# Accessories

## Accessories

Thank you for your purchase. Please check the product as well as the accessories shown below

❖ Note that the accessories may look different from those shown here.

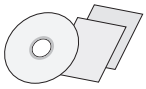

Remote Control / Batteries

D-Sub Signal Cable

Power Cable

CD-ROM / Cards

## Separate purchase

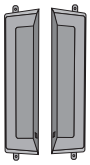

Without prior notice, optional accessories are subject to change to improve the performance of the product, and new accessories may be added.To purchase optional accessories,

❖ Optional accessories (purchased separately) may vary depending on the model.

❖ Note that optional accessories may look different from those shown here.

**Speaker kit**

❖ Applicable only for models that support the speakers.

Speaker(2)

Screws (4) / Cable (2)

Cable holder/Cable tie

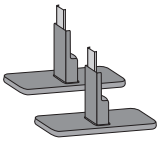

They may not be available in some areas or for some models.

**Stand kit**

❖ Applicable only for models that support the stand.

**< M4225C >**

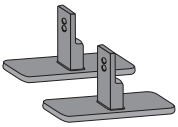

Stand (2)

Screws (4)

**< M3704C >**

Stand (2)

Screws (4)

# Connecting the stand

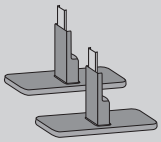

- Only on some models.

**< M4225C >**

1. Take the parts for the stand out of the box and assemble them as shown in the picture.

Parts

First, check if the following parts are all present.

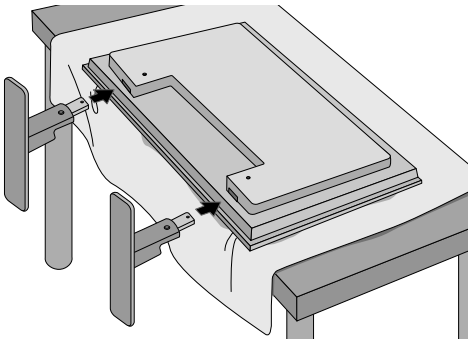

Stand (2)

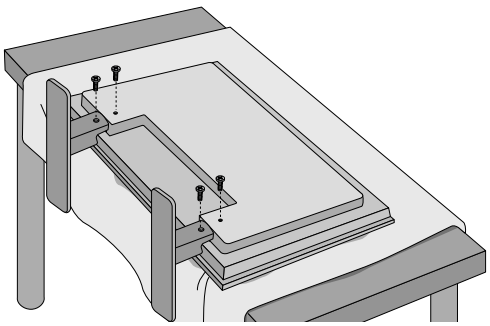

Screws (4)

2. Place a soft cloth on the table and put the product with the screen facing downward. Connect the stand as shown in the following picture.

3. Use the screws to secure the stand on the rear side of the product as shown in the diagram.

# Connecting the stand

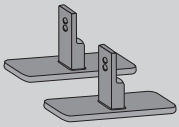

- Only on some models.

**< M3704C >**

1. Take the parts for the stand out of the box and assemble them as shown in the picture.

Parts

First, check if the following parts are all present.

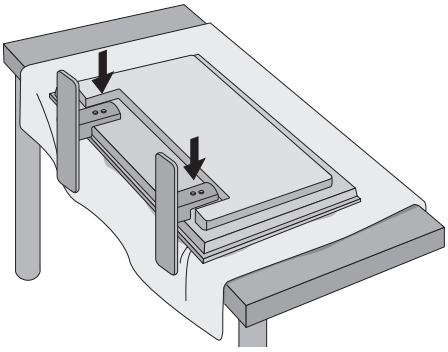

Stand (2)

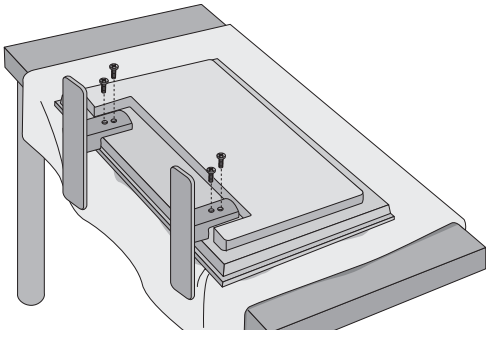

Screws (4)

2. Place a soft cloth on the table and put the product with the screen facing downward. Connect the stand as shown in the following picture.

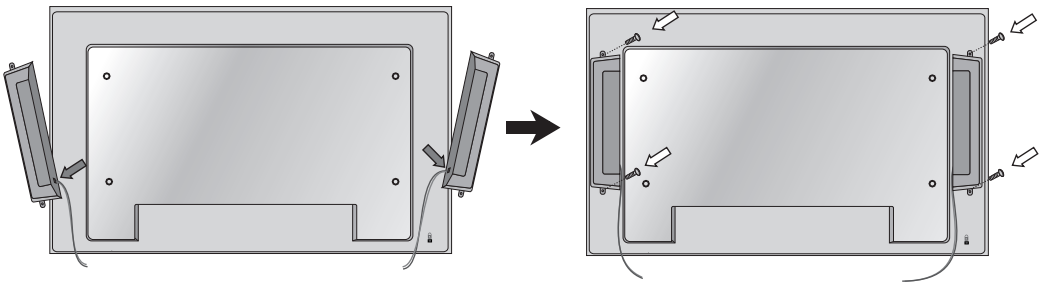

3. Use the screws to secure the stand on the rear side of the product as shown in the diagram.

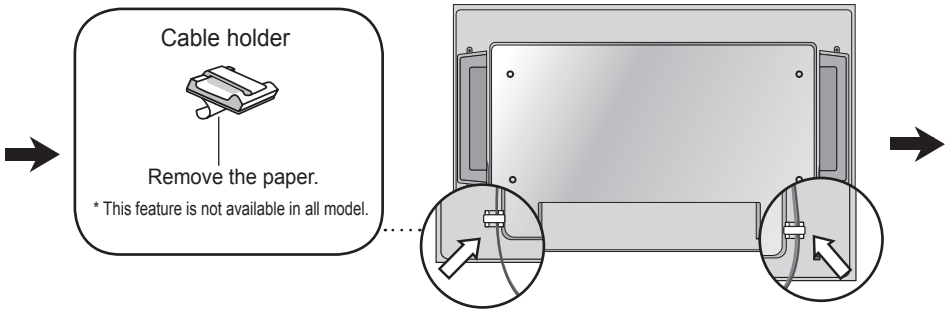

# Connecting the Speakers

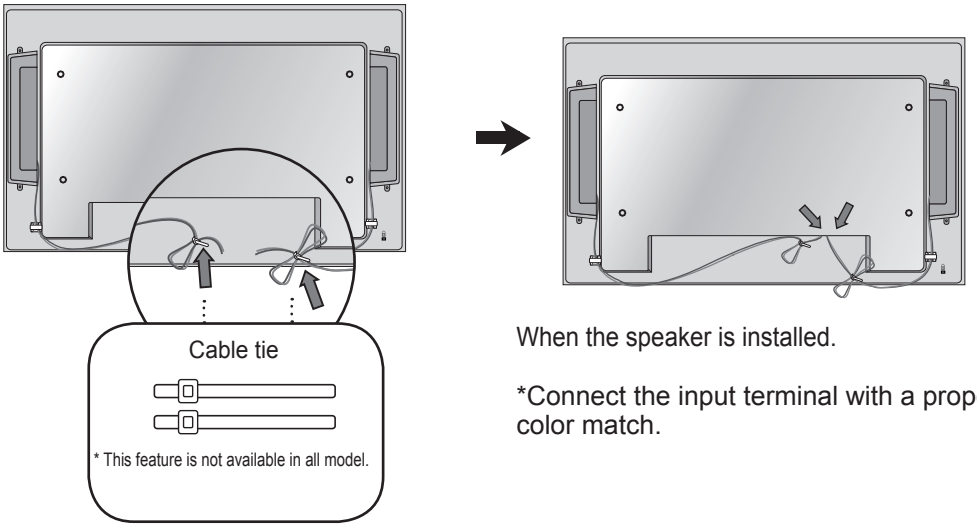

- Only on some models.

Mount the product onto the speaker by using a screw as shown in the following connect the speaker cable.

After installing your speakers, use holders and cable ties to organize the speaker cables.

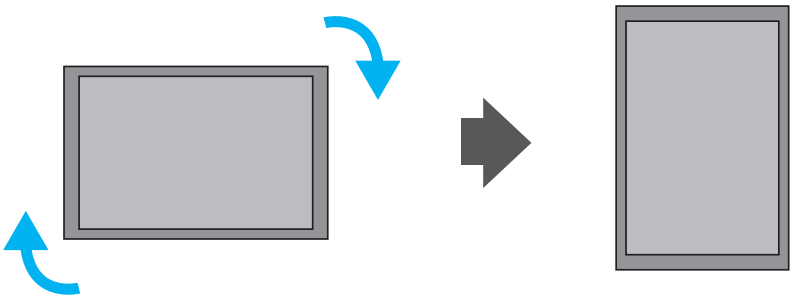

When the speaker is installed.

*Connect the input terminal with a proper color match.

# To install Portrait

- Only on some models.

**< Only M4225C >**

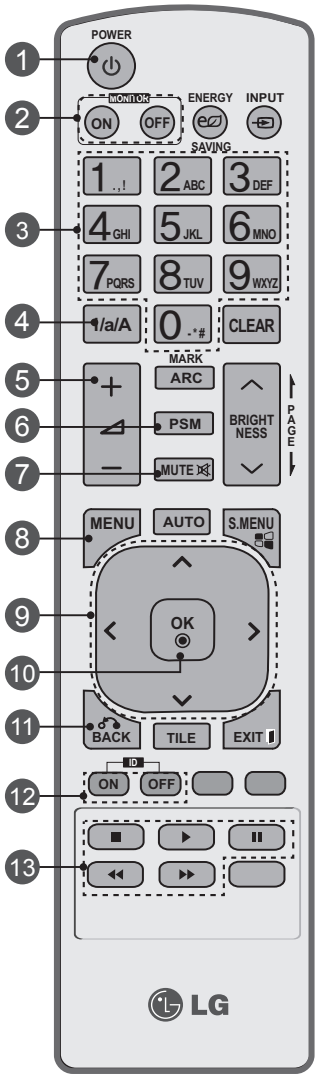

"When installing Portrait, rotate it clockwise based on its front."

Note

- M3704C model cannot be installed in portrait position. Damage resulting from installation in portrait position is not covered by product warranty. (No Warranty)

# Using the Remote Control

## Name of the Remote Control Buttons

1. **Power On / Off Button**
   - Switches the set on from standby or off to standby.

2. **Monitor On / Off Button**
   - Turn off the monitor and then turn it back on.

3. **Number and Alphabet Buttons**
   - Type numbers.
   - It is not available to use Alphabet.

4. **1/a/A Button**
   - It is not available to use this function.

5. **Volume Up/Down Button**
   - Adjusts the volume.

6. **PSM Button**
   - Selects the Picture Status Mode.

7. **MUTE Button**
   - Switches the sound on or off.

8. **MENU Button**
   - Selects a menu.
   - Clears all on-screen displays and returns to SET viewing from any menu.

9. **Up/Down/Left/Right Buttons**
   - Allows you to navigate the on-screen menus and adjust the system settings to your preferenc.

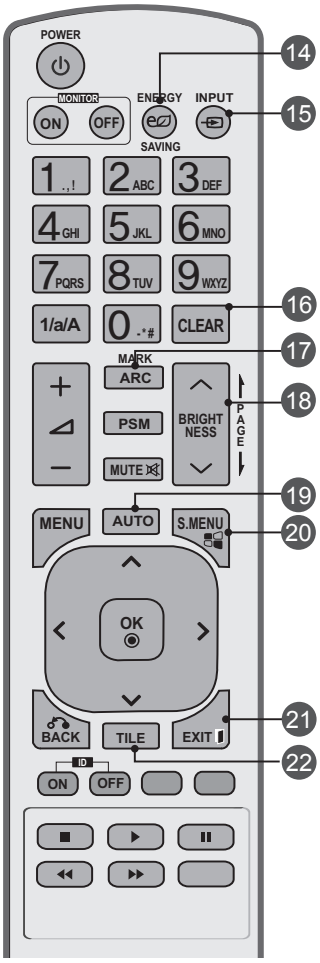

10. **OK Button**
    - Accepts your selection or displays the current mode.

11. **BACK button**
    - Allows the user to move return one step in an interactive application.

12. **ID ON/OFF Button**
    - When the number of input ID is equal to the number of ID Mode, you can control the monitor which you want in the multi display condition.

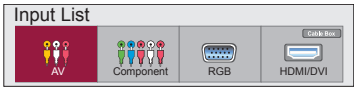

13. **USB Menu control buttons**
    - Adjust the USB menu(Photo List, Music List and Movie List ).

# Using the Remote Control

**14** **Energy Saving Button**
- Adjust the Energy Saving mode of the SET.

**15** **INPUT Select Button**
If you press the button once, the following Input Signal Window will appear. Select the signal type you want using the < > button.

**16** **Clear button**
- It is not available to use this function.

**17** **ARC Button**
- Selects the Aspect Ratio Mode

**18** **Brightness Key**
- Adjust the brightness by pressing the Up and Down buttons on the remote control.
- In USB mode, the OSD menu has the Page function to move to the next file list.

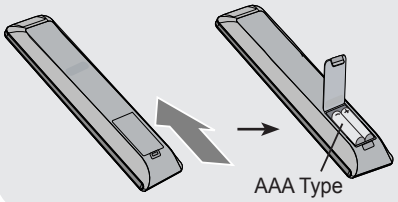

**19** **AUTO Button**
- Automatically adjusts picture position and minimizes image instability.(RGB input only)

**20** **S.MENU Button (SuperSign Menu Key)**
- It is not available to use this function.

**21** **EXIT Button**
- Clears all on-screen displays and returns to monitor viewing from any menu.

**22** **TILE button**
- Selects the TILE Mode

## Inserting batteries into remote control.

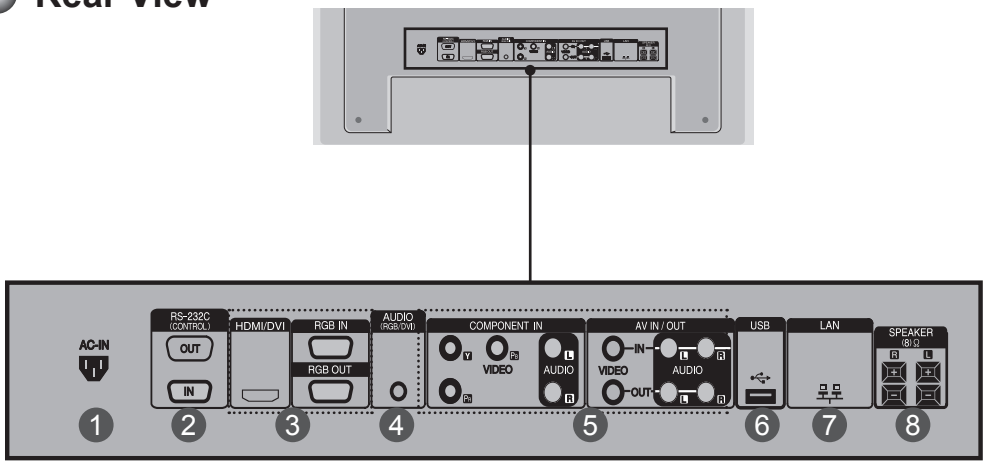

1. Slide off the battery cover.
2. Insert the batteries with correct polarity ( + / - ).
3. Close the battery cover.
4. To remove the batteries, perform the installation actions in reverse.

• Dispose of used batteries in the recycle bin to prevent environmental pollution.

# Name and Function of the Parts

* The product image in the user's guide could be different from the actual image.

## Rear View

1 **Power Connector**
Connect the power cord

2 **RS-232C Serial Ports**

3 **RGB, HDMI/DVI Ports**
HDMI Supports High Definition input and HDCP (High-bandwidth Digital Content Protection). Some devices require HDCP in order to display HD signals.

4 **PC Sound Jack**
Connect the audio cable to the *LINE OUT jack of the PC sound card.

5 **Component, AV Ports**

6 **USB Port**

7 **LAN Port**

8 **Speaker Ports**

* LINE OUT
A terminal used to connect to the speaker including a built-in amplifier (Amp). Make sure that the connecting terminal of the PC sound card is checked before connecting. If the Audio Out of PC sound card has only Speaker Out, reduce the PC volume. If the Audio Out of the PC sound card supports both Speaker Out and Line Out, convert to Line Out using the card jumper of the program (Refer to the Sound Card Manual).

# Connecting to External Devices

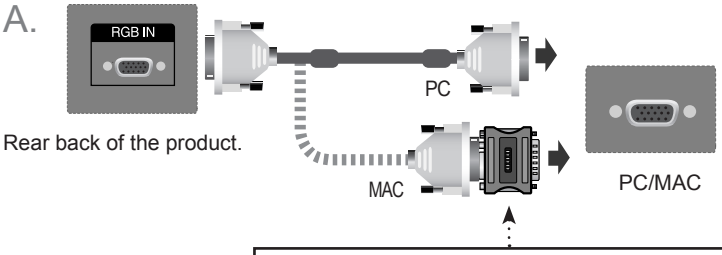

## When Connecting to your PC

1 First of all, see if the computer, product and the peripherals are turned off. Then, connect the signal input cable.

A. When connecting with the D-Sub signal input cable.

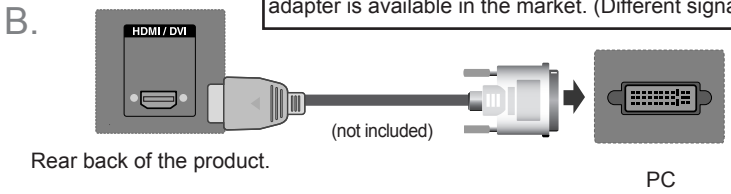

B. When connecting with the HDMI-DVI signal input cable (not included).
* When HDMI PC is used, a compatiblity problem might occur.

A.

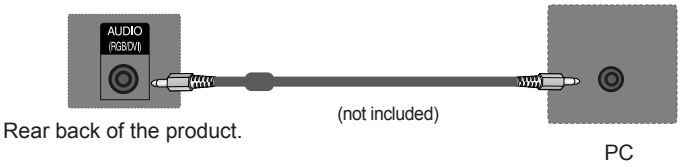

Macintosh Adapter (not included)
Use the standard Macintosh adapter since an incompatible adapter is available in the market. (Different signaling system)

B.

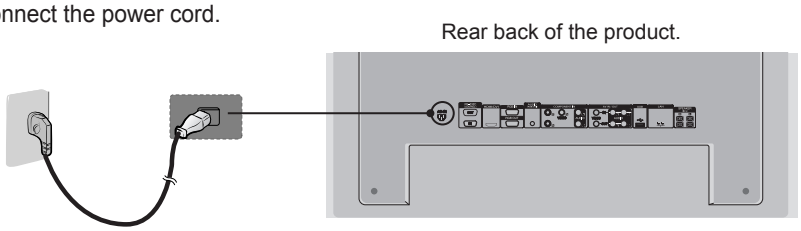

* User must use shielded signal interface cables (D-sub 15 pin cable, HDMI-DVI cable) with ferrite cores to maintain standard compliance for the product.

2 Connect the Audio cable.

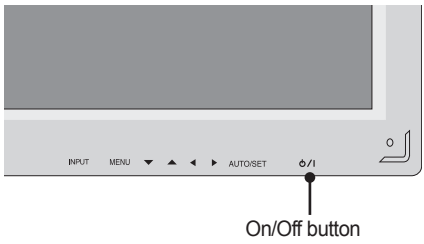

3 Connect the power cord.

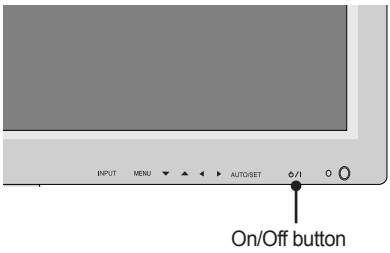

# Connecting to External Devices

4 1. Turn on power by pressing the power button on the product.

**< M4225C >**

**< M3704C >**

2. Turn on the PC.

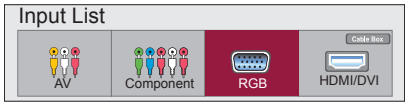

5 Select an input signal.
Press the **INPUT** button on the remote control to select the input signal.

**INPUT → < > → OK**

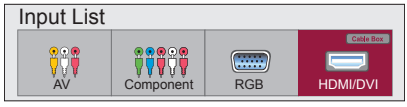

Or, press the **INPUT** button on the back of the product.

**INPUT →◄ ► → AUTO/SET**

A. When connecting with a D-Sub signal input cable.
• Select **RGB** : 15-pin D-Sub analog signal.

B. When connecting with a HDMI-DVI signal input cable and HDMI Signal Cable.
• Select **HDMI/DVI** : DVI Digital signal or HDMI Digital signal.

Note

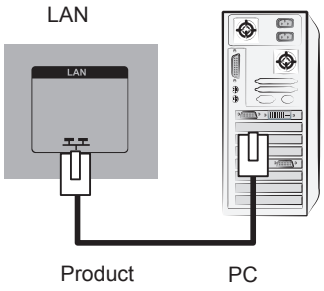

- How to connect to two computers.
  Connect the signal cables (HDMI-DVI and D-Sub) to each computer.
  Press the INPUT button on the remote control to select the computer to use.
- Directly connect to a grounded power outlet on the wall or a power bar with a ground wire.

# Connecting to External Devices

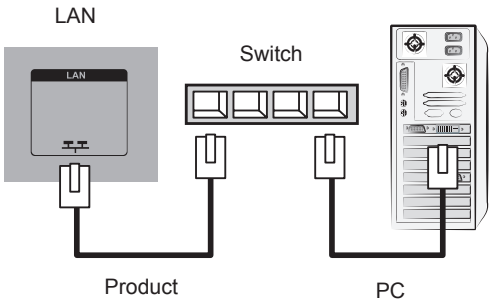

## When using the LAN

1 Connect the LAN cable as shown in the below figure .

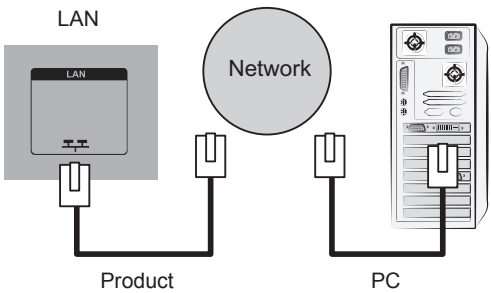

A. Connect PC to Monitor directly.

B. Using a router(Switch)

C. Using the Internet.

2 Connect the LAN cable and install the eZ-Net Manager program on the CD-ROM.
For more information about the program, please refer to eZ-Net Guide in the enclosed CD-ROM.

Note

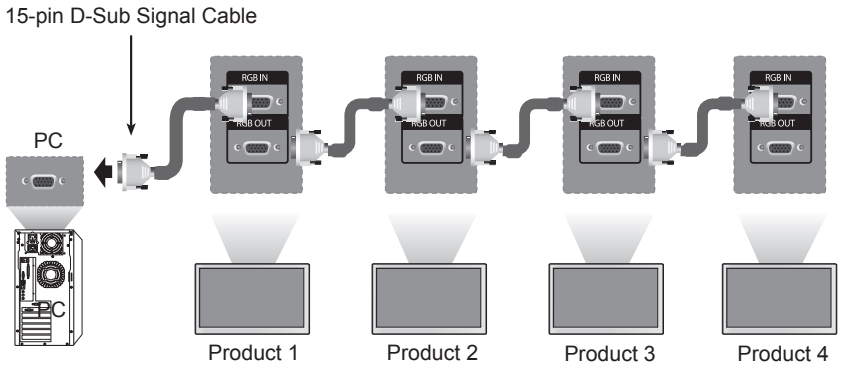

- Using LAN establishes communication between your PC and the monitor and enables to use the OSD menus on the PC as well as on the monitor.

# Connecting to External Devices

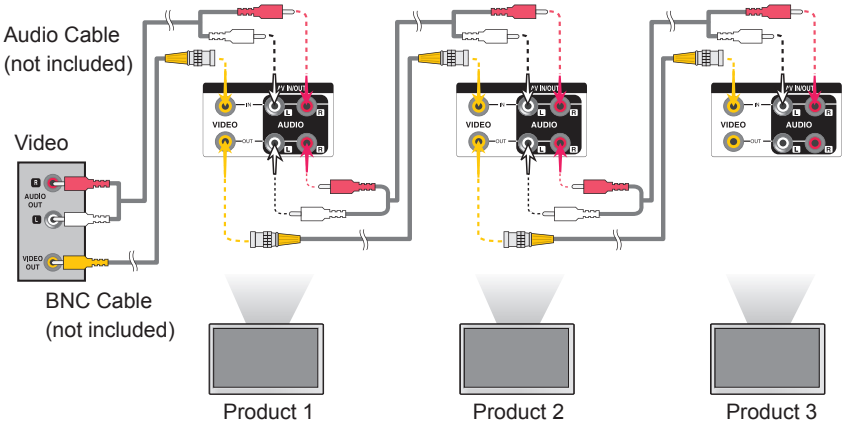

## Daisy Chain Monitors

### A. When using RGB input

To use different products connected to each other Connect one end of the signal input cable (15-pin D-Sub Signal Cable) to the RGB OUT connector of product 1 and connect the other end to the RGB IN connector of other products.

### B. When using AV input

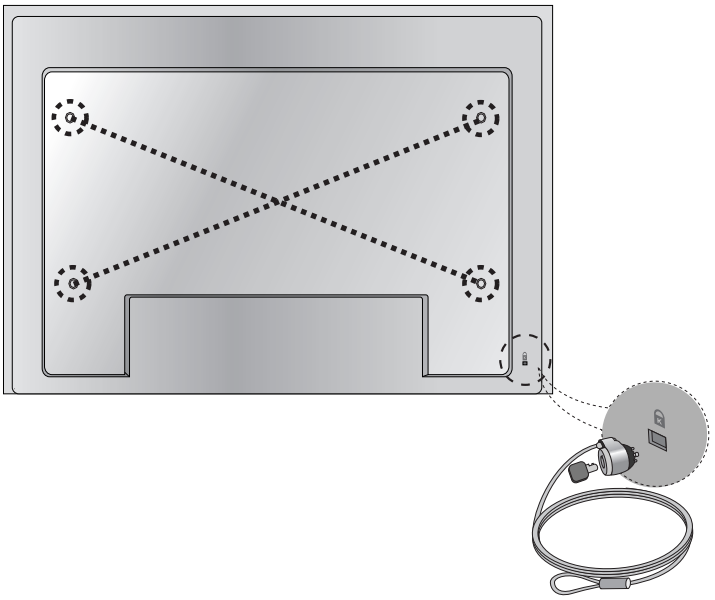

Note

- The number of monitors that can be connected to one output may vary depending on signal status and cable loss. If the signal status is good, and there is no cable loss, it is possible to connect up to 9 monitors. If you want to connect more than this number of monitors, it is recommended to use a distributor.

# Connecting to External Devices

## VESA FDMI wall Mounting

This product supports a VESA FDMI compliant mounting interface. These mounts are purchased separately and  not available from LG. Refer to the instructions included with wall mount for more info.

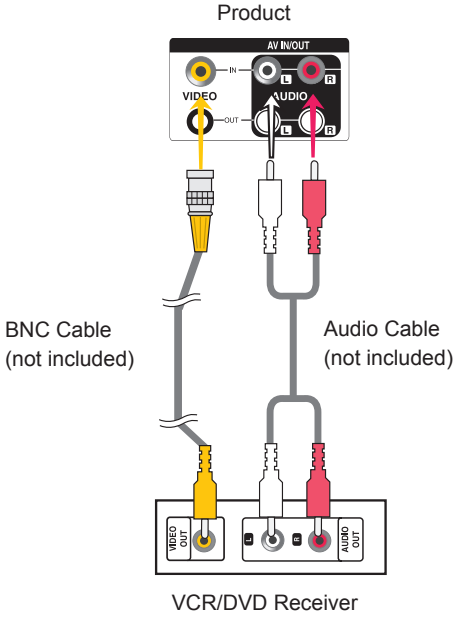

Kensington Security Slot
The Set is equipped with a kensington Security System connector on the back panel. The cable and lock are available separate and are not sold by LG. For more info, visit http://www.kensington.com, the internet home page of the Kensington company.

# Connecting to External Devices

## Video Input

1 Connect the video cable as shown in the below figure and then connect the power cord. (See page 11).

When connecting with a BNC cable.
• Connect the input terminal with a proper color match.

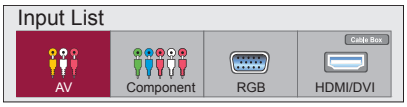

2 Select an input signal.
Press the **INPUT** button on the remote control to select the input signal.

**INPUT → < > → OK**

Or, press the **INPUT** button on the back of the product.

**INPUT → ◄ ► → AUTO/SET**

When connecting with an BNC cable.
• Select **AV**.

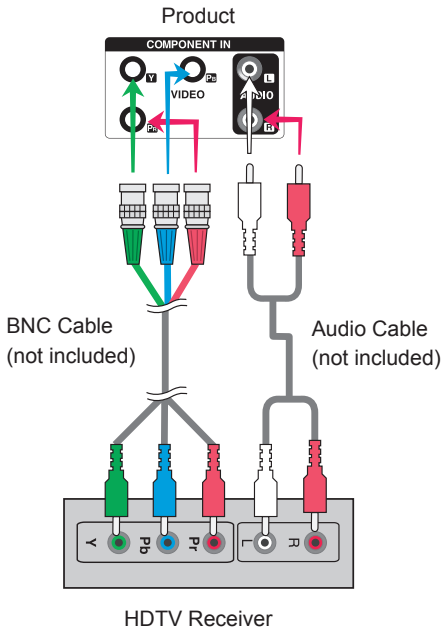

# Connecting to External Devices

## Component Input (480i/480p/576i/576p/720p/1080i/1080p)

1 Connect the video/audio cable as shown in the below figure and then, connect the power cord (See page 11).

• Connect the input terminal with a proper color match.

Note
- Some devices may require HDCP in order to display HD signals.
- Component doesn't support HDCP.

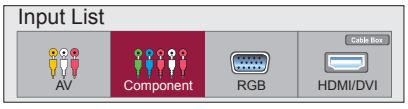

2 Select an input signal.
Press the **INPUT** button on the remote control to select the input signal.

**INPUT → < > → OK**

Or, press the **INPUT** button on the back of the product.

**INPUT →◄ ► → AUTO/SET**

• Select **Component.**

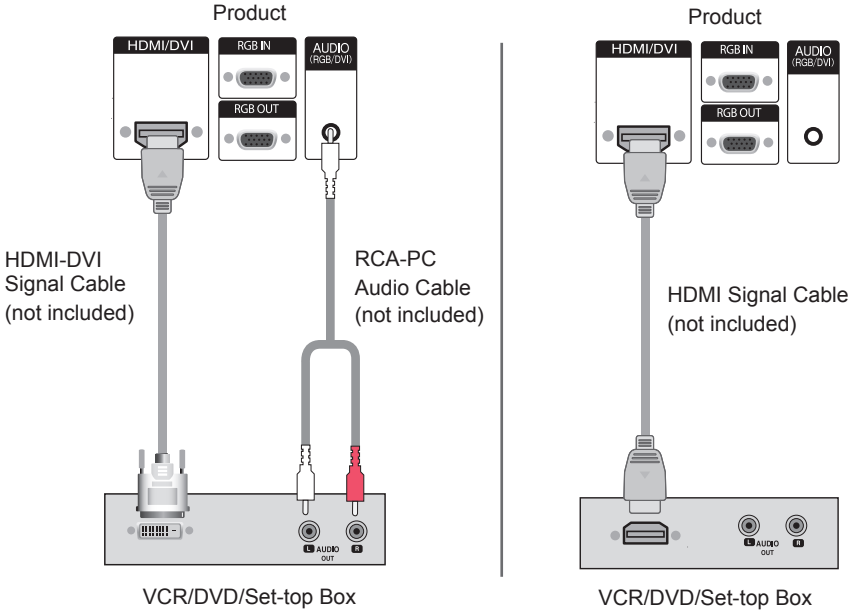

# Connecting to External Devices

## HDMI Input (480p/576p/720p/1080i/1080p)

HDMI Supports High Definition input and HDCP (High-bandwidth Digital Content Protection). Some devices require HDCP in order to display HD signals.

1 Connect the video/audio cable as shown in the below figure and then connect the power cord (See page 11).

Note : Dolby Digital is not supported.

2 Select an input signal.
Press the **INPUT** button on the remote control to select the input signal.

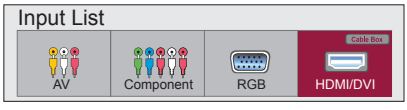

**INPUT → < > → OK**

Or, press the **INPUT** button on the back of the product.

**INPUT → ◄ ► → AUTO/SET**

When connecting with a HDMI-DVI signal input cable.
When connecting with a HDMI signal input cable.

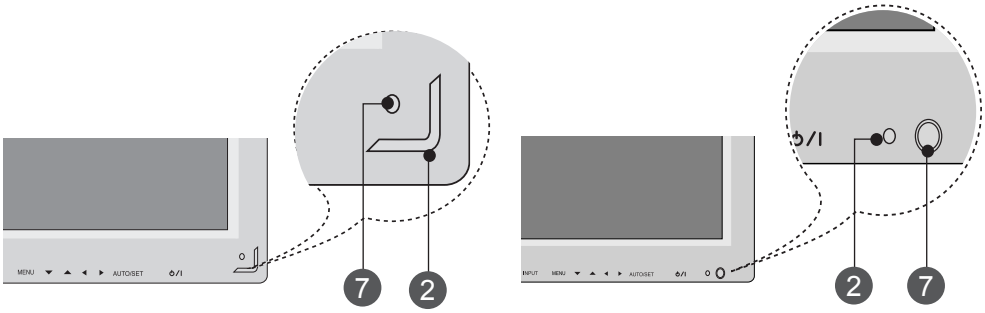

• Select **HDMI/DVI**

You can adjust internal speaker status.
If you want to use your external hi-fi stereo system, turn off the internal speakers of the set.

# User Menus

## Adjusting the timer function

**Clock**
If the current time is incorrect, reset the clock manually.
1) Press the **MENU** button and then use ∧ ∨ < > button to select the Time menu,input OK button to enter.
2) Press the > button and then use ∧ ∨ button to select clock menu.
3) Press the > button and then use < > button to select date
4) Press the ∧ ∨ button and then use < > button to set the hour(00h to 23h).
5) Press the ∧ ∨ button and then use < > button to set the minutes(00 min to 59 min).

**On/Off time**
The off time automatically switches the set to standby at the pre-set time.
1) Press the **MENU** button and then use ∧ ∨ < > button to select the Time menu,input OK button to enter.
2) Press the > button and then use ∧ ∨ button to select On/Off Timer.
3) Press the > button and then use < > button to select date
4) Press the ∧ ∨ button and then use < > button to set the hour(00h to 23h).
5) Press the ∧ ∨ button and then use < > button to set the minutes(00 min to 59 min).
6) Press the ∧ ∨ button ,According to the personal needs, choose to add button.

**Sleep timer**
The power is automatically turned off when the time set by a user is passed.
1) Press the **MENU** button and then use ∧ ∨ < > button to select the Time menu,input OK button to enter
2) Press the > button and then use ∧ ∨ button to select Sleep timer menu.
3) Press the ∧ ∨ button and then use < > button to select the minutes(Off to 240 min).

**Auto off**
If Auto off is active and there is no input signal, the set switches to off mode automatically after 15 minutes.
1) Press the **MENU** button and then use ∧ ∨ < > button to select the Timer menu, input OK button to enter.
2) Press the > button and then use ∧ ∨ button to select the Auto off menu.
3) Press the > button and then use ∧ ∨ button to select On or Off.

**Power on delay**
When connecting multiple monitors and turning the power on, the monitors are turned on individually to prevent overload.

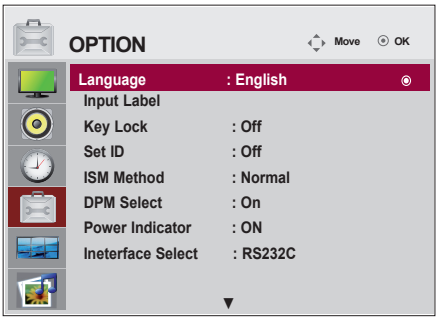

**Automatic Standby**
If you do not use the monitor for more than 4 hours, it will be in standby mode automatically.

Note

- In the event of power interruption (disconnection or power failure), the clock must be reset.
- Once the on or off time is set, these functions operate daily at the preset time.
- The scheduled power-off function works properly only when the device time is set correctly. When the scheduled power-on and power-off times are the same, the power-off time has priority over the power-on time if the set is turned on, and vice versa if the set is turned off.
- When On time is operated, input screen is turned on as it was turned off.
- The Automatic Standby function may not be available depending on the country.

# User Menus

## Selecting the options

**Language**
To choose the language in which the control names are displayed.
**Input Label**
Selects a label for each input source. For example, when connecting to PC in RGB mode,
* Select "PC" for the connecting device field.
Otherwise, the screen may not display properly.

**Key Lock**
Use the ∧ ∨ buttons to select **On** or **Off**. The monitor can be set up so that it can only be used with the remote control. This feature can prevent unauthorized viewing.
In order to lock the OSD screen adjustment, set the **Key Lock** tab to the '**On**' position.
In order to unlock it, do the following :
Push the **MENU** button on the remote control and set **Key Lock** to the '**Off**' position.

**Set ID**
You can assign a unique **Set ID** NO (name assignment) to each product when several products are connected for display. Specify the number (1 to 99) using the < > button and exit. Use the assigned **Set ID** to individually control each product using the Product Control Program.
* If Set ID is set to Off, you cannot control RS-232C functions.To use RS-232C, Set ID must be set to a value other than Off.

**ISM Method**
Leaving a fixed image on the screen for a long time may cause damage to the screen and cause image burn-in. To use the product for a long period of time, use a screen saver on the PC or utilize the residual image prevention function on the product, and when the product is not used, turn off the power. Burn-in and related problems are not covered by the warranty on this product.

**Normal :** Leave on normal if you don't foresee image burn in being a problem.

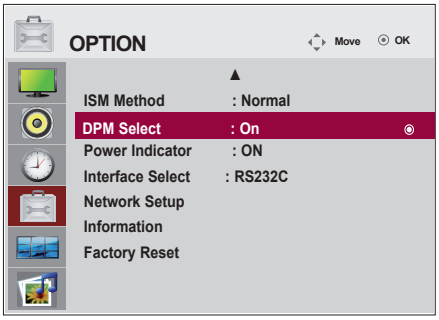

**Orbiter :** May help prevent ghost images. However, it is best not to allow any fixed image to remain on the screen. To avoid a permanent image on the screen, the screen will move every 2 minutes.

**Inversion :** This function inverts the panel color of the screen. The panel color is automatically inverted every 30 minutes.

**White wash :** White wash fills the screen with solid white. This helps removes permanent images burned into the screen. A permanent image may be impossible to clear entirely with white wash.

# User Menus

## Selecting the options

**DPM Select**

A user can choose to turn the power saving mode on / off.

**Power Indicator**

Use this function to set the power indicator on the front side of the product to On or Off. If you set Off, i will go Off. If you set On at any time, the power indicator will automatically be turned on.

**Ineterface Select**

Sets up network connections.

- Network : LAN - Enables communication via Ethernet.
- RS-232C : Enables communication via Serial.

**Network Setup**

- DHCP : Allocates and sets up IP automatically.
- Manual : Sets up IP address, Gateway, Subnet Mask, Primary DNS and Secondary DNS. The setup process is complete when you select Execute, and **"IP Setup Completed"** is displayed at the bottom of the screen. While "**Wait for IP Setup"** is displayed, you cannot use the local keys and remote control. **"Wait for IP Setup"** is displayed for up to 40 seconds.

* If Network select is set to RS232C.DHCP and Manual are disabled.

**Information**

You can find informations about Serial No, F/W version, IP Address and MAC Address.

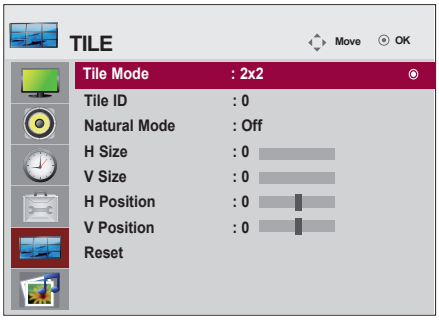

**Factory Reset**

Select this option to return to the default factory settings.

# User Menus

## Adjusts the tile options.

**Tile Mode**

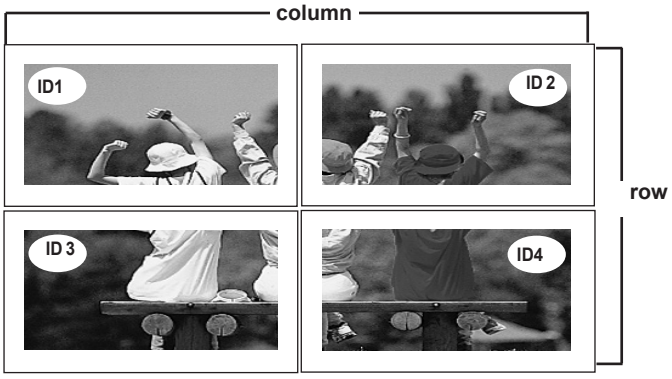

- Must be displayed with various other products.
- Must be in a function that can be connected to RS-232C or RGB Out.
- It is used to enlarge the screen and also used with several products to view screen.

Tile mode and choose Tile alignment and set the ID of the current product to set location. Only after pressing the SET button the adjustments made to the settings will be saved.

- Tile mode : column x row ( c = 1, 2, 3, 4,5 r = 1, 2, 3, 4, 5)
- 5 x 5 available.
- Configuration of an integration screen is also available as well as configuration of One by one Display.

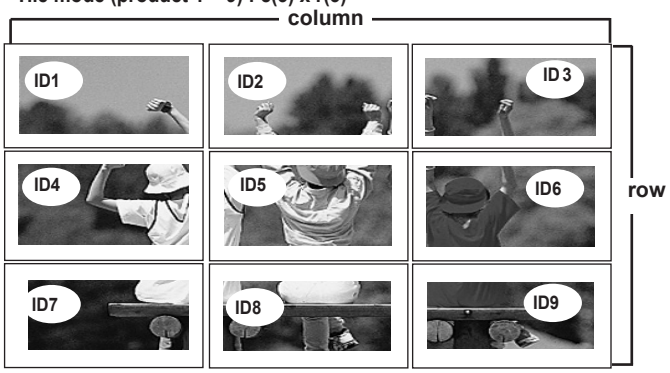

- **Tile mode (product 1 ~ 4) : c(2) x r(2)**

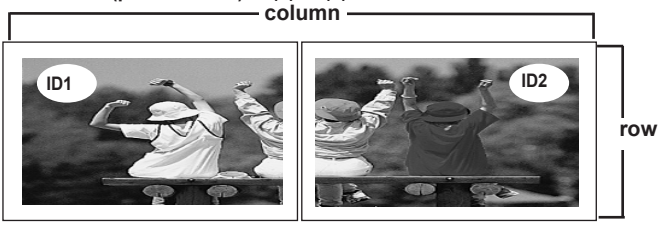

## Adjusts the tile options.

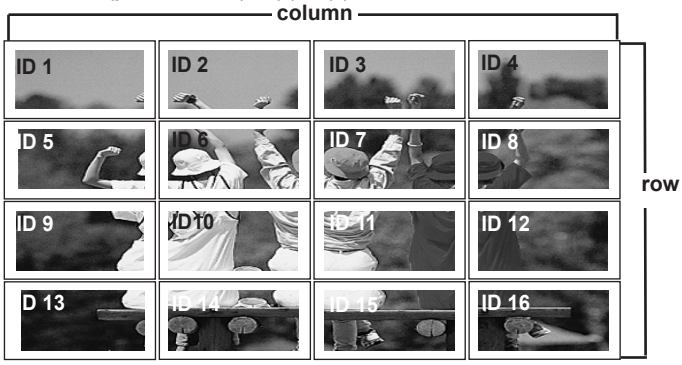

- Tile mode (product 1 ~ 9) : c(3) x r(3)

- Tile mode (product 1 ~ 2) : c(2) x r(1)

- Tile mode (product 1 ~16) : c(4) x r(4)

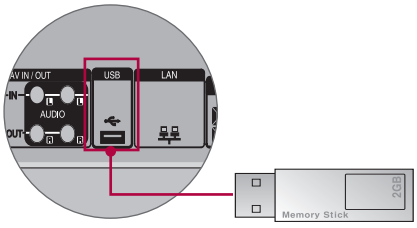

**Tile ID :** Select the location of the Tile by setting an ID.
**Natural :** The image is omitted by the distance between the screens to be naturally shown.
**H-Size :** Adjust the horizontal size of the screen taking into account the size of the bezel.
**V-Size :** Adjust the vertical size of the screen taking into account the size of the bezel.
**H-Position :** Moving the screen position horizontally.
**V-Position :** Moving the screen position vertically.
**Reset :** Function to initialize and release Tile.
All Tile setting are released when selecting Tile recall and the screen returns to Full screen.

## Adjusts the USB options.

**When connecting the USB device**

When you connect a USB device, this pop up menu is displayed, automatically.
“POP UP MENU” will not be displayed while the OSD including Menu, EPG or Schedule list is activated.
When the Pop Up menu appears, you can select Music List, Photo List or Movie List in the MY MEDIA menu.
In USB device, you can not add a new folder or delete the existing folder.

1. Connect the USB device to the **USB** jack on the SET.

2. Select **PHOTO LIST**, **MUSIC LIST** or **MOVIE LIST**.

## Adjusts the USB options.

**Precautions when using the USB device**

- Only a USB storage device is recognizable.
- If the USB storage device is connected through a USB hub, the device is not recognizable.
- A USB storage device using an automatic recognition programme may not be recognized.
- A USB storage device which uses its own driver may not be recognized.
- The recognition speed of a USB storage device may depend on each device.
- Please do not turn off the TV or unplug the USB device when the connected USB storage device is working. When such device is suddenly separated or unplugged, the stored files or the USB storage device may be damaged.
- Please do not connect the USB storage device which was artificially maneuvered on the PC. The device may cause the product to malfunction or fail to be played. Never forget to use only a USB storage device which has normal music files or image files.
- Please use only a USB storage device which was formatted as a FAT16, FAT32, NTFS file system provided with the Windows operating system. In case of a storage device formatted as a different utility programme which is not supported by Windows, it may not be recognized. Data in a USB storage device cannot be deleted in the NTFS file system.
- Please connect power to a USB storage device which requires an external power supply. If not, the device may not be recognized.
- Please connect a USB storage device with cable is offered by USB maker. If connected with cable is not offered by USB maker or an excessively long cable, the device may not be recognized.
- Some USB storage devices may not be supported or operated smoothly.
- Maximum of 999 files and folders can be recognized.
- Data in a USB storage device cannot be aligned. Up to 128 English characters can be recognized as a file name.
- Please back up the important file because a data of USB device may be damaged. Data management is consumer's responsibility and in consequence the manufactures does not cover the product bearing data damage.
- If the USB is connected in Standby Mode, specific hard disk will automatically be loaded when the TV is turned on.
- The recommended capacity is 1TB or less for a USB external hard disk and 32GB or less for USB memory.
- Any device with more than the recommended capacity may not work properly.
- If a USB external hard disk with a “Power Saving” function does not work, turn the hard disk off and on again to MAKE IT WORK PROPERLY.
- Names and subtitles of some language files may not display properly.(Korean, Chinese, Japanese)
- When using Korean, Japanese or Chinese subtitles or file names, it is recommended to set the language to the corresponding one.

# User Menus

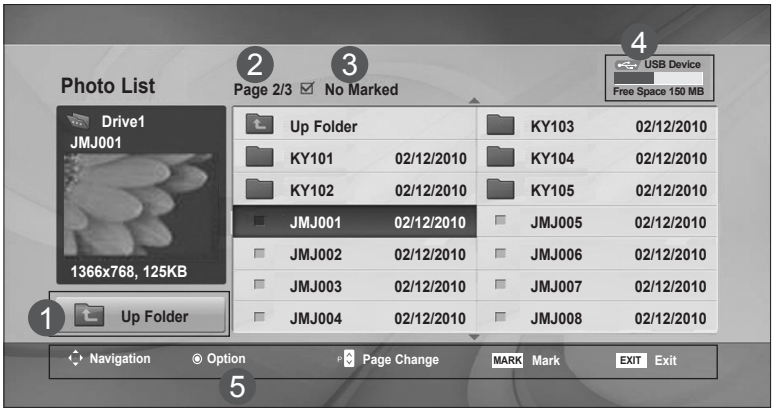

## Adjusts the USB options.

### Photo List

You can view photo files on USB storage device.
The On Screen Display may be different from your SET. Images are an example to assist with the SET operation.

PHOTO(*.JPEG) supporting file
Baseline: 15360 x 8640
Progressive : 1024 x 768
• You can play JPEG files only.
• Non-supported files are displayed in the form of bitmap.

### Screen Components

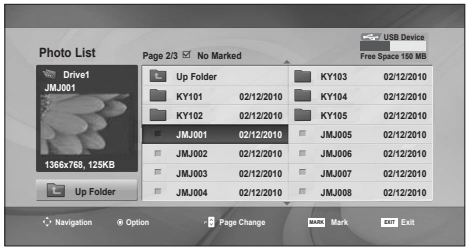

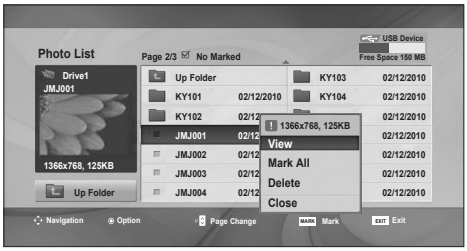

1. Moves to upper level folder
2. Current page / Total pages
3. Total number of marked photos
4. Usable USB memory
5. Corresponding buttons on the remote control

# User Menus

## Adjusts the USB options.

### Photo Selection and PopUp Menu

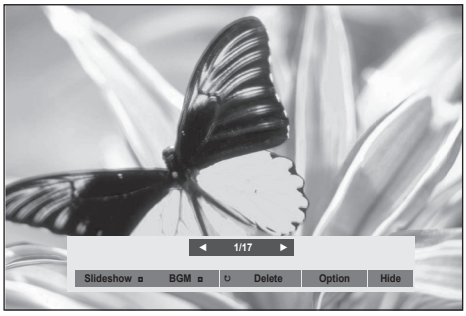

**View** : Display the selected item.
**Mark All** : Mark all photos on the screen.
**Unmark All :** Deselect all marked photos.
**Delete** : Delete the selected photo item.
**Close** : Close the pop-up menu.

# User Menus

## Adjusts the USB options.

**How to view photo**

Detailed operations are available on full-sized photo view screen.

The aspect ratio of a photo may change the size of the photo displayed on the screen in full size. Press the **EXIT** button to move to the previous menu screen.

► **Slideshow**
When no picture is selected, all photos in the current folder are displayed during slide show. If some photos are selected, those photos are displayed in a slide show.

- Set the time interval of the slide show in **Option**.

► **BGM (Background Music)**
Listen to music while viewing photos in full size.

- Set the Music Folder for **BGM** in Options before using this function.

► **(Rotate)**

- Rotate photos. Rotates the photo 90°, 180°, 270°, 360° clockwise.

► **Delete**
Delete photos.

► **Option**
Set values for **Sl ide Speed** and **Music Folder** for **BGM**.

- Use ∧ ∨ < > button and **OK** button to set values. Press OK to save the settings.
- You cannot change **Music Folder** while **BGM** is **playing.**

► **Hide**
Hide the menu on the full-sized screen. To see the menu again on the full-sized screen, press **OK** button to display.
If you press the ARC key on the remote control after hiding the menu, you can toggle between normal and full screen mode.

# User Menus

## Adjusts the USB options.

### Music List

You can play music files on USB storage device.
Purchased music files(*.MP3) may contain copyright restrictions. Playback of these files may not be supported by this model. Music file on your USB device can be played by this unit.
The On Screen Display may be different from your SET. Images are an example to assist with the SET operation.

MUSIC (*.MP3) supporting file
Bit rate 32 to 320kbps
• Sampling rate MPEG1 layer 3: 32 kHz, 44.1 kHz, 48 kHz.

### Screen Components

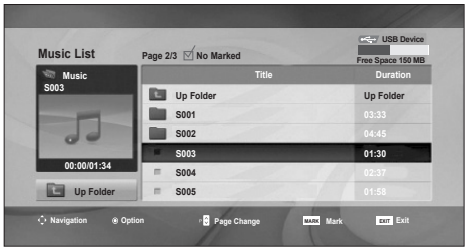

1. Moves to upper level folder
2. Current page / Total pages
3. Total number of marked music title
4. Usable USB memory
5. Corresponding buttons on the remote control

# User Menus

## Adjusts the USB options.

### Music Selection and PopUp Menu

As shown, up to 6 music titles are listed per page.

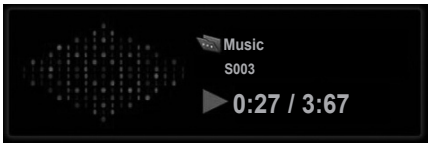

**Play (During stop)** : Play the selected music titles.
One playback of a piece of music finishes, the next selected one will be played. When there are no selected music titles to play, the next one in the current folder will be played. If you go to a different folder and press the OK button, the current music in playback will stop.
**Play Marked**: Play the selected music titles. Once a music finishes playing, the next selected one will be played automatically.
**Stop Play** (During playback): Stop the playing music titles.
**Play with Photo**: Start playing the selected music titles and then move to the Photo List.
**Mark All** : Mark all music titles in the folder.
**Unmark All :** Deselect all marked music titles.
**Delete** : Delete the selected music titles.
**Close** : Close the pop-up menu.

## Adjusts the USB options.

If you don't press any button for a while during the playing, the play information box (as shown in the below) will float as a screen saver.

The **'Screen Saver'**?

Screen saver is to prevent screen pixel damage due to an fixed image remaining on the screen for a extended period of time.

**Note**

- A damaged or corrupted music does not play but displays 00:00 in playtime.
- A music downloaded from a paid service with copyright protection does not start but displays inappropriate information in playtime.
- If you press OK, ■ buttons, screen saver is stopped.
- The PLAY(►), Pause(II), ■ , ►►, ◄◄ buttons on the remote control are also available in this mode.
- You can use the ►► button to select the next music and the ◄◄ button to select the previous music.

## Adjusts the USB options.

### Movie List

The movie list is activated once USB is detected. It is used when playing movie files on SET.
Displays the movies in the USB folder and supports Play.
Allows playback of all movies in the folder and user desired files.
Video editing is not supported but files can be deleted.
It is a movie list that displays folder information and DivX file.
Supports up to four drives.

MOVIE(*.avi/*.DivX) supporting file
Video format : MPEG1, MPEG2, MPEG4(Doesn't support Microsoft MPEG 4-V2, V3), DivX 3.xx, DivX 4.xx, DivX 5.xx, DivX VOD(DRM), XviD, DivX 6.xx(Playback)
Audio format : Mpeg, Mp3, PCM, Dolby Digital
Sampling frequency : within 32k to 48 khz
Bit rate : 32k to 320 kbps
Subtitle format : *.smi/ *.srt/ *.sub(MicroDVD, SubViewer 2.0)/ *.ass/ *.ssa/*.txt(DVD Subtitle System)
• DivX may not be played depending on its types or recording methods.
• If the video and audio structure of recorded file is not interleaved, either video or audio is outputted.
• Maximum FPS (Frame Per Second) can be reached only at SD level. FPS is 25 FPS (720*576) or 30 FPS (720*480) depending on Resolution.
• Max bitrate of playable DivX is 4Mbps.
• Files more than 25 FPS or 30 FPS or higher may not be played properly.
• A DivX movie file and its subtitle file must be located in the same folder.
• A video file name and its subtitle file name must be identical for it to be displayed.
• Playing a video via a USB connection that doesn't support high speed may not work properly.
• USB storage devices below USB 2.0 are supported as well. But they may not work properly in the movie list.
• Files encoded with GMC(Global Motion Compensation) may not be played.

| Extension name | Video Decoder | Audio Codec | Max Resolution |
|---|---|---|---|
| mpg, mpeg, vob, dat | MPEG1, MPEG2 | AC3,MPEG,MP3,PCM | 720x576@25p<br>720x480@30p |
| Avi, DivX, m4v | MPEG4-SP, MPEG4-ASP, DivX 3.xx, DivX 4.xx, DivX 5.xx<br>DivX 6.xx(Playback), Xvid | AC3,MPEG,MP3,PCM | |

## Adjusts the USB options.

### Screen Components

1. Moves to upper level folder
2. Current page / Total pages
3. Total number of marked movie title
4. Usable USB memory
5. Corresponding buttons on the remote control

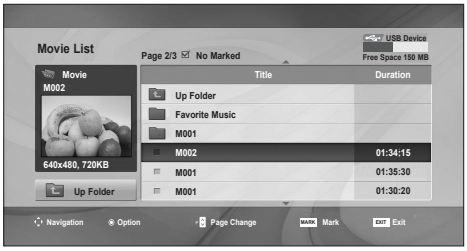

**Note**

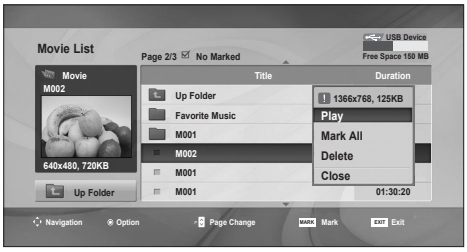

- Use the left/right (< / >) keys to move to a specific frame forward or backward while playing a movie. (The left/right (< / >) keys may not work properly for some files while playing a movie.)

# User Menus

## Adjusts the USB options.

### Movie Selection and PopUp Menu

**Play** : Play the selected movie. DivX Play is executed while screen changes**.**
**Mark All :** Mark all Movie in the folder.
**Unmark All :** Deselect all marked movies.
**Delete** : Delete the selected Movie item.
**Close** : Close the pop-up menu.

### Using the remote control

| | |
|---|---|
| ◄◄ / ►► | When playing, repeatedly, press REW (◄◄) to speed up ◄◄(x2) -> ◄◄◄ (x4) -> ◄◄◄◄(x8) -> ◄◄◄◄◄(x16) ->◄◄◄◄◄◄◄(x32). Repeatedly, press FF (►►) to speed up ►►(x2)-> ►►► (x4) -> ►►►► (x8) -> ►►►►►(x16) -> ►►►►►►►(x32). Pressing these buttons repeatedly increases the fast forward/reverse speed. |
| II | During playback, press Pause (II) and the still screen is displayed. |
| ■ | During playback, stops the screen. |
| ► | Press Play(►) to return to normal playback. |

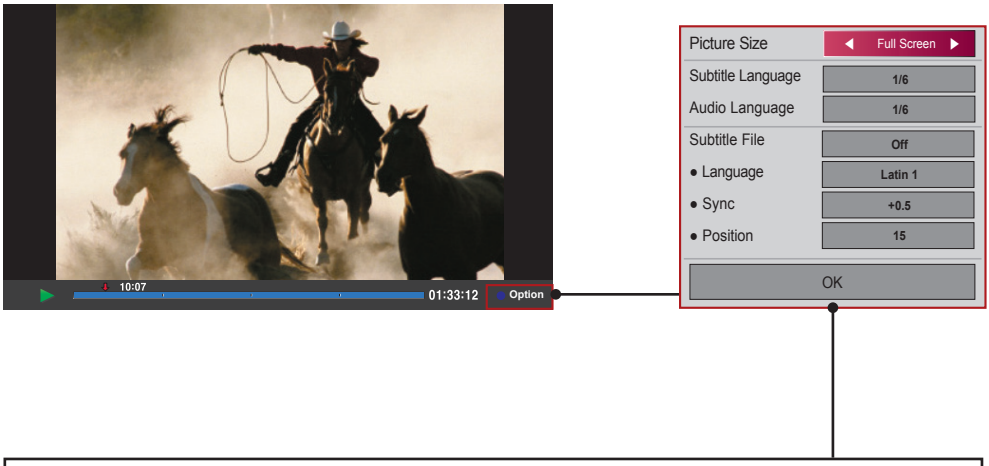

**Note**

- In the case of files not supported, a message regarding non-supported file is displayed.

# User Menus

## Adjusts the USB options.

**When you select the Movie Option,**

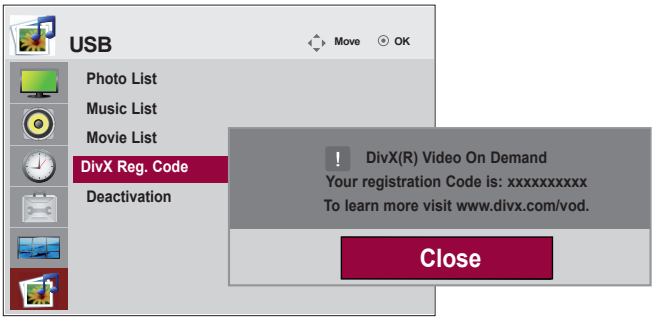

**Picture Size** : Sets to [Full] or [Original].
**Subtitle Language** : Allows to select the language you want for the file with multiple subtitle tracks.
This option is not available if the file has only one subtitle track.
**Audio Language** : Allows to select the language you want for the file with multiple audio tracks. This option is not available if the file has only one audio track.
**Subtitle File** : Sets to On or Off.
**Language** : Sets to one of Latin1, Latin2, Latin4, Latin5, Cyrillic, Greek, Hebrew, Chinese and Korean.
**Sync** : Adjusts the subtitle delay from 0 and +5.0 in 0.5 second increments.
**Position** : Moves the subtitle position from 0 to 16.
* You can move the video back or forward by clicking < or > key.

# User Menus

## Adjusts the USB options.

### DivX Registration Code

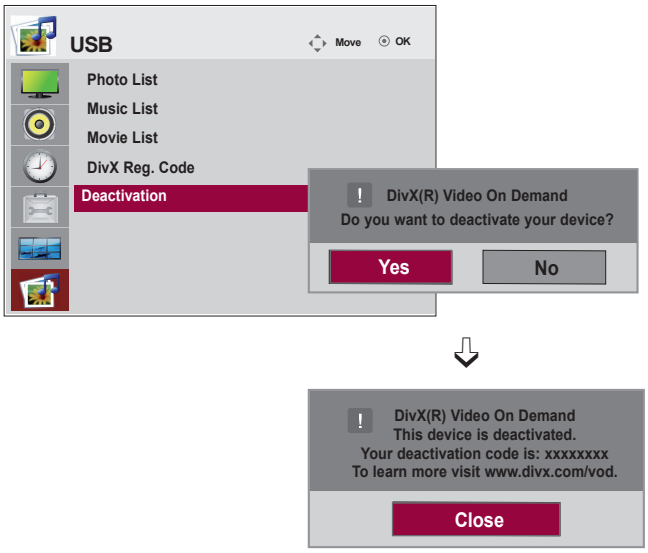

Confirm the DivX registration code number of the SET. Using the registration number, movies can be rented or purchased at www.divx.com/vod.
With a DivX registration code from other SET, playback of rented or purchased DivX file is not allowed. (Only DivX files matched with the registration code of the purchased SET are playable.)

**Note**

- Supported movie file
  Resolution : under 25 frames/sec(720x576 WxH pixels).
  Frame rate : under 30 frames/sec(720x480)
- Video Codec : MPEG1, MPEG2, MPEG4(Doesn't support Microsoft MPEG4-V2, V3), DivX3.xx, DivX4.xx, DivX5.xx, , DivX VOD(DRM), XviD, DivX6.xx(Playback).
- When loading, some buttons may not work.

## Adjusts the USB options.

### Deactivation

The purpose of deactivation is to allow deactivation of devices for users who have activated all the available devices through the web_server and are blocked from activating more devices. DivX VOD allowed the consumer to activate up to 6 devices under one account, but to replace or deactivate any of those devices, the consumer had to contact DivX Support and request deletion. Now with this added feature, consumers will be able to deactivate the device themselves and hence better manage their DivX VOD devices.

# Troubleshooting

## No image is displayed

| | |
|---|---|
| ● **Is the power cord connected?** | • See if the power cord is properly connected to the outlet. |
| ● **Is the power indicator light on?** | • See if the power switch is turned on.<br>• May need service. |
| **<M4225C>**<br>● **Power is on, power indicator is Blue but the screen appears extremely dark.**<br>**<M3704C>**<br>● **Power is on, power indicator is Green but the screen appears extremely dark.** | • Adjust brightness and contrast again.<br>• Backlight may need repair. |
| ● **Is the power indicator amber?** | • If the set is in power saving mode, move the mouse or press any key.<br>• Turn both devices off and then back on. |
| ● **Does the 'Out of range' message appear?** | • The signal from the PC (video card) is out of the vertical or horizontal frequency range of the set. Adjust the frequency range by referring to the specifications in this manual.<br>*** Maximum Resolution**<br>**RGB : 1920 x 1080 @ 60 Hz**<br>**HDMI/DVI : 1920 x 1080 @ 60 Hz** |
| ● **Does the 'Check signal cable' message appear?** | • The signal cable between PC and set is not connected. Check the signal cable.<br>• Press INPUT on the remote control to check the input signal. |

## 'Unknown Product' message appears when the product is connected.

| | |
|---|---|
| ● **Did you install the driver?** | • Install the product driver, which is provided with the product, or download it from the web site. (http://www.lg.com)<br>• See if the plug&play function is supported by referring to the video card user manual. |

## 'Key Lock On' message appears.

| | |
|---|---|
| ● **The 'Key Lock On' message appears when pressing the Menu button.** | • The Lock function prevents the OSD settings from being changed inadvertently. To release the lock, go to Menu and Option and disable the Key Lock option. |

# Troubleshooting

## The screen image looks abnormal.

| | |
|---|---|
| ● **Is the screen position wrong?** | • D-Sub analog signal - Press the "AUTO" button in the remote control to automatically select the optimal screen status that fits into the current mode. If adjustment is not satisfactory, use the Position OSD menu.<br>• See if the video card resolution and frequency are supported by the product. If the frequency is out of range, set to the recommended resolution in the Control Panel "Display" Setting menu. |
| ● **Do thin lines appear on the background screen?** | • D-Sub analog signal - Press the "AUTO" button in the remote control to automatically select an optimal screen status that fits into the current mode. If adjustment is not satisfactory, use the Clock OSD menu. |
| ● **Horizontal noise appears or the characters look blurred.** | • D-Sub analog signal - Press the "AUTO" button in the remote control to automatically select an optimal screen status that fits into the current mode. If adjustment is not satisfactory, use the Phase OSD menu. |
| ● **The screen is displayed abnormally.** | • The proper input signal is not connected to the signal port. Connect the signal cable that matches with the source input signal. |

## After-image appears on the product.

| | |
|---|---|
| ● **After-image appears when the product is turned off.** | • If you use a fixed image for a long time, the pixels may be damaged quickly. Use the screen-saver function. |

Note

- **Vertical frequency:** To enable the user to watch the product display, screen image should be changed tens of times every second like a fluorescent lamp. The vertical frequency or refresh rate is the times of image display per second. The unit is Hz.
- **Horizontal frequency:** The horizontal interval is the time to display one vertical line. When 1 is divided by the horizontal interval, the number of horizontal lines displayed every second can be tabulated as the horizontal frequency. The unit is kHz.

# Troubleshooting

## The audio function does not work.

| | |
|---|---|
| ● **No sound?** | • See if the audio cable is connected properly.<br>• Adjust the volume.<br>• See if the sound is set properly. |
| ● **Sound is too dull.** | • Adjust the Clear Voice II, Treble and Bass appropriately. |
| ● **Sound is too low.** | • Adjust the volume. |

## Screen color is abnormal.

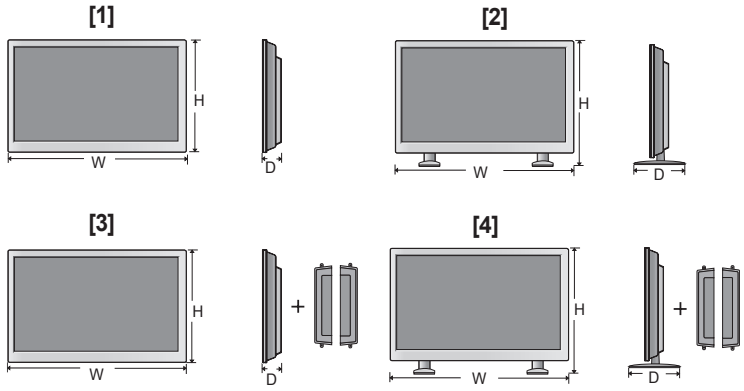

| | |
|---|---|
| ● **Screen has poor color resolution (16 colors).** | • Set the number of colors to more than 24 bits (true color)<br>Select Control Panel - Display - Settings - Color Table menu in Windows. |
| ● **Screen color is unstable or mono-colored.** | • Check the connection status of the signal cable. Or, re-insert the PC video card. |
| ● **Do black spots appear on the screen?** | • Several pixels (red, green, white or black color) may appear on the screen, which can be attributable to the unique characteristics of the LCD panel. It is not a malfunction of the LCD. |

## The operation does not work normally.

| | |
|---|---|
| ● **The power suddenly turned off.** | • Is the sleep timer set?<br>• Check the power control settings.<br>Power interrupted.<br>• "CAUTION! FAN STOP!"<br>If the power is turned off after this message appears, it means that the fan is out of order.<br>In this case, contact your local service center. |

# Controlling the Multiple Product

Use this method to connect several products to a single PC. You can control several products at a time by connecting them to a single PC.
If the [Set ID] menu in [Option] is set to OFF, the monitor ID value should be set between 1 and 99.

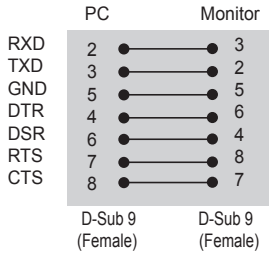

## Connecting the cable

Connect the RS-232C cable as shown in the picture.
You need to purchase a cable to connect the RS-232C socket as it is not provided as the accessory.
The RS-232C protocol is used for communication between the PC and product. You can turn the product on/off, select an input source or adjust the OSD menu from your PC.

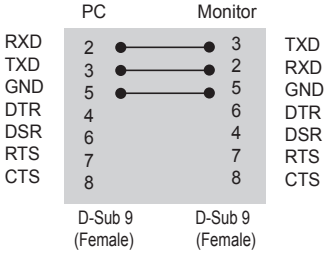

## RS-232C Configurations

7-Wire Configurations (Standard RS-232C cable)

3-Wire Configurations (Not Standard)

## Communication Parameter

- ► Baud Rate : 9600 buad Rate (UART)
- ► Data Length : 8 bit
- ► Parity Bit : None
- ► Stop Bit : 1bit
- ► Flow Control : None
- ► Communication Code : ASCII code
- ► Use a crossed (reverse) cable

## Command Reference List

## Transmission / Receiving Protocol

Transmission

[Command1][Command2][ ][Set ID][ ][Data][Cr]

* [Command 1]: First command. (k, j, m, d, f, x)
* [Command 2]: Second command.(a to u)
* [Set ID]: Set up the Set ID number of product.
  range : 01H to 63H. by setting '0', server can control all products.
* In case of operating with more than 2 sets using set ID as '0' at the same time, it should not be checked the ack message. Because all sets will send the ack message, so it's impossible the check the whole ack messages.
* [DATA]: To transmit command data.
  Transmit 'FF' data to read status of command.
* [Cr]: Carriage Return
  ASCII code '0 x 0 D'
* [ ]: ASCII code Space (0 x 20)

OK Acknowledgement

[Command2][ ][Set ID][ ][OK][Data][x]

* The Product transmits ACK (acknowledgement) based on this format when receiving normal data. At this time, if the data is data read mode, it indicates present status data. If the data is data write mode, it returns the data of the PC computer.

Error Acknowledgement

[Command2][ ][Set ID][ ][NG][Data][x]

* If there is error, it returns NG

## Transmission / Receiving Protocol

01. Power(Command : k a)

► To control Power On / Off of the Set.

Transmission

| [k][a][ ][Set ID][ ][Data][Cr] |
|---|

Data 0 : Power Off 1 : Power On

Acknowledgement

| [a][ ][Set ID][ ][OK][Data][x] |
|---|

► To show the status of Power On / Off.

Transmission

| [k][a][ ][Set ID][ ][FF][Cr] |
|---|

Acknowledgement

| [a][ ][Set ID][ ][OK][Data][x] |
|---|

Data 0 : Power Off 1 : Power On

## Transmission / Receiving Protocol

02. Aspect Ratio(Command : k c) (Main picture format)

► To adjust the screen format.
You can also adjust the screen format using the ARC (Aspect Ratio Control) button on remote control or in the Screen menu.

Transmission

| [k][c][ ][Set ID][ ][Data][Cr] |
|---|

Data 1 : Normal Screen (4 : 3)
2 : Wide Scran (16 : 9)
4 : Zoom (AV,Component,HDMI-DTV)
6 : Original (AV)
7 : 14 : 9 (AV,Component,HDMI-DTV)
9 : Just Scan (Component (HD DTV), HDMI-DTV (HD DTV))
* 1:1 (RGB, HDMI-PC)
10 to 1F : Cinema Zoom 1 to 16 (AV,Component,HDMI-DTV)
B : Full Wide (AV)

Acknowledgement

| [c][ ][Set ID][ ][OK][Data][x] |
|---|

03. Screen Mute(Command : k d)

► To select screen mute on / off.

Transmission

| [k][d][ ][Set ID][ ][Data][Cr] |
|---|

Data 0 : Screen mute off (Picture on)
1 : Screen mute on (Picture off)

Acknowledgement

| [d][ ][Set ID][ ][OK][Data][x] |

Data 0 : Off 1 : On

## Transmission / Receiving Protocol

13 Balance(Command : k t)
► To adjust the sound balance.
Transmission

| [k][t][ ][Set ID][ ][Data][Cr] |
|---|

Data Min : 00H to Max : 64H
(Hexadecimal code)

00H : Step L50
64H : Step R50

Acknowledgement

| [t][ ][Set ID][ ][OK][Data][x] |
|---|

Data Min : 00H to Max : 64H

00H : Step 0 to L50
64H : Step 100 to R50
* Balance : L50 to R50

14. Color Temperature (Command : k u)
► To adjust the screen color temperature.
Transmission

| [k][u][ ][Set ID][ ][Data][Cr] |
|---|

Data 0 : Medium
1 : Cool
2 : Warm

Acknowledgement

| [u][ ][Set ID][ ][OK][Data][x] |
|---|

Data 0 : Medium
1 : Cool
2 : Warm

## Transmission / Receiving Protocol

15. Abnormal state (Command : k z)

► Abnormal State : Used to Read the power off status when Stand-by mode.

Transmission

| [k][z][ ][Set ID][ ][Data][Cr] |
|---|

Data FF : Read

Acknowledgement

| [z][ ][Set ID][ ][OK][Data][x] |
|---|

0 : Normal (Power on and signal exist)
1 : No signal (Power on)
2 : Turn the monitor off by remote control
3 : Turn the monitor off by sleep time function
4 : Turn the monitor off by RS-232C function
8 : Turn the monitor off by off time function
9 : Turn the monitor off by auto off function

16. ISM mode(Command: j p)

► Used to select the afterimage preventing function.

Transmission

| [j][p][ ][Set ID][ ][Data][Cr] |
|---|

Data 1H : Inversion
2H : Orbiter
4H : White Wash
8H : Normal

Acknowledgement

| [p][ ][Set ID][ ][OK][Data][x] |

28. Fan Fault check (Command : d w )

► To check the Fan fault of the TV.

Transmission

| [d][w][][Set ID][][Data][x] |
|---|

* The data is always FF(in Hex).
Data ff: Read Status

Acknowledgement

| [w][][Set ID][][OK/NG][Data][x] |
|---|

* Data is the status value of the Fan fault.
Data 0: Fan fault
1: Fan OK
2: N/A(Not Avaliable)

## Transmission / Receiving Protocol

29. Elapsed time return(Command : d l)
► To read the elapsed time.

Transmission

| [d][l][ ][Set ID][ ][Data][x] |
|---|

* The data is always FF(in Hex).

Acknowledgement

| [l][ ][Set ID][ ][OK/NG][Data][x] |
|---|

* The data means used hours.
(Hexadecimal code)

30. Temperature value (Command : d n)
► To read the inside temperature value.

Transmission

| [d][n][ ][Set ID][ ][Data][x] |
|---|

* The data is always FF(in Hex).

Acknowledgement

| [n][ ][Set ID][ ][OK/NG][Data][x] |

| [j][][Set ID][][OK/NG][Data][x] |
|---|

43. Reset (Command : f k)

► Execute the Picture, Screen and Factory Reset functions.

Transmission

| [f][k][][Set ID][][Data][Cr] |
|---|

Data
0 : Picture Reset
1 : Screen Reset
2 : Factory Reset

Acknowledgement

| [k][][Set ID][][OK/NG][Data][x] |
|---|

## Transmission / Receiving Protocol

44. Power saving(Command : f l)

► To set the Power saving mode.

Transmission

| [f][l][][Set ID][][Data][Cr] |
|---|

Data 0 : Off
1: (static level 1)
2: (static level 2)
3: (static level 3)

Acknowledgement

| [l][][Set ID][][OK/NG][Data][x] |
|---|

45. Power Indicator (Command : f o)

► To set the LED for Power Indicator

Transmission

| [f][o][][Set ID][][Data][Cr] |
|---|

Data 0 : Off
1: On

Acknowledgement

| [o][][Set ID][][OK/NG][Data][x] |
|---|

## Transmission / Receiving Protocol

46. Serial no.Check (Command : f y)

► To read the serial numbers

Transmission

| [f][y][][Set ID][][Data][Cr] |
|---|

Data FF (to read the serial numbers)

Acknowledgement

| [y][][Set ID][][OK/NG][Data1] ~ [Data13] [x] |
|---|

* The data format is ASCII Code.

## Transmission / Receiving Protocol

47. S/W Version (Command : f z)

► Check the software version.

Transmission

| [f][z][][Set ID][][Data][Cr] |
|---|

Data FFH : Read

Acknowledgement

| [z][][Set ID][][OK/NG][Data][x] |
|---|

48. Input Select (Command : x b)

► To select input source for the Set.

Transmission

| [x][b][][Set ID][][Data][Cr] |
|---|

Data 20H : AV
40H : Component
60H : RGB (PC)
90H : HDMI/DVI (DTV)
A0H : HDMI/DVI (PC)

Acknowledgement

| [b][ ][Set ID][ ][OK][Data][x] |
|---|

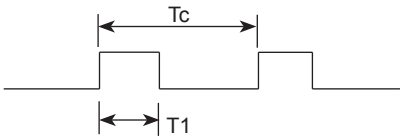

Data 20H : AV
40H : Component
60H : RGB (PC)
90H : HDMI/DVI (DTV)
A0H : HDMI/DVI (PC)

# IR Codes

## Remote Control IR Code

Output waveform

single pulse, modulated with 37.917kHz signal at 455kHz

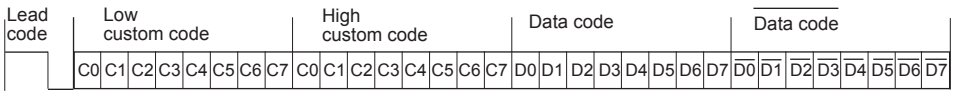

Carrier frequency

FCAR = 1 / Tc = fosc / 12

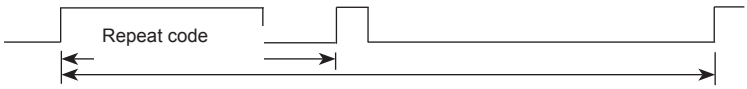

Duty ratio = T1 / Tc = 1 / 3

► Configuration of frame

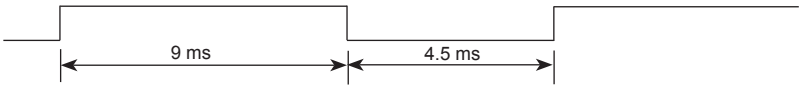

▪ 1st frame

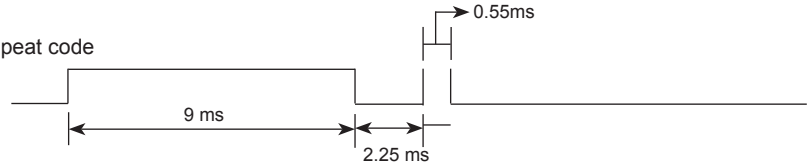

▪ Repeat frame

► Lead code

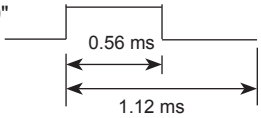

► Repeat code

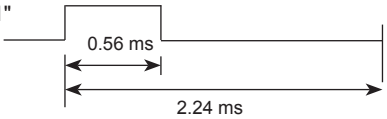

► Bit description

▪ Bit "0"

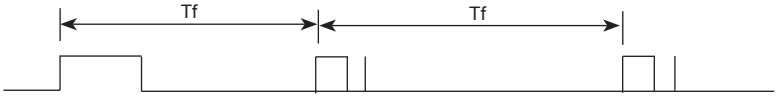

▪ Bit "1"

► Frame interval : Tf

▪ The waveform is transmitted as long as a key is depressed.

Tf = 108 ms @ 455 kHz
