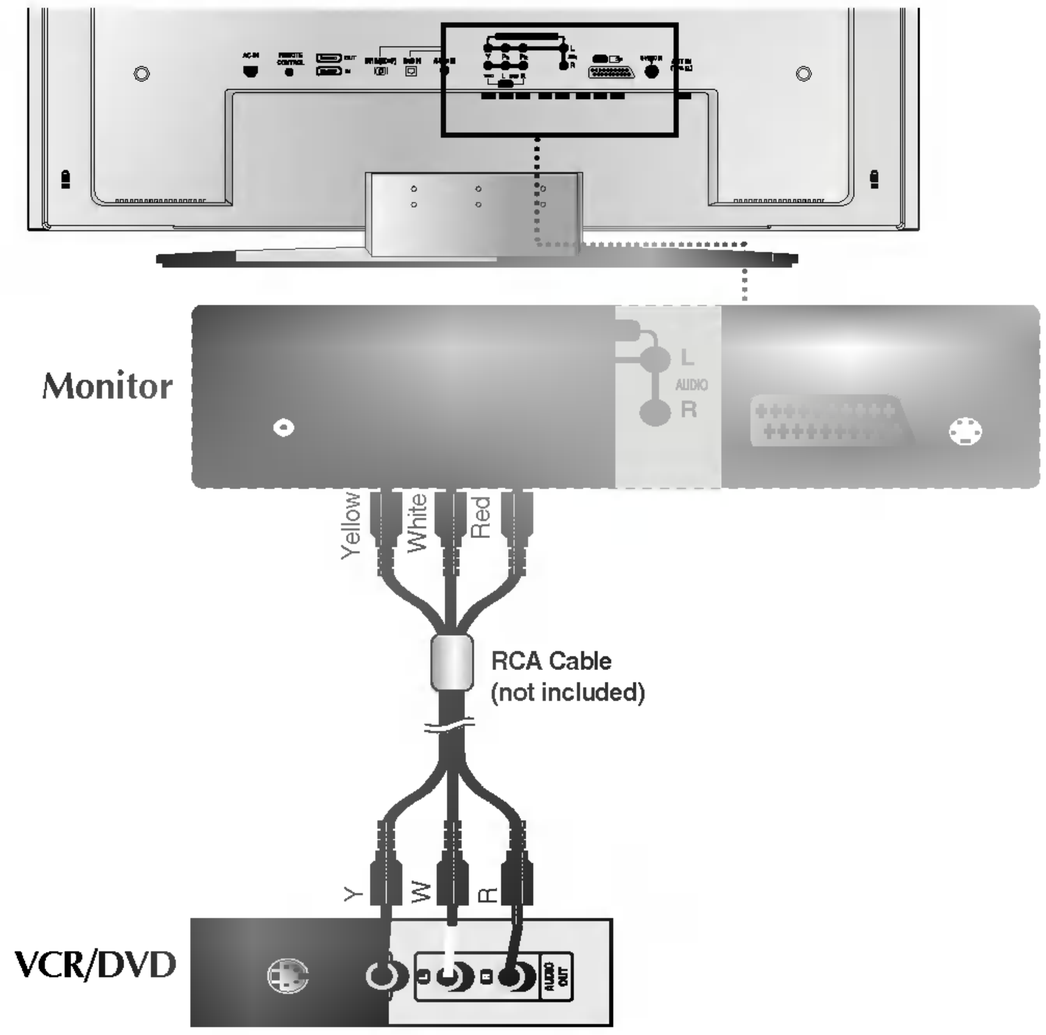
☐ **How to connect to two computers.**
Connect the signal cables (DVI and D-Sub) to each computer.
Press the SOURCE button in a remote controller to select the computer to use.

☐ **Directly connect to a grounded power outlet on the wall or a power bar with a ground wire.**

1 **Connect the video cable as shown in the below figure and then connect the power cord (See page A15).**

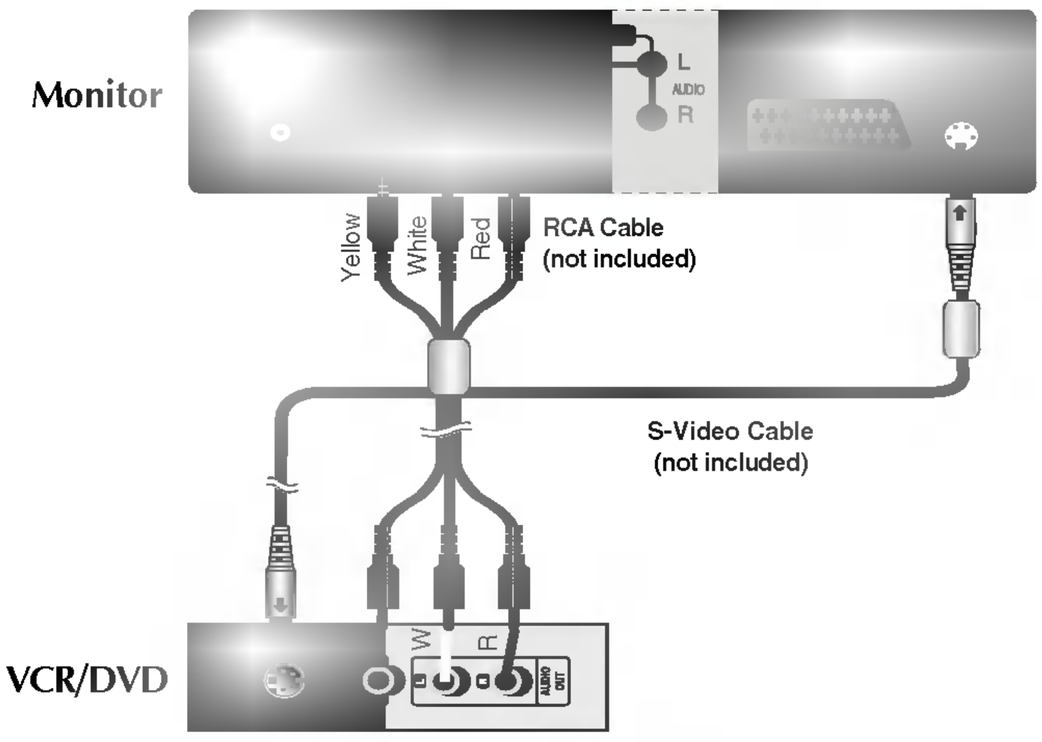
(A) When connecting with a RCA cable.

• Connect the input terminal with a proper color match.
(Video – Yellow, Sound (left) – White, Sound (right) – Red)

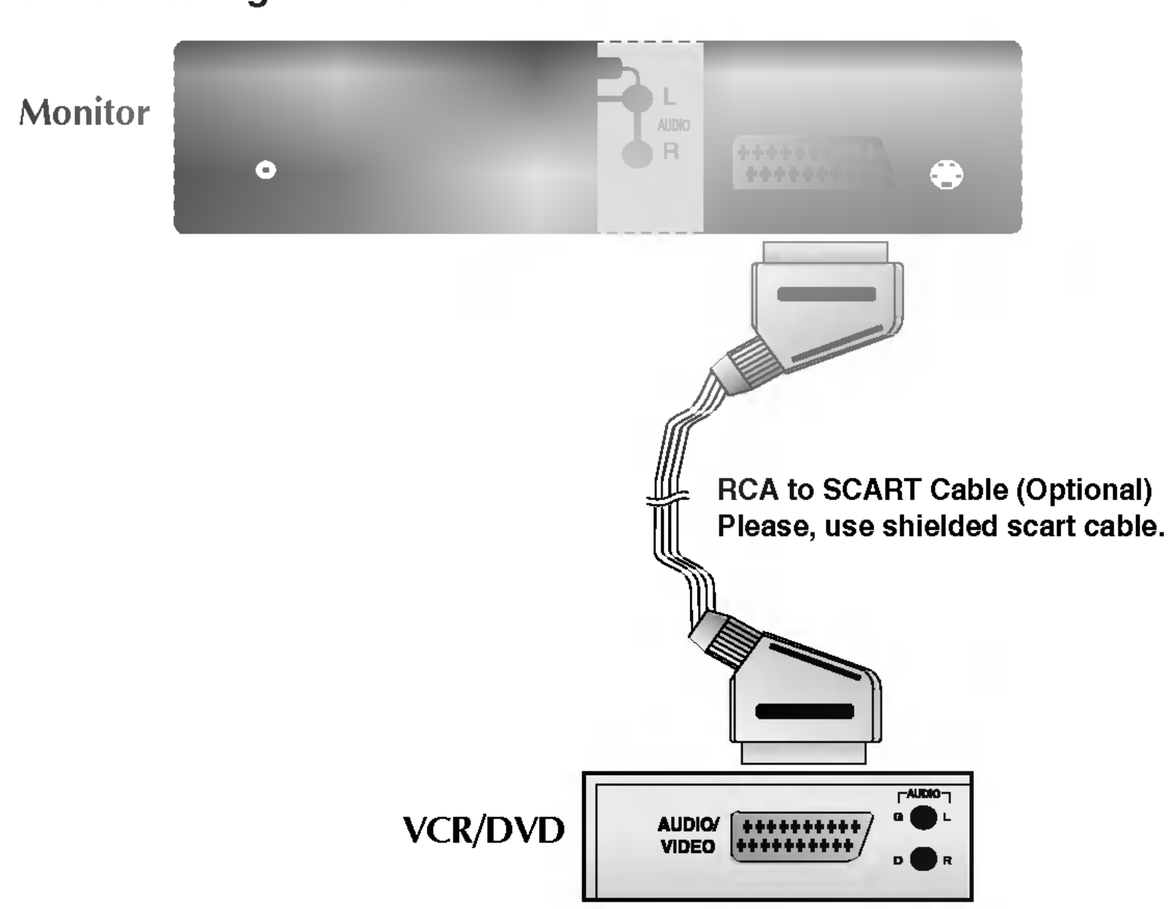


(B) When connecting with a S-Video cable.

• Connect to the S-Video input terminal to watch high image quality movies.



Ⓒ When connecting with a SCART cable.



❷ Select an input signal.
Press the SOURCE button on the remote controller to select the input signal.
Or, press the SOURCE button at the front side of the monitor.

SOURCE → ▼▲ → OK or SELECT

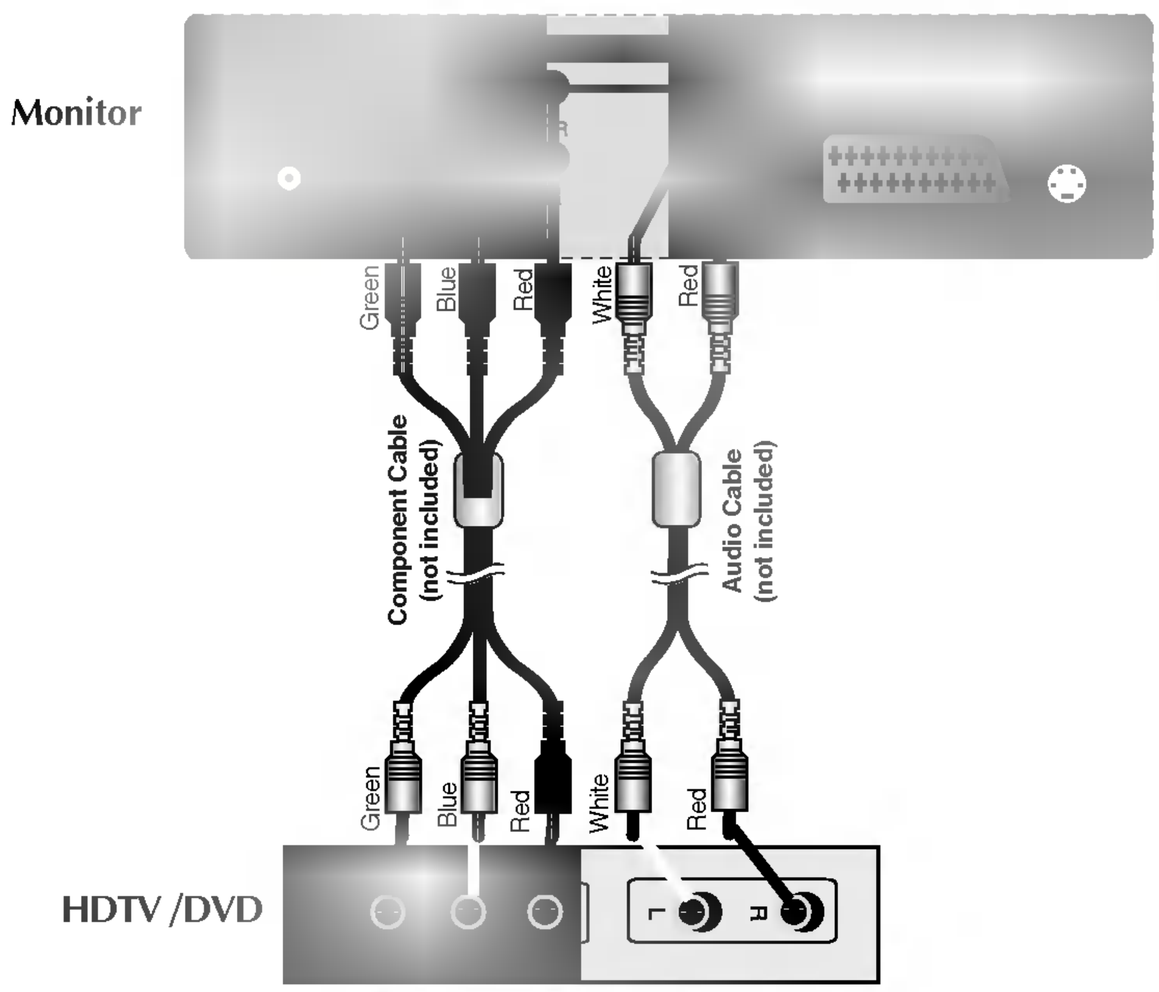
Ⓐ When connecting with an RCA cable.
- Select **AV2.**

Ⓑ When connecting with an S-Video cable.
- Select **S-Video.**

Ⓒ When connecting with a SCART cable.
- Select **AV1.**

❶ Connect the video/audio cable as shown in the below figure and then, connect the power cord (See page A15).

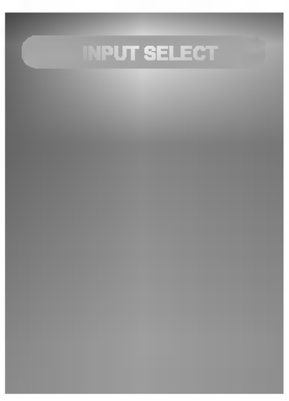
• Connect the input terminal with a proper color match.



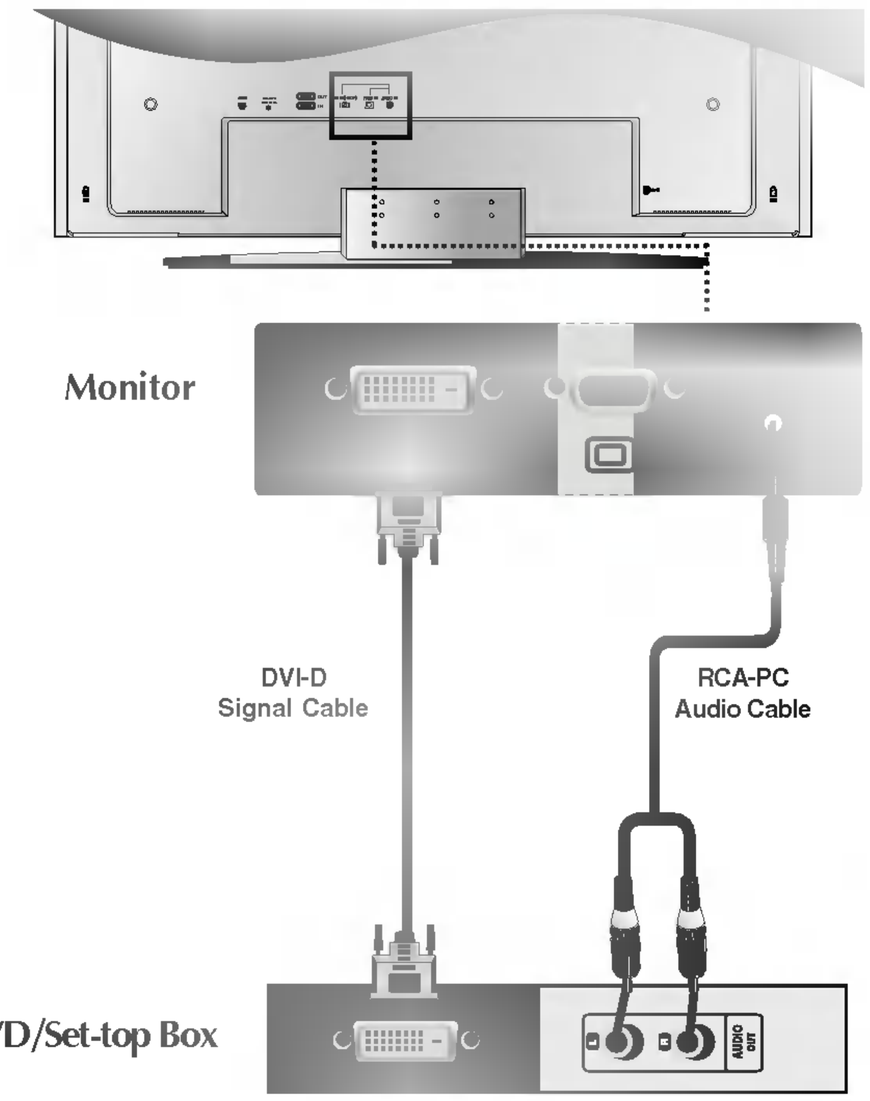
❷ Select an input signal.
Press the SOURCE button on the remote controller to select the input signal.
Or, press the SOURCE button at the front side of the monitor.

SOURCE → ▼▲ → OK or SELECT

• Select **Component.**



❶ Connect the video/audio cable as shown in the below figure and then connect the power cord (See page A15).

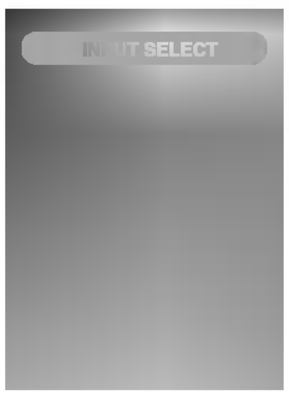


❷ Select an input signal.

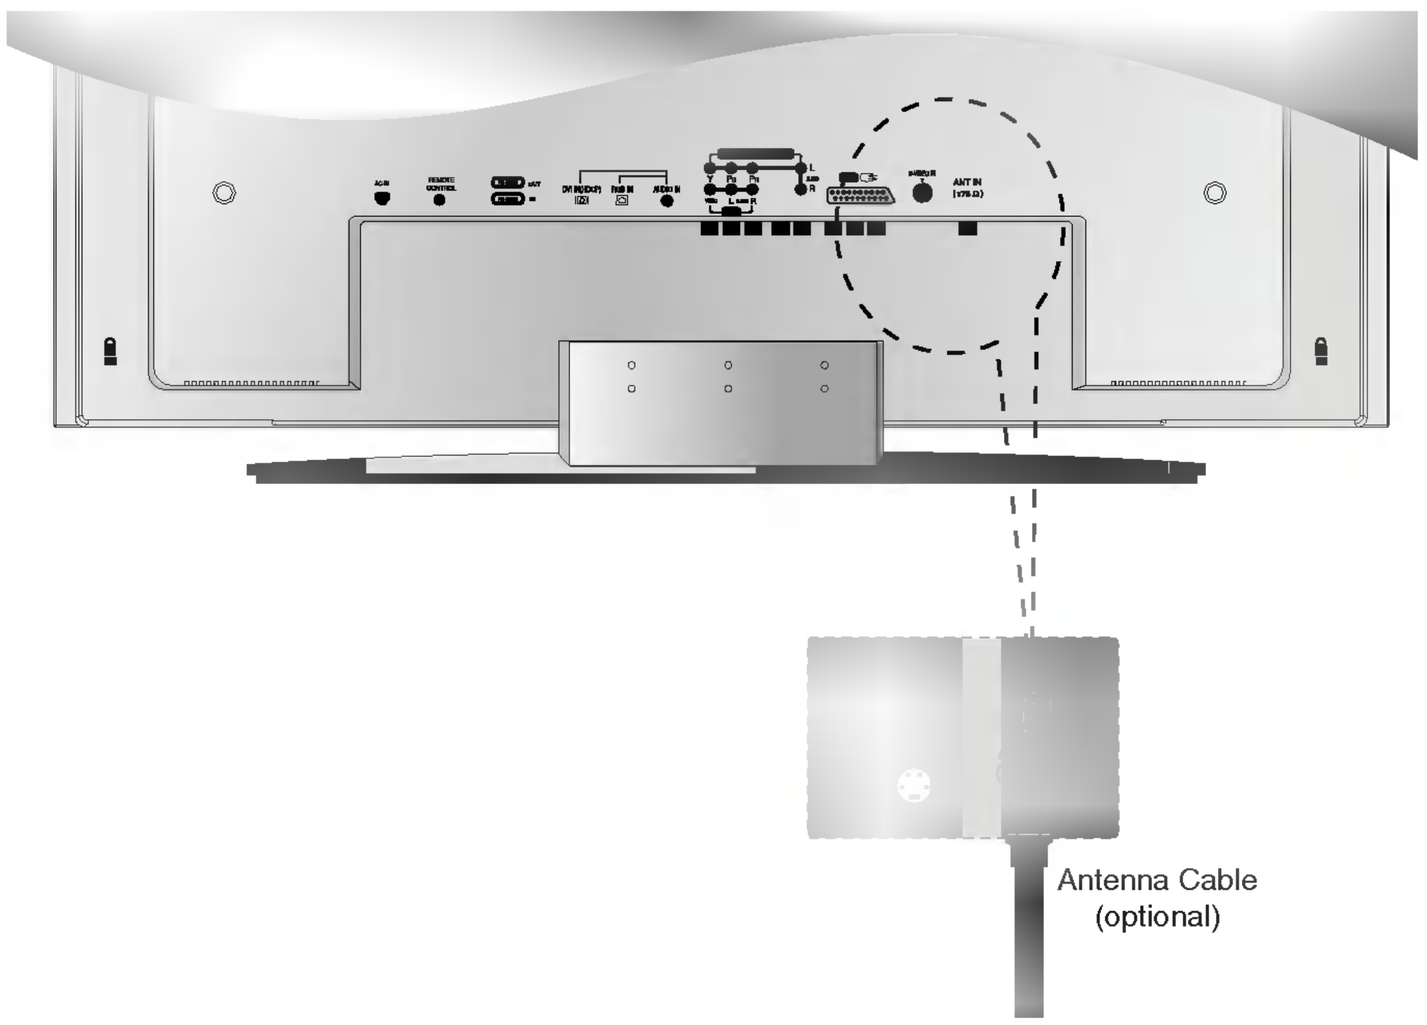
Press the SOURCE button on the remote controller to select the input signal.
Or, press the SOURCE button at the front side of the monitor.

SOURCE → ▼▲ → OK or SELECT

• Select **DVI PC.**



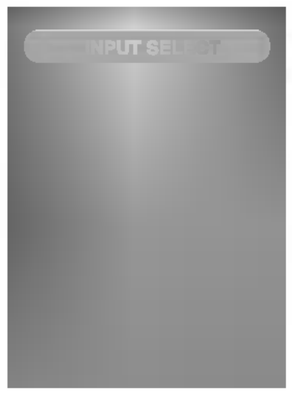
1 **See if the antenna cable is connected at the rear side of the monitor and then, connect the power cord (see page A15).**



2 **Select an input signal.**
Press the SOURCE button on the remote controller to select the input signal.
Or, press the SOURCE button at the front side of the monitor.

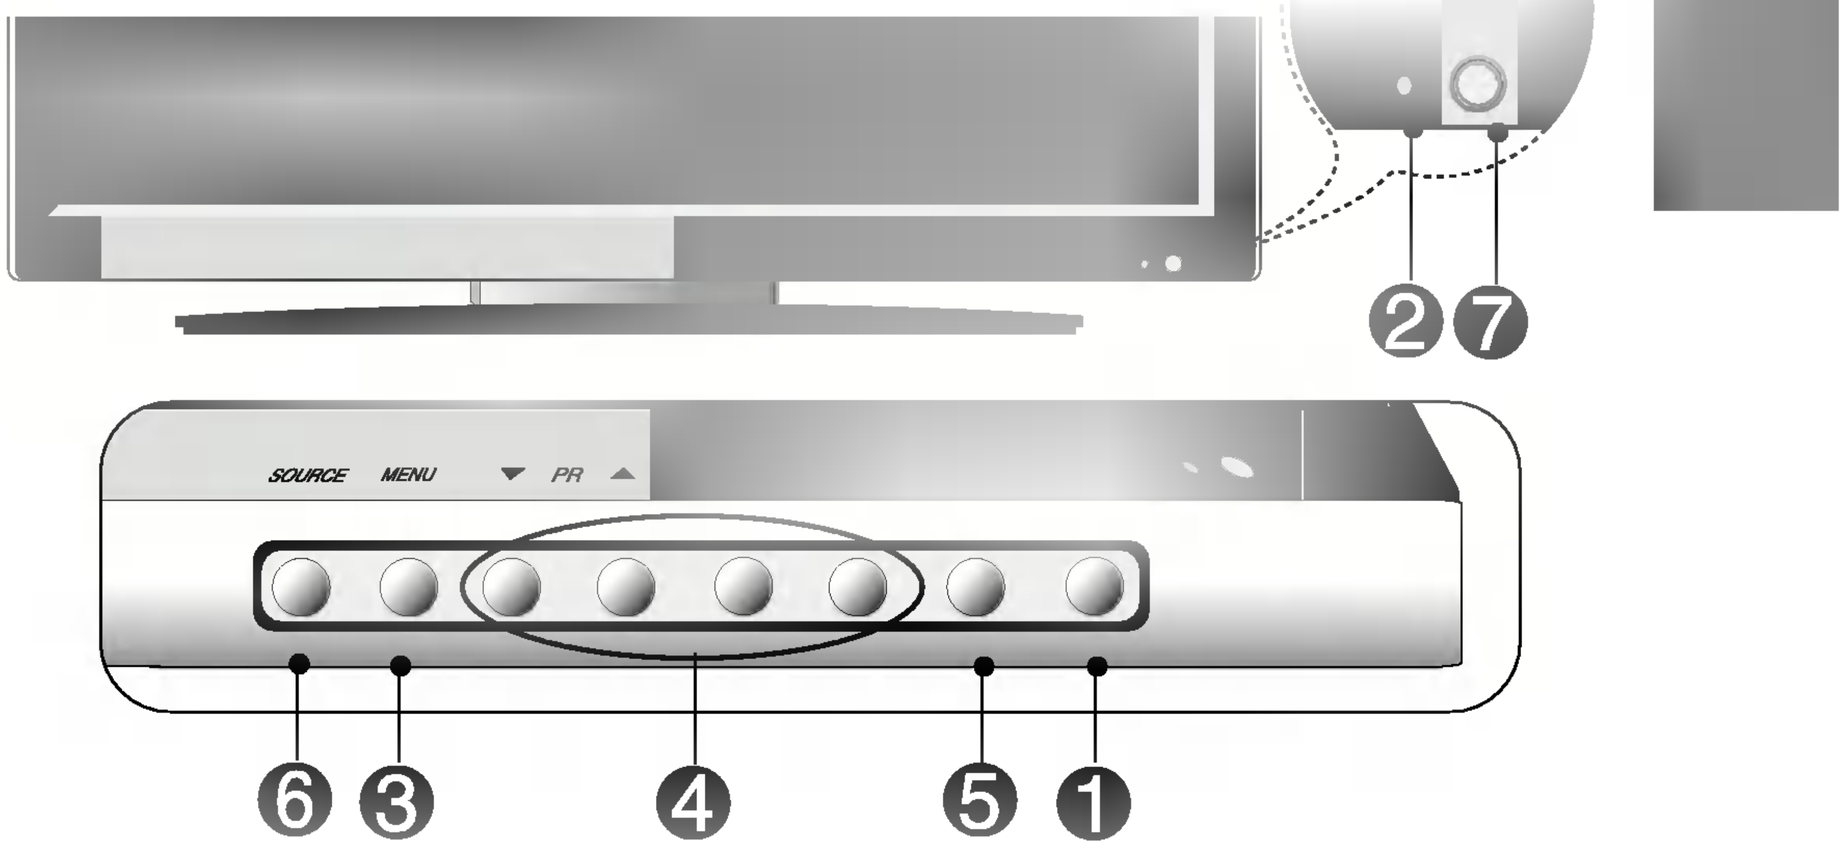
SOURCE → ▼▲ → OK or SELECT

- Select **TV.**



Name of the Buttons in the Screen

Adjustment Unit



1 Power Button

- Press this button to turn on the power.
  Press this button again to turn it off.

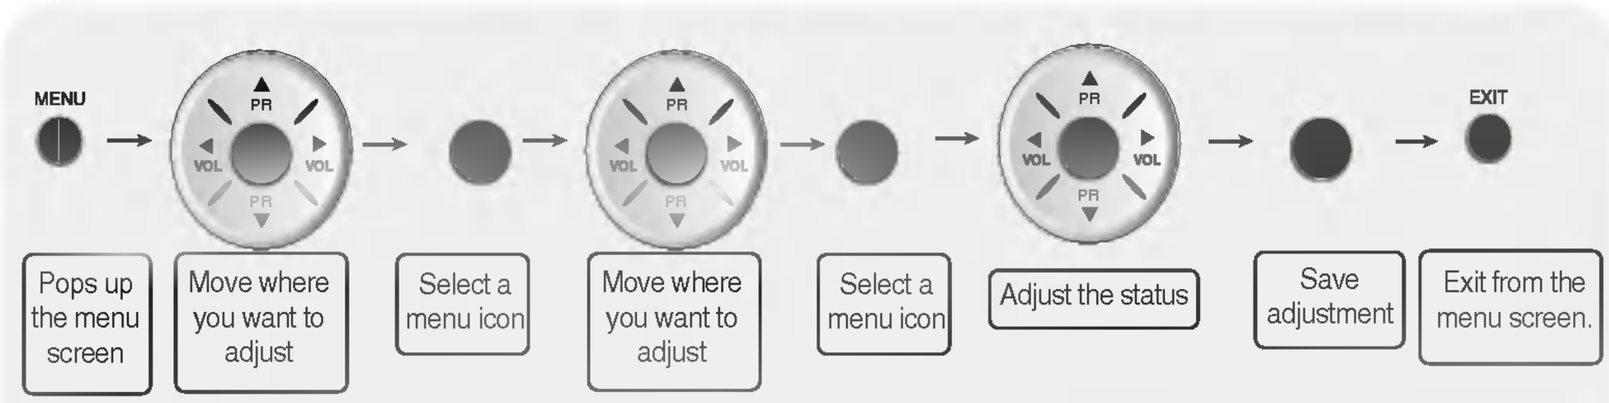
Icon	Function Description
STATION	Set/Selects the channel. (available only when watching TV)
PICTURE	Adjusts screen brightness, contrast and color that you prefer.
SOUND	Adjusts the audio function.
TIMER	Adjusts the timer function.
SPECIAL	Adjusts the screen status according to the circumstances.
SCREEN	Adjusts the screen video.
 PIP/POP/PBP	Adjusts PIP/POP/PBP mode function.

Note

OSD(On Screen Display)
The OSD function enables you to adjust the screen status conveniently since it provides graphical presentation.

How to adjust the OSD (On Screen Display) screen



• **Use the remote controller to adjust the OSD screen.**

Press the **MENU** Button, then the main menu of the OSD appears.

To access a control, use the ▼ ▲ Buttons.

When the icon you want becomes highlighted, press the **OK** Button.

Use the ▼ ▲ ◄ ► Buttons to adjust the item to the desired level.

Accept the changes by pressing the **OK** Button.

Exit the OSD by pressing the **EXIT** Button.

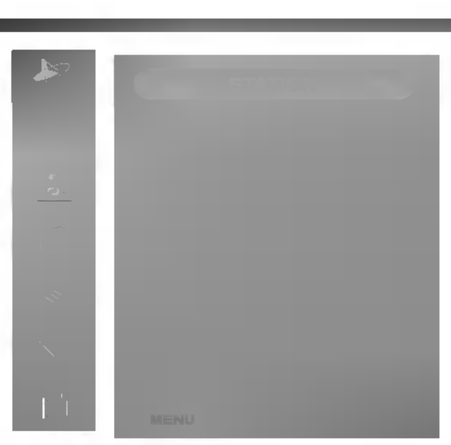
How to adjust the screen automatically

You need to adjust the screen display when connecting the monitor to a new computer or changing the mode. Refer to the following section to set an optimal monitor screen.

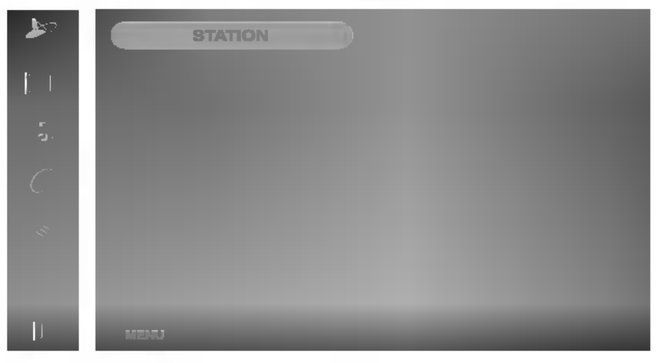
Press the AUTO/SELECT button (**AUTO button** in a remote controller) in the PC analog signal. Then, an optimal screen status will be selected that fits into the current mode.

If adjustment is not satisfactory, you need to adjust screen position, clock and phase in the OSD menu.

Set/Selects the channel when using the TV (Optional)



Auto programme

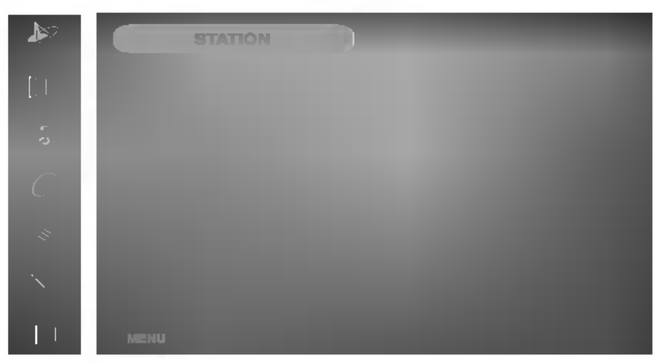


System Press the ▼▲ buttons to select the TV system of the country or part of the world from where you want to receive the TV channels.
If you want to receive 'SECAM L' channel, change the SYSTEM menu to 'L' before launching an automatic search.

Storage from To select a programe number or enter the programe number with the number buttons from where you want to start searching for new channels.
If you want to keep the channels 1 to 10 stored earlier, enter programe number 11. Your TV search for new channels from number 11 onwards.

Start Press **OK** button to start automatic programming. all available TV channels are searched for and stored automatically. To stop auto programming, press the **MENU** or **EXIT** button. When auto programming is completed, the programme list menu appears.

Manual programme



To change the channel.

System Press the ▼▲ buttons to select the TV system of the country or part of the world from where you want to receive the TV channels.

Storage Press the ▼▲ buttons to select the channel number or enter the programe number with the number buttons in where you want to store channel.

Channel Press the ▼▲ buttons to select C-CH for aerial channels or S-CH for cable channels. If you know the C-(01~69) or S-channel number(01~47), enter it drectly with the digit buttons 0 to 9.
To select the channel reception type. : V/UHF / CABLE

Set/Selects the channel when using the TV (Optional)

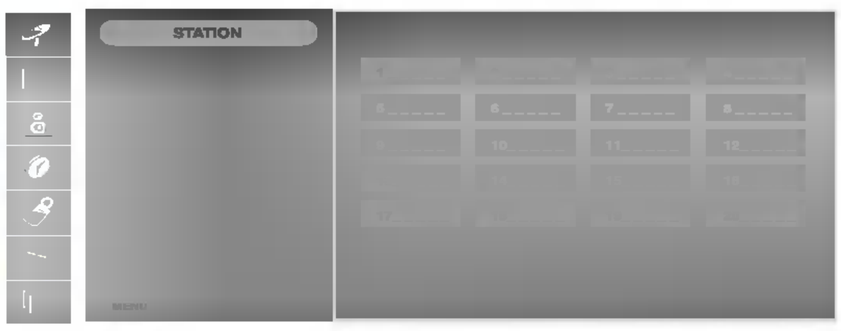
Name To see the assigned channel name.
It is possible to change the name stored in the memory or to assign a name to a TV channel which has not yet been entered. A name with up 5 letters or numbers can be given to the programme numbers 0 to 99.

Press the ◄ ► buttons to move cursor to be changed. -> Press the buttons to select a character.(space, number 0~9, and alphabet A~Z) -> Press the **AUTO/SELECT** button (or **OK** button on the remote control).

Fine tune In case of poor reception, you can improve the reception by fine tuning. Use the ◄ ► buttons to fine tune for the best picture and sound.

Search Use the ◄ ► buttons to search next channel backward or foreward direction.

Programme edit



To adjust the **Edit** submenu function, Press the **OK** --> ◄ ► button on the remote control

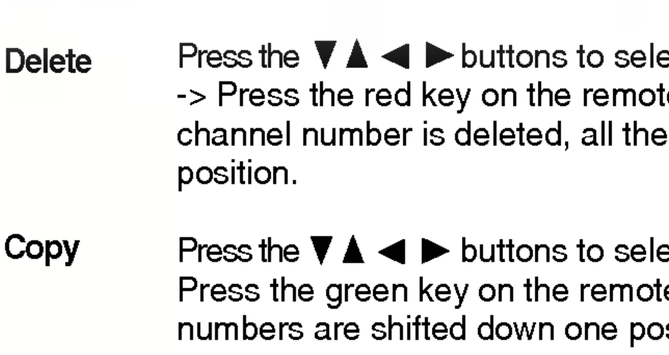
Delete Press the ▼▲ ◄ ► buttons to select a TV channel to be deleted. -> Press the red key on the remote control -> The selected TV channel number is deleted, all the following channels are shifted up one position.

Copy Press the ▼▲ ◄ ► buttons to select a TV channel to be copyed. -> Press the green key on the remote control. All the following channel numbers are shifted down one position.

Move Press the ▼▲ ◄ ► buttons to select a channel number to be moved. -> Press the yellow key on the remote control. -> Press the ▼▲ ◄ ► buttons to move the TV channel to the desired channel number. -> Press the yellow key again to release this function.

Skip Press the ▼▲ ◄ ► buttons to select a channel number to be skipped. -> Press the blue key on the remote control. The skipped TV channel is displayed in blue.

Favourite programme

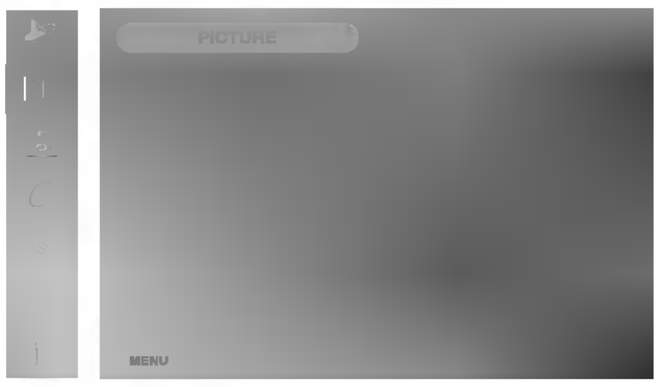


This function lets you select your favourite programmes directly. (8 channel)
Press the ▼▲ ◄ ► buttons to select a channel number.

* **Q.VIEW button(remote control) :**
Rotate Favourite channel

Adjusting Screen Color

PSM



TV/ AV1/ AV2/ S-Video/ Component input only

The **PSM** function automatically adjusts the screen image quality depending on the AV/TV usage environment.

- **Dynamic** : Select this option to display with a sharp image.
- **Standard** : The most general and natural screen display status.
- **Mild** : Select this option to display with a mild image.
- **Game** : Select this option to enjoy dynamic image when playing a game.
- **User** : Select this option to use the user-defined settings.

Contrast
To adjust the contrast of the screen.

Brightness
To adjust the brightness of the screen.

Color
To adjust the color to desired level.

Sharpness
To adjust the cleaness of the screen.

Tint
To adjust the tint to desired level.
This function is available only in NTSC broadcasting mode.

ACC

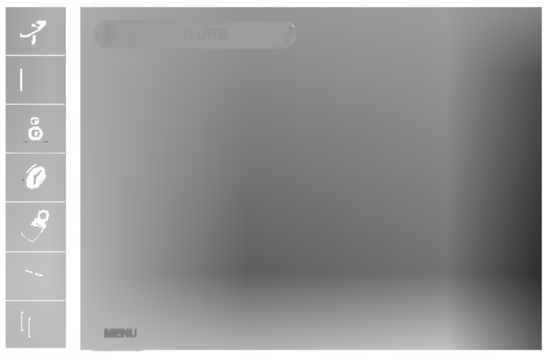
Selecting a factory setting color set.

- **Warm** : Slightly reddish white.
- **Normal** : Slightly bluish white.
- **Cool** : Slightly purplish white.

Note | If the **PSM** setting in the PICTURE menu is set to Dynamic, Standard, Mild or Game the subsequent menus will be automatically set.

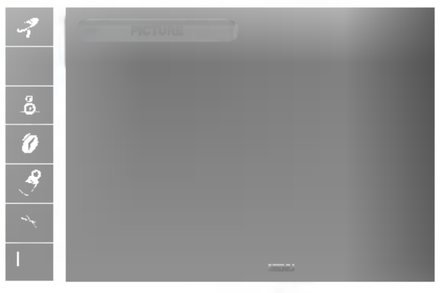
Adjusting Screen Color

CSM



RGB PC / DVI PC input only

- **6500K/9300K**
  Selecting a factory setting color set.
  6500K: Slightly reddish white.
  9300K: Slightly bluish white.
- **User** : Select this option to use the user-defined settings.



Contrast
To adjust the contrast of the screen.

Brightness
To adjust the brightness of the screen.

Red / Green / Blue
Set your own color levels.

Adjusting the audio function

SSM

The best sound tone quality will be selected automatically depending on the video type that you're currently watching.

- **Flat**
  The most commanding and natural audio.
- **Music**
  Select this option to enjoy the original sound when listening to the music.
- **Movie**
  Select this option to enjoy sublime sound.
- **Speech**
  Select this option to watch sports broadcasting.
- **User**
  Select this option to use the user-defined audio settings.

Balance Use this function to balance sound from the left and right speakers.

AVL To adjust uneven sound volumes across all channels or signals automatically to the most appropriate level. To use this feature, select ON.

SRS WOW Set the SRS WOW menu on.
The SRS WOW function plays back the mono or stereo sound input with the dynamic surround effects. It will provide rich and profound sound tone. If you set the SRS WOW on, user audio setting can not be adjusted.

Note When connected to your computer and the 'SSM' setting in the audio menu is one of Flat, Music, Movie or Speech, the available menus are Balance, AVL and SRS WOW .

Adjusting the timer function

Clock

If the time is on the clock is incorrect, reset the clock manually.

1) Press the **MENU** button and then use ▼▲ button to select the **TIMER** menu.
2) Press the ► button and then use ▼▲ button to select the **Clock** menu.
3) Press the ► button and then use ▼▲ button to set the hour(01~12).
4) Press the ► button and then use ▼▲ button to set the minutes(00~59).
5) Press the ► button and then use ▼▲ button to set the morning(AM) or afternoon(PM).

Off / On Timer Setting is available, however, operation is only allowed upon TV input

The off timer automatically switches the set to standby at the pre-set time.

1) Press the **MENU** button and then use ▼▲ button to select the **TIMER** menu.
2) Press the ► button and then use ▼▲button to select **Off Timer** or **On Timer**.
3) Press the ► button and then use ▼▲ button to set the hour(01~12).
4) Press the ► button and then use ▼▲ button to set the minutes(00~59).
5) Press the ► button and then use ▼▲ button to set the morning(AM) or afternoon(PM).
6) Press the ► button and then use ▼▲ button to select **On** or **Off**.
7) Only **On Timer** function; Press the ► button and then ▼▲ button to set the channel at turn-on. Then, press the ► button and then use ▼▲ button to set the turn-on sound level.

Auto Off Setting is available, however, operation is only allowed upon TV input

If **Auto Off** is active and there is no input signal, the TV swithchs to Stanby mode automatically after 10 minutes.

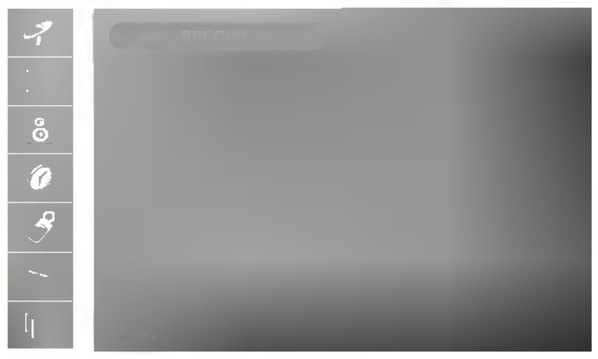
1) Press the **MENU** button and then use ▼▲ button to select the **Auto Off** menu.
2) Press the ► button and then use ▼▲ button to select **On** or **Off**.

Note

- ☐ In the event of power interruption (disconnection or power failure), the clock must be reset.
- ☐ Two hours after the set is switched on by the on time function it will automatically switch back to standby mode unless a button has been pressed.
- ☐ Once the on or off time is set, these functions operate daily at the preset time.
- ☐ Off Timer function overrides On Timer function if they are set to the same time.
- ☐ The set must be in standby mode for the On timer to work.

Selecting the options

Input



If you press the button once, the following Input Signal Window will appear. Select the signal type you want using the ▼▲ button.

Child Lock Use the ▼▲ buttons to select **On** or **Off**. The Set can be set up so that it can only be used with the remote control. This feature can prevent unauthorized viewing.

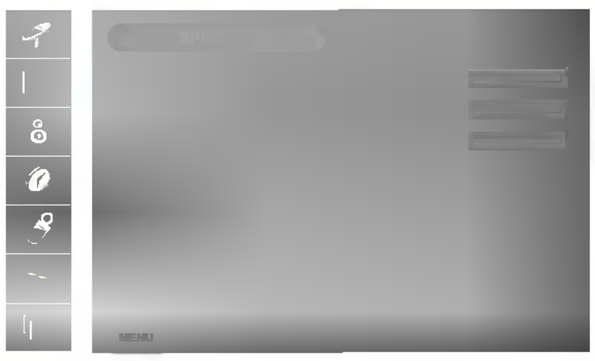
In order to lock the OSD screen adjustment, set the **Child Lock** tab to the '**On**' position.
In order to unlock it, do the following :
1) Push the **MENU** button on the remote control and set **Child Lock** to the '**Off**' position.

Language To choose the language in which the control names are displayed.

Power Indicator Use this function to set the power indicator on the front side of the monitor to **On** or **Off**. If you set **Off**, it will go off. If you set **On** at any time, the power indicator will automatically be turned on.

Transparency To adjust the transparency of the OSD menu screen.

Zoom



Use this function to zoom in the screen. When you turn the monitor off and on again, the default screen size will be restored. Press the ▶ button to display the submenu for Zoom.

* If the zooming value is set to '0', vertical and horizontal positioning cannot be adjusted.
* The variable range can differ according to the type of the input signal.

Reset Use this function to reset the monitor to the factory default. However, language selection will not be initialized.

Note the **Zoom menu** will be disabled if the screen size is not Full or PIP/POP/PBP is in use.

Selecting the options

Set ID

You can assign a unique **Set ID** NO (name assignment) to each monitor when several monitors are connected for display. Specify the number (0~99) using the ▼ ▲ button and exit. Use the assigned **Set ID** to individually control each monitor using the Monitor Control Program.

Logo Display Lamp

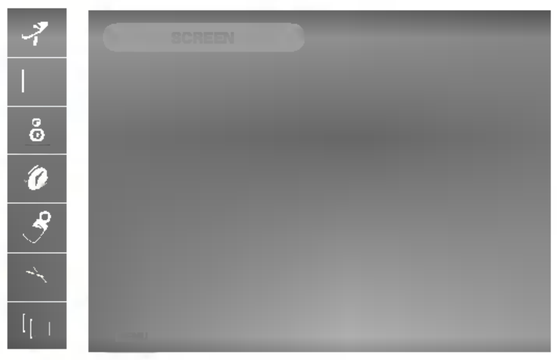
Use this function to set the Logo Dispaly Lamp on the front side of the monitor to **On** or **Off**. If you set **On**, the lamp will automatically be turned on.

Adjusting Screen CLOCK/PHASE and Position

ARC

To select the image size of the screen.

<**TV / AV1 / AV2 / S-Video / Component** input only>



<**RGB PC / DVI PC** input only>

* When the **component** input signal is 720p or 1080i, the spectacle function is not supported.

Auto-configure

This button is for the automatic adjustment of the screen position, clock and phase.
This function is suitable for analoge singnal input only(RGB PC input only).

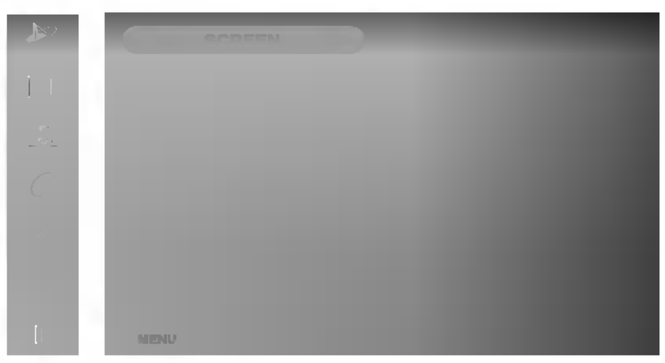
Clock

To minimize any vertical bars or stripes visible on the screen background. The horizontal screen size will also change. This function is suitable for analoge singnal input only(RGB PC input only).

Phase

To adjust the focus of the display. This item allows you to remove any horizontal noise and clear or sharpen the image of characters. This function is suitable for analoge singnal input only(RGB PC input only).

Position



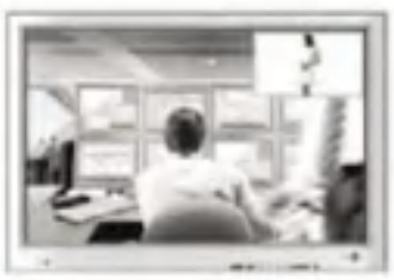
To adjust position of the screen
(RGB PC input only).
Press the ▶ button to display the submenu for position.

◀ Left
▶ Right — Moving the screen position horizontally.

▲ Up
▼ Down — Moving the screen position vertically.

Adjusting PIP/POP/PBP Mode (Multiple Screen) Functions

On/Off



PIP

After selecting **PIP** in the **PIP On/Off** menu, the following menu items can be adjusted.

POP

After selecting **POP** in the **POP On/Off** menu, the following menu items can be adjusted.

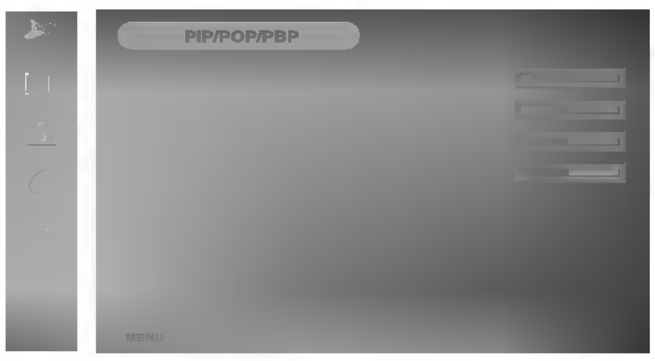
PBP

After selecting **PBP** in the **PBP On/Off** menu, the following menu items can be adjusted.

Source To select an input signal for PIP/POP/PBP.

Size To adjust the size of the PIP/POP/PBP screen. (PIP : Small, Medium, Large / PBP : Full, 4:3)

Image To adjust the image of the PIP/POP/PBP screen; Press the ► button to display the submenu for PIP/POP/PBP image. Use the ◄ ► buttons to adjust the item to the desired level. The items of the sub-menu may vary depending on the type of the source.



■ **Contrast**
Adjust PIP/POP/PBP screen contrast.

■ **Brightness**
Adjust PIP/POP/PBP screen brightness.

■ **Color**
Adjust the PIP/POP/PBP screen color.

■ **Tint**
To adjust the tint to desired level.
This function is available only in NTSC broadcasting mode.

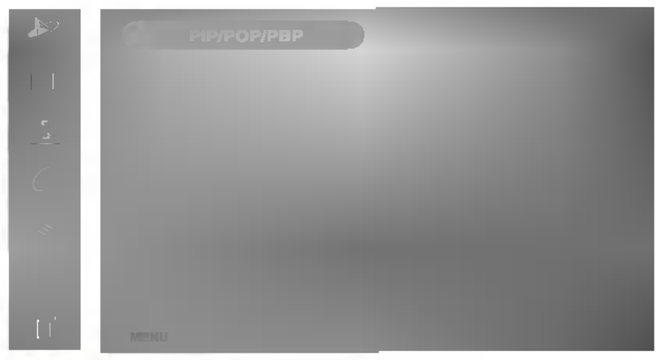
* The sub-menu can differ according to the type of the input signal.

Sound To turn the PIP/POP/PBP sound on/off.

L3200T_103D(PAL-TV)-ENG 2005.5.18 9:8 AM 페이지 A35

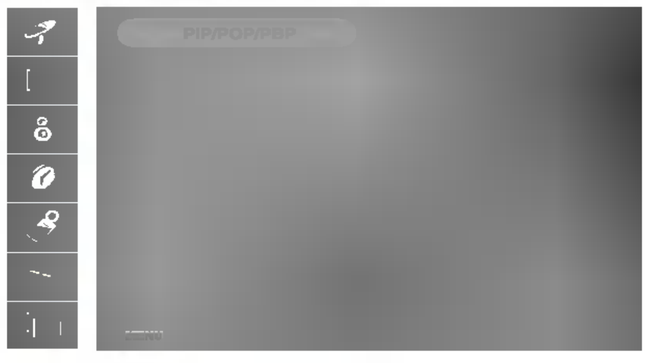
Adjusting PIP/POP/PBP Mode (Multiple Screen) Functions

Position

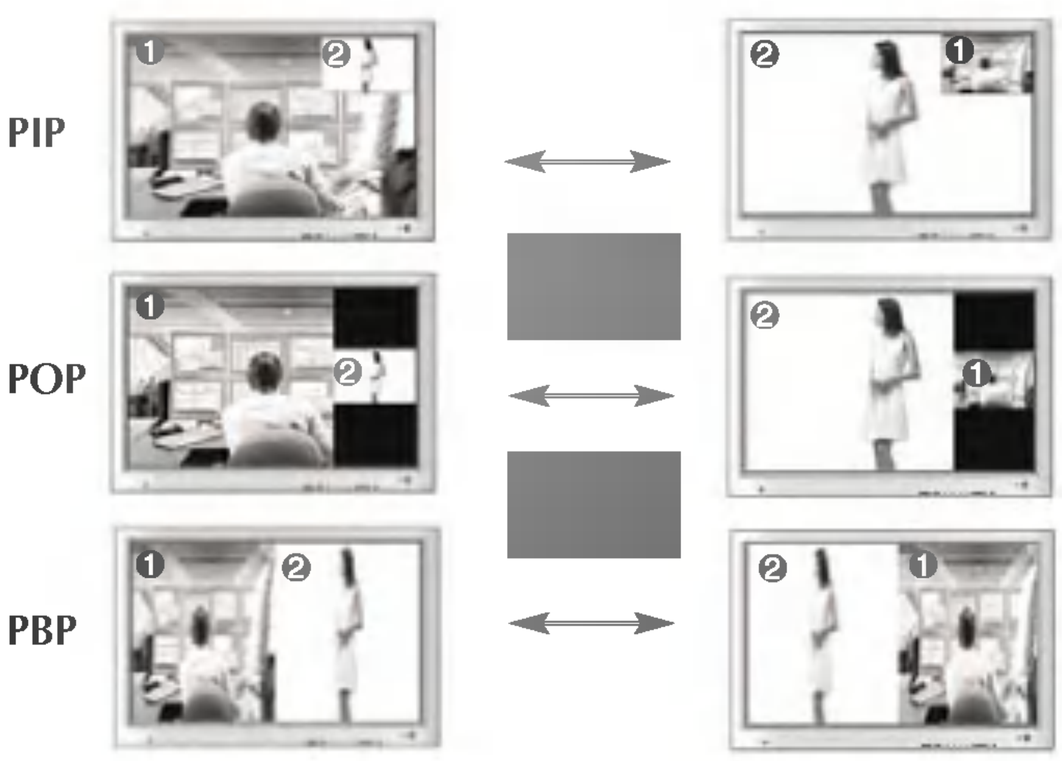


To adjust the position to PIP screen.

Swap



To switch the main-screen and sub-screen in PIP/POP/PBP mode.

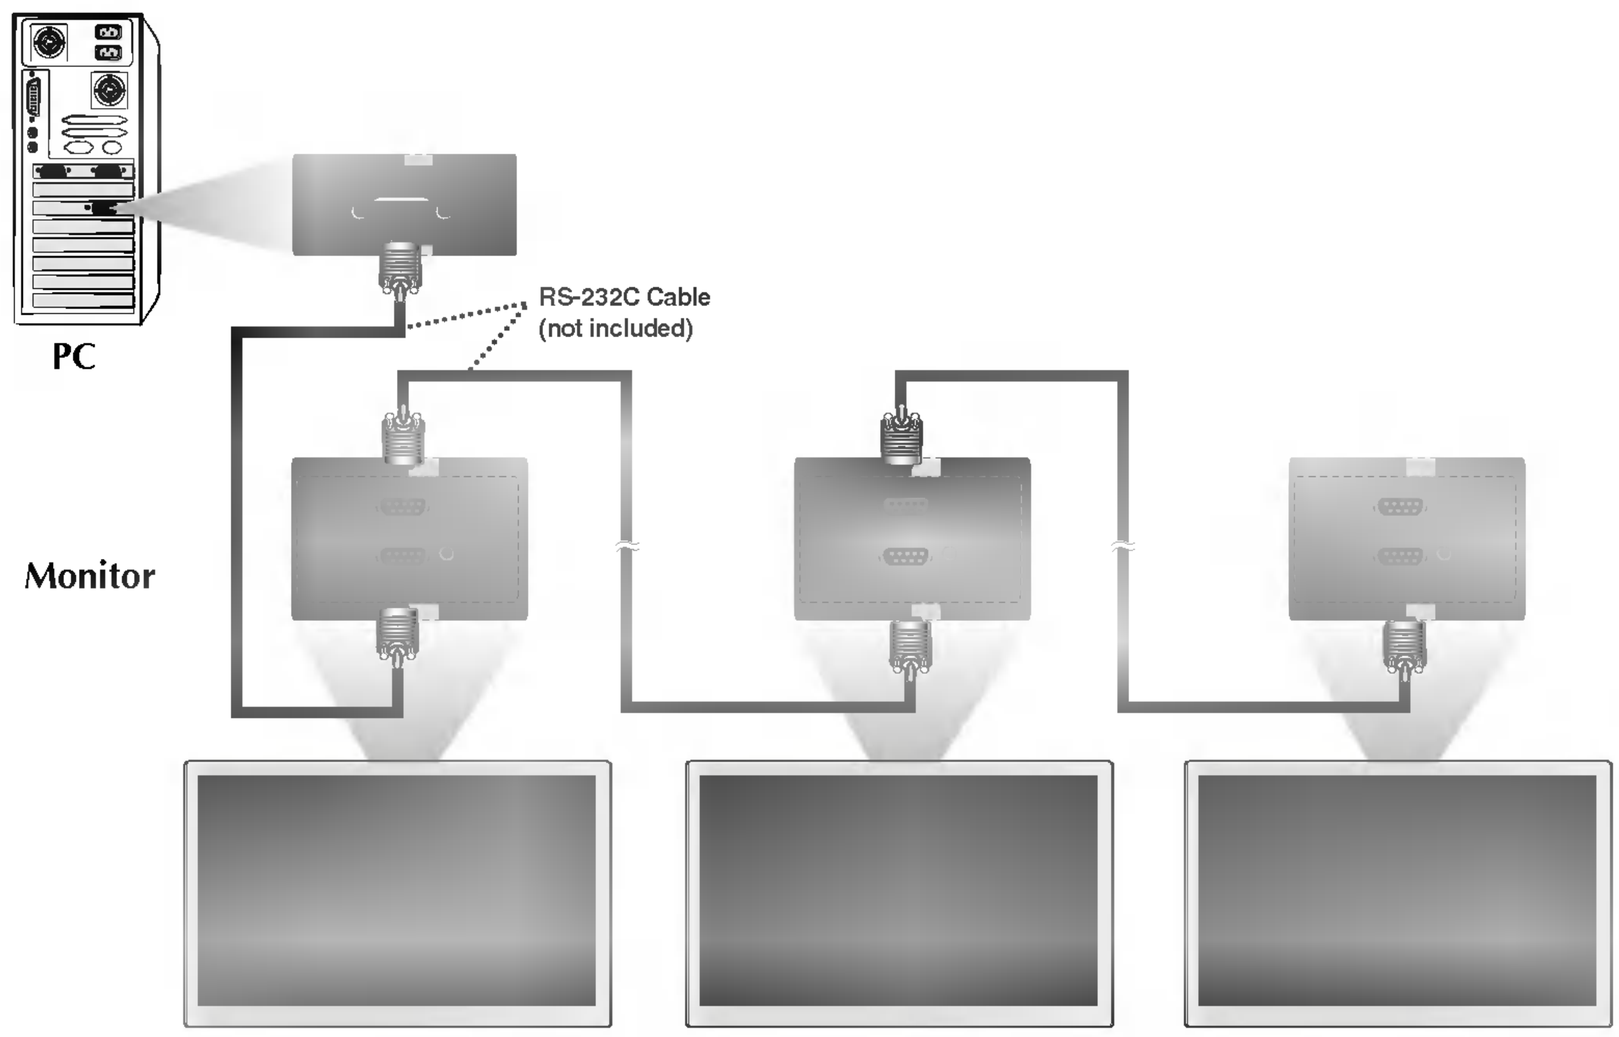


Use this method to connect several monitors to a single PC.
You can control several monitors at a time by connecting them to a single PC.

Connecting the cable

Connect the RS-232C cable as shown in the picture.

* The RS-232C protocol is used for communication between the PC and monitor. You can turn the monitor on/off, select an input source or adjust the OSD menu from your PC.



Communication Parameter

- ▶ Baud Rate : 9600bps (UART)
- ▶ Data Length : 8bits
- ▶ Parity Bit : None
- ▶ Stop Bit : 1bit
- ▶ Flow Control : None
- ▶ Communication Code : ASCII code

☐ **Is the monitor power cord connected?**	• See if the power cord is properly connected to the outlet.
☐ **Is the power indicator light on?**	• See if the power switch is turned on.
☐ **Power is on, power indicator is green but the screen appears extremely dark.**	• Adjust brightness (☼) and contrast (◑) again.
☐ **Is the power indicator amber?**	• If the monitor is in power saving mode, move the mouse or press any key.
☐ **Does the 'Out of range' message appear?**	• The signal from the PC (video card) is out of the vertical or horizontal frequency range of the monitor. Adjust the frequency range by referring to the Specifications in this manual. *** Maximum resolution** RGB PC : 1600 x 1200 @60Hz DVI PC : 1360 x 768 @60Hz
☐ **Does the 'Check signal cable' message appear?**	• The signal cable between PC and monitor is not connected. Check the signal cable. • Press the 'SOURCE' menu in the remote controller to check the input signal.

☐ **Did you install the driver?**	• Install the monitor driver, which is provided with the monitor, or download it from the web site. (http://www.lge.com) • See if the plug&play function is supported by referring to the video card user manual.

☐ **The 'Controls locked' message appears when pressing the Menu button.**	• The control locking function prevents unintentional OSD setting change due to careless usage. To unlock the controls, simultaneously press the Menu button and ▶ button for 5 seconds. (You cannot set this function using the remote controller buttons. You can set this function in the monitor only.)

Note

* **Vertical frequency:** To enable the user to watch the monitor display, screen image should be changed tens of times every second like a fluorescent lamp. The vertical frequency or refresh rate is the times of image display per second. The unit is Hz.

* **Horizontal frequency:** The horizontal interval is the time to display one vertical line. When 1 is divided by the horizontal interval, the number of horizontal lines displayed every second can be tabulated as the horizontal frequency. The unit is kHz.

☐ **Is the screen position wrong?**	• D-Sub analog signal – Press the "AUTO" button in the remote controller to automatically select the optimal screen status that fits into the current mode. If adjustment is not satisfactory, use the Position OSD menu. • See if the video card resolution and frequency are supported by the monitor. If the frequency is out of range, set to the recommended resolution in the Control Panel – Display – Setting menu.
☐ **Do thin lines appear on the background screen?**	• D-Sub analog signal – Press the "AUTO" button in the remote controller to automatically select an optimal screen status that fits into the current mode. If adjustment is not satisfactory, use the Clock OSD menu.
☐ **Horizontal noise appears or the characters look blurred.**	• D-Sub analog signal – Press the "AUTO" button in the remote controller to automatically select an optimal screen status that fits into the current mode. If adjustment is not satisfactory, use the Phase OSD menu.
☐ **Unable to adjust the horizontal/vertical position in the Zoom menu.**	• See if the Zoom value is set to 0. If it is, you cannot adjust the H/V Position value.
☐ **Screen size is automatically adjusted when connected to the PC.**	• If the screen size is not full when connected to the PC, execute the PIP/POP/PBP to change to full screen mode.
☐ **Brightness differs in the main and sub screen when connected to the PC.**	• You cannot adjust brightness and tint in the PIP/POP/PBP Screen menu for the sub-screen among PIP/POP/PBP menus. Therefore, brightness can be different for the sub-screen.
☐ **The screen is displayed abnormally.**	• The proper input signal is not connected to the signal port. Connect the signal cable that matches with the source input signal.
☐ **No sound appears in the TV channel display window.**	• See if the TV sound is set to mono. if it is, the sound will not be displayed.

☐ **After-image appears when the monitor is turned off.**	• If you use a fixed image for a long time, the pixels may be damaged quickly. Use the screensaver function.

☐ **No sound?**	• See if the audio cable is connected properly. • Adjust the volume. • See if the sound is set properly.
☐ **No sound is available when the PIP/POP/PBP mode is engaged.**	• See if the Sound is set to On in the PIP/POP/PBP menu.
☐ **Sound is too dull.**	• Select the appropriate equalize sound.
☐ **Sound is too low.**	• Adjust the volume.

☐ **The TV signal is not being received.**	• See if you have selected the proper channel mode. • Use the automatic channel setup function. • See if the TV antenna is properly connected.

☐ **The screen size function in the OSD menu does not work.**	• See if the PIP/POP/PBP function is in use. If the PIP/POP/PBP function is in use, the screen size function may not work.

☐ **Screen has poor color resolution (16 colors).**	• Set the number of colors to more than 24 bits (true color) Select Control Panel – Display – Settings – Color Table menu in Windows.
☐ **Screen color is unstable or mono-colored.**	• Check the connection status of the signal cable. Or, re-insert the PC video card.
☐ **Do black spots appear on the screen?**	• Several pixels (red, green, white or black color) may appear on the screen, which can be attributable to the unique characteristics of the LCD panel. It is not a malfunction of the LCD.
