- 2 Initialize(Reset) the AP or cable modem.
- 3 Check that the MAC address of the TV/router is registered with your Internet service provider. (The MAC address displayed on the right pane of the network status window should be registered with your Internet service provider.)
- 4 Check the router manufacturer's website to make sure your router has the latest firmware version installed.

SmartShare PC SW Installing & Setting

Install the **SmartShare PC SW(DLNA)** and **SmartShare PC SW(MediaLink)** program on your PC.

- 1 Go to **www.lg.com**. Then, select your region.
- 2 Select **SUPPORT**. Then, Search for your model.
- 3 Select **SOFTWARE UPDATE**. Then, select **SmartShare PC SW(DLNA)** and **SmartShare PC SW(MediaLink)**.
- 4 You can run the program when installation is complete.

NOTE

- DLNA or Media Link service is only available if TV and other devices are connected via a single router.

DLNA Connection to PC

- 1 Start Nero Media Home 4 and enable shared folders on your PC.
 - a : Click the Share button.
 - b : Click the Add button and select the desired folder.
(Read the Owner's Manual to find out which file formats support the DLNA function.)
- 2 Make sure that the PC network device is selected.

Enabled	Description	IP Address	Type
☐	VMware Virtual Ethernet Adapter f...	192.168.115.1	Ethernet
☐	VMware Virtual Ethernet Adapter f...	192.168.152.1	Ethernet
☐	Atheros AR8131 PCI-E Gigabit Eth...	10.177.40.108	Ethernet
☒	Realtek PCIe GBE Family Controlle...	192.168.0.3	Ethernet

 - c : Click the Network button and check that the correct PC network device is selected. (At least one network device must be selected.)
 - d : Click the Start Server button.
- 3 You can view and enjoy shared content by using the TV's Smart Share function.

DLNA Device

 - e : Select the DLNA Device on the TV's Smart Share Card to enjoy content from your PC.

DLNA Connection to Smartphone

- 1 Check that Wi-Fi is enabled on your smartphone.

- 2 Install/run the app for sharing content on your smartphone (It's called SmartShare on LG phones).
- 3 Enable your smartphone to share content files with other devices.
- 4 Select the file type you want to play (movie, audio or photo).
- 5 Select a movie, music or photo file to play on the TV.
- 6 Add the selected file to the playlist.
- 7 Select a TV model name on which to play the files. (The TV model name is labelled on the rear side of the panel.)
- 8 Play the media file to view and enjoy it on your TV.

Please call LG Customer Service if you experience any problems.

Media Link Connection

- After installing the program, right-click the Plex icon **(a)** on your PC's taskbar. Click Media Manager **(b)**... and select the type **(c)** you want.

- Name **(d)**: Enter the section name to be displayed on the screen.
Add **(e)**: Select a folder in the PC to add. Create a folder to store files you want to watch on TV.
Add Section **(f)**: Complete to create the section.
Turn on the TV and select Media Link **(g)** from the Home menu.

* For more information on file sharing, visit www.plexapp.com/medialink.

Updating the TV Firmware

HOME →  Settings → SUPPORT → Software Update

Uses **Software Update** to check and obtain the latest version. If not updated, certain functions may not work properly. It is also possible to check manually for available updates.

Software Update	Set it to On . When an updated file is detected, the file is downloaded automatically. When the file download is complete, the software update window appears.
Check Update Version	Checks the latest update version installed. When a new update is available, the download process can be performed manually.

NOTE

- The latest version can be obtained via the digital broadcast signal or an internet connection.
- Changing the program while downloading the software via a digital broadcast signal interrupts the download process. Returning to the initial program allows downloading to resume.
- If software is not updated, certain functions may not work properly.

WiFi Screen Setting

HOME →  **Settings** → **NETWORK** → **Wi-Fi Screen Share**

The **Wi-Fi Screen Share** function supports wireless connection technology, such as Wi-Fi Direct and WiDi. With Smart Share, you can share files or screens of devices connected to **Wi-Fi Screen Share**.

- 1 If **Wi-Fi Screen Share** is set to On, a list of available devices appears.
To use **Wi-Fi Screen Share**, go to  **Settings** → **NETWORK** → **Wi-Fi Screen Share** (a) to On.
- 2 When you are prompted to request connection, select **Yes**. **Wi-Fi Screen Share** is now connected to your TV.

*If you are not using **Wi-Fi Screen Share** to minimize the interference between Wi-Fi devices, it is recommended to set **Wi-Fi Screen Share** (a) to Off.

WiDi (Wireless Display) Setting

WiDi refers to Wireless Display. Wireless Display is a system that sends video and audio files that can be played back on a laptop that supports Intel WiDi. It can be used only for Live TV and external inputs (Composite/Component/RGB/HDMI). Other than these inputs, your computer can't detect the LG Smart TV.

- 1 Connect your laptop to an Access Point. (It is possible to use this WiDi feature without an Access Point but for the best performance it is recommended to connect to an Access Point).
Next, run the WiDi  program on your laptop.
- 2 After running the WiDi program on your laptop, a list will show all available devices that were detected. From the list, select the device you want and click **Connect**. In the list, select the TV you want and click **Connect**. Enter the 4-digit number shown (a) on the screen (b) and then click **Continue**.

TV Screen

Laptop Screen

- 3 The TV screen will appear on the laptop screen within 10 seconds. The wireless connection will affect the quality of the video displayed on the laptop. If the connection is poor, the intel WiDi connection may be lost or quality of the video may be poor.

* LG TV is not need to register.

* TV sound setting for **Digital Sound Out** is set to **PCM**.

* For more information on Intel WiDi, visit <http://intel.com/go/widi>

* On the **Wi-Fi Screen Share**, WiDi device is not searched. Close the **Wi-Fi Screen Share**, then search Wi-Di.
