Exploring the Product

| Charging Case

- (A) Earbuds charging terminals: You can charge the earbuds by inserting them into the charging case.
- (B) Case charging port: You can connect the USB Type-C™ Charging cable to a suitable USB power source, then connect to the case charging port to charge the case.
- (C) Battery status indicator: You can check the battery status of the earbuds or charging case.

✔ Note

- USB Type-C™ Charging cable is not provided with the product.
-

| Earbuds

- (A) Ear hooks
- (B) Speaker mesh (microphone)
- (C) Touch pad
- (D) Microphone
- (E) Earbuds charging terminals

✔ Note

- Be careful that foreign substances are not over the Earbuds charging terminals.
-

Connecting with Bluetooth

Connecting the Earbuds to a Smartphone via Bluetooth

- 1 Turn on the Bluetooth® function of your smartphone or a device you want to connect.
- 2 Open the cover with earbuds attached to the charging case. The blue battery status indicator on the front blinks. If the blue battery status indicator does not blink, or if you want to connect a device other than the one already connected, touch and hold the touch pad of the left or right earbud for 3 - 5 seconds.

- 3 When the Fast Pair connection pop-up appears at the bottom of the smartphone screen, touch the pop-up to connect.
 - Only Android™ 6.0 or higher is supported, and Bluetooth® and location information settings of the mobile device are required.
- 4 If the connection pop-up does not show up, select and connect [xboom Buds] in the Bluetooth® menu of the smartphone. (For users of iOS or Android 5.0 or lower)
 - If the earbuds model name is displayed abnormally on the Android device, please change the model name in the Bluetooth® menu of the settings of the connected device.
 - The model name is BUDS, but when connected via Bluetooth, it is displayed as the representative model name xboom Buds on smartphones and apps.

✓ Note

- To connect with another device, perform the above procedures again.
-

| Multiple Connections

If you use the LG xboom Buds app, you can connect and use two devices, such as a smartphone and a PC at the same time.

- ❶ Please activate Multi-Point & Multi-Pairing on the LG xboom Buds app.
- ❷ Put the earbuds in the charging case and perform the connecting procedures in the same way.
- ❸ You can use the multi-connection function more conveniently in the detailed Multi-Point & Multi-Pairing settings.

✔ Note

- In some media players, the sound may not switch automatically when content is played.
 - If you want to connect a new device while two devices are connected, you can do so by disconnecting one device and then connecting it.
-

| Automatic Reconnection

If you open the charging case of the earbuds, they are automatically connected to the last connected and used device. (If the device cannot be found, it changes to the connectable mode.)

If automatic reconnection is not done, search for earbuds on the device to be connected and connect them manually.

Listening to Sound with Earbuds

| Wearing Earbuds

- 1 Remove the earbuds from the charging case by pushing the inside of the earbuds outward, and then insert them in your ears for a firm fit.

✓ Note

- If you use an ear gel sized to fit your ears, you can improve performance of active noise cancellation (ANC). You can then listen to music with rich sound quality.
-

- 2 If you wear earbuds properly, you can hear a notification detection sound.

* To replace the ear gel, align the hole shape of the ear gel with the protrusion of the earbuds and fasten it.

Replacing the Ear hooks

Replacing the Large Size Ear Hooks

- 1** Grasp the end of the wing of the ear hooks from the earbuds and separate it.

- 2** Insert the earbuds with the wide part of the ear hooks facing forward. Hold the wing of the ear hooks and turn it little by little to align the hole of the ear hooks with the protrusion of the earbuds.

Replacing the Small Size Ear Hook

- 1 Use your fingernail to gently apply pressure to separate the ear hooks from the earbuds.

- 2 Insert the earbuds with the wide part of the ear hooks facing forward. Turn the ear hooks slightly with your finger to align the hole in the ear hooks with the protrusion on the earbuds.

* Check the L (left) or R (right) marks on the Ear hooks and Earbuds, then replace the Ear hooks with the Ear hooks in the same direction as the Earbuds.

* Be careful as it may be damaged if you pull on the ear hooks with too much force.

| Listening to Music

How to Use	Function
 : Touch once	Play/Stop
 : Touch twice	Volume Down (Touch the left) Volume Up (Touch the right)
 : Touch three times	Play the previous song (Touch the left) Play the next song (Touch the right)

✔ Note

- You can change how to use the listen to music in the Touch function settings of the LG xboom Buds app.

Receiving Phone Call

How to Use	Function
 : Touch once	Answer Call
 : Touch twice	End Call
 : Touch and hold	Reject call

✓ Note

- When you make a call from your smartphone, the call is automatically connected to the headset.
- If you touch the left or right earbud once, the current phone call is switched to the standby status and you can receive an incoming call during a call. If an existing call is on hold, you can end the current call on your smartphone. (This operates differently depending on the smartphone settings.)

Listening to Ambient Sound/Active Noise Cancellation (ANC)

Listening to ambient sound

When the listening to ambient sound function turned on allows you to control the amount of sound you can hear around you.

Active noise cancellation (ANC)

The active noise cancellation (ANC) function blocks external sounds during use. Therefore, use it when you do not want to be disturbed while listening to music or watching a video.

How to Use	Function
 : Touch and hold	Change the functions between active noise cancellation (ANC) and listening to ambient sound.

- You can set listening to ambient sound or active noise cancellation (ANC) functions in the LG xboom Buds app.
- You can set listening mode and conversation mode in the LG xboom Buds app.
- When using listening to ambient sound function or active noise cancellation (ANC) function, the battery life will be shorter than when these functions are not active.
- The listening to ambient sound or active noise cancellation (ANC) function operates when you are in standby/listening to music/during a call.
- The listening to ambient sound or active noise cancellation (ANC) function require both earbuds to be worn to work.
 - ANC stands for active noise cancellation.

Caution

- When the ambient sound mode is executed, you may hear a loud ambient sound suddenly. Pay attention to safety when using active noise cancellation (ANC) outdoors.

Charging

| Charging by cable

If you connect the USB Type-C™ Charging cable the charging status shows up on the charging case.

✔ Note

- The earbuds and charging case are charged at the same time.
 - The Case charging port of the charging case does not support the power supply function to other devices such as smartphone.
 - USB Type-C™ Charging cable is not provided with the product.
-

Checking Battery Status

If you open the charging case, the battery status of the earbuds is displayed.
When the earbuds are not attached, the battery status of the charging case is displayed.

Battery status indicator	Battery level state (charger not connected)
Red	Less than 20 %
Yellow	20 % ~ 80 %
Green	Over 80 %

Battery status indicator	Charging status (charger connected)
Red	Charging
Green	Fully charged

✔ Note

- If you close the charging case, the battery status of the charging case is displayed.
- When the battery in the charging case is completely consumed, the earbuds cannot be turned on or off. Please charge the charging case.

Battery status indicator

Status	Operation
Bluetooth® search mode	The blue battery status indicator blinks.
Battery 20% or less	The red battery status indicator turns on and off.
Battery 20% ~ 80%	The yellow battery status indicator turns on and off.
Battery 80% or higher	The green battery status indicator turns on and off.
When a charging error occurs	The red battery status indicator blinks.
While battery is charged (charger connected)	The red battery status indicator turns on.
Battery charging completed (charger connected)	The green battery status indicator turns on.

Connecting to the Bluetooth App

| Connecting the LG xboom Buds App

- 1** Search for "LG xboom Buds" on Google Play Store or App Store on your smartphone or scan the QR code below to install the LG xboom Buds app.
- 2** Run the app to use various functions [Battery Status, Voice Alert Settings (Android only), Sound Effect, and Find my earbuds function, etc.] Only Android 7.0 or iOS 13 or higher is supported.

<Android>

<iOS>

Listening to an Auracast™ broadcast

You can listen to broadcasts that are in progress around you in the Auracast™ broadcast feature in the LG xboom Buds app.

- 1 Run the LG xboom Buds app and select listen to Auracast™ broadcast.
- 2 Select the Auracast™ broadcast you want to listen to from the searched list.
- 3 Once the Auracast™ broadcast is connected, you can listen to the broadcast through the earbuds.

Function	Description
Currently playing	This is the broadcast you are currently listening to. • Stop Listening: Select to stop listening to the broadcast. • Listen again: Select to listen to the broadcast again.
Listening to another broadcast	In addition to the broadcast you are currently listening to, broadcasts that can be heard around you will appear in the list. • Search: Press the button to search for broadcasts that can be heard around you. • Lock symbol: Appears when a password is required.

✔ Note

- If a password is required, the Input password window will appear.
- If you play music or perform additional operations on a connected device while listening to Auracast™ broadcast, the Auracast™ connection may be disconnected.
- Depending on the device (smartphone, TV, etc.) that supports Auracast™ broadcasting, the sound may be out of sync.
- The degree of out of sync may vary depending on the device that supports Auracast™ broadcasting.
- For detailed instructions, please refer to the user manual of the device (smartphone, TV, etc.) that supports Auracast™ broadcasting.

| Connecting LG Gram and Earbuds

- ❶ Open the cover with earbuds attached to the charging case.
- ❷ The blue battery status indicator on the front blinks.
 - If the blue battery status indicator does not blink touch and hold the touch pad of the left or right earbud for 3 - 5 seconds.
- ❸ When the connection pop-up appears on the PC screen, click the pop-up to connect.
- ❹ Once the connection is complete, the LG xboom Buds app will launch.
- ❺ Use various functions such as checking the Battery Status, Control ambient sound and ANC, and Sound Effects through the LG xboom Buds app.

✔ **Note**

- The LG xboom Buds app is available for LG Gram Pro, LG Gram Pro 360, and LG Gram released after 2025.
 - For some models released in 2025, it will be provided sequentially through future updates.
-

Cleaning Guide

| How to clean your ear gel

Make sure to clean the ear gel periodically to keep it clean!

If the ear gel is clogged, the sound may be reduced or the ANC performance may be reduced!

Earbuds

(A) Speaker mesh

Ear gel

- 1 Separate the ear gel from the earbuds.
- 2 Remove contaminants (earwax, sebum, etc.) from the ear gel.

* Foreign substances can be easily removed by washing in lukewarm water, and reuse after removing the water.

- 3 Reassemble the ear gel with the earbuds.

Safety Precautions

| Safety Notices and Warnings

The following “Safety Precautions” are to prevent unexpected dangers or damages, so be sure to read them thoroughly.

‘Safety Precautions’ are divided into ‘Warning’ and ‘Caution’.

⚠ WARNING: Failure to follow the instructions may result in serious injury or death.

⚠ Caution: Failure to follow the instructions may result in minor injury or product damage.

⚠ Warning

- Do not drop the product from a high place.
 - Make sure there is no alcohol, or benzene in contact with the product.
 - Do not store the product in a wet or dusty place.
 - Do not place heavy objects on the product.
 - Earbuds tested under controlled laboratory conditions with an IPX4 rating. Resistant to splashed water. Dry before using. Do not charge while wet. Case has not been tested for IPX4.
-

⚠ Caution

- Do not disassemble, adjust, or repair the product.
 - Do not place the product near excessive heat or flammable material.
 - The product may be damaged if an incompatible charger is used.
 - Keep small components of the product away from infants or children.
 - Make sure that foreign objects do not enter the charger's connectors (Case charging port and power plug). Foreign objects in the charger's connectors may result in fire or electric shock.
 - If you have a medical device implanted, contact your doctor before using this device.
 - For your safety, do not remove the battery incorporated in the product.
 - This product has a built-in battery, and the battery cannot be removed or replaced.
 - If you arbitrarily replace the battery or don't replace it correctly, it may explode.
 - The lithium-ion battery is a hazardous component that can cause injury.
 - Battery replacement by an unqualified professional can cause damage to your device.
 - Do not discard the battery arbitrarily. Follow the local procedure for discarding batteries.
 - In order to prevent unnecessary energy consumption, disconnect the device when fully charged. Always use an easily accessible power outlet for charging your device.
 - Risk of fire or explosion if the battery is replaced by an incorrect type.
 - Do not store or transport at pressures lower than 11.6 kPa and at above 15,000 m altitude.
 - Replacement of a battery with an incorrect type that can defeat a safeguard (for example, in the case of some lithium battery types).
 - Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, may result in an explosion.
 - Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.
 - A battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas.
 - Do not carelessly throw away old batteries. It can cause an explosion or fire. The disposal method may vary by country and region. Dispose of it in an appropriate manner.
-

| Precautions when Using the Product

Wipe the product clean if it has been exposed to a lot of sweat.

Keep the area around the earphones clean.

If you wear earphones for a long time, it may cause pain, and if the moisture in the ears remains long, it may cause skin trouble.

| Prevention of product misuse

To prevent misuse of the product, please be sure to check the contents below.

Precautions for using the product

- You cannot charge external devices with the USB port.
- When moving the product, pull out the power cord and all cables connected to the product.
 - Otherwise, it may cause a fire or electric shock.
- Do not open or close the cover of the charging case with excessive force.
- Do not mount the earbuds on the charging case with the left and right sides reversed.
 - If you mount the earbuds reversed and close the cover of the charging case forcefully, it may result in a product breakdown.
- Make sure that water or any other liquid does not get into the charging case.
 - If liquid gets into the charging case, it may cause a breakdown.
- Be careful not to insert or touch foreign substances into the charging port.

Things to Check before Reporting Malfunction

| Troubleshooting

If you experience the following symptoms while using the product, please check them again. They may not be malfunctions.

Symptom	Cause and Solution
If the power does not turn on	• Check the battery level and charge it.
If a call cannot be made with the earbuds	• If your smartphone does not support the hands-free function, you cannot use the call function. • Check the battery level and charge it.
If you cannot register the earbuds into the smartphone	• Check whether power is turned on by opening the cover of the charging case. • Check that the earbuds are switched to search mode. - If you touch and hold the touchpad on the left or right side of the earbuds for 3 to 5 seconds with the earbuds in the charging case, it is switched to search mode.
If you have replaced the earbuds or have problems with operation (factory reset).	• Touch and hold the left or right touchpad of the earbuds for more than 10 seconds with the earbuds in the charging case. - The battery status indicator of the charging case blinks red and the factory reset progresses. Please reconnect the earbuds after factory reset.

Appendix

| Product Specifications

General	Description
Bluetooth Specifications	V 5.4 (HFP/A2DP/AVRCP)
Battery	Earbud: 3.85 V / 70 mAh, Lithium-ion Charging case: 3.85 V / 475 mAh, Lithium-ion
Music Play Time Earbuds & With Charging case	ANC Off: Up to 10 & Up to 30 hours* ANC On: Up to 7.5 & Up to 24 hours*
Charging time	Earbud: within an hour Charging case: within 2 hours 30 minutes* Fast Charging: 5 min charge for up to 60 min playtime* • When charging wired at room temperature
Rated Input Voltage	Earbud: 5 V  , 140 mA Charging case: 5 V  , 500 mA

*The use time may vary depending on the connected smartphone or use functions, settings, signal strength, operation temperature, using frequency band, and other use methods.

Operating Temperature	0 °C ~ +40 °C
Operating Humidity	5 % ~ 60 %
Dimensions (mm)	• Earbud: 25.3 mm (W) X 20.8 mm (L) X 23.9 mm (H) • Charging case: 63.0 mm (W) X 32.8 mm (L) X 31.2 mm (H)
Frequency range	2402 MHz to 2480 MHz

*Duration of use and charging time may vary depending on the connected mobile device or charging adapter, features being used, settings, signal strength, operating temperature, frequency band, and other methods of use.

Safety Information

| Prevention of Hearing Loss

If the volume of the headset is too high, you can experience permanent hearing loss. Set the volume to a safe level. It may sound normal, but if you often listen to high-pitch sounds that can damage your hearing, your ears get used to it over time.

If you feel ringing in your ears or hear faint voice, stop listening and get a hearing test. The louder the volume, the faster your hearing can be damaged.

Experts suggest you to do the followings to protect your hearing.

- Limit the time for using the headset with the high volume.
- Avoid the habit to turn up the volume not to hear loud noises around you.
- If you cannot hear people nearby, turn the volume down.

For how to set the maximum volume limit of the connection device, refer to the user manual provided with the connection device.

| Radio frequency exposure

This Bluetooth LG Stereo Headset is a radio transmitter and receiver. When in operation, it communicates with a Bluetooth-equipped mobile device by receiving and transmitting radio frequency (RF) electromagnetic fields (microwaves) in the frequency range 2402 to 2480 MHz.

Bluetooth connection precautions

The following environments affect the range and reception of Bluetooth signals:

- When walls, metal, human bodies, or other obstacles exist between the Bluetooth device and the connected device.
- When equipment that uses 2.4 GHz frequency signals (wireless LANs, wireless phones, microwave ovens, etc.) is placed near the devices being used.
- When using a Bluetooth device (TV, laptop, etc.) other than the mobile phone, the sound quality may be affected by the specifications and performance of the device.

Battery Information

A rechargeable battery has a long service life if treated properly. A new battery or one that has not been used for a long period of time could have reduced capacity the first few times it is used. Do not expose the battery to extreme temperatures, never above +50 °C or below -10 °C. For maximum battery capacity, use the battery at room temperature. If the battery is used in low temperatures, the battery capacity will be reduced. The battery can only be charged in temperatures between 0 °C and +45 °C.

[For coin battery application]

WARNING

- **INGESTION HAZARD:** This product contains a button cell or coin battery.
- **DEATH** or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause **Internal Chemical Burns** in as little as **2 hours**.
- **KEEP** new and used batteries **OUT OF REACH of CHILDREN**
- **Seek immediate medical attention** if a battery is suspected to be swallowed or inserted inside any part of the body.

- Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate.
- Even used batteries may cause severe injury or death.
- Call a local poison control center for treatment information.
- The compatible battery type is only SP1254
- The nominal battery voltage is 3.85 V
- Non-rechargeable batteries are not to be recharged.
- Do not force discharge, recharge, disassemble, heat above (manufacturer's specified temperature rating) or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.
- The product contains non-replaceable batteries.
