- ✎ Only H.264/AVC profile levels 4.1 and lower are supported.
- ✎ Video files that exceed 50 GB (Gigabyte) are not supported for playback. The file size limit is dependent on the encoding environment.
- ✎ The DTS is supported only for playback of USB and HDMI video files [depending on the model].
- ✎ The DTS support may vary depending on your country and model. For more information, refer to 「Quick Guide」 provided with the product.

## SETTINGS ⇒ Customer Support → Software Update

Uses Software Update to check and obtain the latest version. If not updated, certain functions may not work properly.

It is also possible to check manually for available updates.

- **Software Update** : Set it to **On**. If an update is available, a prompt will appear to perform the update.
- **Automatic update mode** : If an update is available, the update automatically starts without prompting.
- **Check Update Version** : Checks the latest update version installed. When a new update is available, the download process can be performed manually.  
[Depending on model]

- ✎ When the update starts, the update progress window appears for a short time and disappears.
- ✎ The latest version can be obtained via digital broadcast signals or internet connections. [Depending on model]
- ✎ Changing the channel while downloading the software via digital broadcast signal interrupts the download process. Returning to the initial channel allows downloading to resume.
- ✎ If software is not updated, certain functions may not work properly.
- ✎ [For Finland/Sweden/Denmark/Norway models.]  
If the software update is performed via the broadcasting signal, you will be prompted to continue the update regardless of whether the **Automatic update mode** is enabled or not.

If the following symptoms occur, recheck the system. It may not be a malfunction.

## ❑ Operational problem

### ☑ Cannot view certain channels.

- Adjust the location or orientation of the antenna.
- Save the desired viewing channels on **Auto Tuning** or **Channel Edit**.

### ☑ After turning on the TV, there is a delay before full images appear.

- This is normal because an image deletion process was inserted to clean up image noises that may occur immediately after the power is turned on.

## ❏ Image problem

SETTINGS ⇒ Customer Support → Picture Test

Conducts Picture Test first to verify that image signal output is normal.

When the test image is normal, check connected external devices or broadcast signal.

- ☑ Images from the previously viewed channel or other channels linger or the screen shows annoying lines.
  - Adjust the antenna to the direction of the TV station or refer to the manual for proper way to connect the antenna.

- ☑ Vibrating horizontal/vertical lines and fishnet patterns appear momentarily.
  - Such a problem may happen when there is strong electronic interference. Turn off other electronic devices such as mobile phones, power tools and other small electrical appliances.
  
- ☑ The screen display freezes or does not work properly during digital broadcast.
  - It may happen when the signals are weak or the reception is unstable. Adjust the antenna's orientation or cable connections.
  - If the signal strength or quality is low on **Manual Tuning**, contact the TV station or administration office for checkup.

- ☑ Digital broadcast cannot be seen though the cable is connected.
  - Verify subscription and/or signal with cable operator.  
(Depending on the subscription, digital broadcasting may not be supported.)
- ☑ Display is not on or unclear when connected to HDMI.
  - Check the HDMI® cable specifications. Failure to use a genuine HDMI® cable may cause images to fade in and out or not be displayed properly.
  - Verify that all cable connections are securely connected. When connections are not secure, images may not be properly displayed.
- ☑ Does not work when connected to USB storage device.
  - Verify that the USB device and cable is version 2.0 or higher.

## ❏ Sound problem

SETTINGS ⇒ Customer Support → Sound Test

Try Sound Test to verify that sound signal output is normal.

When the test sound is normal, check connected external devices or broadcast signal.

☑ Screen display is on but no sound.

- Check other TV channels.
- [Depending on model] Make sure the TV Speaker is set to On.

- ✓ For analog broadcast, stereo is not clear or sound comes from one speaker only.
  - In a poor reception area (areas with weak or unstable signal) or if multi audio is unstable, select **Mono** on **Multi Audio**.
  - Adjust the **Balance** with the Navigation Button.
- ✓ TV sound is not in sync with the lips or the sound breaks up occasionally.
  - If it occurs only with a certain TV channel, that station's broadcast signal may have a problem. Check with the TV station or your cable operator.

- ☑ Each channel's volume is different.
  - Depending on the channel, there can be differences in volume.
  - Please set **Auto Volume** to **On**.
  
- ☑ On certain channels, sound does not come out or only the background music plays. (If it is a program created for overseas viewers)
  - On Language, set **Language** → **Audio Language** to the desired language. Changes to the language on **Multi Audio** may returned to the default setup by turning off the power or changing the channel.

- ☑ There is no sound when connected to HDMI/USB.
  - Verify that the HDMI® cable is high speed.
  - Check that the USB device and cable is version 2.0 or higher.
  - Use only regular music (\*.mp3) files.

## ❑ PC connection problem (Only for models supporting PC connection)

- ☑ The screen display is not on after connecting to the computer.
  - Check that the computer and TV are securely connected.
  - Check if the resolution is correctly set for PC input.
  - To use the TV as a secondary monitor, check that the connected desktop or laptop supports dual monitor displays.
- ☑ There is no sound after connecting the computer with the HDMI cable.
  - Check with the video card manufacturer to ensure it supports HDMI voice output. (Video cards manufactured in DVI format require connection of a separate sound cable.)

- ☑ When connected to the computer, the display is partially cut off or shifts to one side.
  - Set up the resolution supporting PC input.  
(If it does not work, reboot the computer.)

## ❏ Problem with replaying movies in My Media

- ✓ I cannot view the files on the Movie List.
  - Check if the file on the USB storage device can be read on a computer.
  - Check that the file extension is supported.
- ✓ This is not a file that is supported. The above error message appears. Sound, video or subtitles is not normal.
  - Make sure that the file replays normally on the video player in the computer. (Check for damaged files.)
  - Check if My Media can support selected file.
- ✎ For information on requesting service, refer to the TV's menu.

## ❑ Federal Communications Commission (FCC) Statement

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1 this device may not cause harmful interference, and
- 2 this device must accept any interference received, including interference that may cause undesired operation of the device.

## Indoor use only

FCC Caution: for indoor use only, use outdoors or in other modes not covered by this manual may violate the FCC regulation and violate the user authority to use the product.

## ❑ LG Recycling Policy

LG Electronics offers a customized e-waste take-back & recycling service that meets local needs and requirements in the countries where e-waste regulations are in place, and also provides product and packaging take-back & recycling service voluntarily in some countries. LG Electronics evaluates products' recyclability at the design step using LG's recyclability evaluation tool, with the goal of improving recyclability where practicable. Through these activities, LG seeks to contribute to conserving natural resources and protecting the environment.
